30-64-0009

SYSTEM NAME:

Examiner, Training and Education Records—FDIC.

SYSTEM LOCATION:

Division of Bank Supervision Training Center, FDIC, 1701 N. Fort Myer Drive, Arlington, Virginia 22209.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FDIC assistant examiners who have been candidates for determination of progress to become a commissioned bank examiner (progress evaluation candidates). FDIC examiners who attend, or have attended, graduate schools of banking (graduate school of banking students).

CATEGORIES OF RECORDS IN THE SYSTEM:

Progress Evaluation Candidates—contains a statement of the candidate's education, home address, date and place of birth, and experience, a report of evaluation of a progress evaluation panel, the consolidated findings of each progress evaluation panel member, the candidate's case studies, basic work papers, and responses, and, in the case of an unsuccessful candidate, the candidate's complete work papers and reponses, as well as the individual findings of each progress evaluation panel member.

Graduate school of banking students—contains the student's name, enrollment data, record of attendance, record of completion or graduation and general correspondence between the FDIC and the student's school of enrollment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sec. 10(b) of the Federal Deposit Insurance Act (12 U.S.C. 1820(b)).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclosure may be made to: (1) The United States Office of Personnel Management, the Merit Systems Protection Board, the Office of Special Counsel, the Federal Labor Relations Authority, an arbitrator, and the Equal Employment Opportunity Commission, to the extent disclosure is necessary to carry out the government-wide personnel management, investigatory, adjudicatory and appellate functions within their respective jurisdictions; (2) to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual; (3) to educational institutions for purposes of enrollment and verification of employee attendance and performance; and (4) to vendors, carriers, or other appropriate third parties, by the FDIC Office of Corporate Audits, for the purpose of verification, confirmation, or substantiation during the performance of audits or investigations.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

Maintained in lockable metal file cabinets.

RETENTION AND DISPOSAL:

Progress evaluation candidates' records maintained for two years for the successful candidate and then destroyed by shredder, records of unsuccessful candidate retained until the candidate's successful completion or until the candidate leaves the FDIC's employ. Graduate school of banking student records are permanently retained.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

NOTIFICATION PROCEDURE:

Executive Secretary, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

RECORD ACCESS PROCEDURES:

Same as "Notification" above.

CONTESTING RECORD PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

Progress evaluation candidates—the candidate, the candidate's personnel record, and members of the candidate's progress evaluation panel. Graduate school of banking students—the student, the student's school, and the student's personnel record.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to § 310.13(c) of the FDIC's rules and regulations, testing material used solely to assess individual qualifications for appointment or promotion, the disclosure of which would compromise the objectivity or fairness of the testing, evaluation or examination process, may be withheld from disclosure.

SYSTEM NAME:

Legal Compliance and Enforcement Records—FDIC.

SYSTEM LOCATION:

Office of the General Counsel, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Directors, trustees, officers, or other persons participating in the conduct of the affairs of an FDIC-insured bank which is not a member of the Federal Reserve System ("an FDIC-insured nonmember bank") who have been the subject of an indictment, information or complaint for a felony involving dishonesty or breach of trust. Directors, trustees, officers or other persons participating in the conduct of the affairs of an FDIC-insured nonmember bank who are suspected of committing violations of law, rule or regulation, or of a final cease-and-desist order, or of committing acts, omissions or practices constituting a breach of fiduciary duty.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains the indictment, information, or complaint filed against the subject individual, and any court order or resolution of such indictment, information, or complaint. Contains newspaper clippings on subject individuals. Contains affidavits of the subject individual and bank employees. Contains intra-agency memoranda and general correspondence between the FDIC and the subject individual and/or his/her attorney. Contains final administrative orders issued by the FDIC.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sec. 8 of the Federal Deposit Insurance Act (12 U.S.C. 1818).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) In the event that the system of records indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system may be referred to the appropriate agency, whether Federal or State, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issed pursuant thereto.

(2) In the event of civil, criminal or administrative proceedings, the relevant records may be disclosed to the appropriate court, magistrate, or administrative tribunal as evidence, or to counsel for the presentation of evidence and/or in the course of discovery.

(3) Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM.

STORAGE:

Maintained in file folders and on computer discs.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

Maintained in lockable metal file cabinets in a secured room; computer discs are accessed only by authorized personnel.

RETENTION AND DISPOSAL:

Permanent retention.

SYSTEM MANAGER(S) AND ADDRESS:

General Counsel, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

NOTIFICATION PROCEDURE:

Executive Secretary, FDIC, 550 17th Street, NW., Washington, D.C. 20429. Inquirers must provide their full name, the name of the bank with which they

were associated, and a notarized statement attesting to their identify.

RECORD ACCESS PROCEDURES:

Same as "Notification" above.

CONTESTING RECORD PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

Information is obtained from the individual on whom the record is maintained, the employer of the individual, newspaper articles, and individuals interviewed during the investigation. Federal and State prosecuting authorities and Federal and State financial institution supervisory authorities are also sources of information.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to § 310.13(a) of the FDIC's Rules and Regulations, investigatory material compiled as a part of this system for law enforcement purposes is exempted from the accounting provisions of § 310.10(d)(2) of the FDIC's Rules and Regulations and may be withheld from disclosure.

30-64-0012

SYSTEM NAME:

Financial Information System—FDIC.

SYSTEM LOCATION:

Fiscal and Facilities Management Branch, Division of Accounting and Corporate Services, FDIC, 550 17th Street, NW., Washington, D.C. 20429, and the appropriate FDIC regional offices. (See Appendix A for the location of FDIC regional offices.) Information pertaining to State or Federal tax liens bankruptices, attachments, and wage garnishments also is maintained in the Legal Division, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM: ALL CURRENT AND FORMER FDIC EMPLOYEES, AND ALL INDIVIDUALS PROVIDING GOODS AND/OR SERVICES TO THE FDIC UNDER CONTRACTUAL ARRANGEMENTS.

CATEGORIES OF RECORDS IN THE SYSTEM:

Consists of the following information on all FDIC employees: Mailing addresses and home addresses; rate and amount of pay; hours worked; leave accrued and leave balances; life insurance, health insurance, and retirement deductions; tax exemptions; and payroll deduction authorizations (including, where applicable, deductions for savings bonds, States or Federal tax liens, bankruptcies, attachments and wage garnishments which have been legally executed by the appropriate taxing or judicial authority). Record relating to employee claims for reimbursement of official travel expenses, including travel authorizations, advances, and vouchers showing amounts claimed, exceptions taken as a result of audit, advance balances applied, and amounts paid. Other records maintained on employees, where applicable, include records relating to claims for reimbursement for relocation expense including authorization, advances, vouchers showing amounts claimed and amounts paid; records pertaining to reimbursement for educational expense or professional membership dues; records relating to incentive award payments; and records relating to advances or other funds owed to the Corporation. Records on individuals who are not employees of the FDIC consist of all documents relating to the purchase of goods and/or services from those individuals including contractual documents and amounts paid.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 9 and 10(a) of the Federal Deposit Insurance Act (12 U.S.C. 1819 and 1820(a)); Exec. Order No. 9397, "Numbering System for Federal Accounts Relatiing to Individual Persons" (November 22, 1943); Travel Expense Act of 1949 (5 U.S.C. 5701–5709).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Records are periodically made available for inspection to auditors employed by the General Accounting Office.

(2) In the event that information contained in this system of records indicates a violation or potential violation of the law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may referred, as a routine use, to the appropriate agency, whether Federal or State, charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

(3) In the event of litigation, the records may be presented to the appropriate court, magistrate, or administrative tribunal as evidence or to counsel for the presentation of evidence and/or in the course of discovery.

(4) Disclosure may be made to the United States Office of Personnel Management, the Merit Systems Protection Board, the Office of Special Counsel, the Federal Labor Relations Authority, an arbitrator, and the Equal Employment Opportunity Commission, to the extent disclosure is necessary to carry out the government-wide personnel management, investigatory, adjudicatory and appellate functions within their respective jurisdictions.

(5) Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

(6) Disclosure may be made to the United States Treasury Department for preparations of savings bonds.

(7) Information developed form these records in routinely provided to State, City and Federal income tax authorities, including, at the Federal level, the Internal Revenue Service and the Social Security Administration, and to other recipients, as authorized by the employee, including the United States Treasury Department, savings institutions, insurance carriers, and charity funds.

(8) Disclosure may be made by the FDIC Office of Corporate Audits to vendors, carriers, or other appropriate third parties for the purpose of verification, confirmation, or substantiation during the performance of audits or investigations.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM.

STORAGE:

File folders, record cards, and computer discs.

RETRIEVABILITY:

File folders and record cards are indexed by name; computer discs are indexed by social security number or specialized identifying number.

SAFEGUARDS:

File folders and record cards are stored in lockable metal file cabinets; computer discs are accessed only by authorized personnel.

RETENTION AND DISPOSAL:

Financial payment, payroll deduction, and official travel expense and reimbursement records are retained by the FDIC for three years and then transferred to the Federal Records center or destroyed. Year-end trial balances (the individual earnings record) are retained during employment and then transferred to the Federal Records Center and maintained indefinitely. Deduction authorizations and documents used to develop payroll and employee financial records are

retained for the period of use and up to three additional years, after which they are destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Accounting and Corporate Services, FDIC, 550 17th Street, NW., Washington, D.C. 20429. The appropriate FDIC regional director for records maintained in FDIC regional offices. (See Appendix A for the location of FDIC Regional Offices.) General Counsel, FDIC, 550 17th Street, NW., Washington, D.C. 20429, for records maintained by the Legal Division.

NOTIFICATION PROCEDURE:

Executive Secretary, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

RECORDS ACCESS PROCEDURES:

Same as "Notification" above.

CONTESTING RECORDS PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

The information is obtained from the employee or person on whom the record is maintained. Where an employee is subject to a tax lien, a bankruptcy, an attachment, or a wage garnishment, information also is obtained from the appropriate taxing or judicial entity.

30-64-0015

SYSTEM NAME:

Unofficial Personnel System—FDIC.

SYSTEM LOCATION:

Office of Personnel Management, FDIC, 550 17th Street, NW., Washington, D.C. 20429. In addition, records are maintained at the division or office levels in the FDIC Washington office, at the FDIC regional offices, and may be maintained at FDIC field offices. (See Appendix A for the location of FDIC regional offices; a list of the field offices may be obtained from the Director, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429.)

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All current and former FDIC employees and applicants to and graduates of the FDIC upward mobility program.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of personnel-related records that are maintained in addition to those kept in the official personnel folder pursuant to the Federal Personnel Manual Suppl. 296-31, table 8, sec. 1. (The United States Office of Personnel Management has Privacy Act responsibility for those systems of records which are government-wide in nature and it requires agencies to maintain them. Included among these is the Official Personnel Folder. While OPM has designated the FDIC as being responsibile for disclosing to its current employees the contents of their Official Personnel Folder, notice of the existence and character of this system is published by the United States Office of Personnel Management as "General Personnel Records," OPM/GOVT-1.) This system contains records of various types. They are: (1) Records maintained in the Washington, regional, and field offices which may contain information on individuals relating to: Birth date; social security number; past and present salaries, grades, and position titles; home address and telephone number, emergency contacts, addresses and telephone numbers; employment and education experience, original applications, resumes, and letters of reference; statement of bank loans and stock ownership; record of equipment and material issued to the individual; record of leave and time-and-attendance; performance appraisals; written notes or memoranda on employee performance; counseling; employee assignments; lists of banks examined; records relating to on-the-job training; data documenting reasons for personnel actions, decisions, or recommendations made about an employee; disciplinary and adverse action backup material; claims for benefits under the Civil Service Retirement System; Federal Employees' Group Life Insurance; FDIC Employees' Group Life Insurance; documents related to on-the-job injuries; (2) parking permit records containing information (name, address, and type of automobile) about FDIC employees who have applied for (or are members of the applicants' carpool) a parking permit in the FDIC's Washington office garage; (3) FDIC personnel awards including information supporting the employees nomination for one of these awards; (4) dental insurance records including information on earnings, number and name of dependents, sex, birth date, home address, and social security number; (5) employee locator records containing the employee's name, social security number, division or office assignment, office telephone number and office room number; and (6) upward mobility program files coordinated by the FDIC Office of Personnel Management.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sec. 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819); sec. 506 of the Federal Records Act of 1950 (44 U.S.C. 3101). For category (6), sec. 717 of the Equal Employment Opportunity Act (42 U.S.C. 2000e-16).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

With regard to category (1) above, the records are primarily maintained to be used by the employee's supervisor for preparation of general personnel action; however, in the case of categories (1), (2), (3) and (6), disclosures may be made, where relevant:

(a) To financial and credit institutions for loan and credit reference purposes (solely to verify the employee's employment with the FDIC, date of employment, and pay grade);

(b) [Reserved];

(c) To the United States Office of Personnel Management, the Merit Systems Protection Board, the Office of Special Counsel, the Federal Labor Relations Authority, an arbitrator, and the Equal Employment Opportunity Commission, to the extent disclosure is necessary to carry out the government-wide personnel management, investigatory, adjudicatory and appellate functions within their respective jurisdiction;

(d) In the event of litigation, to the appropriate court, magistrate, or administrative tribunal as evidence, or to counsel for the presentation of evidence and/or in the course of discovery;

(e) To a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual;

(f) To State authorities regarding reasons for a former employee's separation from FDIC service, where the inquiry is made pursuant to the former employee's application for unemployment compensation;

(g) To Federal and State regulatory agencies, for reasons related to FDIC business, as to the temporary work location of FDIC bank examiners.

Disclosure may be made, in the case of category (4) above, to the dental insurance carrier in support of a claim for dental insurance benefits. In category (5) above, except for the employee's Social Security Number, all information in the record is available to

the public. In category (6) above, disclosure may be made to appropriate FDIC managers, supervisors and Office of Personnel Management individuals who are involved in the assessment, evaluation and selection of an applicant for upward mobility training and/or in the monitoring and evaluation of the upward mobility participant during the training period. In categories (1), (2), and (4) above, disclosure may be made by the FDIC Office of Corporate Audits to vendors, carriers, or other appropriate third parties for the purpose of verification, confirmation, or substantiation during the performance of audits or investigations.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on index cards and in file folders. Category (5) is maintained on computer discs, category (6) in file folders.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

Maintained in lockable metal file cabinets; computer discs are accessed only by authorized personnel.

RETENTION AND DISPOSAL:

Records are destroyed when no longer relevant to the purpose for which they were compiled and maintained. Generally, records are destroyed when the employee no longer works in the division or office which compiled and maintained the information. Parking permit records are kept for one year and then destroyed. Records of unsuccessful upward mobility candidates are retained for four years after submission; records of successful applicants are maintained until two years after leaving the employ of the FDIC.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Personnel Management, FDIC, 550 17th Street, NW., Washington, D.C. 20429, for Corporation level records. For FDIC division or office levels, the head of the approprite division or office; for FDIC regional offices, the regional director; for FDIC field offices, the field office supervisor. (See Appendix A for the location of FDIC regional offices; a list of the field offices may be obtained from the Director, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429.) For Parking Permit Records and Employee Locator Records, the Director, Division of Accounting and Corporate Services, FDIC, 550 17th Street, NW., Washington, D.C. 20429. For the upward mobility program, Director, Office of Personnel Management, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

NOTIFICATION PROCEDURE:

Executive Secretary, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

RECORD ACCESS PROCEDURES:

Same as "Notification" above.

CONTESTING RECORD PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

Individuals to whom the records pertain; their immediate supervisors or persons at other supervisory levels; other fellow employees. For upward mobility, record source categories would include educational institutions which the applicant has attended.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

30-64-0016

SYSTEM NAME:

Municipal Securities Principals and Representatives System—FDIC.

SYSTEM LOCATION:

Operations Branch, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429. Records stored in computerized files are maintained off premises on a contract basis with the National Association of Securities Dealers, 1735 L Street, NW., Washington, D.C. 20036.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who are or seek to be municipal securities principals or municipal securities representatives associated with municipal securities dealers which are FDIC-insured State-chartered banks, not members of the Federal Reserve System, or are subsidiaries, departments, or divisions of such banks.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records may contain identifying information as well as educational, employment, and disciplinary information, if any, and, where applicable, information regarding termination of employment of individuals covered by the system. Identifying information includes name, addresses, date and place of birth, and may include social security account number.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 15B, 23 and 32(a) of the Securities Exchange Act of 1934, as amended (15 U.S.C. sec. 78).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in these records may be used: (1) To refer, where there is an indication of a violation or potential violation of law, whether civil, criminal, or regulatory in nature, to the appropriate governmental authority, whether Federal, State, local, or foreign, or a self-regulatory organization, as defined in section 3(a)(26) of the Securities Exchange Act of 1934 (15 U.S.C. sec. 78c(a)(26)); (2) to refer, in the event of litigation, whether civil, criminal, or regulatory in nature, to the appropriate court, magistrate, or administrative law judge as evidence, or to counsel for the presentation of evidence and/or in the course of discovery; (3) to assist in any proceeding in which the Federal securities or banking laws are in issue or a proceeding involving the propriety of a disclosure of information contained in the information, in which the FDIC or one of its past or present employees is a party; (4) to disclose to a Federal, State, local, or foreign governmental authority or a self-regulatory organization if necessary in order to obtain information relevant to a Federal Deposit Insurance Corporation inquiry concerning a person who is or seeks to be associated with a municipal securities dealer (as such a dealer is described in "Categories of individuals covered by the system" above) as a municipal securities principal or representative; (5) to respond to a request from a Federal, State, local, or foreign government authority or a self-regulatory organization for information in connection with the issuance of a license or other benefit to the extent that such information is relevant and necessary; (6) to disclose to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual; (7) to disclose to a registered dealer, a registered broker or a registered municipal securities dealer that is a past or present employer of an individual that is the subject of a record, or to which such individual has applied for employment, for purposes of identity verification or for purposes of investigating the qualifications of the subject individual.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM.

STORAGE:

Maintained in file folders and on computer discs.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

File folders are stored in lockable metal file cabinets; computer discs are accessed only by authorized personnel.

RETENTION AND DISPOSAL:

Permanent retention with periodic review of contents of record and destruction of excess and dated information.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

NOTIFICATION PROCEDURE:

Executive Secretary, FDIC, 550 17th Street, NW., Washington, D.C. 20429. Inquirers must provide their full name and the date and place of their birth, and may be required to include a notorized statement attesting to identity.

RECORD ACCESS PROCEDURES:

Same as "Notification" above.

CONTESTING RECORD PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

Individuals on whom the records are maintained, as well as municipal securities dealers (as such dealers are described in "Categories of individuals covered by the system" above), and Federal, State, local, and foreign governmental authorities and self-regulatory agencies which regulate the securities industry.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

30-64-0017

SYSTEM NAME:

Medical Records and Emergency Contact Information System—FDIC.

SYSTEM LOCATION:

Health Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All current and former FDIC employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Medical record of the employee, including the date of visit to the FDIC Health Unit, the diagnosis, and the treatment administered; name and telephone number of the person to contact in the event of an emergency involving the employee; American Red Cross donor cards containing the donor's name, blood type, and dates of donations; Standard Form 78 (Certificate of Medical Examination); and Standard Form 177 (Statement of Physical Ability for Light Duty Work).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sec. 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819); sec. 506 of the Federal Records Act of 1950 (44 U.S.C. 3101).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

No disclosure (including intra-agency disclosure) of information contained in the medical files is made without the prior written consent of the employee concerned. In the event of an emergency, the emergency contact would be notified. For American Red Cross donor cards, disclosure of name and blood type is made only to the American Red Cross in response to specific requests for emergency donations to ensure that donor will be accepted immediately on arriving at Blood Center.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM.

STORAGE:

On 8" x 10" cards with a separate emergency contact sheet attached to it. American Red Cross donor cards are stored alphabetically in wooden files in the Health Unit.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

Maintained in lockable metal file cabinets in the nurse's office of the Health Unit. Only the nurse and substitute nurse are allowed access to the files. The Health Unit is locked whenever the nurse is absent.

RETENTION AND DISPOSAL:

Records are kept for the duration of the employees's tenure with the FDIC and for five years thereafter, then destroyed. Standard Forms 78 and 177 are reviewed by the FDIC Nurse. If a disability is noted, the form is kept by the nurse; otherwise, the form is destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Personnel Management, FDIC, 550 17th Street, NW., Washington D.C. 20429.

NOTIFICATION PROCEDURE:

Executive Secretary, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

RECORD ACCESS PROCEDURES:

Same as " Notification" above.

CONTESTING RECORD PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

The medical records are compiled by the employee and the nurse during the course of visits to the Health Unit for treatment. The information on the emergency contact sheet is supplied by the employee.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

30-64-0018

SYSTEM NAME:

Grievance Records System—FDIC.

SYSTEM LOCATION:

Office of Personnel Management, FDIC, 550 17th Street, NW., Washington, D.C. 20429. Records at the regional level generated through grievance procedures negotiated with recognized labor organizations and arbitration are located in the FDIC regional office where originated. (See Appendix A for the location of FDIC regional offices.) Duplicate copies are maintained as records by the Office or Personnel Management for the purpose of coordinating grievance and arbitration handling.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current or former FDIC employees who have submitted grievances in accordance with Part 771 of the United States Office of Personnel Management's regulations (5 CFR Part 771) or a negotiated grievance procedure.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains records relating to grievances filed by FDIC employees under Part 771 of the United States Office of Personnel Management's regulations, or under 5 U.S.C. 7121. These case files contain all documents related to the grievance including statements of witnesses, reports of interviews and hearings, examiner's findings and recommendations, a copy of the final decision, and related

correspondence and exhibits. This system includes files and records of internal grievance and arbitration systems that FDIC may establish through negotiations with recognized labor organizations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 7121; 5 CFR Part 771.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used: (1) To disclose pertinent information to the appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing or implementing a statute, rule, regulation, or order, where the FDIC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation; (2) to disclose information to any source from which additional information is requested in the course of processing a grievance, to the extent necessary to identify the individual, inform the source of the purpose(s) of the request and identify the type of information requested; (3) to disclose information to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract or the issuance of a license, grant, or other benefit by the requesting agency to the extent that the information is relevant and necessary to requesting agency's decision on the matter; (4) to provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual; (5) to disclose information to another Federal agency or to a court when the government is party to a judicial proceeding before the court; (6) by the National Archives and Records Service (General Services Administration) in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906; (7) by the FDIC or the United States Office of Personnel Management in the production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related work force studies. While published statistics and studies do not contain individual identifiers, in some instances the selection of elements of data included in the study may be structured in such a way as to make the data individually identifiable by inference; (8) to disclose information to officials of the Merit Systems Protection Board, the Office of the Special Counsel, the Federal Labor Relations Authority and its General Counsel, an arbitrator, or the Equal Employment Opportunity Commission when requested in performance of their authorized duties; (9) to disclose in response to a request for discovery or for appearance of a witness, information that is relevant to the subject matter involved in a pending judicial or administrative proceeding; and (10) to provide information to officials of labor organizations recognized under the Civil Service Reform Act when relevant and neccessary to their duties of exclusive representation concerning personnel polices, practices and matters affecting work conditions.

POLICES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM.

STORAGE:

Maintained in file folders.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

Maintained in lockable metal file cabinets to which only authorized personnel have access.

RETENTION AND DISPOSAL:

These records are disposed of three years after closing of the case. Disposal is by shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Personnel Management, FDIC, 550 17th Street, NW., Washington, D.C. 20429. The appropriate FDIC regional director for records maintained in FDIC regional offices. (See Appendix A for the location of FDIC regional offices.)

NOTIFICATION PROCEDURE:

Executive Secretary, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

RECORD ACCESS PROCEDURES:

Same as "Notification" above.

CONTESTING RECORD PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

Information in this system of records is provided; (1) By the individual on whom the record is maintained; (2) by testimony of witnesses; (3) by agency officials; and (4) from related correspondence from organizations or persons.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 6714-01-M

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Notice of Proposed de Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8)) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their

views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Fedeal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated for each application.

A. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *Canadian Imperial Bank of Commerce*, Toronto, Canada and its subsidiary, Canadian Imperial Holdings, Inc., Wilmington, Delaware (leasing; New York, California, Illinois, Georgia and Pennsylvania): To engage through their subsidiary Canadian Imperial Leasing Inc., in the activity of leasing real and personal property. These activities will be conducted from offices in New York, New York, serving the states of New York, California, Illinois, Georgia and Pennsylvania. Comments on this application must be received not later than October 9, 1982.

B. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Union Trust Bancorp*, Baltimore, Maryland (financing and insurance activities; Virginia Beach, Virginia): To engage, through its subsidiary, Landmark Financial Services, Inc., in making installment loans to individuals for personal, family or household purposes; in purchasing sales finance contracts executed in connection with the sale of personal, family or household goods or services; in acting as agent in the sale of credit life and credit accident and health insurance directly related to its extensions of credit; in acting as agent in the sale of insurance protecting collateral held against the extensions of credit; and in making second mortgage loans secured in whole or in part by mortgages or other liens on real estate. These activities would be conducted from an office located in Virginia Beach, Virginia, serving the town of Virginia Beach, Virginia and the surrounding rural area. Comments on this application must be received not later than October 18, 1982.

C. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *First Bank System, Inc.*, Minneapolis, Minnesota; mortgage banking and servicing loans; Minnesota and western Wisconsin): To engage, through its subsidiary, FBS Mortgage Corporation, in the mortgage banking business, including the brokering, origination, purchase, sale and servicing of real estate mortgage loans. These activities would be conducted from an office in Roseville, Minnesota, serving the Minneapolis-Saint Paul SMSA consisting of the following counties: Anoka, Dakota, Hennepin, Ramsey, Washington, Chisago, Wright, Scott, and Carver, all in Minnesota; and St. Croix, Wisconsin. Comments on this application must be received not later than October 19, 1982.

D. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *BankAmerica Corporation*, San Francisco, California (financing servicing, and insurance activities; expansion of geographic scope; Pennsylvania): To continue to engage, through its indirect subsidiary, FinanceAmerica Consumer Discount Company, a Pennsylvania corporation, in the activities of making or acquiring for its own account loans and other extensions of credit such as would be made or acquired by a finance company; servicing loans and other extensions of credit; and offering credit-related life insurance, credit-related accident and health insurance and credit-related property insurance. Such activities will include, but not be limited to, purchasing installment sales finance contracts, making loans and other extensions of credit to consumers as well as small businesses, making loans and other extensions of credit secured by real and personal property, and offering credit-related life, credit-related accident and health and credit-related property insurance. These activities will be conducted from an existing office located in Quakertown, Pennsylvania, serving the entire State of Pennsylvania. Comments on this application must be received not later than October 20, 1982.

Board of Governors of the Federal Reserve System, September 20, 1982.

Dolores S. Smith,

Assistant Secretary of the Board.

[FR Doc. 82-26907 Filed 9-23-82; 8:45 am]

BILLING CODE 6210-01-M

Eaton Capital Corp.; Proposed Acquisition of Colorado Industrial Bank

Eaton Capital Corporation, Loup City, Nebraska, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Colorado Industrial Bank, Eaton, Colorado.

Applicant states that the proposed subsidiary would engage in the activities of operating as an industrial bank and selling credit related insurance. These activities would be performed from offices of Applicant's subsidiary in Eaton, Colorado, and the geographic area to be served is Weld County, Colorado. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of §225.5(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received no later than October 20, 1982.

Board of Governors of the Federal Reserve System, September 20, 1982.
Dolores S. Smith,
Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Formation of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares and/or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *First Palmetto Bancshares Corporation,* Columbia, South Carolina; to become a bank holding company by acquiring 100 percent of the voting shares of First Palmetto State Bank and Trust Company, Columbia, South Carolina. Comments on this application must be received not later than October 20, 1982.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Owen Financial Corporation,* Spencer, Indiana; to become a bank holding company by acquiring 100 percent of the voting shares of Owen County State Bank, Spencer, Indiana. Comments on this application must be received not later than October 20, 1982.

C. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *First Exchange Corp.,* Jackson, Missouri; to become a bank holding company by acquiring 80 percent of the voting shares of Jackson Exchange Bank and Trust Company, Jackson, Missouri. Comments on this application must be received not later than October 20, 1982.

2. *Smackover Bancshares, Inc.,* Smackover, Arkansas; to become a bank holding company by acquiring 80 percent of the voting shares of Smackover State Bank, Smackover, Arkansas. Comments on this application must be received not later than October 20, 1982.

3. *Missouri Delta Bancshares, Inc.,* Hayti, Missouri; to become a bank holding company by acquiring 95.3 percent of the voting shares of Missouri Delta Bank, Hayti, Missouri. Comments on this application must be received not later than October 20, 1982.

D. Federal Reserve Bank of Minneapolis (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Central Dakota Bank Holding Company,* Lehr, North Dakota; to become a bank holding company by acquiring 84.88 percent of the voting shares of Central Dakota Bank, Lehr, North Dakota. Comments on this application must be received not later than October 20, 1982.

Board of Governors of the Federal Reserve System, September 20, 1982.
Dolores S. Smith,
Assistant Secretary of the Board.

BILLING CODE 6210-01-M

[Regs. M and Z; Doc. No. R-0415]

Consumer Leasing, Truth in Lending; Order Granting Exemptions to the States of Massachusetts, Oklahoma and Wyoming

AGENCY: Board of Governors of the Federal Reserve System.
ACTION: Order.

SUMMARY: The Board has determined that the exemptions from the revised federal Truth in Lending Act requested by the states of Massachusetts, Oklahoma and Wyoming should be granted. Massachusetts sought an exemption from chapters 2 (credit transactions) and 4 (credit billing) of the act for transactions subject to the Massachusetts Truth in Lending Act; Oklahoma sought an exemption from chapters 2 and 5 (consumer leases) of the act for transactions subject to the Oklahoma Consumer Credit Code, and Wyoming sought an exemption from chapter 2 of the act for transactions subject to the Wyoming Consumer Credit Code.

EFFECTIVE DATE: October 1, 1982.

FOR FURTHER INFORMATION CONTACT: Rugenia Silver or Lynn Goldfaden, Staff Attorneys, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 at (202) 452-3667 or (202) 452-3867.

SUPPLEMENTARY INFORMATION: (1) *General.* The Truth in Lending Act (15 U.S.C. 1601 *et seq.*) directs the Board to exempt from that act transactions that are subject to state laws meeting certain requirements. Under section 123 of the act, consumer credit transactions may be exempt from chapter 2 (credit transactions) if the applicable state law is substantially similar to the federal act and the state demonstrates adequate provision for enforcement. Sections 171 and 186 prescribe the same exemption standards for chapter 4 (credit billing) and chapter 5 (consumer leases), respectively, except that the Board, in making exemption determinations under those chapters, is also to consider whether the state law is more protective of the consumer.

A state law need not exactly mirror the comparable federal requirement in order to be considered substantially similar. However, any variations should be few in number and minor in nature, in order not to deprive consumers of any federal protections nor significantly complicate compliance by creditors. In measuring the adequacy of enforcement, the Board looks to whether the state requires restitution for certain violations, has adequate funding and personnel, and in other ways demonstrates a commitment to effective enforcement of its laws.

Under the original Truth in Lending Act, the Board granted exemptions to Connecticut, Maine, Massachusetts, Oklahoma and Wyoming for chapter 2. Those exemptions expire on October 1, 1982, the mandatory effective date of the Truth in Lending Act as revised by Congress in Pub. L. 96-221. Effective that date, the Board granted new exemptions to Connecticut and Main under the revised act (47 FR 36931, August 24, 1982). At the same time, the Board published notice of applications from the Sates of Massachusetts, Oklahoma and Wyoming for exemptions from the revised act (47 FR 36962, August 24, 1982). In order to assure final action on the requests by October 1, 1982, the Board requested comments by September 15, 1982.

Massachusetts requested an exemption from chapters 2 and 4 of the revised act, based on chapter 140D (consumer Credit Costs Disclosure) of the General Laws of Massachusetts, and implementing regulations (209 Code of Massachusetts Regulations section 32.00 *et seq.*). After analysis of the state law and regulations, and consideration of the state's enforcement provisions, the

Board has determined that the state of Massachusetts meets the standards for exemption and that its application should be granted as requested.

Oklahoma applied for an exemption from chapters 2 and 5 of the act, pursuant to the Oklahoma Consumer Credit Code as revised (Title 14A Oklahoma Statutes 1–101 *et seq.*) and implementing regulations. In its August notice, the Board noted one variation in the state law that limits the scope of that exemption. Because the state law and regulations contain no counterpart to §§ 132 through 135 of the federal act and § 226.12 of Regulation Z (credit card rules), an exemption from the requirements of chapter 2 does not extend to those provisions of chapter 2 relating to credit card issuance and liability. With this one execption, the Board believes that the Oklahoma statute and regulations meet the requirements for exemption and that the state has adequate provision for enforcement. Therefore, the Board has determined that the Oklahoma exemption should be granted, with the limitation noted.

Wyoming applied for an exemption from chapter 2 of the federal statute for transactions subject to the Wyoming Consumer Credit Code, as amended in 1982 (W.S. 40–14–101 through 40–14–702), and implementing regulations. In its August notice, the Board noted one significant variation in the state law relating to the term "residential mortgage transaction." That term is defined in the federal act and regulation and used in several important federal provisions, including the early disclousre rules of § 226.19, the finance charge rules in § 226.4(e), and the exceptions from the right of rescission under § 226.23. Wyoming law did not use that term, using instead terms such as "real property mortgage" that are not defined in th same manner as "residential mortgage transaction." For this reason, the Board was concerned that the coverage of the special mortgage provisions would be significantly altered under the Wyoming statute.

Since publication of the notice, the state of Wyoming has revised its statute and implementing regulations by replaceing the relevant state terms with there term "residential mortgage transaction," defined in accordance with the federal Truth in Lending Act and Regulation Z. With this change, the Board has determined that the Wyoming statute and regulation are substantially similar to the federal statute, that the state has adequate provision for enforcement, and that the exemption should be granted as requested.

By the close of the comment period, the Board had received 10 comments regarding the exemption requests. Several commenters questioned apparent discrepancies between the federal act and certain of the state laws, relating to cash discounts under section 167 of the federal act, in the case of Oklahoma and Wyoming, and the special federal rules for residential mortgage transactions, in the case of Wyoming (discussed above). Effective October 1, 1982, Wyoming and Oklahoma are adopting revisions to their rules which reflect the revised federal act and regulation. No substantive evidence was offered by commenters to cast doubt on the adequacy of the states' enforcement efforts.

In accordance with Appendix B of Regulation Z and Appendix A of Regulation M, the Board reserves the right to revoke an exemption if at any time it determines that the standards required for exemption are not being met. The state receiving an exemption undertakes to inform the Board within 30 days of any change in its relevant law or regulations. The Board will inform the appropriate state official of any revisions in the federal statute or regulation that must be adopted by the state in the future in order to maintain its exemption. Should an amendment or other revision to a state law become necessary because of a corresponding congressional or Board action, the Board will allow sufficient time to the state to revise its laws and regulations in order to preserve substantial similarity.

(2) *Order of exemption.* The following order sets forth the terms of the Massachusetts, Oklahoma and Wyoming exemptions. Notice of the exemptions will be included in the official staff commentaries on Regulations Z and M.

Order

The states of Massachusetts, Oklahoma and Wyoming have applied for exemptions from the federal Truth in Lending Act as revised on March 31, 1980 (Title VI of the Depository Institutions Deregulation and Monetary Control Act of 1980, Pub. L. 96–221). Pursuant to sections 123, 171 and 186 of the act, the Board has determined that the laws of those states are substantially similar to the federal law and that there is adequate provision for enforcement of those laws. Therefore, the Board hereby grants those exemptions as follows:

Massachusetts. Effective October 1, 1982, credit transactions that are subject to chapter 140D (Consumer Credit Costs Disclosures) of the General Laws of Massachusetts, established by chapter 733 of the Acts of 1981, and its implementing regulations are exempt from chapter 2 (credit transactions) and chapter 4 (credit billing) of the federal Truth in Lending Act. This exemption does not apply to transactions in which a federally chartered institution is a creditor.

Oklahoma. Effective October 1, 1982, credit and lease transactions that are subject to the Oklahoma Consumer Credit Code (Title 14A Oklahoma Statutes 1–101 *et seq.*) and its implementing regulations are exempt from chapter 2 (credit transactions) and chapter 5 (consumer leases) of the federal Truth in Lending Act. The exemption does not apply to sections 132 through 135 of the federal act, nor does it apply to transactions in which a federally chartered institution is a creditor or lessor.

Wyoming. Effective October 1, 1982, credit transactions that are subject to the Wyoming Consumer Credit Code (W.S. 40–14–101 through 40–14–702) and its implementing regulations are exempt from chapter 2 (credit transactions) of the federal Truth in Lending Act. The exemption does not apply to transactions in which a federally chartered institution is a creditor.

By order of the Board of Governors of the Federal Reserve System, September 22, 1982.

James McAfee,

Associate Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

Office of the Administrator

Advisory Board; Meeting

Notice is hereby given that the GSA Advisory Board will meet on October 4, 1982, from 10:00 a.m. to 4:45 p.m., in Room 6120, 18th and F Streets, NW, Washington, D.C. 20405. This session will be open to the public and will be devoted to discussions of organizational and management issues of current interest to GSA. The Board will also hear reports relating to the activities of its subcommittees on Facilities and Buildings Management, Supply and Distribution, Contracting, and General Management.

For further information, contact Roger C. Dierman, Deputy Associate Administrator, on (202) 523–1141.

Less then fifteen (15) days notice of this meeting is being provided due to scheduling difficulties.

Charles S. Davis III,

Associate Administrator.

September 20, 1982.

BILLING CODE 8320-25-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 82N-0204]

Ethanolamine Oleate for Treating Bleeding Esophageal Varices; Invitation To Submit New Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has established an Orphan Products Development office to identify and facilitate the availability of products useful in treating or diagnosing uncommon diseases. This office will also promote availability of products for common diseases where commercial sponsorship of the products is either lacking or is not totally committed to obtaining marketing approval. By this notice, the Orphan Products Development office invites submission of a new drug application (NDA) for the use of ethanolamine oleate in treating bleeding esophageal varices.

FOR FURTHER INFORMATION CONTACT: Roger Gregario, Orphan Products Development (HF-35), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4903.

SUPPLEMENTARY INFORMATION: FDA will publish notices in the **Federal Register** inviting sponsorship of specific products when significant amounts of clinical data are available for those products. The notices will describe the available preclinical and clinical data and what additional studies, if any, may be needed for submission of an application for marketing approval.

Ethanolamine Oleate

Ethanolamine oleate has been injected into esophageal varices to treat active bleeding and to prevent rebleeding. Bleeding from esophageal varices is a common disorder. Several methods are used to reverse acute bleeding. These include tamponade with the Sengstaken-Blakemore tube, intraveneous vasopressin, emergency surgical procedures such as portacaval shunt, and sclerotherapy. All these methods have disadvantages. Use of the Sengstaken-Blakemore tube is associated with local tissue damage, which can be severe, and aspiration fatalities; rebleeding is common when the tube is removed. Intravenous vasopressin is not uniformly effective. The various surgical procedures are also associated with some failures, but, in addition, the procedures themselves result in morbidity and mortality, particularly in patients who are poor surgical risks. Indeed, emergency surgery is often not a viable option in many patients. Sclerosing agents require skill in administering and are associated, even in the most experienced hands, with esophageal necrosis, ulceration, and stenosis, although the incidence is low. Because of their high rate of effectiveness, however, and the relatively low incidence of serious adverse effects from their use and their applicability in patients who are poor surgical risks, there has been a recent resurgence of interest in the use of sclerosing agents for control of acute bleeding. Some investigators are also using these agents repetitively to obliterate the varices and prevent rebleeding.

FDA has reviewed some of the published reports on use of ethanolamine oleate specifically and other sclerotherapy in general, as well as other means of treating bleeding esophageal varices. FDA concludes there are sufficient data available in the published literature and from unpublished case report information to invite submission of an NDA for use of ethanolamine oleate in the treatment of bleeding esophageal varices. At present, data are insufficient to approve the drug for prevention of future rebleeding episodes.

Examples of published data that would help to support approval of an NDA for treatment of active bleeding from esophageal varices are as follows: Terblanche, et al., *Surgery*, 85:239, 1979; Johnston and Rodgers, *British Journal of Surgery*, 60:797, 1973; Johnson, *Annals of the Royal College of Surgery*, 59:497, 1977. In addition, Clark, A. W., et al., *Lancet*, 2:552, 1980, and Terblanche, et al., *Surgery Gynecology and Obstetrics*, 148:323, 1979, performed prospective controlled clinical trials on the effectiveness of chronic injection of ethanolamine oleate in preventing rebleeding. These trials can be used as supportive evidence for the relative safety of the drug and the procedure.

Copies of references cited above are on display in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and may be seen between 9 a.m. and 4 p.m., Monday through Friday.

FDA is aware of a substantial amount of clinical data from two investigators in the United States who used ethanolamine oleate in acute bleeding. The investigators have agreed to make those data available to a sponsor of an NDA.

FDA would require the following information to be submitted in an NDA:

1. Manufacturing controls informations.

2. Pertinent published reports on the use of ethanolamine oleate in acute esophageal variceal bleeding.

3. Pertinent, representative, published reports on the use of other methods for control of acute bleeding, to provide comparative data on the advantages and disadvantages of the various techniques and their degree of effectiveness.

4. Case report data from the two U.S investigators. (FDA will furnish the names to potential NDA sponsors on request.)

FDA will be pleased to meet with potential sponsors to discuss the data and requirements. Manufacturers interested in submitting an NDA should contact Roger Gregorio at the address above.

Dated: September 9, 1982.

Arthur Hull Hayes, Jr.,

Commissioner of Food and Drugs.

[FR Doc. 82-26181 Filed 9-23-82; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 82M-0290]

Metrosoft Inc.; Premarket Approval of Metrosoft II™ (Polymacon) Hydrophilic Contact Lenses

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application for premarket approval under the Medical Device Amendments of 1976 of METROSOFT II™ (polymacon) Hydrophilic Contact Lenses, sponsored by Metrosoft Inc., Austin, TX. The lenses are to be manufactured under an agreement with National Patent Development Corp., New Brunswick, NJ, which has authorized Metrosoft Inc., to incorporate by reference information contained in its approved premarket approval application for the Hydron® (polymacon) Hydrophilic Contact Lens. After reviewing the recommendation of the Ophthalmic Device Section of the Ophthalmic; Ear, Nose, and Throat; and

Dental Devices Panel, FDA notified the sponsor that the application was approved because the device had been shown to be safe and effective for use as recommended in the submitted labeling.

DATE: Petitions for administrative review by October 25, 1982.

ADDRESS: Requests for copies of the summary of safety and effectiveness data and petitions for administrative review may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Charles Kyper, Bureau of Medical Devices (HFK–402), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7445.

SUPPLEMENTARY INFORMATION: On April 28, 1982, Metrosoft Inc., Austin, TX, submitted to FDA an application for premarket approval of METROSOFT II™ (polymacon) Hydrophilic Contact Lenses. These lenses are indicated for daily wear for the correction of visual acuity in persons with nondiseased eyes and aphakia and have spherical ametropias and refractive astigmatism of 1.50 diopters or less. The application included authorization from the National Patent Development Corporation, New Brunswick, NJ, to incorporate by reference the information contained in its approved premarket approval application for the Hydron® (polymacon) Hydrophilic Contact Lens (Docket No. 79M–0244). The application was reviewed by the Ophthalmic Device Section of the Ophthalmic; Ear, Nose, and Throat; and Dental Devices Panel, an FDA advisory committee, which recommended approval of the application for this device. On August 27, 1982, FDA approved the application by a letter to the sponsor from the Acting Associate Director for Device Evaluation for the Bureau of Medical Devices.

Before enactment of the Medical Device Amendments of 1976 (the amendments) (Pub. L. 94–295, 90 Stat. 539–583), soft contact lenses and solutions were regulated as new drugs. Because the amendments broadened the definition of the term "device" in section 201(h) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 321(h)), soft contact lenses and solutions are now regulated as class III devices (premarket approval). As FDA explained in a notice published in the **Federal Register** of December 16, 1977 (42 FR 63472), the amendments provide transitional provisions to ensure continuation of premarket approval requirements for class III devices formerly regulated as new drugs. Furthermore, FDA requires, as a condition to approval, that sponsors of applications for premarket approval of soft contact lenses or solutions comply with the records and reports provisions of Subpart D of Part 310 (21 CFR Part 310) until these provisions are replaced by similar requirements under the amendments.

A summary of the safety and effectiveness data on which FDA's approval is based is on file with the Dockets Management Branch (address above) and is available upon request from that office. A copy of all approved final labeling is available for public inspection at the Bureau of Medical Devices. Contact Charles Kyper (HFK–402), address above. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

The labeling of approved contact lenses states that the lenses are to be used only with certain solutions for disinfection and other purposes. The restrictive labeling informs new users that they must avoid using certain products, such as solutions intended for use with hard contact lenses. The restrictive labeling needs to be updated periodically, however, to refer to new lens solutions that FDA approves for use with approved contact lenses. A sponsor who fails to update the restrictive labeling may violate the misbranding provisions of section 502 of the act (21 U.S.C. 352) as well as the Federal Trade Commission Act (15 U.S.C. 41–58), as amended by the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act (Pub. L. 93–637). Furthermore, failure to update restrictive labeling to refer to new solutions that may be used with an approved lens may be grounds for withdrawing approval of the application for the lens, under section 515(e)(1)(F) of the act (21 U.S.C. 360(e)(1)(F)). Accordingly, whenever FDA publishes a notice in the **Federal Register** of the agency's approval of a new solution for use with an approved lens, the sponsor of the lens shall correct its labeling to refer to the new solution at the next printing or at any other time FDA prescribes by letter to the sponsor.

Opportunity for Administrative Review

Section 515(d)(3) of the act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of FDA's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and FDA's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration of FDA action under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register.** If FDA grants the petition, the notice will state the issues to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before October 25, 1982, file with the Dockets Management Branch (address above) four copies of each petition and supporting data and information, identified with name the of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: September 15, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 82M–0278]

Siemens Corp.; Siemens-Elema Endocardial Carbon Tipped Leads—Models 411S(Flanged) and 412S (Tined)

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application for premarket approval under the Medical Device Amendments of 1976 of the Siemens-Elema Endocardial Carbon Tipped Leads—Models 411S(flanged) and 412S(tined) sponsored by Siemens Corp. After reviewing the recommendations of the Circulatory System Devices Panel, FDA notified the sponsor that the application was approved because the devices had been shown to be safe and effective for use as recommended in the submitted labeling.

DATE: Petitions for administrative review by October 25, 1982.

ADDRESS: Requests for copies of the summary of safety and effectiveness data and petitions for administrative review may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Charles Kyper, Bureau of Medical Devices (HFK–402), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7445.

SUPPLEMENTARY INFORMATION: On October 31, 1980, Siemens Corp., New York, NY 10153, submitted to FDA an application for premarket approval of the Siemens-Elema Endocardial Carbon Tipped Leads—Models 411S(flanged) and 412S(tined) for use as an electrically conductive pathway between the pulse generator and the heart in patients requiring permanent pacemaker implantation. The application was reviewed by the Circulatory System Devices Panel, an FDA advisory committee, which recommended approval of the application. On August 9, 1982, FDA approved the application by letter to the sponsor from the Acting Associate Director for Device Evaluation of the Bureau of Medical Devices.

A summary of the safety and effectiveness data on which FDA's approval is based is on file in the Dockets Management Branch (address above) and is available upon request from that office. A copy of all approved final labeling is available for public inspection at the Bureau of Medical Devices. Contact Charles Kyper (HFK–402), address above. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition under section 515(g) of the act (21 U.S.C. 360e(g)) for administrative review of FDA's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and of FDA's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration of FDA action under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register.** If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before October 25, 1982, file with the Dockets Management Branch (address above), four copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: September 14, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

[Docket No. 82N–0241]

Triethylene Tetramine Dihydrochloride for Treatment of Penicillamine-Intolerant Patients With Wilson's Disease; Invitation To Submit New Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Orphan Products Development Office of the Food and Drug Administration (FDA) invites submission of a new drug application (NDA) for the use of triethylene tetramine dihydrochloride in penicillamine-intolerant patients with Wilson's Disease.

FOR FURTHER INFORMATION CONTACT: Roger Gregorio, Orphan Products Development (HF–35), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4903.

SUPPLEMENTARY INFORMATION: Wilson's Disease is a rare, inherited disorder of copper metabolism that affects approximately 1,000 patients in the United States. It is characterized by progressive accumulation of copper in various body tissues, primarily the liver, brain, and iris, resulting in a wide variety of symptoms predominantly involving the liver and nervous system. The age of onset varies from early childhood to the fifth decade. Without adequate treatment it runs a progressively downhill course of neurological disability and/or hepatic failure, ending fatally within 5 years of onset. Early initiation of appropriate treatment, however, may prevent the development of symptoms; and in established disease, severe symptoms may be dramatically improved or reversed.

Effective therapy consists of aggressive chelation therapy to deplete excess copper from the body and prevent its reaccumulation. Penicillamine, an oral chelating agent, has been the drug of choice since the mid-1950's. Dr. J. M. Walshe, an authority on Wilson's Disease, has reported that approximately 10 percent of Wilson's Disease patients develop intolerance to penicillamine within a few weeks to 13 years of beginning therapy, the most serious manifestations being immune complex nephrosis and lupus erythematosus.

Triethylene Tetramine Dihydrochloride

Walshe developed a new oral chelating agent, triethylene tetramine dihydrochloride, and has reported its successful use as a life-saving alternative in more than 20 penicillamine-intolerant patients in England since 1969. The drug has also been studied by two U.S. investigators.

FDA has reviewed published reports on the use of triethylene tetramine dihydrochloride in the treatment of patients with Wilson's Disease who are intolerant of penicillamine, and a summary of data from one of the U.S. investigators. FDA finds there are sufficient data available in the published literature and unpublished case reports to invite submission of an NDA for use of triethylene tetramine dihydrochloride in treating Wilson's Disease in patients intolerant of penicillamine.

Examples of published data that would support approval of an NDA for treatment of Wilson's Disease in penicillamine-intolerant patients are as follows: Walshe, J. M., *Lancet*, 2:1401, 1969; Dubois, R. S., et al., *Lancet*, 2:775, 1970; Walshe, J. M., *Quarterly Journal of Medicine*, 167:441, 1973; Walshe, J. M., *Lancet*, 1:643, 1982; Walshe, J. M., "Story of Triethylene Tetramine Dihydrochloride" *in* "Orphan Drugs," Edited by Karsh, Marcel Dekker, Inc., NY, 1982.

Copies of references cited above are on display in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers

Lane, Rockville, MD 20857, and may be seen between 9 a.m. and 4 p.m., Monday through Friday.

Dr. Walshe and the two U.S. investigators have agreed to make their detailed clinical data available to the sponsor of an NDA.

FDA would require the following information to be submitted in an NDA:

1. Manufacturing controls information.

2. Pertinent published reports on the use of triethylene tetramine dihydrochloride in penicillamine-intolerant Wilson's Disease patients.

3. Case report data from the investigators. (FDA will furnish the names of the U.S. investigators to potential NDA sponsors on request.)

FDA will not require the submission of animal toxicology data. One of the investigators and the National Center for Toxicological Research (NCTR) will be conducting subacute studies in animals. In addition, FDA is aware of completed teratology studies in mice and rats (with respect to the latter see Keen, C. L., et al., *Lancet*, 1:1127, 1982). NCTR will be conducting an additional teratology study.

FDA will not require the submission of in vivo bioavailability data for the following reasons:

1. Dosage titration is utilized in each patient to obtain the desired cupriuretic effect.

2. Under 21 CFR 320.22(e), FDA may defer or waive a requirement for submittal of in vivo bioavailability data when such action is compatible with the public health. In the United States, there are an estimated 100 patients who might benefit from this drug. Delay in approval of the NDA for patients with serious disease while a bioavailability method is under development and testing would not be compatible with protection of the public health. Furthermore, the product to be released to the public must meet the manufacturing standards already developed, and a product of this nature has been tested in patients with Wilson's Disease and found to be sufficiently bioavailable to maintain the patients in a state of clinical remission.

FDA will be pleased to meet with potential sponsors to discuss the data and requirements. Manufacturers interested in submitting an NDA should contact Roger Gregorio at the address above.

Dated: September 9, 1982.

Arthur Hull Hayes, Jr.,

Commissioner of Food and Drugs.

BILLING CODE 4160-01-M

lth Resources and Services inistration

Advisory Committee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of November 1982:

Name: National Advisory Council on Health Professions Education.

Date and Time: November 8-9, 1982, 9:00 a.m.-5:30 p.m.

Place: Conference Room G-20, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782.

Meeting open to the public.

Purpose: The Council advises the Secretary with respect to the administration of programs of financial assistance for the health professions and makes recommendations based on its review of applications requesting such assistance. This also involves advice in the preparation of regulations with respect to policy matters.

Agenda: The meeting will cover: welcome and opening remarks; report of the Administrator; budget update; discussion on resolution regarding Humanistic Health Care; update of Department's goals for Health Promotion and Disease Prevention; and future agenda items.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should write to or contact Mr. Robert L. Belsley, Executive Secretary, National Advisory Council on Health Professions Education, Bureau of Health Professions, Health Resources Administration, Room 4-27, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782, telephone (301) 436-6564.

Agenda items are subject to change as priorities dictate.

Dated: September 15, 1982.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

[FR Doc. 82-26363 Filed 9-23-82; 8:45 am]

BILLING CODE 4160-15-M

Office of the Secretary

President's Council on Physical Fitness and Sports; Meeting

AGENCY: Office of the Assistant Secretary for Health, HHS.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the President's Council on Physical Fitness and Sports. This notice also describes the functions of the Council. Notice of this meeting is required under the National Advisory Committee Act.

DATE: September 24, 1982, 9:00 a.m. to 3:00 p.m.

ADDRESS: Capitol (House side) Rm. H-130, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Mr. C. Carson Conrad, Executive Director, President's Council on Physical Fitness and Sports, 450 5th St., NW., Suite 7103, Washington, D.C. 20001.

SUPPLEMENTARY INFORMATION: The President's Council on Physical Fitness and Sports operates under Executive Order 12345 dated February 2, 1982. The functions of the Council are: (1) To recommend to the President and the Secretary of HHS as necessary, steps to accelerate carrying out provisions of the Executive Order and (2) Advise the Secretary on matters pertaining to ways and means of enhancing opportunities for participation in physical fitness and sports activities and on state, local, and private action to extend and improve physical activity programs and services.

The Council will hold this meeting to apprise the new Council members of the 9-point national program of physical fitness and sports; to report on on-going Council programs; and to plan future directions.

Dated: September 17, 1982.

C. Carson Conrad,

Executive Director, President's Council on Physical Fitness and Sports.

BILLING CODE 4150-17-M

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on September 17.

Public Health Service

National Institutes of Health

Subject: Health Message Testing Service—Print Component—New (Resubmission).

Respondents: Individuals.

Subject: Biomedical Research Support Grant Application and Annual Progress Report (0925-0008)—Extension.

Respondents: Universities, hospitals and research institutes.

OMB Desk Officer: Richard Eisinger.

Health Care Financing Administration

Subject: Integrated Quality Control Review Schedule (HCFA-301)—Revision.

Respondents: State Medicaid agencies.

Subject: Integrated Quality Control Review Worksheets (HCFA-316)—Revision.

Respondents: State Medicaid agencies and Medicaid recipients.

OMB Desk Officer: Fay S. Iudicello.

Social Security Administration

Subject: Quarterly Report of Child Support Enforcement Activities Under Title IV-D of the Social Security Act (OCSE-3 (8-82))—Revision.

Respondents: State or local governments.

OMB Desk Officer: Milo Sunderhauf.

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202-245-6511.

Written comments and recommendations for the proposed information collections should be sent directly to both the HHS Reports Clearance Officer and the appropriate OMB Desk Officer designated above at the following addresses:

J. J. Strnad, HHS Reports Clearance Officer, Hubert H. Humphrey Building, Room 524-F, Washington, D.C. 20201

OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503, Attn: (name of OMB Desk Officer)

Dated: September 17, 1982.

Dale W. Soper,

Assistant Secretary for Management and Budget.

[FR Doc. 82-26227 Filed 9-23-82; 8:45 am]

BILLING CODE 4150-04-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Availability of Pinyon Final Environmental Impact Statement

Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969 and the 1975 Federal Court Order, the Bureau of Land Management (BLM) has prepared a final grazing management environmental impact statement (EIS) for the Pinyon Planning Unit rangeland management program in portions of Beaver, Iron, Millard and Washington Counties of southwestern Utah.

The Final EIS examines five alternative management programs: (1) Continuation of Current Management (No Action), (2) Planning Recommendations, (3) Livestock Grazing Preference, (4) Resident Resource Values, and (5) Livestock Maximization. The alternatives examine varied levels of livestock grazing (from 60,757 animal unit months [AUMs] to 209,006 AUMs) wildlife forage (from 2,663 AUMs to 8,345 AUMs), and wild horse forage (from 0 AUMs to 12,825 AUMs). Varying levels of vegetation treatment and management intensity would accompany the different alternatives.

Copies of the EIS are available at the Cedar City District Office, 1579 North Main, P.O. Box 724, Cedar City, Utah 84720, (801) 586-2401 and the Beaver River Resource Area Office, 444 South Main, Suite C-3, Cedar City, Utah 84720, (801) 586-2458. Public reading copies of the Final EIS will be available for review at the following locations: Office of Public Affairs, Bureau of Land Management, Interior Building, 18th and C Streets, NW., Washington, D.C. 20240, and Utah State Office, Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111.

Written comments on the Final EIS should be submitted to the Cedar City District Manager by October 29, 1982.

Morgan S. Jensen,

District Manager.

September 16, 1982.

BILLING CODE 4310-84-M

[F-19155-10]

Alaska; Alaska Native Claims Selection

On April 2, 1975, Doyon, Limited, filed selection application F-19155-10, as amended, under the provisions of Sec. 12(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611(c) (1976)) (ANCSA), as amended, for the surface and subsurface estates of certain lands withdrawn pursuant to Sec. 11(a)(1) for the Native village of Ruby. The application excluded Deer Creek and Big Creek as being navigable. As these are considered nonnavigable and as Sec. 12(c)(3) of ANCSA and Departmental regulation 43 CFR 2652.3(c) require the region to select all available lands within the township, the beds of these water bodies are considered selected.

As to the lands described below, the application, as amended, is properly filed and meets the requirements of the Alaska Native Claims Settlement Act, as amended, and of the regulations issued pursuant thereto. These lands do not include any lawful entry prefected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface and subsurface estates of the following described lands, selected pursuant to Sec. 12(c) of ANCSA, as amended, aggregating approximately 192,521 acres, are considered proper for acquisiton by Doyon, Limited, and are hereby approved for conveyance pursuant to Sec. 14(e) of ANCSA:

Kateel River Meridian, Alaska (Surveyed)

T. 7 S., R. 15 E.,
Secs. 1 to 36, inclusive.
Containing 22929.12 acres.

T. 9 S., R. 15 E.,
Secs. 19 to 36, inclusive.
Containing approximately 11,210 acres.

T. 11 S., R. 15 E.,
Secs. 1 to 36, inclusive.
Containing 22,931.04 acres.

T. 8 S., R. 16 E.,
Sec. 1;
Sec. 4, excluding Native allotment F-14475;
Secs. 5 to 9, inclusive;
Secs. 15 to 18, inclusive;
Secs. 22 and 23.
Containing approximately 8,252 acres.

T. 10 S., R. 16 E.,
Secs. 1 to 36, inclusive.
Containing 22,956.32 acres.

T. 7 S., R. 17 E.,
Secs. 3 to 10, inclusive;
Sec. 13;
Secs. 16 to 19, inclusive;
Secs. 23 to 27, inclusive;
Secs. 33 to 36, inclusive.
Containing 13,997.67 acres.

T. 11 S., R. 17 E.,
Sec. 1;
Sec. 11 to 14, inclusive;
Secs. 23 to 26, inclusive;
Secs. 35 and 36.
Containing 7,040 acres.

T. 8 S., R. 18 E.,
Sec. 1;
Secs. 11 to 16, inclusive;
Secs. 20 to 29, inclusive;
Secs. 31 to 36, inclusive.
Containing 14,718.97 acres.

T. 10 S., R. 18 E.,
Secs. 1 to 36, inclusive.
Containing 22,858.32 acres.

T. 9 S., R. 19 E.,
Secs. 1 to 36, inclusive.
Containing 22,785.60 acres.

T. 11 S., R. 19 E.,
Secs. 1 to 36 inclusive.
Containing 22,931.04 acres.
Aggregating approximately 192,521 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable

because they have been or could be used in connection with travel, trade and commerce. Those water bodies are identified on the attached navigability maps, the original of which will be found in easement case file F–21779–10.

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The land excluded in the above description is not being approved for conveyance at this time and has been excluded for the following reason: Land is under application pending further adjudication. This exclusion *does not* constitute a rejection of the selection application.

The conveyance issued for the surface and subsurface estates of the lands described above shall contain the following reservation to the United States:

Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)), as amended, the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F–21779–10, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (less than 3000 lbs. Gross Vehicle Weight (GVW)).

50 Foot Trail—The uses allowed on a fifty (50) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, small and large all-terrain vehicles, track vehicles and four-wheel drive vehicles.

a. (EIN 11a C5, L) An easement fifty (50) feet in width for an existing access trail from Sec. 31, T. 7 S., R. 16 E., Kateel River Meridian, southwesterly to public land. The uses allowed are those listed for a fifty (50) foot wide trail easement.

b. (EIN 11b C5, L) An easement fifty (50) feet in width for a proposed access trail from public land in Sec. 36, T. 10 S., R. 17 E., Kateel River Meridian, southeasterly to public land. The uses allowed are those listed for a fifty (50) foot wide trail easement.

c. (EIN 22 C5) An easement fifty (50) feet in width for a proposed access trail from public land in Sec. 1, T. 10 S., R. 15 E., Kateel River Meridian, northeasterly to public land. The uses allowed are those listed for a fifty (50) foot wide trail easement.

d. (EIN 23 C5) An easement fifty (50) feet in width for a proposed access trail from public land in Sec. 6, T. 11 S., R. 16 E., Kateel River Meridian, northwesterly to public land. The uses allowed are those listed for a fifty (50) foot wide trail easement.

e. (EIN 27 C4) An easement twenty-five (25) feet in width for a proposed access trail from public land in Sec. 1, T. 9 S., R. 18 E., Kateel River Meridian, easterly to public land. The uses allowed are those listed for a twenty-five (25) foot wide trail easement.

f. (EIN 35 C5) An easement twenty-five (25) feet in width for a proposed access trail from public land in Sec. 1, T. 11 S., R. 18 E., Kateel River Meridian, northeasterly to public land. The uses allowed are those listed for a twenty-five (25) foot wide trail easement.

g. (EIN 36 C5) An easement twenty-five (25) feet in width for a proposed access trail from public land in Sec. 6, T. 10 S., R. 19 E., Kateel River Meridian, northwesterly to public land. The uses allowed are those listed for a twenty-five (25) foot wide trail easement.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official supplemental plat of survey confirming the boundary description and acreage of the lands hereinabove granted; and

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (48 U.S.C. Ch. 2, Sec. 6(g))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)(2)) (ANCSA), as amended, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law.

To date, approximately 4,039,473 acres of land, selected pursuant to Sec. 12(c) of ANCSA, have been approved for conveyance to Doyon, Limited.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in the Fairbanks Daily News-Miner.

Any party claiming a property interest in lands affected by this decision, an agency fo the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E, as revised. However, pursuant to Pub. L. 96–487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99501.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 25, 1982, to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the party to be served with a copy of the notice of appeal is: Doyon, Limited, Land Department, Doyon Building, 201 First Avenue, Fairbanks, Alaska 99701.

Ann Johnson,

Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-84-M

[F-14837-A]

Alaska; Alaska Native Claims Selection

On December 18, 1974, Beaver Kwit'chin Corporation filed selection application F-14837-A under the provisions of Sec. 12 of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611 (1976)) (ANCSA), as amended, for the surface estate of certain lands in the vicinity of Beaver.

As to the lands described below, the application is properly filed and meets the requirements of ANCSA, as amended, and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In views of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a) of ANCSA, as amended, aggregating approximately 81,235 acres is considered proper for acquisition by Beaver Kwit'chin Corporation, and is hereby approved for conveyance pursuant to Sec. 14(a) of ANCSA.

Fairbanks Meridian, Alaska (Unsurveyed)

T. 18 N., R. 1 E.,
- Sec. 13, excluding Native allotment F-13993 Parcel B;
- Sec. 14, excluding Native allotments F-13422 and F-13993 Parcels A and B;
- Sec. 15, excluding Native allotment F-13993 Parcel A;
- Sec. 22, excluding Native allotment F-13416;
- Sec. 23, excluding Native allotments F-13422, F-13416, and F-14366 Parcel C;
- Sec. 24;
- Sec. 25, excluding U.S. Survey No. 3798;
- Secs. 26 to 33, inclusive;
- Sec. 34, excluding Native allotment F-028096;
- Sec. 35, excluding Native allotment F-14377 Parcel B;
- Sec. 36, excluding Native allotment F-028102.

Containing approximately 9,555 acres.

T. 17 N., R. 2 E.
- Secs. 1 to 10, inclusive;
- Secs. 11 to 14, inclusive, excluding Native allotment F-13420;
- Secs. 15 to 24, inclusive.

Containing approximately 12,815 acres.

T. 18 N., R. 2 E.,
- Sec. 1, excluding Native allotment F-14655 Parcel A;
- Secs. 2 to 6, inclusive;
- Sec. 7, excluding Native allotment F-13992 Parcel A;
- Sec. 8, excluding Native allotments F-13996 Parcel B and F-13994 Parcel C;
- Secs. 9 to 14, inclusive;
- Sec. 15, excluding Native allotments F-13996 Parcel A and F-13992 Parcel B;
- Sec. 16, excluding Native allotment F-13992 Parcel B;
- Sec. 17, excluding Native allotment F-13994 Parcel C;
- Sec. 18, excluding Native allotment F-13992 Parcel A;
- Sec. 19, excluding U.S. Survey No. 3798 and Native allotment F-13994 Parcel B;
- Sec. 20, excluding U.S. Survey No. 3798, and Native allotments F-13416 and F-13994 Parcel B;
- Sec. 21, excluding Native allotment F-13992 Parcel B;
- Secs. 22 to 27, inclusive;
- Sec. 28, excluding Native allotment F-13418;
- Sec. 29, excluding U.S. Survey No. 3798, U.S. Survey No. 4895, and Native allotments F-13994 Parcel B and F-13416;
- Sec. 30, excluding U.S. Survey No. 3798, U.S. Survey No. 4895, and Alaska Native Claims Settlement Act Sec. 3(e) application F-36743;
- Secs. 31 to 36, inclusive.

Containing approximately 17,875 acres.

T. 18 N., R. 3 E.
- Secs. 1 and 2;
- Secs. 3 and 4, excluding Native allotment F-14411 Parcel A;

- Secs. 21 and 22, excluding Native allotments F-12014 and F-026101;
- Secs. 23 to 26, inclusive;
- Secs. 27 and 28, excluding Native allotments F-12014 and F-026101;
- Secs. 29 and 30;
- Sec. 31, excluding Native allotment F-12016 Parcel B;
- Secs. 32 to 36, inclusive.

Containing approximately 17,617 acres.

T. 19 N., R. 4 E.,
- Secs. 1 to 7, inclusive;
- Sec. 8, excluding Native allotment F-020098;
- Secs. 9 to 14, inclusive;
- Sec. 15, excluding Native allotments F-14730 and F-12015 Parcel C;
- Sec. 16, excluding Native allotments F-14730 and F-12015 Parcel B;
- Sec. 17, excluding Native allotments F-12015 Parcel B and F-026098;
- Secs. 18, 19, and 20.
- Secs. 21 and 22, excluding Native allotment F-14730;
- Secs. 23 to 36, inclusive.

Containing approximately 17,748 acres.

T. 16 N., R. 1 W.,
- Secs. 1 to 12, inclusive.

Containing approximately 6,125 acres.

Aggregating approximately 81,235 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade and commerce. Those water bodies are identified on the attached navigability maps, the original of which will be found in easement case file F-14837-EE.

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for the following reasons: Lands are no longer under Federal jurisdiction; lands are under applications pending further adjudication; or lands are pending a determination under Sec. 3(e) of ANCSA. Lands within U.S. Surveys which are excluded are described separately in this decision if they are available for conveyance. These exclusions *do not* constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(f)), as amended; and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)), as amended the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F-14837-EE, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, and small all-terrain vehicles (ATV's) (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

One Acre Site—The uses allowed on a one (1) acre site easement are: vehicle parking (e.g., aircraft, boats, ATV's, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours

a. (EIN 15 D9) An easement twenty-five (25) feet in width for an existing access trail from public lands in Sec. 32, T. 20 N., R. 3 E., Fairbanks Meridian, southerly to Beaver and then on to public lands south of Beaver. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement. The season of use will be limited to winter.

b. (EIN 16 C5) An easement twenty-five (25) feet in width for an existing access trail from the village of Beaver in Secs. 29 and 30, T. 18 N., R. 2 E.,

Fairbanks Meridian, southeasterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

c. (EIN 20 D1) An easement twenty-five (25) feet in width for an existing access trail from trail easement EIN 15 D9 in Sec. 20, T. 18 N., R. 2 E., Fairbanks Meridian, northwesterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

d. (EIN 25 E) An easement twenty-five (25) feet in width for a proposed access trail from trail easement EIN 20 D1 in Sec. 31, T. 19 N., R. 2 E., Fairbanks Meridian, southwesterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement. The season of use will be limited to winter.

e. (EIN 26a E) An easement twenty-five (25) feet in width for a proposed access trail from site easement EIN 26b E in Sec. 6, T. 18 N., R. 3 E., Fairbanks Meridian, northwesterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

f. (EIN 26b E) A one (1) acre site easement upland of the ordinary high water mark in Sec. 6, T. 18 N., R. 3 E., Fairbanks Meridian, on the right bank of Jack Uheen Slough. The uses allowed are those listed above for a one (1) acre site easement.

g. (EIN 27a E) A one (1) acre site easement upland of the ordinary high water mark in Sec. 27, T. 18 N., R. 1 E., Fairbanks Meridian, on the right bank of Joe Guay Slough. The uses allowed are those listed above for a one (1) acre site easement.

h. (EIN 27b E) An easement twenty-five (25) feet in width for a proposed access trail from Joe Guay Slough in Sec. 27, T. 18 N., R. 1 E., Fairbanks Meridian, northwesterly to public land. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official plat of survey confirming the boundary description and acreage of the lands hereinabove granted;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (48 U.S.C. Ch. 2, Sec. 6(g))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)(2)) (ANCSA), as amended, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law; and

3. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(c)), as amended, that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

Beaver Kwit'chin Corporation is entitled to conveyance of 92,160 acres of land selected pursuant to Sec. 12(a) of ANCSA. The total acreage conveyed or approved for conveyance is approximately 81,235 acres. The remaining entitlement of approximately 10,925 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of ANCSA and Departmental regulation 43 CFR 2652.4, conveyance of the subsurface estate shall be issued to Doyon, Limited when the surface estate is conveyed to Beaver Kwit'chin Corporation, and shall be subject to the same conditions as the surface conveyance, except for those provisions under Sec. 14(c) of ANCSA; also the right to explore, develop, or remove mineral materials from the subsurface estate in lands within the boundaries of the Native village of Beaver shall be subject to the consent of Beaver Kwit'chin Corporation.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in the FAIRBANKS DAILY NEWS-MINER.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E, as revised. However, pursuant to Pub. L. 96-487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANSCA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 25, 1982, to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

BILLING CODE 4310-84-M

Wyoming; Grazing Management in the Grass Creek Resource Area; Availability of Final Environmental Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Availability of final environmental impact statement.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, notice is hereby given that the Bureau of Land Management, U.S. Department of the Interior, has prepared a final environmental impact statement on grazing management in portions of Park, Hot Springs, Big Horn and Washakie Counties, Wyoming, and has made copies of the document available for public review and comment.

The Bureau of Land Management proposes to continue to allow livestock

grazing on 966,000 acres of public land in the Grass Creek Resource area, Worland District, Wyoming. The proposal is to manage grazing allotments at different levels of intensity to maintain present conditions, improve present conditions or prevent deterioration of present conditions. Proposed actions include changing grazing treatments and seasons of use, adjustments in use levels, and providing additional grazing management facilities and land treatments. Four alternatives (No Change, No Livestock Grazing, Optimize Livestock Grazing and Manage for Other Than Grazing Use) are analyzed along with the proposed action. The affected environment is described, and the environmental impacts are documented.

FOR FURTHER INFORMATION CONTACT: John Moorhouse, Team Leader, Bureau of Land Management, Box 119, Worland, Wyoming 82401, telephone (307) 347–6151.

Paul M. Andrews,

District Manager.

Fish and Wildlife Service

Endangered Species Permit; Receipt of Applications

The applicants listed below wish to conduct certain activities with endangered species:

Applicant: Miami-Metrozoo, Miami, FL—PRT 2-9048

The applicant requests a permit to import two male and three female captive-bred Eld's deer (*Cervus eldi*) from the Leipzing Zoological Garden, German Democratic Republic for enhancement of propagation.

Applicant: Tennessee Valley Authority, Knoxville, TN—PRT 2-9575

The applicant request an amendment to his permit to allow the take of any endangered mussel species encountered in the Duck River while collecting *Conradilla caelata*. TVA would hold these specimens in a secure location until issues surrounding Columbia Reservoir are resolved.

Humane care and treatment during transport, if applicable, has been indicated by the applicants.

Documents and other information submitted with these applications are available to the public during normal business hours in Room 601, 1000 N. Glebe Rd., Arlington, Virginia, or by writing to the U.S. Fish & Wildlife Service, WPO, P.O. Box 3654, Arlington, VA 22203.

Interested persons may comment on these applications within 30 days of the date of this publication by submitting written data, views, or arguments to the above address. Please refer to the file number when submitting comments.

Dated: September 21, 1982.

INTERSTATE COMMERCE COMMISSION

[Volume No. 13]

Motor Carriers; Applications, Alternate Route Deviations, and Intrastate Applications

Motor Carrier Alternate Route Deviations; Notice

The following letter-notices to operate over deviation routes for operating convenience only have been filed with the Commission under the Deviation Rules—Motor Carrier of Passengers (49 CFR 1042.2(c)(9)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of this **Federal Register** notice.

Each applicant states that there will be no significant effect on either the quality of the human environment or energy policy and conservation.

Motor Carriers of Passengers

MC 61599 (Deviation No. 16), TRAILWAYS SOUTHEASTERN LINES, INC., 1500 Jackson Street, Dallas, TX 75201, filed September 8, 1982. Carrier proposes to operate as a *common carrier,* by motor vehicle, of *passengers and their baggage,* and *express and newspapers* in the same vehicle with passengers, over a deviation route as follows: From Ft. Jackson, SC over US Hwy 378 to Sumter, SC, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From Ft. Jackson, SC over SC Hwy 12 to junction US Hwy 601, then over US Hwy 601 to Camden. From Camden over US Hwy 521 to junction SC Hwy 12, then over SC Hwy 12 to the Kershaw-Sumter County line, then over SC Hwy 43 to Sumter-Lee County line, then over SC Hwy S–31–68 to the Lee-Sumter County line, then over SC Hwy 43 to junction US Hwy 521, then over US Hwy 521 to Sumter, SC, and return over the same route.

MC 61599 (Deviation No. 17), TRAILWAYS SOUTHEASTERN LINES, INC., 1500 Jackson Street, Dallas, TX 75201, filed September 13, 1982. Carrier proposes to operate as a *common carrier,* by motor vehicle, of *passengers and their baggage,* and *express* and *newspapers* in the same vehicle with passengers, over a deviation route as follows: From Orangeburg SC over US Hwy 21 to its junction with Interstate Hwy 95, then over Interstate Hwy 95 to junction US Hwy 17, then over US Hwy 17 to Ridgeland, SC, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From Orangeburg, SC over SC Hwy 601 to Hampton, SC, then over US Hwy 278 to Ridgeland, SC, and return over the same route.

By the Commission.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Volume No. OP1–159

Decided: September 20, 1982.

By the Commission, Review Board No. 1, Members Parker, Chandler and Fortier. Member Parker not participating.

MC 128270 (Sub-53), filed August 16, 1982. Applicant: REDIEHS EXPRESS, INC. 1477 Ripley Street, Lake Station, IN 46405. Representative: Richard A. Kerwin, 180 North La Salle Street, Chicago, IL 60601–2897, (312) 332–5106. Transporting, for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), between points in the U.S. (except AK and HI).

MC 163680 (Sub-1), filed September 3, 1982. Applicant: TRANSPORT AMERICA, INC., 808 S. Joliet Street, Joliet, IL 60436. Representative: James C. Hardman, 33 N. LaSalle Street, Chicago, IL 60602, (312) 236–5944. Transporting *general commodities,* between Dillsburg,

Gifford, Penfield, Potomac and Armstrong, IL, on the one hand, and, on the other, points in the U.S. (except AK and HI). Conditions: (1) To the extent that any certificate issued in this proceeding authorizes the transportation of explosives, it shall expire 5 years from its date of issuance; and (2) The person or persons who appear to be engaged in common control of another regulated carrier must either file an application under 49 U.S.C. 11343 or submit an affidavit indicating why such approval is unnecessary to the Secretary's office. In order to expedite issuance of any authority please submit a copy of the affidavit or proof of filing the applications for common control to team 1, room 2426.

Note.—The purpose of this application is to substitute motor carrier for abandoned rail carrier service.

Please direct status inquiries about the following to Team 2 (202) 275–7030.

Volume No. OP2–228

Decided: September 16, 1982.

By the Commission, Review Board Number 1, Members Parker, Chandler and Fortier.

MC 163802, filed September 10, 1982. Applicant: A. L. LOPEMAN TRUCKING, P.O. Box 68, 105 E. Henry St., Atkinson, IL 61235. Representative: A. L. Lopeman (same address as applicant) 309–936–7982. Transporting *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners*, by the owner of the motor vehicle, in such vehicle, between points in the U.S. (except AK and HI).

Please direct status inquiries about the following to Team 4 (202) 275–7669.

Volume No. OP4–336

Decided: September 17, 1982.

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing.

W 1347 (Sub-1), filed August 30, 1982. Applicant: CARGO CARRIERS, INCORPORATED, P.O. Box 9300, Minneapolis, MN 55440. Representative: Gerald W. Brown, (same address as applicant) (612) 475–6756. To operate as a *contract carrier*, by water, by non-self-propelled vessels with the use of separate towing vessels in the transportation of *steel and metal articles*, between ports and points along inland waterways between Minneapolis, MN, Houston, TX, and Tulsa, OK, under continuing contract(s) with North Star Steel Company, of Minneapolis, MN.Conditions: (1) This is a major regulatory action and requires preparation of a statement of energy impact under the provisions of 49 CFR 1106.5(a)(8). Accordingly, applicant must submit the information required by 49 CFR 1106.7(a). Upon submission of such information, an appropriate statement of energy impact will be prepared; and (2) This application contemplates operations which should result in decreased energy consumption in comparison with existing energy consumption in the affected area. To the extent traffic will be diverted from existing transportation modes, greater energy efficiencies may be obtained without disruption to existing patterns of energy distribution or to development of energy resources. The application is, in all respects, consistent with prevailing goals and objectives of the National Energy Policy.

W 1356, filed August 24, 1982, previously noticed in the **Federal Register** issue of September 14, 1982, and republished this issue. Applicant: CONSOLIDATED GRAIN AND BARGE COMPANY, 101 Merchants Exchange Bldg., 5100 Oakland Ave., St. Louis, MO 63110. Representative: Peter A. Greene, 1920 N St., N.W., Suite 700, Washington, DC 10026, (202) 331–8800. Transporting, by water, by non-self-propelled vessels with the use of separate towing vessels, *general commodities*, and by towing vessels in the performance of *general towage*, between ports and points on the Cumberland, Tennessee, Ohio, Missouri, Mississippi, Arkansas, Mobile, Alabama, Tombigbee, Black Warrior, and Illinois Rivers; the Illinois Waterway; Lake Michigan between Chicago, IL and Burns Harbor, IN; the Gulf of Mexico and the Gulf Intracoastal Waterway between Brownsville, TX and Apalachicola, FL, and tributary and connecting waterways and channels.

Note.—The purpose of this republication is to correct the commodity description.

MC 150927 (Sub-3), filed September 3, 1982. Applicant: HORIZON TRANSPORT, INC., P.O. Box 20648, Portland, OR 97220. Representative: Michael D. Crew, 1618 SW 1st Ave., Suite 205, Portland, OR 97201, (503) 221–1529. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI).

MC 151067 (Sub-2), filed September 3, 1982. Applicant: TWILIGHT TRUCKING, LTD., 4303—76 Ave., Edmonton, Alberta, Canada T6B 2N3. Representative: Dale G. Thiessen, (same address as applicant) (403) 468–4062. Transporting *detergents*, between the ports of entry on the International Boundary line between the U.S. and Canada in MT, ID, and WA, on the one hand, and, on the other, points in CA, OR, WA, and TX.

MC 152447 (Sub-1), filed September 3, 1982. Applicant: OPIES' MILK HAULERS, INC., Highway 52 West, P.O. Box 88, Eldon, MO 65026. Representative: James C. Swearengen, P.O. Box 456, Jefferson City, MO 65102, (314) 635–7166. Transporting *commodities in bulk*, between points in Jasper County, MO, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 162417, filed September 1, 1982. Applicant: NAAMAN GERSHOWITZ, INC., Aden Rd., Liberty, NY 12754. Representative: George Gershowitz, (same address as applicant), (914) 292–4485. Transporting *passengers and their baggage*, in special and charter operations, in round-trip sightseeing and pleasure tours, beginning and ending at points in Sullivan County, NY, and extending to points in NJ, CT, MA, and PA.

MC 163687, filed September 2, 1982. Applicant: ALL SOUTHERN TRANSPORT, INC., 307 N.W. 3rd St., Ocala, FL 32670, Representative: Frank C. Amatea, P.O. Box 1147, Ocala, FL 32678, (904) 732–4740. Transporting *General Commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S., under continuing contract(s) with Kimco of Ocala, Inc., of Ocala, FL.

MC 163707, filed September 2, 1982. Applicant: DIRECT CARTAGE CO., INC., P.O. Box 29014, 11311 Stemmons Freeway, Dallas, TX 75229, Representative: Thomas J. O'Brien, 234 Mt. Pleasant Ave., Ambler, PA 19002, (215) 646–6220. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in LA, OK, and TX, under continuing contract(s) with Intermodal Brokerage Services Inc., of Norcross, GA.

BILLING CODE 7035–01–M

[Amendment No. 3]

Section 5a (49 U.S.C. 10706) Application No. 106; Household Good Forwarders Tariff Bureau Agreement

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional approval of amendment.

SUMMARY: Provisional approval under the tenets of 49 U.S.C. 10706(c) of non-substantive amendments to rate agreement is granted to the Household Goods Forwarder Tariff Bureau, on behalf of its member carriers. This approval may be revoked if, upon protest, the Commission issues a decision finding the amendment(s) inconsistent the National Transportation Policy.

This amendment may be inspected at the Public Docket Room, Office of the Secretary, Interstate Commerce Commission, Washington, DC.

DATES: Protests should be filed on or before October 14, 1982. A reply may be filed by October 29, 1982.

ADDRESS: Protests (an original and 7 copies) should be addressed to: Interstate Commerce Commission, Office of Proceedings, Room 5356, 12th & Constitution Ave., NW., Washington, DC 10423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278, or Tom Smerdon, (202) 275–7277.

SUPPLEMENTARY INFORMATION: On March 22, 1982, the Household Goods Forwarders Tariff Bureau (HGFT), on behalf of its member carriers, filed an application for approval of amendments to the by-laws of its agreement between its members.[1] These amendments were adopted by HGFT's Executive Committee on August 27, 1981, pursuant to a review of HGFT's operations by Commission field staff. HGFT proposes to (1) modify the definition of dues paying members to reflect Commission practices with regard to the 50-State territorial scope of household goods freight forwarder authority; (2) authorize its president to select the date and place of HGFT's annual meeting; and (3) establish quorum rules for its meetings whereby 30 percent of its members in good standing will constitute a quorum at annual or special meetings at which rates, rules or classifications are discussed or considered. At all other meetings, a quorum shall consist of the members present in good standing.

The first two proposed amendments are consistent with Commission practice. The final amendment concerning quorum rules is consistent with the standards and procedures announced in Ex Parte No. 297 (Sub-No. 5), *Motor Carrier Rate Bureau—Implementation of Pub. L. 96–296*, 364 I.C.C. 464 (1980) and our subsequent decision in that proceeding making certain pertinent modifications at 364 I.C.C. 921 (1981). Although that proceeding pertains to motor carriers, we believe its quorum requirements are also reasonable for household goods freight forwarders.

Provisional approval under the tenets of 49 U.S.C. 10706(c) of the non-substantive amendments is granted.

---

[1] The original agreement was approved in Section 5a Application No. 106, *Household Goods Forwarders—Agreement*, (not printed) decided April 25, 1972, as amended by Order served May 7, 1973. HGFT has no other pending applications for approval of amendments to its agreement.

This approval may be revoked if an interested party demonstrates that it is inconsistent with the National Policy and we issue a decision withdrawing approval. Pleadings must be served on all parties.

This decision will not significantly affect the quality of the human environment or the conservation of energy resources.

(49 U.S.C. 10706)

Dated: September 16, 1982.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Volume No. 297]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: September 20, 1982.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR 1137. Part 1137 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Canadian Carrier Applicants

In the event an application to transport property, filed by a Canadian domiciled motor carrier, is unopposed, it will be reopened on the Commission's own motion for receipt of additional evidence and further consideration in light of the record developed in Ex Parte No. MC-157, *Investigation Into Canadian Law and Policy Regarding Applications of American Motor Carriers For Canadian Operating Authority.*

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Shaffer, Williams, and Higgins.

Agatha L. Mergenovich,

Secretary.

MC 95398 (Sub-1)X, filed September 13, 1982. Applicant: WM. B. KENT & SONS, INC., 550 Turnpike St., North Andover, MA 01845. Representative: Frank J. Weiner, 15 Court Square, Boston, MA 02108. Lead certificate: (1) Broaden household goods to "household goods and furniture and fixtures"; and (2) expand North Andover, MA and points in Massachusetts within 10 miles of North Andover, MA to points in Essex and Middlesex Counties, MA.

MC 111651 (Sub-20)X, filed September 8, 1982. Applicant: MIDDLEWEST FREIGHTWAYS, INC., 6801 Prescott Ave., St. Louis, MO 63147. Representative: Frank W. Taylor, Jr., 1221 Baltimore Ave., Ste. 600, Kansas City, MO 64105. Subs 1, 3, 5, 8, 9, 12 and 17 certificates: (A) Broaden to general commodities (except classes A and B explosives, household goods and commodities in bulk) from "packed, bagged or crated commodities" over a specified regular route between Kansas City, MO, and Wichita, KS, to render authority consistent with authorized "general commodities" service to intermediate and off-route points, Sub 1; (B) remove (1) all restrictions in its general commodity authority except "classes A and B explosives, household goods and commodities in bulk", Subs 1, 3, 5, 8, 9, 12 and 17; (2) intermediate point restrictions, to authorize service at all intermediate points on its regular routes, Subs 1 and 3; (3) "site and/or supply point" restriction, Subs 3, 8, 9 and 12, (C) broaden off-route point authority to county-wide authority: Jefferson, Bullit and Oldham Counties, KY and Harrison, Floyd and Clark Counties, IN (points within 5 miles of Louisville, KY), Sub 3.

MC 126605 (Sub-6)X, filed September 8, 1982. Applicant: BEAVER'S DUMP TRUCK SERVICE, INC., Route 3, Box 338, Live Oak, FL 32060. Representative: Sol H. Proctor, 1101 Blackstone Building, Jacksonville, FL 32202. Lead certificate, broaden (1)(a) sand to "clay, concrete, glass or stone products," (b) limestone and limestone products to "ores and minerals," and (c) fertilizer and fertilizer materials to "chemicals and related products"; (2) to countywide authority: Cook, Lowndes, Thomas and Tift Counties, GA (Adel, Valdosta, Lake Park, Thomasville, and Tifton), and Jefferson and Madison Counties, FL (Monticello and Madison); (3) from one-way authority to radial authority; and (4) eliminate "dry, in bulk, in dump vehicles" restrictions.

MC 143708 (Sub-9)X, filed September 1, 1982. Applicant: DUNES TRANSPORT, INC., 3965 North Meridian St., Indianapolis, IN 46208. Representative: Warren C. Moberly, 777 Chamber of Commerce Building, Indianapolis, IN 46204. Sub 3F certificate, broaden (1) commodity description to "such commodities as are dealt in or used by manufacturers and distributors of food and related products," from such commodities as are dealt in or used by manufacturers and distributors of bakery products; and (2) from plantsites to citywide authority: Fremont, Indianapolis and Lake Station, IN (facilities at Fremont, Indianapolis, and Lake Station).

BILLING CODE 7035-01-M

[Ex Parte No. 290 (Sub-2)]

Railroad Cost Recovery Procedures

AGENCY: Interstate Commerce Commission.

ACTION: Notice of approval of railroad cost index.

SUMMARY: The Commission has decided to approve the cost index filed by the Association of American Railroads (AAR) under the procedures of Docket Ex Parte No. 290 (Sub-No. 2), *Railroad Cost Recovery Procedures.* The application of this index provides for a Rail Cost Adjustment Factor (RCAF) of 1.159. This RCAF when compared to the third quarter RCAF of 1.159 shows no change in total railroad input prices. It remains below the RCAF of 1.177 published for the first quarter 1982. No rate actions will be ordered.

EFFECTIVE DATE: September 24, 1982.

FOR FURTHER INFORMATION CONTACT: Robert C. Hasek (202) 275–0938; Tom Smerdon (202) 275–7277.

SUPPLEMENTARY INFORMATION: By decision served April 17, 1981 (46 FR 22594, April 20, 1981), we outlined the procedures for calculation of the interim Mid-Quarter Index of railroad costs and the methodology for computing the Rail Cost Adjustment Factor. We also decided to require the AAR, no later than 20 days before the end of each quarter, to calculate and submit to the Commission the mid-quarter index.

We have received AAR's calculations of the mid-quarter index and have found that these calculations comply with the guidelines outlined in our decision served April 17, 1981.

The indices derived from these calculations are shown in the table below.

Interim Mid-quarter Index

Category	1980 weight (percent)	2d quarter 1982 actual	3d quarter 1982 forecast	4th quarter 1982 forecast
Salaries, wages and supplements	47.8	123.9	129.6	129.5
Fuel	12.3	106.0	111.0	111.7
Materials and supplies	12.2	109.0	108.1	107.9
Other expenses	28.3	111.1	111.2	111.2
Weighted Average:				
A–1980=100		116.3	119.0	119.0
B–10/1/80=100[1] (rail cost adjustment factor)		113.2	115.9	115.9

[1] Weighted average 10/1/80=102.7

Based on the above figures, we conclude that the Third Quarter 1982 Rail Cost Adjustment Factor (RCAF) remains at 1.159 and that the Fourth Quarter 1982 RCAF is also 1.159.

This decision will not significantly affect the quality of the human environment or conservation of energy resources. Although this proceeding is not subject to Public Law 96–354, it is our opinion that it will not have a significant adverse impact on a substantial number of small entities.

(49 U.S.C. 10321, 10707a, 5 U.S.C. 553)

Dated: September 16, 1982.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 82-26312 Filed 9-23-82; 8:45 am]

BILLING CODE 7035-01-M

[Finance Docket No. 30025]

Rail Carriers; Norfolk and Western Railway Co. and Wabash Railroad Co.—Amendment of Lease—Exemption

September 20, 1982.

Petitioner, the Norfolk and Western Railway Company (N&W), was authorized in *Norfolk & W. Ry. and New York, C. St. L. Ry. Merger,* 324 I.C.C. 1 (1964), to lease the properties of petitioner, the Wabash Railroad Company (Wabash) for an eight year period. The Commission has twice approved eight year extensions of the lease period, with the last commencing October 16, 1980.

Section 4 of the N&W's lease with the Wabash provides that the N&W shall make certain rental payments to the Wabash according to a specified formula. Subsection (11) of section 4 permits adoption of a new formula if any changes are made to, or in, the common stock of N&W as a result of any merger, consolidation, or reorganization involving the N&W.

On June 1, 1982, N&W and the Southern Railway Company (Southern) were consolidated under the common control of Norfolk Southern Corporation (NCS). Each share of N&W's outstanding common stock was converted to one share of common stock in NSC. In view of this change, the N&W and the Wabash propose, pursuant to section 4 (11) of the involved lease agreement, to modify the existing formula for determining the rental payments paid to the Wabash by the N&W. To the extent that the amount of these payments has been based upon the amount of the dividend paid by the N&W prior to its consolidation with the Southern, it would now be based upon the amount of the dividend paid by the NSC.

N&W and Wabash have also agreed to modify their lease agreement so that the rental payments, which have been calculated with reference to allowances for depreciation and retirements, as prescribed by this Commission, would now be calculated with reference to the deductions for depreciation and retirements allowed under Federal tax laws. This change takes into account certain provisions of the Economic Recovery Tax Act of 1981, which make it possible for the Wabash to obtain the maximum benefit from the deductions involved.

The N&W controls the Wabash through its ownership of 99 percent of Wabash common stock and 2.1 percent of Wabash preferred stock. The proposed changes in the lease agreement are minor in nature and will not result in any changes in service levels or operations, nor will they affect the existing competitive scheme.

By petition filed August 20, 1982, the N&W and the Wabash seek an exemption under 49 U.S.C. 10505 of the proposed modification. Since it would be a transaction wholly within a corporate family that would not result in adverse changes in service levels, significant operational changes, or a change in the competitive balance with carriers outside the corporate family, the proposal is exempt pursuant to 49 CFR 1111.2(d)(3). See *Railroad Consolidation Procedures,* 366 I.C.C. 75, 94 (1982). As a condition to the use of this exemption, any rail employees affected by the described modification of the lease shall be protected pursuant to *Mendocino Coast Ry., Inc.-Lease and Operate,* 354 I.C.C. 732 (1978) and 360 I.C.C. 653 (1980). This will satisfy the statutory requirements of 49 U.S.C. 10505(g)(2).

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

Agency Forms Under Review

September 21, 1982.

OMB has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. The list has all the entries grouped into new forms, revisions, extensions, or revisions. Each entry contains the following information:

(1) The name and telephone number of the Agency Clearance Officer (from whom a copy of the form and supporting documents is available); (2) The office of the agency issuing this form; (3) The title of the form; (4) The agency form number,

if applicable; (5) How often the form must be filled out; (6) Who will be required or asked to report; (7) An estimate of the number of responses; (8) An estimate of the total number of hours needed to fill out the form; (9) An indication of whether Section 3504(H) of Pub. L. 96–511 applies; (10) The name and telephone number of the person or office responsible for OMB review.

Copies of the proposed forms and supporting documents may be obtained from the Agency Clearance Officer whose name and telephone number appear under the agency name. Comments and questions about the items on this list should be directed to the reviewer listed at the end of each entry and to the Agency Clearance Officer. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer and the Agency Clearance Officer of your intent as early as possible.

Department of Justice

Agency Clearance Officer Larry E. Miesse—202–633–4312.

Extension (Adjustment to Burden Only)

- Immigration and Naturalization Service, Department of Justice

Agreement by Transportation Line to Assume Responsibility for Removal of Aliens.
Nonrecurring
Businesses or other institutions (except farms)
Transportation lines bringing aliens to the U.S.: 6,000 responses; 720 hours; not applicable under 3504(h).
Andy Uscher—395–4814

Extension (No Change)

- Immigration and Naturalization Service, Department of Justice

Application to File Declaration of Intention (Immigrants).
Nonrecurring
Individuals or households
Permanent resident aliens over 18 years of age: 5,000 responses; 2,500 hours; not applicable under 3504(h).

DEPARTMENT OF LABOR

Employment and Training Administration

Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period September 13, 1982–September 17, 1982.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In the following case the investigation revealed that criterion (3) has not been met. Increased imports did not contribute importantly to workers separations at the firm.

TA–W–13,158; Zenith Radio Corp., Chicago, IL, Plant #6

Affirmative Determinations

TA–W–13,156; Zenith Radio Corp., Chicago, IL, Plant #1

A certification was issued in response to a petition received on December 17, 1981 covering all workers separated on or after December 28, 1981.

TA–W–13,157; Zenith Radio Corp., Chicago, IL, Plant #2

A certification was issued in response to a petition received on December 17, 1981 covering all workers separated on or after December 28, 1981.

I hereby certify that the aforementioned determinations were issued during the period September 13, 1982–September 17, 1982. Copies of these determinations are available for inspection in Room 10,332, U.S. Department of Labor, 601 D Street, NW., Washington, D.C. 20213 during normal business hours or will be mailed to persons who write to the above address.

Dated: September 21, 1982.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Dismissals of Applications for Reconsideration of Negative Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

Pursuant to 29 CFR 90.18 applications for administrative reconsideration were filed with the Director of the Office of Trade Adjustment Assistance in the cases listed below. In each case, the review indicated that the applications contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissals of the applications were issued.

TA–W–12,599; Superior Shake Company, Concrete, WA
Dated: September 13, 1982: Harold A. Bratt, Acting Deputy Director, Office of Program Management, Unemployment Insurance Service

TA–W–12,488; Westclox U.S., Yadkinville, NC
Dated: September 13, 1982: Harold A. Bratt, Acting Deputy Director, Office of Program Management, Unemployment Insurance Service

I hereby certify that the aforementioned determinations were issued on September 13, 1982. Copies of these determinations are available for inspection in Room 10,332, U.S. Department of Labor, 601 D Street, NW., Washington, D.C. 20213 during normal business hours or will be mailed to persons who write to the above address.

Dated: September 21, 1982.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 4, 1982.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 4, 1982.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, N.W., Washington, D.C. 20213.

Signed at Washington, D.C., this 20th day of September 1982.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Occupational Safety and Health Administration

Advisory Committee on Construction Safety and Health; Meeting

Notice is hereby given that the Advisory Committee on Construction Safety and Health, established under section 107 (e)(1) of the Contract Work Hours and Safety Standards Act (40 U.S.C. 333) and section 7(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656) will meet on October 13–14, 1982 in Room S–4215, Frances Perkins Department of Labor Building, Washington, D.C. The meeting is open to the public and will begin at 9:00 a.m.

The agenda for this meeting will include the swearing in of new members, updates on safety and health standards activities, a review of a draft proposal for the revision of Subpart P—Trenching and Excavation, and a general discussion of construction safety and health matters.

Written data, views or comments may be submitted, preferably with 20 copies, to the Division of Consumer Affairs. Any such submissions received prior to the meeting will be provided to the members of the Committee and will be included in the record of the meeting.

Anyone wishing to make an oral presentation should notify the Division of Consumer Affairs before the meeting. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the content of the presentation.

Oral presentations will be scheduled at the discretion of the Chairman depending on the extent to which time permits. Communications may be mailed to: Ken Hunt, Committee Management Officer, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room N–3635, Washington, D.C. 20210, telephone 202–523–8024.

Materials provided to members of the Committee are available for inspection and copying at the above address.

Signed at Washington, D.C., this 20th day of September 1982.

Thorne G. Auchter,

Assistant Secretary.

BILLING CODE 4510-26-M

Puerto Rico State Standards; Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State Plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On August 30, 1977, notice was published in the **Federal Register** (42 FR 43628) of the approval of the Puerto Rico plan and the adoption of Subpart FF to Part 1952 containing the decision.

The Puerto Rico plan provides for the adoption of Federal standards as State standards by reference. Section 1953.20 29 CFR provides that "where any alteration in the Federal program could have an adverse impact on the 'at least as effective as' status of the State program, a program change supplement to a State plan shall be required." In

response to Federal standards changes, the State has submitted by letter dated June 9, 1982 from Assistant Secretary John Cinque to Regional Administrator Roger A. Clark, and incorporated as part of the plan, State standards comparable to the Occupational Safety and Health Administration final standards for Guarding of Low-Pitched-Roof Perimeters During the Performance of Built-Up Roofing Work, as published in the **Federal Register** (45 FR 75618) dated November 14, 1980; Electrical standards, as published in the **Federal Register** (46 FR 4034) dated January 16, 1981; and by letter dated July 12, 1982, Electrical standards—corrections, as published in the **Federal Register** (46 FR 40183) dated August 7, 1981; Occupational Noise Exposure; Hearing Conservation Amendment, as published in the **Federal Register** (46 FR 4078) dated January 16, 1981, with corrections as published in the **Federal Register** (46 FR 42622) dated August 21, 1981. These standards which are contained in the Puerto Rico Regulations, Number Four (equivalent to 29 CFR Part 1910) and Number Ten (equivalent to 29 CFR Part 1926) were promulgated by resolutions adopted by the Puerto Rico Department of Labor and Human Resources on February 12, 1982 and June 2, 1982, pursuant to the Puerto Rico Act Number 16 and Chapter 52 of the Puerto Rico Rules and Regulations Act of 1958.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards it has been determined that the State standards are identical to the Federal standards and accordingly are hereby approved.

3. *Location of supplement for inspection and copying.* A copy of the standard supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 3445, 1515 Broadway, New York, New York 10036; Puerto Rico Department of Labor and Human Resources, Prudencio Rivera Martinez Bldg., 505 Munoz Rivera Avenue, Hato Rey, Puerto Rico 00917; Office of the Director, Federal Compliance and State Programs, Occupational Safety and Health Administration, Room N3613, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

4. *Public Participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Puerto Rico State Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are identical to the Federal standards which were promulgated in accordance with Federal law meeting requirements for public participation.

2. The standards were adopted in accordance with the procedural requirement of State law and further participation would be unnecessary.

The decision is effective September 24, 1982.

(Sec. 18 Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at New York City, New York, this 10th day of August 1982.

Robert C. Hallock,

Acting Regional Administrator.

[FR Doc. 82-26402 Filed 9-23-82; 8:45 am]

BILLING CODE 4510-26-M

Office of Pension and Welfare Benefit Programs

[Application No. D-3498]

Proposed Exemption for Certain Transactions Involving the Smith, Barney Real Estate Fund Located in New York, New York

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt certain prohibited transactions between Smith, Barney Real Estate Fund (the Fund) and certain parties in interest with respect to the Fund, subject to specified conditions. The proposed exemption, if granted, would affect the Fund, employee benefit plans which participate in the Fund and their participants and beneficiaries, certain parties in interest with respect to the Fund, and any other persons participating in the proposed transactions.

DATES: Written comments and requests for a public hearing must be received by the Department on or before November 9, 1982.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. D-3498. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Mr. David Stander of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of certain sections of the Act and from certain sanctions resulting from the application of section 4975 of the Code. The proposed exemption was requested in an application filed on behalf of the trustees of the Fund (the Trustees), pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Preamble

On July 25, 1980, the Department published a class exemption, Prohibited Transaction Exemption 80-51 (PTE 80-51, 45 FR 49709), which permits collective investment funds that are maintained by banks and in which employee benefit plans participate to engage in certain transactions provided that specified conditions are met. The transactions for which the applicants have requested relief are those which are the subject of PTE 80-51.

The Department stated in PTE 80-51 that a comment had been received to the proposed class exemption requesting that it be amended to apply to collective

investment funds that are not maintained by banks. Relief was granted for bank collective investment funds because, among other reasons, such funds are regulated by other governmental agencies and constitute a well-defined class of funds. In the case of collective investment funds that are not maintained by banks, the Department found that the record was insufficient to determine the nature of the funds and the entities managing the funds that would comprise the class covered by such broad relief. As a result, the Department stated that it could not make the required statutory findings for such relief, and that relief for non-bank maintained collective investment funds should be dealt with on an individual rather than a class basis.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicants.

1. The Fund is a qualified group trust formed to provide qualified pension and profit-sharing plans (the Plans) with a medium for pooling a portion of their funds for investment in real estate and interests in real estate. The Internal Revenue Service has ruled that the Fund is qualified under section 401(a) of the Code and is exempt from Federal income tax under section 501(a) of the Code. The Fund was established under a written agreement of Trust (the Trust Agreement) dated October 1, 1976. A Plan's interest in the Fund is represented by Units and a participating Plan in the Fund is referred to as a Unitholder. As of June 30, 1982, there were 55 Unitholders participating in the Fund, and the total value of the Fund's assets was approximately $92,000,000.

2. Messrs. Jack L. Billhardt, Thomas J. Gochberg, John A. Orb, John A. Morgan, and J. Perry Ruddick currently serve as the Trustees of the Fund. The Trustees, in addition to performing certain administrative and ministerial functions, are solely responsible for accepting or rejecting participation in the Fund by a prospective Plan, for determining the net fair market value of the Fund's assets, and for determining the amount and time of distributions to Unitholders.

3. Pursuant to an agreement dated October 1, 1976 (the Agreement), Smith, Barney Real Estate Corporation (SBREC) serves as the investment manager of the Fund. SBREC, a New York corporation, was formed to provide advice and management in connection with real estate activities. Since its founding in 1969, SBREC has invested, on behalf of its clients, over $1 billion in over 150 properties. These investments have been primarily in multi-family residential properties, office buildings, shopping centers, and other commercial properties. Currently, SBREC has approximately 525 employees. SBREC is a wholly-owned subsidiary of SBHU Holdings Inc. (SBHU), and is a sister corporation of Smith Barney, Harris Upham & Co. Incorporated (Smith Barney).

4. SBREC has exclusive authority to exercise, on behalf of the Trustees, all of the powers necessary to acquire, manage and dispose of all of the Fund's investments. SBREC receives reasonable compensation for its services. Pursuant to the Agreement, SBREC does not permit the Fund to own or have any interest in any property in which an interest is owned or held by SBREC or any Trustee, or any entity controlled by or controlling SBREC or any Trustee, or any other individual, corporation or entity affiliated with SBREC or a Trustee, as described within the Fund documents. Neither SBREC nor any of its affiliates receive any real estate commissions, property acquisition fees, mortgage placement fees, property management fees or similar fees in connection with the Fund's acquisition, management or disposition of properties. The Trustees are not compensated by the Fund for serving as trustees, but receive compensation from SBREC and/or SBHU and/or Smith Barney for services performed in connection with their duties as officers and/or directors of those corporations.

5. The Fund instruments provide that only pension and profit-sharing trusts qualified under section 401 of the Code and exempt from taxation under section 501(a) of the Code may participate in the Fund. Each Unitholder executes an agreement (the Adoptive Agreement) causing the governing instrument of such Plan to be amended to incorporate the Trust Agreement. Neither the sponsor-employer of such Unitholder nor any of the trustees, administrators, officers or investment advisers of such sponsor-employer or its Plan have any right or power to control or in any way participate in the operation or management of the Fund.

6. The Fund will invest, except in unusual circumstances, only in income-producing properties. Such investments will be primarily in multi-family residential properties, shopping centers, office buildings and other commercial properties. The Fund intends to diversify its investments geographically throughout the continental United States. Income from the Fund, less expenses, is either reinvested in real estate or distributed to the Unitholders. Pending such reinvestment or distribution, cash assets of the Fund are invested in short-term government obligations. Similarly, capital contributions from new and existing Unitholders are similarly invested in short-term government obligations pending investment in real estate.

7. The fiduciaries of each Unitholder, who are independent of the Fund, will maintain complete discretion with respect to the investment in or redemption of Units from the Fund. In order to provide sufficient time for the orderly disposition of assets of the Fund, the Fund has up to two years and three months to redeem the interests of a requesting Unitholder. It is the intention of the Trustees of the Fund to honor a Unitholder's request for a withdrawal as soon as practicable.

8. Because each Unitholder will incorporate as part of such Plan the terms, provisions, and conditions of the Trust Agreement, the Fund will occupy a position equivalent to the trust created under such Unitholder. Accordingly, pursuant to Rev. Rul. 81-100, 1981-13 I.R.B. 32, it is the position of the Department that a "party in interest" or "disqualified person" as defined in the Act [1] with respect to a Unitholder may be viewed as a party in interest with respect to the Fund. Accordingly, a transaction between such party and the Fund may be viewed as a prohibited transaction as described in section 406(a) of the Act, section 4975(c) of the Code, or both. The applicants represent that if the Fund is unable to enter into transactions with certain persons because such persons are parties in interest with respect to Unitholders, the Fund's ability to prudently make its investments and conduct its operations solely for the benefit of the Unitholders will be unduly restricted. The applicants represent that such transactions, because of the nature of the Fund, are difficult to identify and control, but if entered into would be in the interests of the Funds, the Unitholders and their participants and beneficiaries.

9. The applicants request prospective exemptive relief for transactions between the Fund and parties in interest who maintain no formal authority over the management and investments of the Fund, when such transactions are necessary for the Fund to prudently make its investments and conduct its

[1] For purposes of this exemption the term "party in interest" shall include a disqualified person as defined in section 4975(e)(2) of the Code.

operations. The applicants request prospective exemptive relief for those classes of transactions between the Fund and certain parties in interest which were afforded exemptive relief in PTE 80–51. The applicants propose that such classes of transactions be subject to the identical conditions, limitations, and restrictions as those delineated with respect to the transactions afforded exemptive relief in PTE 80–51.

10. The applicants represent that because Units of the Fund constitute "securities" within the meaning of the Securities Act of 1933 (the 1933 Act), full and fair disclosure of information to investors in connection with the offer and sale of the Units is required. Full and fair disclosure is accomplished by either registration of the securities with the Securities and Exchange Commission (the Commission) or by satisfying the requirements for a private placement of such securities under section 4(2) of the 1933 Act.

11. In furtherance of the purposes of section 4(2), the Commission has promulgated Regulation D which exempts certain transactions meeting stated objective standards from the registration provisions of the securities laws. Generally, Regulation D provides an exemption where, among other things, a purchaser alone, or with his representative, has such knowledge and experience in financial and business matters that he is capable of evaluating the merits and risks of the prospective investment. Regulation D also requires that each issuer provide essentially the same kind of information as would be provided upon registration if the issuer believes such information is material, and that each purchaser generally possess or have access to the same kind of information that would have been available to them upon registration.

12. The Fund fully complies with the requirements of Regulation D (and its predecessor, Rule 146) at the time that Units are offered and sold to prospective Unitholders. As a means of ensuring that these requirements are satisfied, the Fund provides each Unitholder with an offering memorandum describing the Fund, forms of the Fund's Adoptive and Group Trust Agreements, recent reports regarding the Fund's activities, and financial statements describing the assets and liabilities of the Fund. In addition, the Fund requires that a prospective Unitholder's initial purchase of Units must be for at least $250,000. The investments of many Unitholders are substantially in excess of $250,000. The Trustees also make a determination, as required by Regulation D, whether a prospective Unitholder is sufficiently knowledgeable and experienced, or has advisers who have such knowledge and experience, to make the proper investment decision. In this regard, the Trustees are empowered to refuse the sale of Units to any prospective Unitholder if they determine that the prospective Unitholder lacks the sophistication necessary for investing in the Fund. A substantial majority of the Unitholders' investment advisers are banks, insurance companies or registered investment advisers. In addition, virtually all of the Unitholders are continually advised by accounting firms, actuarial firms and law firms.

13. The Fund also supplies Unitholders and their advisers with quarterly reports on the Fund's activities containing unaudited financial information, including a statement of the Fund's annual return and Unit value as of the beginning and end of each quarter, and a statement of current and proposed transactions and developments affecting the Fund and the Fund's investments. The annual report of the Fund includes financial information, audited by the Fund's independent certified public accountants, Arthur Andersen & Co., and includes a balance sheet for the Fund, a profit and loss statement for the Fund and a statement of changes in the Fund's financial position. These reports are audited and distributed to the Unitholders within 90 days after the end of the Fund's fiscal year. These reports also show, for the partcular year, all fees paid to SBREC, all purchases and sales of real estate, the amount of Unitholders' contributions and redemptions, and distributions to Unitholders.

14. Further, the Fund prepares and distributes to each Unitholder such other information as may be requested by Unitholders. The books and records of the Fund are available for examination by Unitholders at all times, and individual Unitholders on a regular basis arrange meetings with representatives of the Fund in order to review the Fund's financial results and to discuss current and proposed transactions of the Fund.

15. In summary, the applicants represent that the proposed exemption for certain transactions between the Fund and certain parties in interest satisfies the criteria of section 408(a) of the Act because: (a) The proposed exemption would allow the Fund to enter into transactions which, although prohibited, are necessary for the Fund to prudently make its investments and conduct its operations solely for the benefit of its Unitholders and their participants and beneficiaries; (b) the proposed exemption would only apply to those classes of prohibited transactions which were afforded relief in PTE 80–51 and would be subject to the identical conditions, limitations, and restrictions as those delineated with respect to the transactions afforded exemptive relief in PTE 80–51; (c) independent fiduciaries, unrelated to the Fund, the Trustees, SBREC, or any other related party maintain complete discretion with respect to investment in or redemption of Unitholders' assets from the Fund; and (d) such fiduciaries are knowledgeable and experienced investors acting on behalf of large Plans and are provided with detailed information on the Fund.

Notice to Interested Persons

Within 14 days after the publication in the **Federal Register** of the proposed exemption, the Fund will send by mail a copy of such proposed exemption to the fiduciaries of each Unitholder in the Fund. The Fund will also inform such fiduciaries of their right to comment and request a hearing within the time period set forth in the notice of proposed exemption.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the

exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interst in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975).

Section I. Exemption for Certain Transactions Involving the Fund

(a) Effective upon the date of publication in the **Federal Register** of the grant of this exemption (hereinafter, the Effective Date), the restrictions of sections 406(a), 406(b)(2) and 407(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (D) of the Code, shall not apply to the transactions described below if the applicable conditions set forth in Section III are met.

(1) *Transactions Between Parties-In-Interest and the Fund: General.*

Any transaction between a party-in-interest with respect to a Unitholder and the Fund, or any acquisition or holding by the Fund of employer real property, if the party-in-interest is not SBREC, any of its affiliates, or any other group trust managed by SBREC or any of its affiliates, and if, at the time of the transaction, acquisition or holding, the interest of the Unitholder, together with the interests of any other Unitholders maintained by the same employer or employee organization in the Fund, does not exceed 5 percent of the total of all assets in the Fund.

(2) *Special Transactions Not Meeting the Criteria of Section I(a)(1) Between Employers of Employees Covered by a Multiple Employer Plan and the Fund.*

Any transaction between an employer (or an affiliate of an employer) of employees covered by a multiemployer plan (as defined in section 3(37)(A) of the Act and section 414(f)(1) of the Code) that is a Unitholder and the Fund, or any acquisition or holding by the Fund of employer real property, if at the time of the transaction, acquisition or holding—

(A) The interest of the multiemployer plan in the Fund does not exceed 10 percent of the total assets in the Fund, and the employer is not a "substantial employer" with respect to the plan, or

(B) The interest of the multiemployer plan in the Fund exceeds 10 percent of the total assets in the Fund, but the employer is not a "substantial employer" with respect to the plan and would not be a "substantial employer" if "5 percent" were substituted for "10 percent" in the definition of "substantial employer."

(3) *Acquisitions, Sales or Holdings of Employer Real Property.*

(A) Except as provided in subsection (B) of this section (3), any acquisition, sale or holding of employer real property by the Fund which does not meet the requirements of paragraphs (a)(1) and (a)(2) of this Section I, if no commission is paid to SBREC or to the employer or to any affiliate of SBREC or the employer in connection with the acquisition, sale or lease of employer real property; and

(i) Each parcel of employer real property and the improvements thereon held by the Fund are suitable (or adaptable without excessive cost) for use by different tenants, and

(ii) The property of the Fund that is leased or held for lease to others, in the aggregate, is dispersed geographically.

(B) In the case of a Unitholder that is not an eligible individual account plan (as defined in section 407(d)(3) of the Act), the exemption provided in subsection (A) of this section (3) shall be available only if, immediately after the acquisition of the real property, the aggregate fair market value of employer real property held by the Fund does not exceed 10 percent of the fair market value of the Unitholder's interest in the Fund.

(C) For purposes of the exemption contained in subsection (A) of this section (3), the term "employer real property" shall include real property leased to a person who is a party-in-interest with respect to a Unitholder by reason of a relationship to the employer described in section 3(14)(E), (G), (H) or (I) of the Act.

(b) Effective upon the Effective Date, the restrictions of section 406(a)(1) (A), (B), (C), and (D) and section 406(b)(1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the transactions described below, if the conditions of Section III are met.

(1) *Transactions with Persons Who Are Parties in Interest With Respect to a unitholder Soley by Virtue of Being Certain Service Providers or Certain affiliates of Service Providers.*

Any transaction between the Fund and a person who in a party-in-interest with respect to a Unitholder if—

(A) The person is a party-in-interest (including a fiduciary) solely by reason of providing services to the Unitholder, or solely by reason of a relationship to a service provider described in section 3(14)(F), (G), (H) or (I) of the Act, or both, and the person neither exercised nor has any discretionary authority, control, responsibility or influence with respect to the investment of the Unitholder's assets in, or held by, the Fund, and

(B) The person is not an affiliate of SBREC.

(2) *Certain Leases and Goods.*

The furnishing of goods to the Fund by a party-in-interest with respect to a Unitholder or the leasing of real property owned by the Fund to such party-in-interest and the incidental furnishing of goods to such party-in-interest by the Fund, if—

(A) In the case of goods, they are furnished to or by the Fund in connection with real property owned by the Fund;

(B) The party-in-interest is not SBREC or any affiliate of SBREC; and

(C) The amount involved in the furnishing of goods or leasing of real property in any calendar year (including the amount under any other lease or arrangement for the furnishing of goods in connection with the real property investments of the Fund with the same party-in-interest, or any affiliate thereof) does not exceed the greater of $25,000 or 0.5 percent of the fair market value of the assets of the Fund on the most recent valuation date of the Fund prior to the transaction.

(3) *Management of Real Property.*

Any services provided to the Fund by SBREC or by an affiliate of SBREC in connection with the management of the real property owned by the Fund, if the compensation paid to SBREC or its affiliate does not exceed the cost of the services to SBREC or its affiliate.

(4) *Transactions Involving Places of Public Accommodation.*

The furnishing of services, facilities and any goods incidental to such services and facilities by a place of public accommodation owned by the Fund to a party-in-interest with respect to a Unitholder, if the services, facilities and incidental goods are furnished on a comparable basis to the general public.

Section II—Excess Holdings Exemption for Employee Benefit Plans

(a) Effective upon the Effective Date, the restrictions of sections 406(a), 406(b)(2) and 407(a) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)A) through (D) of the Code shall not apply to any acquisition or holding of qualifying employer real property (other than through the Fund) by a Participating Plan if (1) the acquisition or holding constitutes a prohibited transaction solely by reason of being aggregated with employer real property held by the Fund; (2) the requirements of either paragraph (a)(1) or paragraph (a)(2) of Section I of this exemption are met; and (3) the applicable conditions set forth in Section III of this exemption are met.

Section III—General Conditions

(a) At the time the transaction is entered into, and at the time of any subsequent renewal thereof that requires the consent of SBREC or its affiliate, the terms of the transaction are not less favorable to the Fund than the terms generally available in arm's-length transactions between unrelated parties.

(b) SBREC or its affiliate maintains for a period of six years from the date of the transaction the records necessary to enable the persons described in paragraph (c) of this Section III to determine whether the conditions of this exemption have been met, except that (1) a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of SBREC or its affiliate, the records are lost or destroyed prior to the end of the six-year period, and (2) no party in interest shall be subject to the civil penalty that may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975 (a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by paragraph (c) below.

(c)(1) Except as provided in section 2 of this paragraph (c) and nothwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (b) of this Section III are unconditionally available at their customary location for examination during normal business hours by: (A) any duly authorized employee or representative of the Department or the Internal Revenue Service,

(B) any fiduciary of a Unitholder who has authority to acquire or dispose of the interests in the Fund of the Unitholder or any duly authorized employee or representative of such fiduciary,

(C) any contributing employer to any Unitholder or any duly authorized employee or representative of such employer, and

(D) any participant or beneficiary of any Unitholder or any duly authorized employee or representative of such participant or beneficiary.

(2) None of the persons described in subparagraphs (B) through (D) of this paragraph (c) shall be authorized to examine the trade secrets of SBREC or any of its affiliates, or commercial or financial information which is privileged or confidential.

Section IV—Definitions and General Rules

For the purposes of this exemption,

(a) An "affiliate" of a person includes—

(1) any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person,

(2) any officer, director, employee, relative of, or partner in any such person, and

(3) any corporation or partnership of which such person is an officer, director, partner or employee.

(b) The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(c) The term "relative" means a "relative" as that term is defined in section 3(15) of the Act (or a "member of the family" as that term is defined in section 4975(e)(6) of the Code), or a brother, a sister, or a spouse of a brother or sister.

(d) The term "substantial employer" means for any plan year an employer (treating employers who are members of the same affiliated group, within the meaning of section 1563(a) of the Code, determined without regard to section 1563(a)(4) and (e)(3)(c) of the Code, as one employer) who has made contributions to or under a multiemployer plan for each of—

(1) the two immediately preceding plan years, or

(2) the second and third preceding plan years, equaling or exceeding 10 percent of all employer contributions paid to or under that plan for each such year.

(e) The time as of which any transaction, acquisition or holding occurs is the date upon which the transaction is entered into, the acquisition is made or the holding commences. In addition, in the case of a transaction that is continuing, the transaction shall be deemed to occur until it is terminated. If any transaction is entered into, or an acquisition is made, on or after the effective date of this exemption, or a renewal that requires the consent of the Fund occurs on or after the effective date of this exemption, and the requirements of this exemption are satisfied at the time the transaction is entered into or renewed, respectively, or at the time the acquisition is made, the requirements will continue to be satisfied thereafter with respect to the transaction or acquisition and the exemption shall apply thereafter to the continued holding of the property so acquired. Notwithstanding the foregoing, this exemption shall cease to apply to a holding exempt by virtue of Section I(a)(1) at such time as the interest of the Unitholder exceeds the percentage interest limitation of Section I(a)(1), unless no portion of such excess results from an increase in the assets allocated to the Fund by the Unitholder. For this purpose, assets allocated do not include the reinvestment of Fund earnings. Nothing in this paragraph (e) shall be construed as exempting a transaction entered into by the Fund which becomes a transaction described in section 406 of the Act or section 4975 of the Code while the transaction is continuing, unless the conditions of the exemption were met either at the time the transaction was entered into or at the time the transaction would have become prohibited but for this exemption.

(f) Each Unitholder shall be considered to own the same proportionate undivided interest in each asset of the Fund as its proportionate interest in the total assets of the Fund as calculated on the most recent preceding valuation date of the Fund.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and

that the application accurately describes all material terms of the transactions to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 20th day of September 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-3500]

Proposed Exemption for Certain Transactions Involving the Darby Graphics, Inc. Employees' Profit Sharing Plan and Trust Located in Chicago, Illinois

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security At of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the proposed loan by the Darby Graphics, Inc. Employees Profit Sharing Plan and Trust (the Plan) of the lesser of $175,000 or 40% of the Plan's assets to Citizens Bank and Trust Company (the Bank) as Trustee under Trust Agreement 66-4325 (Land Trust); and the guarantee of repayment by the principals of Rockwell Enterprise (Rockwell). The entire beneficial ownership under the Land Trust is held by Rockwell, a party in interest with respect to the Plan. The proposed exemption, if granted, would affect participants and beneficiaries of the Plan, the Land Trust, the Bank and Rockwell.

DATES: Written comments and request for a public hearing must be received by the Department on or before November 3, 1982.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. D-3500. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Alan H. Levitas of the Department, telephone (202) 523-8971. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the retrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code. The proposed exemption was requested in an application filed by the Plan's trustees, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procudures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975) Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Plan, which was established in 1967, is a profit sharing plan with 34 participants and total assets as of April 30, 1982 of $432,962. John H. Darby and Terry Stanton serve as co-trustees under the Plan. Darby Graphics, Inc. (the Employer) is an Illinois corporation which has been engaged in the printing business since 1964.

2. Rockwell is a joint venture composed of Terry Stanton, Donald J. Zirnite, Howard D. Gebel and Dennis J. Frantzsve (Principals), each of whom is an officer and/or director of the Employer.

3. On August 19, 1980, Rockwell purchased a parcel of improved real property located at 4015 N. Rockwell Street, Chicago, Illinois (the Property) for $325,000. The Property is improved with an industrial building containing approximately 27,000 square feet. Rockwell conveyed title to the Property to the Bank, but retained full beneficial interest in the resulting Land Trust.[1] The Land Trust has been leasing the Property to the Employer since July 1, 1981 (the Lease).

4. The Plan proposes to loan the Land Trust the lesser of $175,000 or 40% of the Plan's assets. The loan will be secured by a first mortgage on the Property and by an assignment of the Lease to the Plan. The loan is to be repaid in 180 equal monthly installments. The interest rate for the first 5 years of the loan will be 16¼%. On the fifth and tenth anniversaries of the loan the interest rate will be adjusted to the higher of 16¼% per annum or the interest rate for comparable loans prevailing in Cook County, Illinios, as determined by an independent fiduciary.

5. The Property was appraised by Donald F. Martorelli of Brandt Carlson Real Estate Appraisers of Park Ridge, Illinois, as having a fair market value of $350,000 as of April 22, 1982. Thus, the loan would represent only about 50% of the value of the improved real property that will secure it. The loan will also be secured by the personal guarantee of the Principals, whose net worth exceeds $3,000,000. The Land Trust represents that it will add any additional collateral that may be required during the life of the loan to assure that the value of the collateral is at all times equal to at least 150% of the outstanding balance of the loan. It is further represented that if the Land Trust has no additional collateral, the Employer will provide such additional collateral. During the life of the loan, the Land Trust will keep the Property insured for 100% of its full restoration or replacment cost against all risks, including fire, lightning, windstorm, hail and riot.[2] The proceeds of the insurance policies will be payable directly to the Plan.

6. Citizens Bank & Trust Company located in Park Ridge, Illinois, has represented that it would lend $175,000 to the Land Trust for 15 years at 16% per annum. The loan would be secured by a first mortgage on the Property.

7. The Trustees of the Plan will appoint William Zundel (Mr. Zundel), a Vice President and Controller for the National Association of Realtors, who is experienced in accounting, real estate investments and financing to serve as the independent fiduciary for the proposed loan. Mr. Zundel represents that he has been advised by legal counsel with regard to his duties, responsibilities and liabilities as independent fiduciary under the Act and

[1] The applicant represents that a land trust is a device commonly used in Illinois to hold naked title to real estate, the trustee acting upon direction of the beneficiary.

[2] The Lease (Article 6) specifies that the Employer will maintain the required insurance coverage.

that he is fully conversant with such responsibilities. Mr. Zundel has no other relationship with the Employer, Rockwell, the Land Trust or the Plan. Mr. Zundel, who will be responsible for making an independent determination that the proposed loan is appropriate and suitable for the Plan, has examined the terms of the proposed loan and has initially determined that the proposed loan is appropriate and suitable for the Plan. Mr. Zundel will be required to make the same determination immediately prior to consummation of the loan, as a condition to such consummation. Mr. Zundel represents that in addition to reviewing the specific terms and conditions of the proposed loan, he has: (a) examined the overall Plan investment portfolio; (b) considered the cash flow needs of the Plan; (c) given consideration to the necessity of a sale of any Plan assets; (d) examined the diversification of Plan assets in light of the proposed loan investment; and (e) reviewed the terms of the proposed loan as such terms comport with the Plan's investment scheme.

Mr. Zundel will be empowered and directed to enforce the terms of the loan agreements between the Plan, the Land Trust and the Principals, including making demand for timely payment, bringing suit or other appropriate process against the Land Trust and/or the Principals in the event of default, keeping accurate records and reporting at least annually to the Plan's trustees on the performance of the loan, specifically including whether the value of the collateral securing the loan remains equal to at least 150% of the outstanding loan balance. Mr. Zundel will be entitled to such information from the Land Trust, Principals and the Plan as may be reasonably necessary to fulfill his responsibilities and he shall be paid reasonable compensation plus reimbursement for reasonable expenses, if any, including legal or appraisal fees or costs, as agreed upon with the Plan's trustees.

8. In summary, the applicant represents that the proposed transactions meet the statutory criteria for an examption under section 408(a) of the Act because (a) the Plan will receive at least 16¼% interest on its investment, which is greater than the rate proposed by an unrelated party, (b) the Land Trust will insure the collateral and add additional collateral so that the value of collateral securing the loan is always at least 150% of the outstanding balance of the loan, and (c) the loan will be approved by and will be administered by an independent fiduciary.

Notice to Interested Persons

Within 10 days after the notice of pendency is published in the Federal Register, notice will be given to all Plan participants and beneficiaries by mail, personal delivery, or by posting on employee bulletin boards at the employer's premises which are customarily used for notices to employees. Such notice shall include a copy of the notice of pendency of the exemption as proposed in the Federal Register and shall inform interested persons of their right to comment and request a hearing within the time period set forth in the notice of proposed exemption.

General Information

The attention of interested persons is directed to the following:

(1) the fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed loan by the Plan to the Land Trust for the lesser of $175,000 or 40% of the Plan's assets, based on the terms and conditions set forth above, and to the personal guarantee of repayment by the Principals, provided that the terms of the transactions are not less favorable to the Plan than those obtainable in an arm's length transaction with an unrelated party.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 20th day of September, 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

[Application No. L-3675]

Proposed Exemption for Certain Transactions Involving the Wells Fargo & Company Group Life Insurance Plan Maintained by Wells Fargo & Company Located in San Francisco, California

AGENCY: Pension and Welfare Benefit Programs Office.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act). The proposed exemption would exempt under certain conditions, the reinsurance by the Central Western Insurance Company (CWIC) of group life insurance contracts sold to Wells Fargo & Company (the Employer) on behalf of the Wells Fargo & Company Group Life Insurance Plan (the Plan) maintained by the Employer. CWIC is a party in interest with respect to the Plan. The proposed exemption, if granted, would affect the Employer, participants and beneficiaries of the Plan, CWIC, and other persons participating in the transactions.

DATES: Written comments and requests for a public hearing must be received by the Department of Labor on or before November 8, 1982.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. L-3675. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Gary H. Lefkowitz of the Department of Labor, telephone (202) 523-8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406 (a) and (b) of the Act. The proposed exemption was requested in an application filed on behalf of the Employer, pursuant to section 408(a) of the Act, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

Preamble

On August 7, 1979, the Department published a class exemption [Prohibited Transaction Exemption 79-41 (PTE 79-41), 44 FR 46365] which permits insurance companies that have substantial stock or partnership affiliations with employers establishing or maintaining employee benefit plans to make direct sales of life insurance, health insurance of annuity contracts which fund such plans, if certain conditions are satisfied.

In PTE 79-41, the Department stated its view that if a plan purchases an insurance contract from a company that is unrelated to the employer pursuant to an arrangement or understanding, written or oral, under which it is expected that the unrelated company will subsequently reinsure all or part of the risk related to such insurance with an insurance company which is a party in interest with respect to the plan, the purchase of the insurance contract would be a prohibited transaction.

The Department further stated that as of the date of publication of PTE 79-41, it had received several applications for exemption under which a plan or its employer would contract with an unrelated company for insurance, and that unrelated company would, pursuant to an arrangement or understanding, reinsure part or all of the risk with (and cede part or all of the premiums to) an insurance company affiliated with the employer maintaining the plan. The Department felt that it would not be appropriate to cover the various types of reinsurance transactions for which it had received applications within the scope of the class exemptions, but would instead consider such applications on the merits of each individual case.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Employer is a bank holding company registered under the Bank Holding Company Act of 1956 and is incorporated in the State of California. The Company's principal subsidiary is Wells Fargo Bank, National Association, a national banking association organized under the laws of the United States, and the Employer also pursues bank-related activities through other subsidiaries.

2. The Plan is an employee welfare benefit plan which provides life insurance benefits to employees of the Employer. There are approximately 19,820 participants in the Plan.

3. CWIC is a wholly-owned subsidiary of the Employer. CWIC is a corporation organized under the laws of the State of Arizona, with its principal offices in Phoenix, Arizona. CWIC is engaged in reinsuring risks under group insurance policies. As of December 31, 1981, CWIC's balance sheet assets were approximately $3.7 million.

4. The benefits under the Plan are funded by the Equitable Life Assurance Society (Equitable). Equitable was selected by the Employer on January 1, 1982. This change in direct insurers from the Prudential Insurance Company of America to Equitable was based on providing the Plan participants with the best possible cost effective coverage and was in no way in anticipation of any possible future reinsurance arrangements between CWIC and Equitable. Equitable and CWIC are currently in the process of negotiating a reinsurance agreement. The proposed agreement will involve a certain percentage of the life insurance premiums paid under the Plan. Under the proposed agreement, Equitable would cede a certain percent of the insurance sales to CWIC. CWIC has no other agreements covering the Plan or any other employee benefit plans (and their employers) with respect to which CWIC is a party in interest. Equitable is unrelated to the Employer and to CWIC. The benefits under the Plan are provided unconditionally by Equitable, and the Plan is not a party to the reinsurance transactions.

5. The applicant represents that the subject reinsurance transactions will meet all of the conditions of PTE 79-41 covering direct insurance transactions:

(a) CWIC is a party in interest as described in Act section 3(14)(G) by reason of stock affiliation with the employer maintaining the Plan.

(b) CWIC is licensed to reinsure credit life and credit accident and health insurance in at least one of the United States.

(c) CWIC is audited by the Superintendent of Insurance of the State of Arizona and is presently in good standing. CWIC has received a Certificate of Authority from the Department of Insurance of the State of Arizona.

(d) CWIC underwent a financial examination by the Superintendent of Insurance of the State of Arizona as of December 31, 1980.

(e) The Plan pays no more than adequate consideration for the insurance contracts. Because Equitable

is one of the largest group insurance underwriters in the country and enjoys substantial economies of scale in overall policy administration, the premium charge to the Plan is highly competitive. The reinsurance transactions are not a factor in the premium computation and thus do not in any way affect the cost to the Plan.

(f) No commissions will be paid in connection with either the direct sale of the insurance contracts or with respect to the reinsurance agreement between Equitable and CWIC.

(g) The gross premiums and annuity considerations from reinsurance received in any one calendar year by CWIC for group life and health contracts for plans (and their employers) with respect to which CWIC is a party in interest will not exceed 50 percent of the gross premiums and annuity considerations received for all lines of insurance in the same calendar year.

6. In summary, the applicant represents that the subject transactions meet the statutory criteria of section 408(a) of the Act because: (1) Plan participants and beneficiaries are afforded insurance protection by Equitable, one of the largest and most experienced group insurers in the United States, at competitive rates arrived at through arm's-length negotiations; (2) CWIC is a sound, viable insurance company which has been in business for four years, and which does a substantial amount of business outside its affiliated group of companies; and (3) each of the protections provided to the Plan and its participants and beneficiaries by PTE 79–41 will be met under the subject reinsurance transactions.

Notice to Interested Persons

Notice of this proposed exemption will be provided to all participants and beneficiaries of the Plan within 14 days of the publication of the notice in the **Federal Register.** Participants who are currently employed will be notified by means of posting an announcement in a place that is customarily used for providing notice to Plan participants. Retired employees will be notified by mail. The notice to interested parties will contain a copy of the proposed exemption and will inform all interested persons of their right to comment and request a hearing.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act does not relieve a fiduciary or other party in interest from certain other provisions of the Act, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act;

(2) Before an exemption may be granted under section 408(a) of the Act, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a) and (b) of the Act shall not apply to the reinsurance of risks and the receipts of premiums therefrom by CWIC from the group life insurance contracts sold by Equitable to the Employer to provide benefits to the Plan, provided the following conditions are met:

(a) CWIC—

(1) Is a party in interest with respect to the Plan by reason of a stock or partnership affiliation with the Employer that is described in section 3(14) (E) or (G) of the Act,

(2) Is licensed to reinsure credit life and credit accident and health insurance in at least one of the United States or in the District of Columbia,

(3) Has obtained a Certificate of Authority from the Insurance Director of its domiciliary state, Arizona, which has neither been revoked nor suspended; and

(4)(A) Has undergone an examination by an independent certified public accountant for its last completed taxable year immediately prior to the taxable year of the reinsurance transaction, or

(B) Has undergone a financial examination (within the meaning of the law of its domiciliary state, Arizona) by the Insurance Commissioner of the State of Arizona within 5 years prior to the end of the year preceding the year in which the reinsurance transaction occurred.

(b) The Plan pays no more than adequate consideration for the group life insurance contracts;

(c) No commissions are paid with respect to the direct sale of the contract, or the reinsurance thereof; and

(d) For each taxable year of CWIC, the gross premiums and annuity considerations received in that taxable year by CWIC for life and health insurance or annuity contracts for all employee benefit plans (and their employers) with respect to which CWIC is a party in interest by reason of a relationship to such employer described in section 3(14) (E) or (G) of the Act does not exceed 50 percent of the gross premiums and annuity considerations received for all lines of insurance (whether direct insurance or reinsurance) in that taxable year by CWIC. For purposes of this condition (d):

(1) The term "gross premiums and annuity considerations received" means as to the numerator the total of premiums and annuity considerations received, both for the subject reinsurance transactions as well as for any direct sale or other reinsurance of life insurance, health insurance, or annuity contracts to such plans (and their employers) by CWIC. This total is to be reduced (in both the numerator and demoninator of the fraction) by experience refunds paid or credited in that taxable year by CWIC.

(2) All premiums and annuity considerations written by CWIC for plans which it alone maintains are to be excluded from both the numerator and the denominator of the fraction.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 20 day of September 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

[FR Doc 82-26577 Filed 9-23-82; 8:45 am]

BILLING CODE 4510-29-M

[Application No. D-3610]

Proposed Exemption for Certain Transactions Involving the Key Employee Retirement Plan Located in Pensacola, Florida

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the proposed cash sale of an unimproved parcel of real property by the Key Employee Retirement Plan (the Plan) to Mr. Anthony Ciano (Mr. Ciano), a party in interest with respect to the Plan. The proposed exemption, if granted, would affect the Plan and its participants and beneficiaries, Mr. Ciano, and any other persons participating in the proposed transaction.

DATES: Written comments and requests for a public hearing must be received by the Department on or before November 4, 1982.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. D-3610. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Mr. David Stander of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed on behalf of Mr. Ciano, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the application.

1. The Plan is a profit sharing plan with 60 participants. Messrs. Ciano, G. W. Pape, and R. H. Mothershed, the trustees (the Trustees) of the Plan, are responsible for all Plan investment decisions. Each Trustee is an officer and/or director of Key Ford, Inc. (the Employer), the sponsor of the Plan. As of December 31, 1981, the Plan had total assets of $197,477.

2. The Employer is a dealer in new and used cars and trucks. Mr. Ciano is the president and 100% shareholder of the Employer.

3. In April, 1980, the Plan purchased from an unrelated party an unimproved parcel of real property (the Property) for $167,582. The Property consists of approximately 7.9 acres of land located at the southwest corner of Pensacola Boulevard and Stumpfield Road in Pensacola, Florida. The Property was purchased for long term investment purposes and is unimproved. The only expense the Plan has incurred with respect to the Property since its acquisition is annual real estate taxes of approximately $4,000. The Property is located directly across the highway from the Employer's present principal place of business.

4. The applicant is seeking an exemption to allow the Plan to sell the Property to Mr. Ciano for cash at its appraised fair market value. Mr. G. Pratt Martin, Jr., an MAI appraiser located in Pensacola, Florida, has appraised the Property and has determined that, as of May 21, 1982, it had a fair market value of $209,000. Mr. Martin represents that the value of the Property to Mr. Ciano is not greater than its appraised fair market value.

5. The sale will be for cash and no sales expenses will be incurred by the Plan. The sale of the Property will enable the Plan to dispose of an asset which is slowly appreciating and not producing any income. The sale of the Property, which constitutes over 80% of the Plan's assets,[1] will improve the Plan's liquidity position and enable the Plan to more easily satisfy claims of retiring employees.

6. In summary, the applicant represents that the proposed transaction satisfies the statutory criteria of section 408(a) of the Act because (a) the sale will enable the Plan to dispose of a non-income producing asset at a gain; (b) the sale will be a one-time transaction for cash; (c) the Plan will receive the fair market value of the Property as determined by an independent appraiser; (d) the Plan will not incur any expenses with respect to the sale; and (e) the Trustees represent that the proposed sale is in the best interests of the Plan and its participants and beneficiaries.

Notice to Interested Persons

Within 10 days after publication in the **Federal Register** notice will be provided by registered mail or other receipted delivery methods to all participants in the Plan. Such notice will include a copy of the notice of proposed exemption as published in the **Federal Register** and will inform each participant of his right to comment on or request a hearing regarding the proposed exemption.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the code, including any

---

[1] In this proposed exemption the Department expresses no opinion as to whether the Plan's acquisition and holding of the Property violates any provision of Part 4 of Title I of the Act.

prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1) (F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the cash sale of the Property by the Plan to Mr. Ciano for $200,000, provided that this amount is not less than the fair market value of the Property on the date of sale.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 20th day of September, 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-3669]

Proposed Exemption for Certain Transactions Involving the Misener Marine Profit Sharing Plan Located in St. Petersburg, Florida

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the cash sale of a certain parcel of unimproved real property (the Real property) by the Misener Marine Profit Sharing Plan (the Plan) to Donald and Rebecca Hudson (the Hudsons), who are parties in interest with respect to the Plan. The proposed exemption, if granted, would affect the Plan, the participants and beneficiaries of the Plan, the trustees (the Trustees), Misener Marine Construction, Inc. (the Employer), the Hudsons and other persons participating in the transaction.

DATES: Written comments and requests for a public hearing must be received by the Department of Labor on or before November 8, 1982.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. D–3669. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Ms. Jan D. Broady of the Department of Labor, telephone (202) 523–8971. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code. The proposed exemption was requested in an application filed on behalf of the Employer, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The employer is a closely-held Florida corporation with principal offices located in St. Petersburg Beach, Florida. The Employer has been engaged in the marine construction business in the Gulf Coast area since 1945, and has participated in a broad spectrum of construction projects , including seawalls, marinas, piers, bridges, and pipelines. Robert P. Bayless (Mr. Bayless) is the President of the Employer corporation, and Richard H. Misener (Mr. Misener) is the Chairman of the Employer's Board of Directors.

2. The Plan, which was adopted in 1966, is a profit-sharing plan with 374

participants and assets having a fair market value of approximately $7,924,554 as of October 31, 1981. The assets of the Plan are held in a trust managed by three individual Trustees—Messrs. Bayless, Misener and Theodore H. Knight, Vice President of Production for the Employer. The Trustees are responsible for the investment of the Plan's assets.

3. Mr. Donald Hudson is the Senior Vice President of Operations for the Employer's corporation. He is the owner of 2.72% of the outstanding stock of the Employer and serves as a member of the Employer's Board of Directors. Mr. Hudson's wife, Mrs. Rebecca Hudson, is employed by the Employer as a paralegal assistant. Both Hudsons are participants in the Plan.

4. The Plan is proposing to sell the Hudsons approximately 9,189 square feet of land located in St. Petersburg Beach, Florida. The Real Property is described on page 39 of Plat Book 72 for Pinellas County, Florida as Lot 17, Bahia Shores, Fifth Addition. The Real Property consists of a vacant residential lot which fronts on Boca Ciega Bay. The Plan purchased the Real Property from Havern Enterprises, Inc., an unrelated party, for $40,000 on February 21, 1975. The Real Property was acquired by the Plan for investment purposes and it has not been improved since its acquisition, nor has it produced any income. Real estate taxes on the Real Property are approximately $880 annually.

5. Two independent appraisal reports have determined that the Real Property has a fair market value of $90,000. This amount constitutes less than 1.5 percent of the total value of the Plan's assets. The first appraisal was performed on December 12, 1981 by Ted Jakimier, IFAS/CRA of St. Petersburg, Florida. The second appraisal was performed on March 26, 1982 by Bert F. Finch, Jr., M.A.I., S.R.A. and Donald R. Carlson, who are appraisers with the firm Fogarty & Finch, Inc. (Fogarty), which is located in St. Petersburg, Florida.

Although the Real Property has appreciated significantly over the past seven years, market activity has declined drastically in recent months. The largest decrease has occurred with respect to vacant lot sales, according to the Fogarty appraisal.

6. In light of current market conditions, the Trustees believe that a sale of the Real Property, as based on the $90,000 appraised fair market valuation, will maximize the Plan's investment yield. Accordingly, on February 3, 1982, the Trustees entered into a conditional sales agreement with the Hudsons whereby the Hudsons paid the Trustees $1,000 as an earnest money deposit and agreed to pay $89,000 in cash at closing. The sales agreement is contingent upon the granting of an exemption by the Department. In the interim, the deposit money has been placed in escrow by the Trustees and neither possession nor title to the Real Property has been awarded to the Hudsons. This will be done at closing. The Plan will not be required to pay any real estate commissions or fees in connection with the proposed sale.

7. An independent fiduciary to the Plan, D. Quigg Porter, Jr. (Mr. Porter), Vice President of the Employee Benefit Trust Division of the Northern Trust Company of Chicago, Illinois, has certified in a letter of May 21, 1982 that a cash sale of the Real Property at fair market value would be in the interests of the Plan and its participants and beneficiaries. Mr. Porter states that the proposed sale will improve the Plan's liquidity position and that it will provide the Trustees with the opportunity to diversify the investments of the Plan.

8. In summary, it is represented that the proposed transaction meets the statutory criteria for an exemption under section 408(a) of the Act because: (a) The sale will enable the Plan to divest itself of a non-income producing asset; (b) the Plan will receive the fair market value of the Real Property, as determined by two independent appraisals, without being required to pay real estate commissions, title fees or any other expenses in connection with the sale; (c) the sale will improve the Plan's liquidity position and provide the Trustees with an opportunity to diversify the Plan's investments; and (d) the Plan's Trustees and an independent fiduciary have determined that a cash sale of the Real Property at fair market value will be in the interests of the Plan and its participants and beneficiaries.

Notice to Interested Persons

Notice of the proposed exemption will be given to all present employees of the Employer within 10 days of the publication of the notice of pendency in the **Federal Register**. The notice will include a copy of the notice of pendency as published in the **Federal Register** and will inform interested persons of their right to comment on and/or to request a hearing within the time period set forth in the notice of pendency. Notice will be provided to participating employees of the Employer by posting the notice on employee bulletin boards found in all operating locations. Field personnel and annuitants will be notified by direct mailing.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the cash sale of the Real Property by the Plan to the Hudsons for $90,000, provided this amount is not less than the fair market value of the Real Property on the date the transaction is consummated.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 20th day of September, 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-3168]

Proposed Exemption for Certain Transactions Involving the Gary Retirement Plan Located in Denver, Colorado

AGENCY: Pension and Welfare Benefit Programs Office, Labor.
ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt a loan (the Loan) of $1,000,000 by the Gary Retirement Plan (the Plan) to Gary Energy Corporation (GEC), a party in interest with respect to the Plan. The proposed exemption, if granted, would affect the Plan, the Plan trustee, the participants and beneficiaries of the Plan, GEC and other persons participating in the transaction.

DATES: Written comments and requests for a public hearing must be received by the Department of Labor on or before November 8, 1982.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. D–3168. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Ms. Jan Broady of the Department of Labor, telephone (202) 523–8971. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed by GEC, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The Application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Plan is a defined contribution pension plan with approximately two hundred participants and total assets of $5,543,893 as of March 18, 1982. The trustee of the Plan is the United Bank of Denver (United Bank), located in Denver, Colorado. Investment decisions for the Plan are made primarily by United Bank although a Plan administrative committee determines the actual asset mix.

2. The Plan is maintained by four Colorado-based organizations having a number of common directors. GEC is engaged in oil field management and operations. The Piton Foundation is a non-profit organization providing grants in the areas of education and social services. Samuel Gary Oil Producer is a sole proprietorship engaged in oil and gas exploration and real estate managment. Colorado Community Resources, Inc. is a non-profit corporation involved in community development projects. The Plan is maintained by GEC and Samuel Gary Oil Producer as a profit sharing plan and by the Piton Foundation and Colorado Community Resources as a money purchase pension plan. These entities sponsor separate plans although all such plans are consolidated into a single document.

3. GEC is requesting an exemption to borrow $1,000,000 from the Plan. This amount represents nearly 18 percent of the Plan's total assets. GEC intends to use the Loan proceeds for leasehold improvements in its office building. The proposed Loan will be evidenced by a promissory note, providing for the repayment of equal annual installments of principal of $200,000 plus interest over a five year period. the Loan will carry interest at an annual rate equal to the greater of 16 percent or ¼ percent above the prime rate charged by First National Bank of Denver (First National) for comparable short term loans. The interest rate will be adjusted daily. In addition, the Plan will be given the right to demand repayment of any or all of the outstanding Loan balance after two years of the date of the making of the Loan.

4. The proposed Loan will be secured by either of two instruments: a one year, irrevocable letter of credit (the Letter of Credit) issued by First National, or a surety bond (the Performance Bond) issued by the Aetna Casualty and Surety Company (Aetna) of Hartford, Connecticut. The Letter of Credit or Performance Bond, the mechanics of which are similar, will be issued in the amount of the Loan and cover past accrued interest and interest which may accrue during the term of the instrument. Each year as the Loan principal and interest are reduced, the amount of the Letter of Credit or Performance Bond will be reduced correspondingly. Should GEC default on the Loan or the parties decide not to renew the designated security instrument, United Bank will call upon either the Letter of Credit or

Performance Bond before the instrument is permitted to lapse.

5. United Bank, which is unrelated to First National, will serve as the independent fiduciary for the proposed Loan. The exemption application discloses that Samuel Gary Oil Producers owns 1,000 shares of the bank holding company owning United Bank and that GEC has outstanding loans with the bank of less than $10,000,000. The amounts representing outstanding shares and loans each constitute less than one percent of the respective items. In addition, the other organizations sponsoring the Plan have no ownership interest in the trustee bank. Moreover, no employees of any of the sponsoring organizations serve as board members or hold positions of influence at United Bank. Conversely, United Bank has no ownership interest or employees in positions of influence at any of the entities maintaining the Plan.

By letters dated March 23, and April 21, 1982, United Bank has made representations regarding the propriety of the proposed Loan investment and the specific duties it will perform on behalf of the Plan as the independent fiduciary. United Bank considers the Loan transaction to be appropriate for the Plan and in the best interests of the participants and beneficiaries. In making this determination, United Bank indicates it has reviewed the terms of the proposed Loan, the interest rate and the security, all of which it believes are favorable to the Plan. In addition, United Bank represents it has viewed the Loan against the portfolio objectives of the Plan. Specifically, United Bank has examined the overall Plan portfolio, considered the cash flow needs of the Plan, considered the assets that might have to be sold, examined the diversification requirements of the Plan in light of the proposed Loan, and examined the Loan in terms of the overall Plan investment scheme.

With respect to its role as the independent fiduciary, United Bank states it is willing to monitor the Loan and will take whatever actions are necessary if any default occurs or the Letter of Credit (or Performance Bond) is not renewed. United Bank reserves the right to call the Letter of Credit or Performance Bond and will not permit the security instrument that is in effect to lapse. United Bank says it may call the Loan after two years, at which time all outstanding principal and interest would be due from GEC. United Bank says it will be responsible to compute the interest on the Loan in the proper manner.

6. In summary, it is represented that the proposed transaction will satisfy the requirements of section 408(a) of the Act because: (a) The Loan will give the Plan a higher rate of return than is ordinarily available to the Plan with respect to its investments; (b) the Loan will be secured by either an irrevocable Letter of Credit issued by First National or a Performance Bond issued by Aetna, either of which can be called at any time, and must be called if the instrument will not be renewed, or the Employer defaults on Loan payments; (c) the terms and conditions of the Loan will be monitored by United Bank; and (d) United Bank, as independent fiduciary to the Plan, has determined the proposed Loan is appropriate for the Plan and is in the best interests of the participants and beneficiaries of the Plan.

Notice to Interested Persons

Notice of the proposed exemption will be given to active participants, inactive participants having deferred vested benefits, retired and disabled participants and the beneficiary of every deceased participant receiving benefits within ten (10) days of the publication of the notice of pendency in the **Federal Register**. The notice will include a copy of the notice of pendency as published in the **Federal Register** and will inform interested persons of their right to comment and/or request a hearing with respect to the pending exemption. Notice will be given by posting a copy of the proposed exemption in conspicuous places customarily reserved for announcements to employees and by first class mail.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection wih the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the Loan of $1,000,000 by the Plan to GEC, provided the terms of the Loan are at least as equal to those which the Plan could receive in an arm's length transaction with an unrelated party.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and

that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 20th day of September, 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-3253]

Proposed Exemption for Certain Transactions Involving the Emjay Corporation Master Profit Sharing Plan for Kurek Amusements, Inc., Located in Milwaukee, Wisconsin

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the proposed sale of real property (the Property) by the Emjay Corporation Master Profit Sharing Plan for Kurek Amusements, Inc. (the Plan) to Mr. George Kurek (Kurek), a party in interest with the respect to the Plan. The proposed exemption, if granted, would affect the participants and beneficiaries of the Plan and other persons participating in the transaction.

DATES: Written comments and requests for a public hearing must be received by the Department of Labor on or before November 5, 1982.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. D-3253. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Louis Campagna of the Department, telephone (202) 523-8883. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed by Kurek, on behalf of the Plan, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Plan is a profit sharing plan with seven participants. The Plan is sponsored by the Kurek Amusements, Inc. (the Employer). The Property is known as Tubby's Pub, a small tavern and restaurant, located in Milwaukee, Wisconsin. Kurek and Louis A. Maier, III are co-trustees of the Plan. Kurek is the president of the Employer and sole member of the administrative committee of the Plan which is responsible for investment decisions for the Plan. The Employer is in the process of being sold to an unrelated third party which does not desire to maintain the Plan. As part of the business of winding down the Plan, the administrative committee of the Plan represents that it is necessary to liquidate the investments of the Plan in order to provide sufficient cash to pay benefits to the participants of the Plan. In addition, the trustees of the Plan represent that the proposed sale will be in the best interests of the participants and beneficiaries of the Plan.

2. The Property was purchased by the plan on March 22, 1976 for $85,000 from James and Helen Woods, unrelated third parties. The Plan proposes to sell the Property to Kurek for a cash sum of $92,500. This price was determined to be the fair market value of the Property, as of January 22, 1982, by Richard B. Kuzminski, a qualified independent appraiser from Milwaukee, Wisconsin. No expenses of any kind will be charged the Plan with respect to the sale of the Property.

3. In summary, the applicant represents that the proposed sale of the Property meets the statutory criteria of section 408(a) of the Act because: (a) It will be a one time transaction for cash; (b) the trustees of the Plan represent that the transaction will be in the best interests of the participants and beneficiaries of the Plan; (c) the price of the Property was determined by an independent appraiser; (d) no expenses will be charged the Plan with respect to the sale; and (e) the Plan will soon be terminated and cash is needed for eventual distribution to the participants.

Notice to Interested Persons

Notice will be given to all participants and beneficiaries of the Plan within 10 days of the publication of notice of pendency in the **Federal Register** by mail or posting on the premises of the Employer at locations commonly used for Employee notices. Notice will include a copy of the notice of pendency as it appears in the **Federal Register** as well as a statement informing all interested persons of their right to comment or request a hearing on the exemption.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b)(1), and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the sale of the Property by the Plan to Kurek for a cash sum of $92,500, provided that this amount is at least the fair market value of the property at the time of the sale.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 20th day of September, 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

[FR Doc. 82-26381 Filed 9-23-82; 8:45 am]

BILLING CODE 4510-29-M

[Application Nos. D–3349 and D–3350]

Proposed Exemption for Certain Transactions Involving the Guthrie Clinic, Ltd. Profit Sharing Plan and Guthrie Clinic, Ltd. Revised Pension Plan Located in Sayre, Pa.

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt for a period of five years the proposed loans of money by the Guthrie Clinic, Ltd. Profit Sharing Plan (The Profit Sharing Plan) and the Guthrie Clinic Ltd. Revised Pension Plan (the Pension plan, collectively, the Plans) to Guthrie Clinic, Ltd. (the Employer), the sponsor of the Plans. The proposed exemption, if granted, would affect the Employer, the participants and beneficiaries of the Plans and other persons participating in the proposed transactions.

DATES: Written comments and request for a public hearing must be received by the Department on or before October 28, 1982.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application Nos. D–3349 and D–3350. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Richard Small of the Department, telephone (202) 523–7222. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the retrictions of section 406(a) and 406(b)(1) and 406(b)(2) of the Act and from the sanctions resulting from the applications of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed by the Employer, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Profit Sharing Plan, as of December 31, 1981, had approximately 95 participants and assets in the amount of $6,640,422. The Pension Plan, as of December 31, 1981, had approximately 95 participants and assets in the amount of $3,785,674. Girard Bank (the Bank), located in Philadelphia, Pennsylvania, is the trustee of the Plans. The Employer is a medical clinic which employs approximately 130 physicians.

2. The applicant is requesting an exemption which will permit the Plans for a period of five years to loan (the Loans) amounts up to 30% of the assets of each Plan to the Employer. The proceeds from the Loans will be used by the Employer to finance one or more satellite office and medical buildings (the Buildings). The Loans will be secured by a first mortgage on the completed Buildings. The applicant represents that each Building will have a fair market value, as determined by an independent M.A.I. appraiser, of at least 150% of the amount of the Loan and that the fair market value of the Buildings will always be at least 150% of the amount of the outstanding balances on the Loans. The applicant also represents that the Buildings will be adequately insured with the Plans being the named insured under the insurance policies. Each Loan will have a term of seven years with equal annual payments of

principal and interest. The interest rate on the Loans will be the prevailing market rate of interest on loans of this type and will be determined by the Bank. The applicant represents that the market rate of interest on the Loans will provide the Plan with a higher rate of return on its assets than the plan is currently receiving.

3. An independent party, the Bank, will examine the proposed transactions. Prior to the Plans entering into the Loans, the Bank: (1) Must certify that the Loans will be in the best interests of the participants and beneficiaries of the Plans; (2) determine the interest rate on the Loans; (3) certify that the terms and conditions of the Loans are at least as favorable to the Plans as those which the Plans could receive in an arms-length transaction; and (4) agree to monitor the terms and conditions of the Loans on behalf of the Plans.

4. In summary, the applicant represents that the investment by the Plans in the Loans will meet the statutory criteria of section 408(a) of the Act as follows: (1) The trustee of the Plans represents that the Loans will be in the best interests of the participants and beneficiaries of the Plans; (2) the Loans will be approved and monitored by an independent fiduciary; and (3) the Plans will be able to receive a higher rate of interest on their investments than they are receiving presently .

Notice to Interested Persons

Within seven days of its publication in the **Federal Register** a copy of the notice of pendency and a statement advising interested persons of their right to comment or request a hearing will be mailed to all participants and beneficiaries of the Plans.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the paritcipants and beneficiaries of the plan and in a prudent fashion in accordance with secion 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writers's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply for a period of five years to the Loans by the Plans to the Employer provided that the terms and conditions of the Loans are at least as favorable to the Plans as those which the Plans could receive in an arms length transaction.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 20th day of September, 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

Proposed Exemption for Certain Transactions Involving South Bay Psychiatric Medical Group Profit Sharing Plan; and South Bay Psychiatric Medical Group Money Purchase Plan, Located in Los Angeles, California

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the proposed sales of certain limited partnership interests (the Partnership Interests) by the South Bay Psychiatric Medical Group Profit Sharing Plan (the Profit Sharing Plan) and the South Bay Psychiatric Medical Group Money Purchase Plan (the Money Purchase Plan, collectively, the Plans) to Dr. Edwin Caine (Caine), a disqualified person with respect to the Plans. The proposed exemption, if granted, would affect Caine and other persons participating in the transaction.

Because Caine is the only participant in the Plans, and the sole shareholder of the South Bay Psychiatric Medical Group, the sponsor of the Plans, there is no jurisdiction under Title I of the Employee Retirement Income Security Act of 1974 (the Act) pursuant to 29 CFR 2510.3–3(c)(1). However, there is jurisdiction under Title II of the Act under section 4975 of the Code.

DATES: Written comments and requests for a public hearing must be received by the Department on or before October 21, 1982.

ADDRESS: All written comments and requests for a hearing (at least three

copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application Nos. D–3385 & D–3386. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Richard Small of the Department, telephone (202) 523–7222. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the sanctions resulting from the application of section 4975 of the Code, by reaon of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed by Caine, pursuant to section 4975(c)(2) of the Code, and in accordance with procedures set forth in Rev. Proc. 75–26, 1975–1 C.B. 722. Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemtions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The sole participant and trustee of the Plans is Caine. As of June 11, 1982, the Plans had combined assets of $295,000. As a part of their assets, the Plans own the Partnership Interests. The Partnership Interests owned by the Plans and the price paid to acquire such Partnership Interests are as follows: the Profit Sharing Plan, 3.5% interest in 1108 18th St. Associates (the 18th St. Assoc.) for $19,250; 6.2% interest in Chelsea Avenue Associates (the Chelsea Assoc.) for $14,000; the Money Purchase Plan, 6.5% interest in 18th St. Assoc. for $35,750; 11.5% interest in Chelsea Assoc. for $26,000. All the Partnership Interests were purchased by the Plans in 1979 from an unrelated party.

2. The Ernest Auerback Company (Auerback) which is located in Santa Monica, California is the general partner of the 18th St. Assoc. and the Chelsea Assoc. (together, the Partnerships). The sole asset of each of the Partnerships is a condominium apartment building. The applicant represents that despite a concerted effort by Auerback over a two year period the Partnerships have been unable to sell their condominium units (the Units) and that each Partnership is operating at a loss. The applicant further represents that in order to save the Partnership projects from foreclosure by the construction lender, Auerback has suggested that each limited partner (the Limited Partner) of the Partnerships purchase a Unit from such Partnership. The price of the Unit would be the same price that the Unit has been offered for sale to the general public. After the purchase by the Limited Partner of a Unit, the Limited Partner will have no residual interest in the Partnerships. Auerback represents that if the Limited Partners do not purchase the Units "it is very likely that the value of each entire Partnership Interest will be substantially reduced due to the continuing interest carrying costs and operating expenses to maintain the Units." The initial investment which was used by the Limited Partner would be applied as a down payment on the Unit and the remainder of the purchase price would be financed through unrelated lenders.

3. The applicant is requesting an exemption which will permit Caine to purchase the Partnership Interests from the Plans for cash in the amount of $95,000, which is the original cost to the Plans of their Partnership Interests. Caine represents that such purchase will prevent the Plans from having to obtain a substantial loan to purchase the Units which already represent a large percentage of the assets of the Plans. In addition, Caine represents that the purchase will allow the Plans to recoup their investment in the Partnerships which do not provide the Plans with any income and which are having substantial financial difficulties.

4. In summary, the applicant represents that the proposed purchases will meet the criteria of section 408(a) of the Act as follows: (1) The trustee of the Plans represents that it is in the best interests of the Plans' participant; (2) the Plans will be able to recoup their money form a non-income producing investment which is in serious financial difficulty; and (3) the Plans will not be forced to add additional funds to an investment which is in serious financial difficulty.

Notice to Interested Persons

This notice of pendency will constitute the only notice to interested persons.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under section 4975(c)(2) of the Code does not relieve a fiduciary or disqualified person from certain other provisions of the Code, including any prohibited transaction provisions to which the exemption does not apply nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the addresss set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in Rev. Proc. 75–26, 1975–1 C.B. 722. If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code

shall not apply to the sale by the Plans of their Partnership Interests to Caine for cash in the amount of $95,000, provided that this is at least the fair market value of the Partnership Interests at the time of sale.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 20th day of September, 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-2791]

Proposed Exemption for Certain Transactions Involving Metropolitan Mortgage and Securities Co., Inc. Located in Spokane, Washington

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt: (1) the past and proposed purchases of debt securities (the Debentures) issued by Metropolitan Mortgage & Securities Co., Inc. (Metropolitan) to those self-employed retirement plans (Keogh Plans) and individual retirement accounts (IRAs), (the IRAs and Keogh Plans are collectively referred to as the Plans), for which Metropolitan is also acting as a custodian; and (2) the past and proposed extension of credit between the Plans and Metropolitan. The proposed exemption, if granted, would affect Metropolitan, the participants and beneficiaries of the Plans and other persons participating in the transactions. To the extent that an IRA meets the conditions contained in 29 CFR 2510.3-2(d) and the Keogh Plans do not have an employee as defined in 29 CFR 2510.3-3(b), there is no jurisdiction over the respective plans under Title I of the Act. However, for purposes of this exemption there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

DATES: Written comments must be received by the Department on or before November 10, 1982.

EFFECTIVE DATE: If the proposed exemption is granted, the exemption will be effective July 12, 1977.

ADDRESS: All written comments (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. D-2791. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Paul R. Antsen of the Department, telephone (202) 523-6915. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a) of the Act and/or from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code. The proposed exemption was requested in an application filed by counsel on behalf of Metropolitan, pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application in file with the Department for the complete representations of the applicant.

1. Metropolitan is primarily engaged in the business of real estate financing by purchasing real estate contracts at a discount and making personal and business loans secured by real estate either in the form of first or second mortgages or real estate contracts. Metropolitan has financed its real estate contract purchasing and lending activities almost exclusively through the public sale of the Debentures. Metropolitan was incorporated in the State of Washington in 1953 and is subject to Washington State laws regulating debenture companies because it obtains its capital needs through public offerings of debt securities. These laws, which are designed to protect the interests of investors, including those holding the Debentures, establish minimum capital requirements and certain debt-to-equity ratios, set limits on use of short term public debt securities and prohibit certain interlocking directorships with other financial institutions.

2. To date the Debentures have been issued in two forms. Between July 12, 1977 and December 5, 1979 the Debentures sold to the Plans were pension debenture bonds (Pension Bonds). Because the Pension Bonds were only sold intrastate, they were exempt from registration with the Securities and Exchange Commission (the SEC) based on section 3(a)(11) of the Securities Act of 1933. However, the Pension Bonds were registered in compliance with the Securities Division of the Washington State Business and Professions Administration. The Pension Bonds were issued in denominations of $100 at an interest rate of eight percent with terms ranging from one to ten years from date of purchase. The prospectus for the Pension Bonds stated that purchasers had an undivided proportionate interest in selected real estate contracts and mortgages maintained in a designated general ledger account which were pledged as security for respective bond holding interests.

On July 6, 1979 a new series of the Debentures was issued (the Investment Debentures). The Investment Debentures were issued under a trust indenture (the Indenture) dated July 6, 1979 and a supplement thereto dated October 3, 1980 between Metropolitan and Seattle-First National Bank (Sea-First). Under the terms of the Indenture, Sea-First was obligated to oversee and, if necessary, to take action to enforce fulfillment of Metropolitan's obligations. Because the Investment Debentures were to be sold interstate they were registered with the SEC and applicable state securities commissions. The Investment Debentures were sold in two denominations—$100 and $5,000 with varying interest rates and terms ranging from six months to ten years.

No public trading market for either the Pension Bonds or the Investment Debentures exists and it is unlikely that

such a market will develop. The Pension Bonds have a redemption feature; however, a premature redemption fee of one percent of the amount redeemed (not less than $25 or more than $1,000) will be charged for redemption prior to the maturity date. While the Investment Debentures will be prepaid upon request in the event of death, they are not otherwise unilaterally redeemable prior to maturity.

3. Metropolitan offers the Debentures for sale on a continuing best efforts basis through Metropolitan Investment Securities, Inc. (Investment), a wholly owned subsidiary. Investment is registered as a broker-dealer with the SEC. Investment engages several independent sales representatives (the Sales Representatives) to solicit sales of the Debentures. Although the Sales Representatives are not employees of Metropolitan or Investment, they do have a close relationship. while spending most of their time in the field marketing the Debentures, the Sales Representatives are provided office space in Metropolitan's home office. The Sales Representatives do not sell securities other than those of Metropolitan. Purchases of the Debentures pay only the purchase price which does not include any direct commission, brokerage fee or other amount to Metropolitan, Investment or the Sales Representatives in connection with such sales. However Metropolitan does reimburse Investment for commissions paid by Investment to the Sales Representatives on sales of such securities. Metropolitan suggests that this is a typical arrangement and customary for market transactions of this type.

4. Metropolitan further suggests that other forms of debt securities may be issued in the future pursuant to a subsequent trust indenture or prospectus and requests that such future issues be included within the scope of this exemption. Metropolitan represents that it would always comply with the applicable state and federal securities laws in the issuance of any security to be marketed to IRAs or Keogh Plans. The Department has agreed to this request, consequently the scope of the term "the Debentures" as used in this exemption includes any debt security issued or to be issued by Metropolitan.

5. Metropolitan has established a prototype custodial account program for Keogh Plans and IRAs (hereinafter referred to as "Custodial Accounts"). The plan and custodial account documents for the IRAs were submitted to the Internal Revenue Service (the Service) for a determination as to their qualified status under the pertinent provisions of the Code. The Service approved the request for the IRAs on July 12, 1977. On April 13, 1977 Metropolitan requested approval from the Service for its prototype Keogh Plan. By letter dated June 10, 1977 the Service responded that under the applicable revenue procedure Keogh Plans of sponsoring organizations like Metropolitan which are not trade or professional associations, banks, insurance companies or regulated investment companies are not eligible to receive such determination letters. Thereupon, Metropolitan advised the sponsoring employers of such Keogh Plans to request individual determinations. To the best of Metropolitan's knowledge, no employer seeking such approval has failed to receive a requested favorable determination.

6. By letter dated November 10, 1976 Metropolitan received permission from the Service under the provisions of Code sections 401(d) and 408(a)(2), to serve as a custodian for the Keogh Plans and IRAs. In serving as custodian for such plans, Metropolitan was authorized and acts as a passive custodian within the meaning of Temporary Income Tax Regulation section 11.401(d)(1)–1(g)(1). As a passive custodian, Metropolitan is authorized to acquire and hold particular investments only as directed by each individual participant of the Plan involved or in accordance with the express terms of a Custodial Account.

7. The Debentures were not designed solely or primarily for the Plans but are investments directed to a broad market. In this regard, at least fifty (50) percent of any offering of the Debentures will be sold to parties with respect to which Metropolitan does not act as custodian. However, the Debentures have been and it is contemplated that they would be sold to IRAs (including IRAs established and maintained by employees of Metropolitan) and Keogh Plans. For the convenience and cost savings to purchasers that are IRAs and Keogh Plans, Metropolitan has agreed to act as custodian with respect to such plans.

Thus, Metropolitan has become a party in interest and/or disqualified person with respect to the Plans solely by virtue of providing custodial services for the Plans. Because of prior purchases of the Debentures after the service provider relationship was established and the desire to continue the above described practice, Metropolitan has requested an exemption for both retroactive and prospective relief. In addition, because of the nature of the security being acquired combined with Metropolitan's service provider role, the purchase of the Debentures by the Plans constitutes an extenson of credit to a party in interest and/or disqualified person.

8. In marketing the Debentures the Sales Representatives would also provide existing and potential customers with information regarding the establishment of Custodial Accounts. Any customer choosing to adopt a Custodial Account does so with the understanding that the acquisition of the Debentures is the only investment option available. To overcome concerns regarding lack of investment diversification the applicant notes that participants in the Custodial Accounts are free to establish or participate in other IRAs and/or Keogh Plans. In addition, recent tax law changes now permit individuals to establish IRAs in addition to participating in qualified pension or profit sharing plans.

With respect to future transactions, Metropolitan has agreed to disclose in writing the nature of the relationship between the Sales Representatives and Metropolitan. Such disclosure statement will also provide that decisions regarding investment in the Debentures are the sole responsibility of the individual buyers as fiduciaries for their respective Plan or Custodial Account. Metropolitan has also agreed that such fiduciary will acknowledge his role in writing as additional evidence of independent judgment. While the applicant represents that heretofore decisions had been made by such independent parties, Metropolitan has agreed to such written documentation as further evidence of the arms length nature of the transactions.

9. As of May 27, 1981, Metropolitan was acting as custodian for approximately 355 IRAs and Keogh Plans. The total asset value of the Plans on that date was $1,340,000 with the average participant account having an asset value of less than $4,000. The applicant notes that the transactions described in this application parallel to a great extent the transactions exempted under section III(f) of Prohibited Transaction Exemption 77–9 (PTE 77–9, 42 FR 32395, Amended 44 FR 1479). PTE 77–9 exempts from section 406(a)(1) (A) through (D) and 406(b) of the Act and section 4975(c)(1) of the Code the purchase by plans of securities from investment companies (or their affiliates) which are fiduciaries or service providers by reason of sponsorship of a master of prototype plan or provision of non-discretionary trust or custodial services in connection therewith. The applicant further

represents that the transactions involved in the application are customary, particularly by banks and other financial institutions that offer custodial services and compete with Metropolitan for investment capital.

10. In summary, the applicant represents that the transactions satisfy the statutory criteria of section 408(a) of the Act and/or section 4975(c)(2) of the Code in that:

(a) Investment decisions with respect to the Debentures have been and would be made by a fiduciary on behalf of the respective Plans or Custodial Accounts who is independent of Metropolitan or any affiliate thereof;

(b) Metropolitan has served and will serve only as a custodian with respect to the assets of the Plans and Custodial Accounts and has no authority which could make them a fiduciary with respect to investment decisions regarding such assets;

(c) The purchase of the Debentures by the Plans and Custodial Accounts has been and would be made in the same manner as other investors in the normal course of business; and

(d) At least fifty (50) percent of the Debentures will be sold to parties with respect to which Metropolitan does not act as custodian.

Notice to Interested Persons

Within fifteen (15) days following publication of the notice of pendency in the **Federal Register**, notice of the proposed exemption will be mailed to all interested persons including each of the participants in the Plans. The notice will contain a copy of the proposed exemption as published in the **Federal Register** and will include a statement advising them of their right to comment on the proposed exemption within the time period set forth above.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and, to the extent jurisdiction exists under Title I of the Act, the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b) of the Act and/or section 4975(c)(1) (E) and (F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments

All interested persons are invited to submit written comments on the pending exemption to the address above, within the time period set forth. All comments will be made a part of the record. Comments should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and/or section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a) of the Act and/or the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (D) of the Code shall not apply effective July 12, 1977 to the purchase by the Plans or Custodial Accounts of the Debentures issued by Metropolitan as described herein and to the extension of credit between Metropolitan and the Plans or Custodial Accounts resulting from the purchase of the Debentures provided that the following conditions are met with respect to the purchase of the Debentures:

(1) The purchase price paid for the Debentures does not exceed fair market value at the time of acquisition; and

(2) Effective 30 days after date of publication of this notice in the **Federal Register** the exemption is available only if each of the following conditions are satisfied in addition to the condition described in section (1) of this exemption:

(a) The Sales Representatives have disclosed in writing the nature of their relationship to Metropolitan and Investment and that they are not acting as an investment advisor or other fiduciary with regard to investment decisions of the Plans or Custodial Accounts. Such disclosure also states that all decisions with respect to purchase of the Debentures are the sole responsibility of the individual buyers as a fiduciary for their respective Plan or Custodial Account; and

(b) Following receipt of the information required to be disclosed and prior to the execution of the transaction, a plan fiduciary unrelated to Metropolitan, Investment or the Sales Representatives acknowledges in writing receipt of the information described in subsection (a) of this exemption and approves the transaction on behalf of the Plan or Custodial Account.

The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions that are the subject of the exemption.

Signed at Washington, D.C., this 10th day of September 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

[FR Doc. 82-26084 Filed 9-23-82; 8:45 am]
BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 82-150; Exemption Application No. D-3371]

Exemption From the Prohibitions for Certain Transactions Involving the Donald H. Bohne, D.D.S., P.A. Profit Sharing Plan Located in Tucker, Georgia

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption will permit the sale of two mortgage loans (the Mortgages) to the Donald H. Bohne, D.D.S., P.A. Profit Sharing Plan (the Plan) by Dr. Donald H. Bohne (Dr. Bohne), a disqualified person with respect to the Plan. Because Dr. Bohne is the sole shareholder of Donald H. Bohne, D.D.S., P.A. and the only participant in the Plan, there is no jurisdiction under Title I of the Employee Retirement Income Security Act of 1974 (the Act) pursuant to 29 CFR 2510.3–3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Internal Revenue Code of 1954 (the Code).

FOR FURTHER INFORMATION CONTACT: Mr. David Stander of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216; (202) 523–8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On August 6, 1982, notice was published in the **Federal Register** (47 FR 34218) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1) (A) through (E) of the Code, for the above-described transaction. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. No public comments and no requests for a hearing were received by the Department.

The notice of pendency was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 4975(c)(2) of the Code does not relieve a fiduciary or other disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of any other provisions of the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 4975(c)(2) of the Code and the procedures set forth in Rev. Proc. 75–26, 1975–1, C.B. 722, and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interests of the Plan and of its participant and beneficiaries; and

(c) It is protective of the rights of the participant and beneficiaries of the Plan.

Accordingly, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the code, shall not apply to the cash sale of the Mortgages by Dr. Bohne to the Plan (including the assumption by the Plan of Dr. Bohne's liabilities under certain first mortgages, as described in the notice of pendency), provided that the sales price of each Mortgage is not greater than its fair market value as of the date of sale.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to this exemption.

Signed at Washington, D.C., this 20th day of September 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 82–160; Exemption Application Nos. D–3408 and D–3409]

Exemption From the Prohibitions for Certain Transactions Involving the Allan D. Stilwell, M.D. Profit Sharing Plan and Trust, and the Allan D. Stilwell, M.D. Money Purchase Plan and Trust Located in Troy, Mich.

AGENCY: Pension and Welfare Benefit Programs Offices, Labor..

ACTION: Grant of individual exemption.

SUMMARY: This exemption will permit the proposed sale of investment grade diamonds (the Diamonds) by the Allan D. Stilwell, M.D. Profit Sharing and Money Purchase Plans and Trusts (the Plans) to Dr. Allan D. Stilwell (Dr. Stilwell), a disqualified person with respect to the Plans. Because Dr. Stilwell is the sole shareholder of Allan D. Stilwell, M.D., P.C., the sponsor of the Plans, and the only participant in the Plans, there is no jurisdiction under Title I of the Employee Retirement Income Security Act of 1974 (the Act) pursuant to 29 CFR 2510.3–3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Internal Revenue Code of 1954 (the Code).

FOR FURTHER INFORMATION CONTACT: Mr. David Stander of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216; (202) 523–8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On August 6, 1982, notice was published in the **Federal Register** (47 FR 34233) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1) (A) through (E) of the Code, for the above-described transaction. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and

representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. No public comments and no requests for a hearing were received by the Department.

The notice of pendency was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 4975(c)(2) of the Code does not relieve a fiduciary or other disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of, any other provisions of the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 4975(c)(2) of the Code and the procedures set forth in Rev. Proc. 75–26, 1975–1 C.B. 722, and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interests of the Plans and of their participant and beneficiaries; and

(c) It is protective of the rights of the participant and beneficiaries of the Plans.

Accordingly, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the cash sale of the Diamonds by the Plans to Dr. Stilwell, provided that the sales price for each Diamond is not less than its fair market value as of the date of sale.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to this exemption.

Signed at Washington, D.C. this 20th day of September 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 82–153; Exemption Application No. D–2981]

Exemption From the Prohibitions for Certain Transactions Involving Marsh and McLennan Asset Management Company and Related Companies Located in Boston, Massachusetts, and New York, New York

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption permits certain subsidiaries of the Marsh and McLennan Asset Management Company (AMC) to recommend that employee benefit plans (the Plans) with respect to which such subsidiaries are fiduciaries by reason of providing investment management services, invest in one or more commingled investment vehicles (the Trusts) which are designed for the collective investment by employee benefit plans in real estate and which have retained another affiliate of AMC to provide investment advice or investment management services regarding such real estate investments.

FOR FURTHER INFORMATION CONTACT: Gary H. Lefkowitz of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216; (202) 523–8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On August 6, 1982, notice was published in the **Federal Register** (47 FR 34249) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the restrictions of section 406 (a) and (b) of the Employee Retirement Income Security Act of 1974 (the Act) and from the sanctions resulting from the application of section 4975 of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) (A) through (F) of the Code, for transactions described in an application filed on behalf of AMC. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. No public comments and no requests for a hearing were received by the Department.

The notice of pendency was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest of disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does the fact the transaction is the subject of an

exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interests of the Plans and of their participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the Plans.

Accordingly, the restrictions of section 406 (a) and (b) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (F) of the Code, shall not apply to the investment of the Plans' assets in one or more of the Trusts as described in the notice of pendency, provided that the terms and conditions of such investments are at least as favorable to the Plans as those obtainable in an arm's-length transaction with an unrelated party.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions to be consummated pursuant to this exemption.

Signed at Washington, D.C., this 20th day of September 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 82–154; Exemption Application No. D–3061]

Exemption From the Prohibitions for Certain Transactions Involving the Fletcher Printing Company Profit Sharing Plan and Trust Located in Lakeland, Florida

AGENCY: Pension and Welfare Benefit Programs.

ACTION: Grant of individual exemption.

SUMMARY: This exemption permits the proposed leasing of office space (the Lease) by the Fletcher Printing Company Profit Sharing Plan and Trust (the Plan) to Fletcher Printing Company (the Employer), the sponsor of the Plan.

FOR FURTHER INFORMATION CONTRACT: Katherine D. Lewis of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216; (202) 523–8972. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On July 20, 1982, notice was published in the **Federal Register** (47 FR 31476) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) and from the sanctions resulting from the application of section 4975 of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) (A) through (E) of the Code, for the above-described transaction. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. The applicant has represented that a copy of the notice has been distributed to interested persons in compliance with the notification provisions in the notice of pendency. No public comments and no requests for a hearing were received by the Department.

The notice of pendency was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interests of the Plan and of its participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the Plan.

Accordingly the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the Lease of office space by the Plan to the Employer as described in the notice of proposed exemption, provided that the terms and conditions of the Lease remain at least as favorable to the Plan as would otherwise be available in an arm's length transaction with an unrelated party.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions to be consummated pursuant to this exemption.

Signed at Washington, D.C., this 20th day of September 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 82-155; Exemption Application No. D-3162]

Exemption From the Prohibitions for Certain Transactions Involving Middletown Surgeons, Inc. Revised Pension Plan Located in Middletown, Ohio

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption permits the proposed purchase by Middletown Surgeons, Inc. Revised Pension Plan (the Plan) from John W. Barnes, M.D. (the Owner), a party in interest with respect to the Plan, of 83,000 shares of common stock of Assembly Machines, Inc. (AMi), an unrelated company, in exchange for cash and a note receivable (the Note) executed by the Owner and currently held by the Plan.

FOR FURTHER INFORMATION CONTACT: Mrs. Miriam Freund, of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216; (202) 523-8971. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On August 6, 1982, notice was published in the **Federal Register** (47 FR 34232) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) and from the sanctions resulting from the application of section 4975 of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) (A) through (E) of the Code, for the above-mentioned transaction, which was described in an application filed on behalf of the Owner. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. Since the Owner is the only participant or beneficiary of the Plan who will be affected by the proposed transaction, it was determined that there was no need to distribute the notice of proposed exemption to interested persons. No public comments and no requests for a hearing were received by the Department.

The notice of pendence was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interests of the Plan and of its participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the Plan.

Accordingly, the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the Plan's purchase of the Owner's 83,000 shares of AMI common stock in exchange for cash and the Note, provided that the total purchase price does not exceed the fair market value of such shares at the time of the purchase.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to this exemption.

Signed at Washington, D.C., this 20th day of September 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 82-156; Exemption Application No. D-3183]

Exemption From the Prohibitions for Certain Transactions Involving the Automotive Sales Co. Employee Stock Ownership Plan Located in Phoenix, Arizona

AGENCY: Pension and Welfare Benefit Programs Office, Labor

ACTION: Grant of individual exemption.

SUMMARY: This exemption permits: (1) Certain indemnifications by the Automotive Sales Company Employee Stock Ownership Plan (the Plan) for the benefit of HJS, Inc. (the Employer), regarding the proposed sale of the assets of the Employer; and (2) the proposed sale of a portion of certain real property (the Property) by the Plan to the Employer.

FOR FURTHER INFORMATION CONTACT: Richard Small of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216; (202) 523-7222. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On July 23, 1982, notice was published in the **Federal Register** (47 FR 31985) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) and from the sanctions resulting from the application of section 4975 of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) (A) through (E) of the Code, for the above described transactions. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. The applicants have represented that they have satisfied the notification provisions as set forth in the notice of pendency. No public comments and no requests for a hearing were received by the Department.

The notice of pendency was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interests of the Plan and of its participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the Plan.

Accordingly, the restrictions of sections 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to: (1) Certain indemnifications by the Plan for the benefit of the Employer; and (2) the proposed sale of a portion of the Property by the Plan to the Employer provided that the Plan receives at least the fair market value of the portion of the Property at the time of the sale.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to this exemption.

Signed at Washington, D.C., this 20th day of September.

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 82-157; Exemption Application No. D-3390]

Exemption From the Prohibitions for Certain Transactions Involving the Bay View Federal Savings and Loan Association Profit Sharing Plan Located in San Mateo, California

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption will permit, effective March 1, 1982, the cash sale by the Bay View Federal Savings and Loan Association Profit Sharing Plan (the Plan) of 39 mortgage loans (the Mortgage Loans) to Bay View Federal Savings and Loan Association (the Employer), the sponsor of the Plan.

EFFECTIVE DATE: March 1, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. David Stander of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-

4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216; (202) 523–8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On July 20, 1982, notice was published in the **Federal Register** (47 FR 31474) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) and from the sanctions resulting from the application of section 4975 of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) (A) through (E) of the Code, for the above-described transaction. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. The applicant has represented that a copy of the notice has been provided to interested persons in accordance with the provisions of the notice of pendency. No public comments and no requests for a hearing were received by the Department.

The notice of pendency was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interests of the Plan and of its participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the Plan.

Accordingly the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply, effective March 1, 1982, to the cash sale of the Mortgage Loans by the Plan to the Employer for $2,216,815, provided that this amount was not less than the fair market value of the Mortgage Loans on the date of sale.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction which is the subject to this exemption.

Signed at Washington, D.C., this 20th day of September 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

[FR Doc. 82-26991 Filed 9-23-82; 8:45 am]

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 82–158; Exemption Application No. D–3499]

Exemption From the Prohibitions for Certain Transactions Involving the L. Michael Feingold, Inc. Profit Sharing Plan Located in Huntington Beach, California

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption will permit the sale to the L. Michael Feingold, Inc. Profit Sharing Plan (the Plan) of an interest in a mortgage note (the Mortgage) by Dr. L. Michael Feingold (Dr. Feingold), a party in interest with respect to the Plan.

FOR FURTHER INFORMATION CONTACT: Mr. David Stander of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216; (202) 523–8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On July 20, 1982, notice was published in the **Federal Register** (47 FR 31468) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) and from the sanctions resulting from the application of section 4975 of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) (A) through (E) of the Code, for the above-described transaction. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. The applicant

has represented that a copy of the notice was provided to interested persons in accordance with the provisions of the notice of pendency. No public comments and no requests for a hearing were received by the Department.

The notice of pendency was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interests of the Plan and of its participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the Plan.

Accordingly the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the sale by Dr. Feingold to the Plan of his ⅓ interest in the Mortgage for $76,343.47 provided that the price paid is not greater then the fair market value of the interest on the date of sale.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to this exemption.

Signed at Washington, D.C. this 20th day of September 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefits Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

Employment and Training Administration

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

Pursuant to the court order in *Julian R. Woodrum* v. *Donovan et. al.* Slip OP. 82–60 (July 26, 1982), which remanded the matter for further administrative proceedings we hereby publish notice of receipt of plaintiff's petition. The Director, of the Office of Trade Adjustment Assistance, Employment and Training Administration is instituting an investigation to comply with the above referenced court order by giving notice of institution of investigation concerning (1) whether there is substantial ownership and control of Capital Chrysler Plymouth of Montgomery, Inc., Montgomery, West Virginia by the Chrysler Corporation; and (2) whether the nature of work performed by the petitioners, employees of Capital Chrysler Plymouth of Montgomery, Inc., a car dealership, constitues production within the meaning of the Trade Act of 1974.

The purpose of the investigation is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than ten days after publication in the **Federal Register.**

Interested persons are invited to submit written comments regarding the subject matter of the investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 4, 1982.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor 601 D Street, N.W., Washington, D.C. 20213.

Signed at Washington, D.C. this 23rd day of September 1982.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

NATIONAL SCIENCE FOUNDATION

Subcommittee on Mechanical Engineering and Applied Mechanics, Advisory Committee for Engineering; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Subcommittee on Mechanical Engineering and Applied Mechanics (MEAM).

Date and Time: October 14th and 15th, 1982—9 a.m. to 5 p.m. each day.

Type of Meeting:

October 14—9:00 a.m. to 12:15 p.m.—Open
1:30 p.m. to 5:00 p.m.—Closed

October 15—9:00 a.m. to 1:00 p.m.—Open;
2:00 p.m. to 5:00 p.m.—Closed.

Contact Person: Dr. R. M. Bowen, Division Director, Mechanical Engineering and Applied Mechanics, Room 1108, National Science Foundation, Washington, D.C. 20550; (202) 357–9542.

Summary/Minutes: May be obtained from Hope Duckett, Division of Mechanical Engineering and Applied Mechanics, Room 1108, National Science Foundation, Washington, D.C. 20550; (202) 357–9542.

Purpose of Subcommittee: To provide directions for Mechanical Engineering and Applied Mechanics research.

Agenda: Thursday October 14th—Open—9 a.m. to 12:15 p.m., Room 540

9:00—Welcome by Dr. J. Slaughter, Director, NSF and Dr J. Sanderson, Assistant Director for Engineering
10:00—Questions and Answers
10:15—Briefing of Division Programs
11:45—Questions and Answers
12:15—Recess for Lunch

Thursday October 14th—Closed—1:30 p.m. to 5:00 p.m., Room 540

1:30—Review and comparison of declined proposals (and supporting documentation) with successful awards under the Mechanical Engineering and Applied Mechanics Division, including review of peer review materials and other privileged material

Friday October 15—Open—9:00 a.m. to 1:00 p.m., Room 540

9:00—Oral reports from Subcommittee
9:30—Subcommittee discussion of future directions of programs
10:30—Subcommittee discussion of division-wide concerns
11:30—Drafting of preliminary Subcommittee response

Friday October 15—Closed—2:00 p.m. to 5:00 p.m., Room 540

2:00—Further review of peer review process on individual grants and declinations
5:00—Adjourn

Reason for Closing: The Subcommittee will be reviewing grant and declination jackets which contain the names of applicant institutions and principal investigators and privileged information contained in declined proposals. This session will also include a review of the peer review documentation pretaining to applicants. These matters are with exemption (4) and (6) of 5 U.S.C. 552b (c), Government in the Sunshine Act.

Authority to Close Meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determination by the Director, NSF on July 6, 1979.

M. Rebecca Winkler,
Committee Management Coordinator.
September 21, 1982.

BILLING CODE 7555-01-M

Subpanel for History and Philosophy of Science; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Subpanel for History and Philosophy of Science Advisory Committee for Social and Economic Science.

Date and Time: October 14th, 15th and 16th, 1982, 9:00 a.m. to 5:00 p.m. each day.

Place: Room 421, National Science Foundations, 1800 G Street, N.W., Washington, D.C. 20550.

Type of Meeting: Closed.

Contact Person: Dr. Ronald J. Overmann, Program Director, History and Philosophy of Science Program, Room 312, National Science Foundation, Washington, D.C. 20550, telephone (202) 357–9677.

Purpose of Subpanel: To provide advice and recommendation concerning support for research in History and Philosophy of Science.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority To Close: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

M. Rebecca Winkler,
Committee Management Coordinator.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 12665; 812–5213]

American General Life Insurance Company of New York, et al; Filing of Application

September 16, 1982.

American General Life Insurance Company of New York ("AGNY"), American General Life Insurance Company of New York Separate Account E ("Account E") and American General Capital Distributors, Inc. ("AG Capital") (together "Applicants") filed an application on June 21, 1982, and an amendment thereto on September 3, 1982, for an order of the Commission exempting Applicants to the extent requested pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") from the provisions of Sections 2(a)(32), 2(a)(35), 22(c), 26(a), 26(a)(2)(C), 27(a)(3), 27(c)(1), 27(c)(2), and 27(d) of the Act and Rule 22c–1 thereunder and granting, pursuant to Section 11 of the Act, approval of the terms of certain offers of exchange. Account E, a separate account of AGNY, was created for the purpose of investing the net purchase payments received by AGNY for single payment and periodic payment variable annuity contracts which it sells. Account E is registered under the Act as a unit investment trust. AGNY is its depositor and AG Capital is its principal underwriter. All interested persons are referred to the application on file with the Commission for a statement of the facts and representations made therein, which are summarized below.

Until recently, AGNY offered certain variable annuity contracts funded through Account E ("Current Contracts") under which contractowners could, from time to time, cause interests in Account E to be transferred for investment purposes among one of three divisions of Account E (divisions one through three), each of which invests its assets solely in a different registered open-end management investment company. The Commission has granted exemptions from certain sections of the Act and

rules thereunder and approval under Section 11 of the Act in connection with the activities and operation of Account E in offering the Current Contracts. As a consequence of Revenue Ruling 81–225, AGNY temporarily ceased sales of Current Contracts. Since two new divisions (divisions six and seven) of Account E have become available, the acceptance of purchase payments under Current Contracts has been resumed. Transfers into divisions six and seven under Current Contracts are effected pursuant to Rule 6c–6(T) under the Act. Under Current Contracts offered and sold subsequent to the availability of divisions six and seven, only those divisions are available. Account E intends to offer a new division (division 8), to which owners of Current Contracts may cause their interests to be invested subject to the same conditions previously applicable to Current Contracts. The fee for any transfer is $5 under Current Contracts, and no change in existing fees relating to transfers under Current Contracts is being sought by Applicants.

AGNY now intends to offer a new class of variable annuity contracts (the "Proposed Contracts") in place of the Current Contracts. The Proposed Contracts provide that contractowners may elect to have their interests in Account E allocated, from time to time, among not more than three divisions of Account E (divisions six through eight), subject to certain conditions. Transfers among divisions under the Proposed Contracts are effected at net asset value, subject only to a fixed charge of $10 with respect to each such transfer. No transfer charge will be imposed in connection with certain transfers effected at or subsequent to annuitization.

Under the Proposed Contracts, premium taxes will be deducted as of the annuity date, although AGNY may have actually paid the tax prior to that time. A withdrawal charge will be imposed on surrenders during the accumulation period, calculated as a percentage of the dollar amount of purchase payments made during the preceding 72 months which are withdrawn; it is always assumed that the earliest payments during a 72-month period are withdrawn first. The withdrawal charge equals the sum of: 1% of purchase payments made during the 61st through 72nd months prior to surrender; 2% of purchase payments made during the 49th through 60th months; 3% of purchase payments made during the 37th through 48th months; 4% of purchase payments made during the 25th through 36th months; 5% of purchase payments made during the 13th through 24th months; and 6% of purchase payments made during the first 12 months prior to surrender.

If a partial surrender is made which reduces the accumulated value of the contract by less than 80% of the accumulated value immediately preceding such partial surrender, no withdrawal charge will be imposed at that time on any amount withdrawn (the "Exempt Amount") which, when added to all other Exempt Amounts previously withdrawn over the life of the contract, does not exceed the sum of the following: 100% of purchase payments made more than 72 months prior to the partial surrender; 50% of purchase payments made during the 61st through 72nd months; 40% of purchase payments made during the 49th through 60th months; 30% of purchase payments made during the 37th through 48th months; 20% of purchase payments made during the 25th through 36th months; and 10% of purchase payments made during the 13th through 24th months prior to the partial surrender. If the partial surrender is for more than the Exempt Amount so calculated, the same withdrawal charge will be imposed as would be imposed on a total surrender in the amount of such excess. Once a withdrawal charge has been imposed on any purchase payment or portion of a purchase payment, that purchase payment or portion will not thereafter be considered as a purchase payment for purposes of calculating either the withdrawal charge or the Exempt Amount.

If a partial surrender is made which reduces the accumulated value of the contract by 80% or more of the accumulated value of the contract immediately preceding such partial surrender, or if a total surrender is made, the amount of the withdrawal charge imposed will be adjusted to reflect a withdrawal charge on Exempt Amounts withdrawn without a withdrawal charge pursuant to any partial surrenders made during the preceding 12 months.

The withdrawal charge also will be imposed in connection with certain settlement options under the Proposed Contracts. Although imposed on or after the annuity date, these charges will be based on purchase payments, as described above in connection with surrenders made during the accumulation period.

Under the Proposed Contracts, AGNY will charge the Account E an amount (the "Asset Charge"), calculated daily, at an annual rate of 1.25% of the average daily net asset value of Account E assets allocable to the Proposed Contracts. The Assets Charge is intended to cover additional anticipated administrative expenses and to compensate the Company for assuming mortality risks. Applicants estimate that compensation for assumption of the mortality risk constitutes ⅘ths of the Asset Charge and additional anticipated administrative expenses constitute approximately ⅕th of the Asset Charge. The Asset Charge is guaranteed and may not be increased by AGNY.

Under the Proposed Contracts, AGNY will also receive reimbursement for administrative expenses from an annual contract maintenance charge in the amount of $30 per contract, which will be assessed on the last day of each contract year during the Accumulation Period. In the case of surrender of the contract, this charge will be prorated on a monthly basis for each month or part of a month during the contract year. This charge is not guaranteed and may be raised or lowered in AGNY's discretion as to contracts outstanding at any time and/or as to contracts issued subsequently.

Applicants represent that the administrative charges under the Proposed Contracts are reasonable, in amounts not exceeding anticipated administrative expenses, and not properly chargeable to sales or promotional activities within the meaning of the Act. Applicants also assert that the level of the Asset Charge, annual maintenance charge, transfer fees and premium taxes is cost-related, reasonable and consistent with industry practice.

Exemptive Relief Requested

Applicants request exemptions from sections 2(a)(32), 2(a)(35), 22(c), 26(a)(2)(C), 27(a)(3), 27(c)(1), 27(c)(2) and 27(d) of the Act and Rule 22c–1 thereunder in order to impose the withdrawal charge.

Applicants request exemptions from Section 26(a) and 27(c)(2) of the Act in order that the assets of Account E may be held by AGNY under the terms and conditions, and subject to the charges and fees, as set forth in the application, rather than by a trustee or custodian.

Section 6(c)

Section 6(c) of the Act generally authorizes the Commission to exempt any person, security or transaction from the provisions of the Act and rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly

intended by the policy and provisions of the Act. Applicants assert that the requested exemptions are necessary and appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act.

Approval Requested

Pursuant to Section 11 of the Act, Applicants request approval of the terms of the proposed transfers among divisions one through three and six through eight of Account E under the Current Contracts and among divisions six through eight of Account E under the Proposed Contracts.

Notice is further given that any interested party may, not later than October 12, 1982 at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following October 12, 1982 unless the Commission thereafter orders a hearing upon request or upon the Commission's motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing, if ordered, and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82-26336 Filed 9-23-82; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 12670; 811-1276]

Industries Trend Fund, Inc.; Filing of an Application

September 16, 1982.

Notice is hereby given that Industries Trend Fund, Inc. ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an openend, diversified, management investment company, filed an application on August 10, 1982, and an amendment thereto on September 2, 1982, for an order pursuant to Section 8(f) of the Act, declaring that it has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant was organized as a Texas corporation. On July 20, 1964, Applicant registered under the Act and filed a registration statement pursuant to the Securities Act of 1933 with respect to 5,000,000 shares of its common stock. That registration was declared effective on February 5, 1965, whereupon Applicant commenced the initial offering of its shares.

On January 31, 1982, Applicant's board of directors voted unanimously to approve a Plan and Agreement of Reorganization ("Plan") which was further approved by the necessary affirmative vote of two-thirds of Applicant's shareholders on April 9, 1981. Pursuant to the Plan, at the close of business April 30, 1981, substantially all of Applicant's assets were transferred to Pilot Fund, Inc. ("Pilot") in exchange for shares of Pilot common stock on the basis of relative net asset value.

Applicant states that its shareholders received a final dividend from net investment income of $0.238 per share, payable May 11, 1981, to shareholders of record at the close of business on May 1, 1981. Applicant further represents that there were 4,849,873 shares of Pilot common stock issued to its shareholders on the basis of 1.399 Pilot shares for each share of Applicant.

According to the application, Applicant has taken the steps necessary to dissolve itself in accordance with the provisions of Texas law and now seeks an order of the Commission terminating its registration as an investment company under the Act.

Applicant represents that it has no assets, liabilities or securityholders, and that it is not a party to any litigation or administrative proceedings. Applicant further represents that it is not now engaged, nor does it propose to engage, in any business activities other than those necessary for the winding up of its affairs.

Section 8(f) of the Act provides, inpertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than October 12, 1982, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82-26331 Filed 9-23-82; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 12669; 812-5256]

Iowa Liquid Assets Fund, Inc.; Filing of an Application

September 16, 1982.

Notice is hereby given that Iowa Liquid Assets Fund, Inc. ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an openend, diversifed, management investment company, filed an application on July 28, 1982, and an amendment thereto on August 30, 1982, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a–4 and 22c–1 thereunder, to the extent necessary to permit Applicant to calculate its net asset value per share using the amortized cost method of valuation. All interested persons are

referred to the application on file with the Commission for a statement of the representations contained therein which are summarized below.

According to the application, Applicant's investment objective is to seek maximum current income consistent with safety of principal and maintenance of liquidity through investments in United States Government securities and repurchase agreements secured by such securities; commercial and industrial loans issued and guaranteed by Iowa commercial banks ("Banks"); and redeemable trust certificates sponsored by federally insured student loans originated by such Banks. Applicant represents that the creditworthiness, including financial condition and loan loss record, of all Banks seeking to sell loans to Applicant will be carefully evaluated by its investment adviser prior to the execution of any agreement with such Bank, and periodically thereafter.

Applicant further represents that its board of directors will also make a determination of the creditworthiness of each participating Bank before, or at the next quarterly board meeting following, execution of any relevant agreement with such Bank, and at least annually thereafter. Moreover, to the extent that Applicant purchases floating rate or variable rate obligations or obligations with demand features, Applicant intends to determine the maturities of such obligations in accordance with the procedures set forth in proposed Rule 2a–7 under the Act, or if the rule should ultimately be adopted, in accordance with the procedures set forth in the rule as adopted.

As here pertinent, Section 2(a)(41) of the Act defines value to mean: (1) With respect to securities for which market quotations are readily available, the market value of such securities, and (2) with respect to other securities and assets, fair value as determined in good faith by the board of directors. Rule 22c–1 adopted under the Act provides, in part, that no registered investment company or principal underwriter therefor issuing any redeemable security shall sell, redeem or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to puchase or to sell such security. Rule 2a–4 adopted under the Act provides, as here relevant, that the "current net asset value" of a redeemable security issued by a registered investment company used in computing its price for the purpose of distribution, redemption and repurchase shall be an amount which reflects calculations made substantially in accordance with the provisions of that rule, with estimates used where necessary or appropriate. Rule 2a–4 states further that protfolio securities with respect to which market quotations are readily available shall be valued at current market value, and that other securities and assets shall be valued at fair value as determined in good faith by an investment company's board of directors. Prior to the filing of the application, the Commission expressed its view that, among other things, (1) Rule 2a–4 requires that portfolio instruments of "money market" funds be valued with reference to market factors and (2) it would be inconsistent, generally, with the provisions of Rule 2a–4 for a "money market" fund to value its portfolio instruments with over sixty-day maturities on an amortized cost basis (Investment Company Act Release No. 9786, May 31, 1977). In view of the foregoing, Applicant requests an exemption from Section 2(a)(41) of the Act and Rules 2a–4 and 22c–1 thereunder to the extent necessary to permit Applicant to calculate its net asset value per share using the amortized cost method of valuation.

Section 6(c) of the Act provides, in pertinent part, that the Commission may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from any provision of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of its request, Applicant represents that its board has determined that, absent unusual circumstances, amortized cost value represents the fair value of its portfolio securities and that the amortized cost method of valuation will benefit both the Applicant and its shareholders. Applicant states that by using the amortized cost method of valuing its shares, investors would have the convenience of being able to value their holdings simply by knowing the number of shares which they own. Applicant further maintains that by using the amortized cost method of valuation its net asset value per share would not vary as a result of realized and unrealized capital gains and loses.

Applicant consents to the imposition of the following conditions in an order granting the relief it requests:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, the Applicant's board of directors undertakes—as a particular responsibility within the overall duty of care owed to Applicant's shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objective, to stabilize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at $1.00 per share.

2. Included within the procedures to be adopted by the board shall be the following:

(a) Review by the board, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from Applicant's $1.00 amortized cost price per share, and the maintenance of records of such review.[1]

(b) In the event such deviation from Applicant's $1.00 amortized cost price per share exceeds ½ of 1 percent, a requirement that the board will promptly consider what action, if any, should be initiated by it.

(c) Where the board believes the extent of any deviation from Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which may include: Redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten the average maturity of portfolio instruments of Applicant; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that Applicant will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a

[1] To fulfill this condition, Applicant intends to use actual quotations or estimates of market value reflecting current market conditions chosen by the board in the exercise of its discretion to be appropriate indicators of value which may include, *inter alia*, (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from yield data relating to classes of money market instruments published by reputable sources.

dollar-weighted average portfolio maturity in excess of 120 days.[3]

4. Applicant will record, maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in paragraph 1 above, and will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of its board's considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the board's meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which the board determines present minimal credit risks, and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by its board of directors.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement as to whether any action pursuant to paragraph 2(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person may, not later than October 12, 1982, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82-26332 Filed 9-23-82; 8:45 am]

BILLING CODE 8010-01-M

[3] In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

[Release No. 12673; 812–5031]

LFS Variable Account A, et al.; Filing of Application

September 17, 1982.

Notice is hereby given that Lomas Financial Security Insurance Company (the "Insurance Company"), LFS Variable Account A (the "Variable Account"), a separate account of the Insurance Company registered under the Investment Company Act of 1940 ("Act") as a management investment company, and, where applicable, Advance Financial Services Corporation (the "Broker-Dealer") filed an application on December 1, 1981 and amendments thereto on April 16, 1982 and September 3, 1982 for an order of the Commission, pursuant to Section 6(c) of the Act, exempting them from provisions of Sections 2(a)(32), 2(a)(35), 17(f), 22(c), 27(c)(1), 27(c)(2), and 27(d) of the Act and Rules 17f–2 and 22c–1 thereunder to the extent necessary to permit the transactions described in the application. Additionally, the application, as amended, includes requests by the Insurance Company, the Variable Account, Advance Mortgage Corporation (the "Mortgage Company"), Advance Asset Advisers, Inc., (the "Investment Adviser") and Advance Financial Securities Corporation (collectively, "Applicants") for an order of the Commission, pursuant to Sections 17(b) and 6(c) of the Act, for an exemption from Section 17(a) of the Act and, pursuant to Section 17(d) of the Act and Rule 17d–1 thereunder, to permit the Applicants to engage in certain transactions in the manner and subject to the conditions set forth in the application. All interested persons are referred to the application on file with the Commission for a statement of the facts and representations contained therein, which are summarized below.

According to the Applicants, the Mortgage Company, a Delaware corporation, owns all of the outstanding common stock of the Insurance Company and is wholly owned by the Lomas/Advance Venture, which is a joint venture organized under Texas law and controlled by the Lomas & Nettleton Financial Corporation. Optimum Mortgage Company Ltd., a Michigan limited partnership, also has a substantial interest in the Lomas/Advance Venture. The sole general partner of Optimum Mortgage Company Ltd. is Optimum Mortgage Corporation, a Delaware corporation and an affiliate of Oppenheimer and Company, a New York-based investment banker. The Broker-Dealer and the Investment Adviser are also wholly owned by the Mortgage Company.

The Proposed Transactions With Affiliates

Applicants request an exemption from Sections 17(a) and 17(d) of the Act and Rule 17d–1 thereunder to permit the Variable Account to purchase Conventional Mortgage Pass-Through Certificates ("Conventional Certificates"), Federal National Mortgage Association ("FNMA") Guaranteed Mortgage Pass-Through Certificates ("FNMA Certificates"), and Government National Mortgage Association Modified Pass-Through Mortgage-Backed Securities ("GNMA Securities") from the Mortgage Company (collectively, "Mortgage Securities").

According to Applicants, the Variable Account intends to purchase Mortgage Securities from the Mortgage Company for investment purposes. The Variable Account will have no participation in the offering of the Mortgage Securities as an issuer, underwriter, dealer, or manager and will not share in any profits or losses of such offering. The Broker-Dealer will act as placement agent for each purchase of a Mortgage Security from the Mortgage Company by the Variable Account but will receive no compensation, commission or broker's fee for performing this function. The Mortgage Company will be acting as a principal and not as an agent or broker in connection with the sale of Conventional Certificates and GNMA Securities. Although FNMA will be the issuer of FNMA Certificates, it will issue them either to or to the order of the Mortgage Company, and therefore the Mortgage Company also will be acting

as a principal and not as an agent or broker in connection with sales of FNMA Certificates to the Variable Account.

The Insurance Company, the Variable Account, and the Investment Adviser believe that the purchasing of Mortgage Securities from the Mortgage Company is desirable because they believe that the most effective way for the Variable Account to invest in conventional mortgage loans is to purchase Conventional Certificates or FNMA Certificates. According to Applicants, precluding the Variable Account from purchasing Conventional Certificates from the Mortgage Company would significantly limit the investment opportunities of the Variable Account in this market. Applicants also assert that precluding the Variable Account from purchasing FNMA Certificates from the Mortgage Company probably would significantly limit the investment opportunities of the Variable Account in this market because FNMA Certificates are marketed by the seller of the underlying conventional mortgage loans and the Mortgage Banker is one of the largest mortgage bankers in the country. Finally, Applicants contend that it would be advantageous to the Variable Account to purchase GNMA Securities directly from the Mortgage Company because, *inter alia*, the investment in GNMA Securities is extremely safe and the price at which the Mortgage Company will sell the securities to the Variable Account will be better than the price then available on the open market. Therefore, Applicants request an exemption from the prohibitions of Section 17(a), subject to the conditions listed below, to the extent necessary or appropriate to authorize the Variable Account to purchase Mortgage Securities from the Mortgage Company as summarized above and described in the application. Similarly, Applicants request an exemption from the prohibitions of Section 17(d), as implemented in Rule 17d–1, subject to the conditions listed below, to the extent necessary or appropriate to authorize the Mortgage Company to engage in the transactions with the Variable Account as summarized above and described in the application.

In making the foregoing request, Applicants have agreed to the following conditions:

1. A majority of the Board of Managers of the Variable Account will not be "interested persons" of the Applicants as defined in the Act.

2. Before any transaction will be executed with the Mortgage Company for the purchase of a Conventional Certificate, FNMA Certificate, or GNMA Security, the Variable Account or the Investment Adviser will obtain such information as they deem necessary to determine the most favorable terms available with respect to the proposed instrument. To this end, for each contemplated transaction the Investment Adviser will formulate a proposal containing the terms of the proposed instrument. The Variable Account or the Investment Adviser must obtain at least three competitive offers from at least three independent sources for each proposal. Such sources must be those who, in the experience of the Variable Account or the Investment Adviser, are in a position to quote favorable terms with respect to the proposed instrument.

3. The Variable Account will not enter into any agreement with the Mortgage Company with respect to a proposed Conventional Certificate, FNMA Certificate, or GNMA Security unless a determination is made in each instance, based upon information available to the Variable Account and the Investment Adviser, that the price available from the Mortgage Company is "better than" that available from the independent sources. To be considered "better than" that available from other sources, the yield quoted by the Mortgage Company must be at least one basis point better than the best of the bona fide offers obtained from the independent sources.

4. The Variable Account will not enter into any agreement with the Mortgage Company with respect to a proposed Conventional Certificate unless the Mortgage Company agrees that the mortgage loans backing up the proposed Conventional Certificate will be assigned to an independent bank trustee for the benefit of the Account and the pooling and servicing agreement between the Mortgage Company and the trustee will give the trustee the authority to terminate all the rights and obligations of the Mortgage Company under the pooling and servicing agreement upon the occurrence of an event of default by the Mortgage Company and, in furtherance of that authority, provides for the receipt by the trustee of the standard and customary reports and certifications. If a bank letter of credit is used in place of mortgage guaranty insurance for any Conventional Certificate, then for purposes of this condition, a bank trustee shall not be considered "independent" with respect to that Certificate if that bank or any affiliate thereof issued the letter of credit.

5. Before the Variable Account enters into any contract, transaction, or agreement with the Mortgage Company relating to Conventional Certificates or FNMA Certificates, the contract, transaction, or agreement (including, with respect to Conventional Certificates, the terms of the pooling and servicing agreement between the Mortgage Company and the trustee for the benefit of the Variable Account) will be reviewed and approved by a majority of the Variable Account's Board of Managers, including a majority of the disinterested members of the Board, after a thorough examination of all relevant facts. The relevant facts include the proposal formulated by the Investment Adviser and the quotations received from independent sources in response thereto. The Board of Managers shall determine in the course of their review and approval that:

(a) Such contracts, transactions or agreements are in the best interest of the Variable Account and the Contract owners;

(b) The nature and quality of the services that the Mortgage Company will provide pursuant to its agreements with the independent trustee will be at least equal to those provided by others offering the same or similar services; and

(c) The fees received by the Mortgage Company for such services are fair and reasonable in light of the usual and customary charges made by others for services of the same nature and quality.

6. All transactions between the Variable Account and the Mortgage Company will originate with the Variable Account or the Investment Adviser. The Mortgage Company will make no solicitations of the Variable Account. In communications with the Variable Account with respect to the proposed transactions, the Mortgage Company personnel will confine their activities to the response to inquiries made of them by the Variable Account or the Investment Adviser.

7. The Variable Account intends to purchase Conventional Certificates, FNMA Certificates, and GNMA Securities for investment purposes. The Variable Account will have no participation in the offering of these securities as an issuer, underwriter, dealer, or manager and the Variable Account will not share in any profits or losses of such offering.

8. No Mortgage Pass-Through Certificate shall be sold by the Mortgage Company to, or purchased by, the Variable Account if an underlying mortgage in the mortgage pool results from the sale of real estate owned by an affiliated person of the Applicants herein, or if the mortgagor is an affiliated person of the Applicants.

9. Applicants will make every reasonable effort to obtain a rating from a major rating service for each Conventional Certificate purchased from the Mortgage Company.

10. The Variable Account and the Investment Adviser will maintain records with respect to all transactions with the Mortgage Company, including documentation of having obtained quotations from at least three other sources with respect to each transaction in Conventional Certificates, FNMA Certificates, and GNMA Securities, and documentation of having attempted to obtain a rating from a major rating service for each Conventional Certificate purchased from the Mortgage Company and the results thereof. A schedule of all transactions with the Mortgage Company, including the ratings, if any, on Conventional Certificates held by the Variable Account, will be filed with the periodic reports filed by the Variable Account with the Commission pursuant to Sections 30(a) and 30(b)(1) of the Investment Company Act of 1940.

11. All transactions referred to herein shall be carried out in accordance with the representations made in this Application for an exemption order.

12. The Board of Managers of the Variable Account will periodically monitor the activities of the Variable Account and the Investment Adviser to ensure that the conditions stated in this Application are being adhered to in all respects.

Charges and Deductions Under the Contracts

Applicants state that the following charges will be assessed either against contract owners or the Variable Account: (i) A Contract Maintenance Charge of, initially, $25.00 per calendar year per contract; (ii) an Expense Reimbursement Charge which is guaranteed to be no more than $10.00 per year per contract; (iii) a daily mortality and expense risk premium at an effective annual rate of 1.00% of the value of the assets of the variable account; (iv) a daily charge for investment advisory services at an effective annual rate of 0.30% of the value of the assets of the Variable Account; (v) a deduction for premium taxes; and (vi) a contingent deferred sales load.

The Contract Maintenance Charge will be deducted to offset the expected costs of administrative services purchased from a third party pursuant to an administrative services contract. Prior to the annuity date, the Contract Maintenance Charge will be deducted from the contract value on December 31 of each calendar year for the subsequent year. Such a charge also will be deducted from the initial purchase payment in determining the net purchase payment allocated to the Variable Account. The amount will be prorated for the first contract year from the date of issue of a contract to the end of the calendar year so that it will be assessed only for the number of days remaining in the calendar year. After the annuity date, the charge will be prorated and deducted monthly from the amount of each annuity payment, except that the charge shall not be deducted from annuity payments made between the annuity date and December 31 of the year in which annuity payments commence.

The Expense Reimbursement Charge also will be deducted from contracts on December 31 of each year. Each contract which has been in effect on that date for at least 60 days will be charged a pro rata portion of the Insurance Company's accumulated expenses for performing services through such date which are not covered by the Contract Maintenance Charge. The maximum amount of the Expense Reimbursement Charge for any year will be $10.00 per contract. To the extent any actual expenses are not reimbursed during any year or years as a result of the $10.00 limitation, these expenses will be carried over to the next year or years. Applicants represent that the Contract Maintenance Charge and Expense Reimbursement Charge are not designed to exceed the actual expenses incurred in administering the contracts or to subsidize the costs of administering other contracts issued by the Insurance Company.

Of the mortality and expense risk premium 0.80% of the charge is allocable to mortality risks and 0.20% to expense risks. Applicants represent that the mortality and expense risk premium under the contracts is consistent with the protection of investors because it is a reasonable and proper insurance charge. The amount of the charge is consistent with industry practice for policies (as reflected in public filings made with the Commission and with various state insurance departments).

The contingent deferred sales charge ("sales charge"), when imposed, will be 5% of the amount withdrawn (which amount includes the amount withdrawn for the sales charge). However, the first time in any contract year that contractowners make a withdrawal, they may withdraw up to 10% of all purchase payments made more than one year prior to the date of withdrawal without incurring the sales charge. Also, amounts withdrawn that are deemed to come from purchase payments made more than five years prior to the date of withdrawal may be withdrawn free of a sales charge. To determine whether an amount withdrawn is attributable to a purchase payment made more than five years prior to the date of withdrawal, all withdrawals will be handled on a first-in, first-out basis. Accordingly, all amounts withdrawn other than such part of the first withdrawal in any contract year that does not exceed 10% of all purchase payments made more than one year prior to the date of withdrawal will be deemed to come from puchase payments in the chronological order of receipt of these purchase payments. Additionally, amounts withdrawn that are deemed to come from earnings may be withdrawn free of a sales charge (amounts withdrawn in excess of the total amount of purchase payments made under the contract as of the date of withdrawal will be deemed to come from earnings). Finally, there will be no sales charge on distributions made pursuant to the death of the annuitant.

Applicants request an exemption from the provisions of Sections 2(a)(32), 2(a)(35), 22(c), 27(c)(1), 27(c)(2) and 27(d) of the Act and Rule 22c-1 thereunder to the extent necessary or appropriate to permit the offer of the contracts with the described sales load arrangement. Applicants also request an exemption from Section 27(c)(2) of the Act to permit the imposition of the Contract Maintenance Charge, the Expense Reimbursement Charge, the deduction for premium taxes, the mortality and expense risk premium, and the investment advisory fee.

Custodial Requirements

It is anticipated that the securities and similar investments of the Variable Account will be deposited with the National Bank of Detroit or other qualified bank pursuant to a safekeeping agreement. Applicants request an exemption from Section 17 and Rule 17f-2 to permit access to the securities and similar investments of the Variable Account to (1) authorized representatives of the Arizona Director of Insurance, and (2) officers or responsible employees of the Insurance Company authorized by resolutions of both the Board of Directors of the Insurance Company and the Board of Managers of the Variable Account. Applicants also request that the Commission grant an order of exemption from Section 27(c)(2) of the Act to the extent necessary to permit the Insurance Company to act as custodian and hold the assets, although not as trustee, under

the safekeeping arrangements described in the application. Furthermore, Applicants respectfully request an exemption from Section 27(c)(2) to the extent necessary to allow the Insurance Company to hold securities and similar investments in book entry form, as permitted by Section 17(f) and Rule 17f–4.

Section 17(b) of the Act authorizes the Commission to exempt a proposed transaction from Section 17(a) of the Act if evidence established that: (1) The terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned; (2) the proposed transaction is consistent with the policy of each registered investment company concerned, as recited in its registration statement and reports filed under the Act; and (3) the proposed transaction is consistent with the general purposes of the Act.

Rule 17d–1, promulgated under Section 17(d) of the Act, authorizes the Commission to exempt a joint enterprise, joint arrangement or profit-sharing plan involving a registered investment company from Rule 17d–1 after considering whether the participation of the registered investment company in the joint enterprise, joint arrangement or profit-sharing plan on the basis proposed is consistent with the provisions, policies and purposes of the Act and the extent to which such participation is on a basis different from or less advantageous than that of other participants.

Section 6(c) of the Act generally authorizes the Commission to exempt any person, security or transaction from the provisions of the Act and rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested party may, not later than October 12, 1982 at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following October 12, 1982 unless the Commission thereafter orders a hearing upon request or upon the Commission's motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing, if ordered, and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 12667; 812–4031]

Merrill Lynch Pacific Fund, Inc.; Filing of an Application

September 16, 1982.

Notice is hereby given that Merrill Lynch Pacific Fund, Inc. ("Applicant"), an open-end, diversified management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on December 11, 1980, and amendments thereto on June 9, 1981, and February 11, 1982, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 17(f) of the Act to permit Applicant's custodian, State Street Bank & Trust Company ("State Street"), to enter into a sub-custodian agreement with The National Bank of Australasia, Ltd. ("Bank") pursuant to which Australian corporate securities owned by Applicant will be deposited in the custody of the Bank. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that prior to July 11, 1980, it invested exclusively in Japanese securities and until that date Applicant was known as The Nomura Capital Fund of Japan, Inc. On July 11, 1980, the management of Applicant was transferred from Nomura Capital Management, Inc. to Merrill Lynch-Nomura Management Company, Inc. and Applicant's present name assumed. Applicant represents that its investment objectives now is to seek long-term capital appreciation through investment in equities of corporations domiciled in Far Eastern or Western Pacific countries, including Japan, Australia, Hong Kong, Singapore and the Philippines.

According to the application, a substantial majority of Applicant's investments, other than Japanese securities, are those of corporations domiciled in Australia. Applicant states, however, that frequently there may be no organized trading market for Australian corporate securities outside Australia, requiring Applicant to effect trading in these securities in Australia. Even where Australian securities are traded abroad, such as in London, Applicant states that they are generally available only at significant premiums over the prices prevailing on Australian exchanges. In addition, Applicant represents that the Articles of Association of some Australian corporations contain provisions which have the effect of requiring foreign owners of their shares to hold the certificates evidencing such shares in Australia in the name of a nominee with an address in Australia.

The application states that the Bank is the third largest non-government bank in Australia in terms of profits, and the third largest in terms of deposits, with total stockholders funds of $A591,084,000 at September 30, 1981, the latest date for which figures are available. The application further states that the Bank is chartered under the laws of Victoria and its operations are subject to supervision of the Reserve Bank of Australia under the Banking Act of Australia. The bank has 902 offices throughout Australia and an additional 17 offices overseas, including offices located in New York, London, Singapore and Hong Kong.

Applicant proposes to join with State Street and the Bank in the execution and delivery of a sub-custody agreement pursuant to which the Bank, through a wholly-owned and fully guaranteed subsidiary, will act as a sub-custodian of the Applicant's securities in Australia and, in that capacity, receive and hold the monies of the Applicant and the Australian securities purchased by the Applicant. Applicant represents that the Bank will be acting solely as the agent of State Street, will be subject only to the instructions of State Street and will not deal directly with Applicant. The proposed sub-custody agreement will provide, among other things, that it will be governed by and interpreted in accordance with the laws of the Commonwealth of Massachusetts and that the securities held by the Bank shall not be subject to any right, charge,

security interest, lien or claims of any kind in favor of the Bank except for their safe custody or administration, and the beneficial ownership of such securities shall be freely transferable without the payment of money or value other than for safe custody or administration. The sub-custody agreement will further provide that the Bank shall grant access to such accountants, attorneys and agents designated by State Street for the purpose of making such direct physical examination as State Street shall from time to time deem necessary to verify the accuracy of the books and records of the Bank, relating to the money and securities received, held and disbursed for the account of State Street. The Applicant has arranged with Price Waterhouse, its independent public accountants, to have their Australian affiliate make such examinations, including at least one regularly scheduled audit and one surprise audit for each of the Applicant's fiscal years.

Section 17(f) of the Act, in relevant part, provides that every registered management investment company shall maintain its securities and similar investments in the custody of a bank having the qualifications prescribed in paragraph (1) of Section 26(a) of the Act. A bank generally is defined in Section 2(a)(5) of the Act as a bank organized or doing business under the laws of any State or the United States which is supervised or examined by State or Federal authority having supervision over banks. It is the Applicant's understanding that Section 17(f) permits the placement and retention of securities of a registered management investment company in a foreign branch of a domestic bank falling within the definition contained in Section 2(a)(5) of the Act and meeting the requirements of paragraph (1) of Section 26(a), provided that the arrangements therefor are consistent with the arrangements of a domestic custodian bank. Applicant represents that there is, however, no such foreign branch of a domestic bank in Australia. Therefore, it is claimed that unless the Applicant is able to obtain an order exempting it from the requirements of Section 17(f) of the Act, investment in certain Australian corporations will be impeded due to the logistical and safety problems associated with transporting the securities, and in other Australian corporations investment will be precluded entirely due to the requirement that stock certificates of such corporations be held in Australia.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision under the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant submits that the exemptive relief requested would be consistent with the protection of investors and the policy and provisions of the Act because the subcustody arrangements provide for the same degree of contractual responsibility as would exist if the Applicant's securities were continuously retained in the direct custody of a bank qualifying as a custodian under the Act. State Street has agreed that, irrespective of the fact that the Bank will have actual physical possession of the securities which are held pursuant to the sub-custody agreement, State Street will be held to the same standard of care with respect to the safekeeping of such securities as would be applicable if State Street were itself holding such securities in Massachusetts. State Street intends that in the performance of its duties under the sub-custody agreement it shall exercise reasonable care. Applicant further represents that State Street will indemnify and hold the Applicant harmless from and against any loss which shall occur as the result of the failure of the Bank to exercise reasonably care with respect to the safekeeping of securities to the same extent that State Street would be required to indemnify and hold the Applicant harmless if State Street itself were holding such securities in Massachusetts. State Street has further warranted to the Applicant that the established procedures to be followed by the Bank, in State Street's opinion, afford protection for the Applicant's securities at least equal to that afforded by State Street's established procedures with respect to similar securities held by State Street in Massachusetts.

The application states that State Street has advised the Applicant that the Bankers Blanket Bond which it maintains provides standard non-negligent loss coverage with respect to securities which may be held in State Street's offices or in offices of any of its affiliates or subsidiaries and securities which may be held in the office of non-affiliated foreign banks and foreign securities depositories. It is further stated that State Street intends to maintain such coverage so long as it is available at reasonable cost, and shall inform the Applicant if at any time State Street shall for any reason discontinue such coverage. The application also states that State Street has advised the Applicant that it does not intend to obtain any insurance for the Applicant's benefit which protects against the imposition of exchange control restrictions or confiscation, expropriation or nationalization of any securities or the assets of the issuer of such securiteis by a government of any foreign country in which the issuer of such securities is organized or in which such securities are held for safekeeping. finally, it is stated that State Street has advised the Applicant that insurance coverage in respect of confiscation, expropriation or nationalization of securities may be available to the Applicant at its own expense.

Notice is further given that any interested person may, not later than October 12, 1982, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereof. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 12568, 811-2856]

Morgan Capital Corp.; Filing of an Application

September 16, 1982.

Notice is hereby given that Morgan Capital Corp. ("Applicant"), 23 Wall Street, New York, NY 10015, registered under the Investment Company Act of 1940 ("Act") as a closed-end, non-diversified, management investment company, filed an application on July 27, 1982, for an order of the Commission, pursuant to Section 8(f) of the Act, declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The application states, among other things, that Applicant, a Maryland corporation and a wholly-owned subsidiary of Morgan Holdings Corp., registered under the Act on July 31, 1978; that it has not filed a registration statement under the Securities Act of 1933, and that it has not made a public offering of its securities.

Applicant's board of directors, by unanimous consent on May 14, 1982, authorized the distribution of all of Applicant's capital surplus and retained earnings, other than $100 representing 100 shares of common stock. Applicant states that it has disposed of its entire investment portfolio and that it has ceased all trading operations; that it paid dividends to its sole securityholder totalling $18,660,000 in 1981, and a final dividend of $174,991 on July 16, 1982. Applicant has no active full time employees. According to the application, Applicant has no unpaid debts or other liabilities, has not created a separate trust to hold any of its assets, and it is not engaged or involved in any litigation or administrative proceedings.

The application states that Applicant has one securityholder, and although it has no present plans to engage in any specific business activity, it may in the future engage in business activities provided that such activities will not require it to register under the Act.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company it shall so declare by order and, upon taking effect of that order, the registration of such company under the Act shall cease to be in effect.

Notice is further given that any interested person may, not later than October 12, 1982, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing theron. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19054; SR-NASD-81-19]

National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change

September 16, 1982.

The National Association of Securities Dealers, Inc. ("NASD"), 1735 K Street, N.W., Washington, D.C. 20006, filed a proposed rule change on August 7, 1981, and an amendment thereto on July 19, 1982, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, to adopt Appendix F to Article III, Section 34 of the NASD's Rules of Fair Practice. Appendix F prescribes standards for members of the NASD, or persons associated with a member, who participate in the public offering of a direct participation program ("DPP"). The standards include requirements regarding investor suitability to purchase a DPP; disclosure of material facts concerning a DPP; and the reasonableness of organization and offering expenses, compensation paid in connection with an offering, and sales incentive items provided to a member or associated person.

Notice of the original proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 18038, August 14, 1981) and by publication in the **Federal Register** (46 FR 42392, August 20, 1981). The amendment was noticed in Securities Exchange Act Release No. 18916, July 26, 1982, and in the **Federal Register** (47 FR 33347, August 2, 1982). All written statements filed with the Commission and all written communications between the Commission and any person relating to the proposed rule change were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552) were made available to the public at the Commission's Public Reference Room.

The Commission received only three comment letters in response to the original filing of the proposed rule change. Although these comment letters raised a variety of issues regarding the proposed rule change, the amendments to the rule change responded to the majority of issues discussed by the commentators. The NASD, however, did not adopt two suggestions by the commentators. First, one commentator, although generally supportive of Appendix F, believed that so-called "back-end" charges[1] should be permitted as underwriting compensation. In addition, the same commentator believed that an underwriter's due diligence expenses should not be included in calculating the amount of an underwriter's compensation. Although these suggestions were not adopted by the NASD in its amended rule change filing, no comments were received on the proposed amendments to the rule change.

The NASD has prohibited "back-end" compensation due to the difficulty of determining whether the amount of such compensation in an offering is reasonable. Because the amount of revenue produced by a DPP is unknown at the time of a public offering, the exact amount of compensation an underwriter

[1] Such charges permit an underwriter to receive compensation from the revenue produced by a DPP instead of, or in addition to, a fixed percentage of the cash receipts associated with the offering. Examples of "back-end" charges include a working interest, net profits interest, or overriding royalty interest.

would receive from "back-end" charges is not readily determinable. For this reason the NASD has, in the past, permitted only a percentage of the cash receipts of an offering as underwriting compensation. Therefore, in light of the difficulty in determining whether "back-end" compensation is reasonable, the Commission does not believe that it is inconsistent with the Act for the NASD to adopt a flat prohibition of such compensation at this time. In this regard, the Commission would note that the NASD currently is considering the issue of whether to allow "back-end" charges as part of an underwriter's compensation. *See* NASD Notice to Members 82–14, March 9, 1982.

With respect to the comment concerning due diligence expenses, Appendix F already addresses the commentator's concern. Specifically, because the NASD only treats those due diligence expenses reimbursed by the sponsor as compensation, the Commission does not believe that such a characterization will act as a significant disincentive to underwriters fulfilling their due diligence responsibilities under the federal securities laws.

Accordingly, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities association, in particular, the requirements of Section 15A, and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the division of Market Regulation, pursuant to delegated authority.[1]

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 12674; 812-5230]

SMA Life Assurance Co. and SMA Equities, Inc; Filing of Application

September 17, 1982.

Notice is hereby given that SMA Life Assurance Company ("Company"), a stock life insurance company organized under the laws of Delaware, Separate Accounts VA–A, VA–B, and VA–C of the Company ("Separate Accounts"), separate accounts registered under the Investment Company Act of 1940 ("Act") as management investment companies, and SMA Equities, Inc. (collectively "Applicants"), 440 Lincoln Street, Worcester, Massachusetts, filed an application on July 1, 1982 and an amendment thereto on September 3, 1982 for an order of the Commission pursuant to Section 6(c) of the Act exempting Applicants from provisions of Sections 2(a)(32), 2(a)(35), 22(c), 27(c)(1), 27(c)(2), and 27(d) of the Act and Rule 22c–1 thereunder to the extent necessary to permit the transactions described in the application. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants filed an application on September 13, 1979 and an amendment thereto on December 28, 1979 for an order pursuant to Section 6(c) of the Investment Company Act of 1940 granting exemptions from Sections 2(a)(32), 2(a)(35), 22(c), 27(c)(1), and 27(d) of the Act and Rule 22c–1 thereunder, to the extent necessary to permit Applicants to offer the combination fixed and variable annuity policies described in the application with a contingent deferred sales charge instead of a front-end sales load. The Application was noticed on January 18, 1980 in Investment Company Act Release No. 11025, and the requested exemptions were granted by order of the Commission on February 12, 1980 in Investment Company Act Release No. 11045 ("prior order"). Applicants now request an amendment to the order, to the extent necessary to implement certain changes in the contingent deferred sales charge applicable to the policies. Pursuant to the prior order, a contingent deferred sales charge is applied in the case of partial redemptions or surrenders of the policies or annuitization under a period certain option within 14 full policy years under an elective payment policy or 9 full policy years under a single payment policy (the "Surrender Charge Periods"). The charge on single payment policies, as a percentage of accumulated value surrendered, redeemed, or annuitized under a period certain option, is 5% in policy Years 1–5, and thereafter grades down 1% annually to zero after Year 9. The charge on elective payment policies is currently 7% in Years 1–8 and thereafter grades down by 1% annually to zero after Year 14. On and after the 10th policy year of a single payment policy and the 15th year of an elective payment policy no charge is assessed on partial redemption, surrender or annuitization of the policies. In all cases, the contingent deferred sales charge is retained by the Company to reimburse it for the expenses incurred in connection with the sales of the policies. These expenses include commissions, promotional costs, sales administration, and other sales related expenses.

Applicants propose to reduce the number of years a single payment policy would be subject to the contingent deferred sales charge, as follows: (policy years/charge as percent of amount surrendered, redeemed or annuitized) 1–3/5%; 4/4%; 5/3%; 6/2%; 7/1%; and 8 and thereafter/0%. Applicants propose to reduce the number of years an elective payment policy would be subject to the contingent deferred sales charge, as follows: (policy years/charge as percent of amount surrendered, redeemed or annuitized) 1–3/7%; 4/6%; 5/5%; 6/4%; 7/3%; 8/2%; 9/1%; and 10 and thereafter/0%.

Applicants also propose that, under both elective and single payment policies, the policyholder may, after the first policy year, at any time withdraw without a contingent deferred sales charge 10% of the accumulated value of the policy, less the amount of any previous free redemptions in the same policy year. This right shall be noncumulative from policy year to policy year. If the policyholder requests more than one partial withdrawal during the policy year, on the second and subsequent withdrawals the policyholder may withdraw free of charge the difference between 10% of the then accumulated value of the policy and the total of any prior redemptions in the same policy year to which no charge was applied. Each partial redemption must be in a minimum amount of $500 under a single payment policy, or $200 under an elective payment policy. In the event that a withdrawal is made in excess of the amount which may be withdrawn free of charge, only the excess will be subject to a surrender charge. In no event will the total contingent deferred sales charges on any one policy exceed 8% of the gross purchase payments under an elective payment policy or 6.5% of the gross purchase payment under a single payment policy.

Applicants have requested amendment of the prior order exempting them from the provisions of Sections 2(a)(32), 2(a)(35), 22(c), 27(c)(1), 27(c)(2), and 27(d) of the Act and Rule 22c–1 thereunder to the extent necessary to permit the proposed changes.

Section 6(c) of the Act generally authorizes the Commission to exempt any person, security or transaction from the provisions of the Act and rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and

---

[1] 17 CFR 200.30-3(a)(12).

consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested party may, not later than October 12, 1982 at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following October 12, 1982 unless the Commission thereafter orders a hearing upon request or upon the Commission's motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing, if ordered, and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: 9:30 a.m. (eastern time), Tuesday, September 28, 1982.

PLACE: Commission Conference Room No. 5240, fifth floor, Columbia Plaza Office Building, 2401 E Street N.W., Washington, D.C. 20506.

STATUS: Part will be open to the public and part will be closed to the public.

MATTERS TO BE CONSIDERED:

1. Ratification of Notation Vote/s.
2. Freedom of Information Act Appeal No. 82–8–FOIA–31–CL, concerning a request for records in a closed charge file compiled under the ADEA.
3. Proposed Contracts for Expert Witness Services.
4. Proposed amendment to existing contract.
5. Ninety-day Notice: Commissioner Initiated Charge Procedures.
6. Procedural Regulations for the Administration and Enforcement of the Age Discrimination in Employment Act of 1967, as amended.
7. A Report on Commission Operations by the Acting Executive Director.

CLOSED:

1. Litigation Authorization; General Counsel Recommendations.

Note.—Any matter not discussed or concluded may be carried over to a later meeting.

In addition to publishing notices on EEOC Commission meetings in the Federal Register, the Commission also provides recorded announcements a full week in advance on future Commission sessions. Please telephone (202) 634–6748 at all times for information on these meetings.

CONTACT PERSON FOR MORE INFORMATION: Treva McCall, Executive Officer, Executive Secretariat at (202) 634–6748.

Part II

Department of Labor

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

Alabama: AL82–1020	Apr. 2, 1982.
Georgia:	
GA81–1306	Oct. 30, 1981.
GA82–1033	July 2, 1982.
Iowa: IA82–4030	June 18, 1982.
Oklahoma: OK81–4067	Aug. 21,1981.
OK82–4035	June 25, 1982.
Louisiana:	
LA82–4020	May 7, 1982.
LA82–4022	May 7, 1982.
LA82–4023	May 7, 1982.
Maryland: MD81–3012	Feb. 6, 1981.
New York:	
NY81–3024	Apr. 3, 1981.
NY81–3045	July 17, 1981.
Texas:	
TX82–4001	Jan. 29, 1982.
TX82–4019	May 7, 1982.
TX82–4024	June 18, 1982.
TX82–4029	June 18, 1982.
TX82–4033	June 18, 1982.
Wyoming: WY82–5106	Mar. 12, 1982.
California:	
CA82–5116	Aug. 20,1982.
CA82–5112	July 16,1982.
CA82–5122	Sept. 3,1982.

Supersedeas Decisions to General Wage Determination Decisions

The numbers of the decisions being superseded and their dates of publication in the **Federal Register** are listed with each State. Supersedeas decision numbers are in parentheses following the numbers of the decisions being superseded.

Alabama: AL82–1040 (AL82–1049)	Sept. 10, 1982.
Georgia: GA82–1006 (GA82–1051)	Feb. 19, 1982.
Ohio: OH80–2011 (OH82–2040)	Mar. 21, 1980.
South Carolina: SC80–1047 (SC82–1060)	Jan. 25, 1980.
Texas: TX81–4009 (TX82–4045)	Jan. 8, 1981.

Cancellation of General Wage Determination Decision

This is to advise all interested parties that the Department of Labor intends to withdraw 14 days from the date of this notice the following general wage determination:

NJ79-3033—Gloucester County, New Jersey, dated October 12, 1979 in 44 FR 59060—Residential Construction

Please note that we are changing the format for Federal Register wage decisions to coincide with the provisions of All Agency Memorandum No. 132 dated January 29, 1980, which provides that the Department of Labor will discontinue identifying fringe benefits separately. Rather, they will be stated as a composite figure which is the total hourly equivalent value of fringe benefits found to be prevailing. Fringe benefits which can not be stated in monetary terms will be shown in footnotes. This procedure is being phased in gradually.

Signed at Washington, D.C., this 17th day of September 1982.

Dorothy P. Come,

Assistant Administrator, Wage and Hour Division.

BILLING CODE 4510-27-M

Part III

Federal Trade Commission

Funeral Industry Practices; Trade Regulation Rule

FEDERAL TRADE COMMISSION

16 CFR Part 453

Trade Regulation Rule; Funeral Industry Practices

AGENCY: Federal Trade Commission.

ACTION: Final Trade Regulation Rule.

SUMMARY: The Federal Trade Commission issues a final Rule, the purpose of which is to provide detailed information about prices and legal requirements to persons arranging funerals. The Rule will require disclosure of itemized price information, both over the telephone and in writing; prohibit misrepresentations about legal, crematory and cemetery requirements pertaining to disposition of human remains and prohibit certain unfair practices, such as embalming for a fee without prior permission or requiring consumers to purchase caskets when they intend to cremate the remains, or conditioning the purchase of any funeral goods and services on the purchase of any other funeral goods and services.

This notice contains the Rule's Statement of Basis and Purpose, the text of the Rule and a Regulatory Analysis relating to the final rule.

EFFECTIVE DATE: The Rule will become effective three months after the conclusion of Congressional review. The Commission will publish a further notice of effective date in the **Federal Register**.

ADDRESS: Requests for copies of the Rule, the Statement of Basis and Purpose, and the Regulatory Analysis should be sent to Public Reference Branch, Room 130, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Erica L. Summers, Division of Service Industry Practices, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580 (202) 523–3413.

SUPPLEMENTARY INFORMATION: This Rule is being submitted to the Congress for review in accordance with Section 21 of the Federal Trade Commission Improvements Act of 1980, 15 U.S.C. 57a–1. Under that section, a Rule becomes effective unless both Houses of Congress disapprove the Rule within 90 calendar days of continuous session after the Rule is submitted. The present legislative review provision is scheduled to terminate on September 30, 1982. Assuming that a new legislative review process will be implemented after that date, the Commission has determined that the Rule should become effective three months after the conclusion of Congressional review. The Commission will publish a further notice of effective date in the **Federal Register** as soon as possible thereafter.

List of Subjects in 16 CFR Part 453

Funeral homes, Price disclosure, Trade practices.

By direction of the Commission, Chairman Miller dissenting.

Dated: September 20, 1982.

Carol M. Thomas,

Secretary.

Funeral Rule Statement of Basis and Purpose and Regulatory Analysis

I. Introduction

A. *Need for and Objectives of Rule.* Arranging a funeral plainly involves emotional, religious, and other important social considerations. At the same time, a funeral is more than a social ritual: it is also an expensive consumer purchase. In fact, the purchase of a funeral is the third largest single expenditure many consumers will ever have to make, after a home and a car. Although funeral costs vary substantially among funeral homes and among different kinds of dispositions and ceremonies, price surveys have found that the average funeral, which includes embalming, viewing, a ceremony with the body present and a procession to the cemetery followed by ground burial, costs the consumer between two and three thousand dollars. In recent years there have been approximately 1.9 million deaths annually, bringing the total amount which consumers spend on funeral and burial arrangements to over $5.2 billion per year.

While the arrangement of a funeral is clearly an important financial transaction for consumers, it is a unique transaction, one whose characteristics reduce the ability of consumers to make careful, informed purchase decisions. Decisions must often be made while under the emotional strain of bereavement. In addition, consumers lack familiarity with the funeral transaction: close to fifty percent of all consumers have never arranged a funeral before, while another twenty-five percent have done so only once. Further, consumers are called upon to make several important and potentially costly decisions under tight time constraints. Within hours of death, consumers must make arrangements to have the body of the deceased removed from the place of death and taken to a funeral home. Within at most 24 to 48 additional hours all additional decisions must be made concerning the form of disposition desired.

Under any circumstances, giving careful consideration to financial matters while arranging a funeral would be difficult. This difficulty is exacerbated, however, by several practices used by funeral providers which limit the consumer's ability to make informed, independent choices. The evidence indicates that a significant number of funeral providers:

(1) Require that consumers purchase "prepackaged" funerals, which may include goods and services which the consumers would not otherwise purchase;

(2) Misrepresent, either directly or by the failure to disclose material information: (a) that the law requires the purchase of embalming, a casket for cremation services, or grave liners and burial vaults; (b) the extent to which funeral goods and services have a preservative and protective value; and (c) that a mark-up is being charged on items such as flowers and obituary notices, commonly termed "cash advance" items;

(3) Require that consumers who wish to arrange direct cremation services purchase a casket for use in those cremations;

(4) Embalm the body of the deceased without first obtaining specific authorization to do so; and

(5) Refuse to discuss or fail to disclose price information over the telephone.

The Commission has concluded that these acts and practices are unfair or deceptive within the meaning of Section 5 of the Federal Trade Commission Act. Section II of this Statement contains a more detailed description of these acts and practices, as well as a discussion of the frequency with which they occur. The rule promulgated by the Commission prohibits these acts and practices and includes requirements designed to prevent their recurrence. The rule's goal is to lower existing barriers to price competition in the funeral market and to facilitate informed consumer choice. The rule will help achieve these goals by ensuring that: (1) Consumers have access to sufficient information to permit them to make informed decisions about which goods and services they wish to purchase; (2) consumers are not required to purchase goods and services which they do not want and are not required by law to purchase; and (3) misrepresentations are not used to influence consumers' decisions on which goods and services to purchase.

Under the provisions of the rule, funeral providers must give consumers a written list, prior to any arrangements discussion, containing the prices of the

funeral goods and services on an itemized basis. At the choice of the funeral provider, separate price lists may also be used to disclose the prices of caskets and outer burial containers. The rule also requires that funeral providers give price information to consumers who call on the telephone and ask about the terms, conditions, or prices at which funeral goods or services are offered by that funeral home. While the rule requires that price information be given to consumers in a relatively standardized, itemized format, it in no way interferes with the ability of funeral directors to offer their goods and services for sale in additional forms (*e.g.*, funeral packages).

To ensure that funeral consumers have the ability to select only the goods and services they want to purchase, the rule generally requires funeral providers to "unbundle" the goods and services they offer for sale and offer them on an itemized basis. Funeral providers may, however, continue to offer "package funerals" for sale as an alternative to itemized purchasing. The rule simply ensures that the consumer has the ability to make an itemized selection.

In addition to the general right to select goods and services on an individual basis, there are two other related provisions that concern items which funeral providers often have required consumers to purchase. First, the rule requires that funeral providers obtain express permission from a family member or representative before embalming is performed, except under special circumstances. This requirement is designed to ensure that consumers do not have to pay for enbalming which they neither asked for nor wanted. Second, the rule prohibits funeral providers from requiring that consumers purchase a casket for use in a direct cremation service. The rule requires funeral providers to offer an unfinished wood box or other alternative to a traditional casket for use in this form of direct disposition.

Finally, the rule prohibits several specifically described misrepresentations concerning legal requirements for burial, or cremation, and misrepresentations about the existence of mark-ups on cash advance items. To implement these prohibitions, the rule requires funeral providers to include several short disclosures on the general price list which they provide to consumers. These disclosures simply inform consumers of their legal rights and purchase options.

The rule also contains a provision which requires the Commission to start a rule amendment proceeding to review the effect and operation of the rule no later than four years after it becomes effective. This mandatory review will enable the Commission to determine whether the rule has worked as expected and will require the Commission to decide whether the rule should be modified or terminated within eighteen months after the proceeding has started. If the rule has been successful in stimulating price competition by that time, the Commission will decide whether the rule is still needed in light of the marketplace changes. This provision ensures that the Commission will decide whether there is a continuing need for regulation of the funeral industry at an early date and in a proceeding open to public participation.

This overview has highlighted the central elements of the rule. Virtually all of its other provisions, including certain definitions, are designed to ensure the integrity of this disclosure scheme and to prohibit misrepresentations of material information. The rule promulgated today is substantially more limited than that which the Commission originally proposed. These modifications are the result of the Commission's careful consideration of the extensive testimony and comments submitted on three different occasions, as well as Congressionally-mandated limitations (discussed below) on the rule's subject matter. The Commission believes that this rule will effectively curb many of the unfair or deceptive practices identified in the rulemaking record with minimal intrusion into the business operations of funeral providers.

B. *History of the Proceeding.* In December of 1972, at the direction of the Commission, the Commission's Bureau of Consumer Protection began an initial investigation of practices in the funeral industry.[1] During the initial investigation, the Commission's staff interviewed consumers, funeral directors, memorial society members, attorneys, state officials and others, and also visited funeral homes. These efforts led the staff to conclude that a more detailed examination of the industry's practices was warranted. The staff made this recommendation in June, 1973, in a 239 page planning report to the Commission.[2] The Commission subsequently approved a full industry-wide investigation and authorized the use of compulsory process.

An Initial Staff Report by the staff of the Bureau of Consumer Protection based on the industry-wide investigation was published in August, 1975. In that report, the staff recommended that the Commission initiate a rulemaking proceeding pursuant to its authority under Sections 5 and 18 of the Federal Trade Commission Act.[3] The Initial Staff Report described practices relating to the purchase of funeral goods and services which may have violated Section 5 of the Act.

After reviewing the Initial Staff Report, the Commission published an Initial Notice of Proposed Rulemaking ("Initial Notice") on August 29, 1975.[4] It contained the text of a proposed rule, a statement of the Commission's reasons for issuing it, and an invitation to comment on the proposal.

Written comments on the Initial Notice were received through March 6, 1976. More than 9,000 separate documents were received, comprising approximately 20,000 pages. Numerous comments were made by individual funeral industry members, state and national funeral trade associations, individual consumers, consumer groups, state regulatory boards, state and local government officials, representatives of funeral-related industries including florists, cemetery operators, and casket and vault manufacturers, memorial societies, clergymen, academics, and other interested parties.

On February 20, 1976, the Final Notice of Rulemaking ("Final Notice") was published by the Presiding Officer in the funeral proceeding.[5] The Final Notice set out thirty disputed issues of fact to serve as the focus for the public hearings on the proposed rule.[6] Public hearings were

[1] The proposal for a limited initial investigation stemmed from an internal staff analysis suggesting a potential for abuse in the funeral transaction, given the unique disadvantages of the funeral purchaser. While few consumer complaints had been received at the time, the potential for consumer injury had been documented by hearings chaired by Senator Phillip Hart in 1964. *Antitrust Aspects of the Funeral Industry: Hearings Pursuant to S.R. 262 Before the Subcomm. on Antitrust and Monopoly of the Senate Comm. on the Judiciary*, 88th Cong., 2d Sess. (1964) (hereinafter cited as *Antitrust and Monopoly Subcomm. Hearings*). This policy planning approach to identifying areas of potential consumer injury was a direct response to criticism made by the American Bar Association in the late 1960s that the Commission relied too heavily on consumer complaints and consequently chose trivial cases for investigation.

[3] 15 U.S.C. 45, 57.

[4] 40 FR 38901 (1975).

[5] 41 FR 7787 (1976).

[6] Prior to the hearings, the National Funeral Directors Association sought to enjoin the hearings in federal court, alleging a number of procedural improprieties and Commission action in excess of its statutory authority. The court denied the injunction. *NFDA* v. *FTC*, 76-0615 (D.D.C., filed April 14, 1976).

held in six cities from April 20 through August 6, 1976.[7] In all, 52 days of hearings were held during which 315 witnesses presented testimony and exhibits and were subject to cross-examination by the various participating parties. The six hearings produced 14,719 pages of transcript and approximately 4,000 additional pages of exhibits.

At the conclusion of the public hearings, a final opportunity for comment was offered the public to rebut any data or views which had previously been submitted into evidence. Forty-seven separate rebuttal submissions were filed by the Commission staff and various parties to the proceeding.

At the conclusion of the public hearing process, reports to the Commission based on the rulemaking record were prepared by the Presiding Officer,[8] who made findings on the issues which had been designated by the Commission for the public hearings, and by the Commission staff,[9] who analyzed the record evidence and made recommendations to the Commission for final action. The Presiding Officer found that the funeral transaction has several characteristics which place the consumer in a disadvantaged bargaining position relative to the funeral director, leave the consumer vulnerable to unfair and deceptive practices, and cause consumers to have little knowledge of legal requirements, available alternatives respecting disposition of the dead, and funeral homes' offerings and prices. The Presiding Officer also found that some funeral providers fail to disclose relevant purchase information to consumers while some other funeral providers affirmatively misrepresent legal, public health and/or religious requirements to customers. The staff, after reaching similar conclusions,[10] recommended a revised trade regulation rule which differed from the initial proposed rule in several respects.

Following publication of these reports, the Commission commenced a comment period to permit the public to comment on the reports of the Presiding Officer and the staff.[11] This comment period was originally scheduled to close after 60 days; however, the Commission extended it for 30 days to afford a greater opportunity to comment.[12] Over 1300 separate comments were received during the comment period. To assist the Commission in reviewing them, the Commission's staff prepared a summary, which accompanied the comments to the Commission. This summary [13] essentially indexed the comments filed, identifying each issue of fact, law or policy raised in the comments. The summary was made available to the Commission as well as to outside parties. On February 2, 1979, the Commission's staff forwarded to the Commission their final recommendations.

On February 27 and 28, 1979, the Commission heard oral presentations from selected rulemaking participants who had been invited to present their views directly to the Commission as provided in § 1.13(i) of the Commission's Rules, 16 CFR 1.13(i).[14]

On March 23, 1979, the Commission met in open session, tentatively approved a final funeral rule and directed the staff to prepare the necessary legal memoranda to implement it. The tentative final rule adopted by the Commission was substantially more limited than the one which the Commission had originally proposed. It required that price information be made available over the telephone, that funeral goods and services be sold on an individual basis enabling consumers to decline goods and services which they did not want, that prior permission be obtained for embalming, and that consumers not be required to purchase caskets for use in cremation. The rule also included a prohibition on deceptive claims and representations concerning legal and cemetery requirements. However, several other major provisions contained in the proposed rule were dropped.[15]

Prior to promulgation, however, Congress adopted the FTC Improvements Act of 1980.[16] Section 19 of that Act imposed a set of procedural and substantive limitations on the Commission's authority to promulgate a rule regulating practices within the funeral industry.[17] Procedurally, Section 19(c)(2)(A) required the Commission to republish a proposed rule in the **Federal Register** for public comment before the Commission could promulgate a final rule.[18]

During the hiatus in the rulemaking proceeding which attended Congressional consideration and subsequent enactment of the Improvements Act of 1980, a second event occurred which necessitated a revision of the rule. In December of 1979, the United States Court of Appeals for the Second Circuit issued its opinion on the Commission's trade regulation rule concerning practices in the proprietary vocational school industry.[19] In adopting

[7] Hearings were held in Atlanta, Chicago, Los Angeles, New York City, Seattle and Washington, D.C.

[8] Report of the Presiding Officer on Proposed Trade Regulation Rule Concerning Funeral Industry Practices (16 CFR Part 453), July 1977 (hereinafter cited as "Report of the Presiding Officer").

[9] Funeral Industry Practices, Final Staff Report to the Federal Trade Commission and proposed Trade Regulation Rule (16 CFR Part 453), June 1978 (hereinafter cited as "1978 Staff Report").

[10] There were several areas of disagreement between the Presiding Officer and the rulemaking staff. For example, the Presiding Officer, in contrast to staff, found insufficient evidence of consumer injury in the rulemaking record to warrant promulgation of a rule provision prohibiting unauthorized removal of remains. *See* Report of the Presiding Officer, *supra* note 8, at 87. The Presiding Officer also concluded that several practices, such as refusal to release remains or requiring a casket for cremation, were not prevalent, although sufficiently harmful when they occurred to warrant prohibition in the rule. *Id.* at 89, 94. Finally, the Presiding Officer felt that there was insufficient evidence on the rulemaking record to make a finding on the prevalence of certain practices, including misrepresentation of cash advance charges and misrepresentation of legal, public health, and/or religious requirements. *Id.* at 66, 73. The staff disagreed with this assessment and reviewed the record evidence in detail in their report. 1978 Staff Report, *supra* note 9, at 251–259, 282–294.

[12] 43 FR 34500 (1978).

[13] Summary of Post-Record Comments on the Funeral Industry Practices Rule, January 25, 1979, XIV–1358.

[14] The participants were U.S. Congressman Marty Russo; National Retired Teachers Association and American Association of Retired Persons; National Selected Morticians; International Order of the Golden Rule; U.S. Small Business Association; New York State Consumer Protection Board; Cremation Association of North America; Americans for Democratic Action and National Council of Senior Citizens; National Funeral Directors Association; Continental Association of Funeral and Memorial Societies; National Funeral Directors and Morticians Association; New York State Public Interest Research Group; Pre-Arrangement Interment Association of America; and California Citizens Action Group.

[15] For example, the Commission eliminated provisions which would have prohibited unauthorized removal of or refusal to release remains, as well as provisions which would have set restrictions on the manner in which funeral providers could display caskets. See Section III(B), *infra*.

[16] Public Law 96–252, 94 Stat. 391.

[17] The substantive limitations imposed by Section 19(c)(1), and the manner in which the rule complies with them, are discussed in Part I(C), *infra*.

[18] The text of Section 19(c)(2)(A), 15 U.S.C. 57a note, states:

"(2)(A) The Commission, before issuing the funeral trade regulation rule in final form—

"(i) shall publish in the **Federal Register** for public comment a revised version of the funeral trade regulation rule which contains the provisions specified in subparagraph (A) and subparagraph (B) of paragraph (1);

"(ii) shall allow interested persons to submit written data, views, and arguments relating to such revised version of the funeral trade regulation rule, and make all such submissions publicly available; and

"(iii) may permit interested persons or as appropriate, a single representative of each group of such persons having the same or similar interests with respect to such revised version of the funeral trade regulation rule, to present their position orally.

[19] Proprietary Vocational and Home Study Schools Trade Regulation Rule, 16 CFR Part 438.

the rule, the Commission had defined and described the underlying unfair and deceptive acts and practices which were the predicate for the final rule in the Statement of Basis and Purpose which accompanied the rule. Within the text of the rule itself, the Commission included only the remedial requirements designed to prevent the unfair acts and practices from recurring.

In *Katharine Gibbs School, Inc.* v. *FTC*, 612 F.2d 658 (2d Cir. 1979) (hereinafter *"Gibbs"*) the Second Circuit held that the Magnuson-Moss Act requires the Commission to include in the actual text of a rule a description of the underlying unfair or deceptive acts or practices which serve as its basis.[20] The version of the funeral rule pending before the Commission in 1979 had been drafted in the same manner as the Vocational School Rule, *i.e.*, in several provisions only the remedial language was actually included in the rule.

On December 17, 1980, the Commission met to consider revisions of the proposed funeral rule in light of Section 19 of the FTC Improvements Act of 1980 and the *Gibbs* decision. At this meeting, the Commission voted to publish for public comment a revised version of the funeral rule. The Commission published a notice on January 22, 1981,[21] which contained the text of the revised version of the funeral rule and set forth a sixty-day written comment period. The Commission also provided for a rebuttal period in which parties could respond to comments submitted by other interested parties concerning the revised rule.

On July 7 and 8, 1981, the Commission heard oral presentations from several major participants in the funeral rule proceeding.[22] On July 22, 1981, the Commission met in open session and approved language of the funeral rule for purposes of submitting the rule's recordkeeping requirement to the Office of Management and Budget (OMB) for review. On June 7, 1982, OMB approved the recordkeeping requirement. After careful consideration and review of the rulemaking record taken as a whole, the Commission has voted to promulgate a trade regulation rule concerning funeral industry practices.

C. *Consistency With Applicable Law.* The funeral rule is being issued under the authority granted the Commission by Section 18 of the FTC Act,[23] as limited by Section 19 of the FTC Improvements Act of 1980.[24] Section 18 of the FTC Act permits the Commission to issue rules defining with specificity acts or practices which are unfair or deceptive under Section 5 of the FTC Act.[25] The Commission further is authorized to include in its rules provisions designed to prevent the defined unfair or deceptive acts or practices. The rule being issued today prohibits and prevents practices which are unfair, deceptive, or both.[26] As such, it is within the Commission's authority under Section 18 of the FTC Act.

The funeral rule, as issued, also complies with the restrictions imposed by Section 19 of the FTC Improvements Act of 1980. Section 19(c)(1) allows the Commission to expend funds to issue and enforce the funeral rule only to the extent that the rule:

"(A) requires persons, partnerships, and corporations furnishing goods and services relating to funerals to disclose the fees or prices charged for such goods and services in a manner prescribed by the Commission; and

"(B) prohibits or prevents such persons, partnerships, and corporations from—

"(i) engaging in any misrepresentation;

"(ii) engaging in any boycott against, or making any threat against any other person, partnership, or corporation furnishing goods and services relating to funerals;

"(iii) conditioning the furnishing of any such goods or services to a consumer upon the purchase by such consumer of other such goods or services; or

"(iv) furnishing any such goods or services to a consumer for a fee without obtaining the prior approval of such consumer.[27]

The Commission has revised the rule to ensure that it falls within the substantive limits imposed by Section 19. Thus, § 453.2 of the rule requires price disclosures, as permitted by Section 19(c)(1)(A). Section 453.3 of the rule prohibits misrepresentations, as permitted by Section 19(c)(1)(B)(i). Section 453.4 prohibits funeral providers from requiring a casket for cremation or from conditioning the furnishing of any funeral goods and services upon purchase of any other funeral good or funeral service. These provisions are permitted by Section 19(c)(1)(B)(iii). Finally, § 453.5 of the rule prohibits funeral providers from embalming for a fee without prior approval, as permitted by Section 19(c)(B)(iv).

D. *The Funeral Service Industry.*—1. *The Funeral Home.* In the United States today there are over 22,000 funeral homes, 50,000 licensed funeral directors and embalmers, and over 400 crematories.[28] In recent years the number of deaths has approached two million per year.[29] The average annual number of deaths per funeral establishment has been about 94.[30] Actual case volume at each funeral establishment varies greatly. Various industry sponsored studies indicate that 50% to over 75% of all funeral homes perform fewer than 100 funerals per year.[31]

The funeral industry is generally composed of small businesses. One report states that 80% of all funeral homes have fewer than seven employees;[32] another report found that 42.9% of the firms in the industry were individual proprietorships[33] and that

[20] 612 F.2d at 662.

[21] 46 FR 6976 (1981). During the written comment period, the National Selected Morticians and the National Funeral Directors and Morticians Association submitted in their comments a modified rule ("NSM/NFDMA proposal") for Commission adoption in lieu of the rule published in the **Federal Register**. The NSM/NFDMA proposal is discussed in Part III(B)(4), *infra*.

[22] The selected participants were National Funeral Directors Association; National Retired Teachers Association and American Association of Retired Persons; National Funeral Directors and Morticians Association; National Selected Morticians; Continental Association of Funeral and Memorial Societies; Pre-Arrangement Interment Association of America; Cremation Association of North America; New York Public Interest Research Group; National Council of Senior Citizens and Consumer Affairs Committee of Americans for Democratic Action; Conference of Funeral Service Examining Boards; International Order of the Golden Rule; New York State Funeral Directors Association; Congressman Marty Russo; and Congressman Andy Ireland.

[23] 15 U.S.C. 57.

[24] 15 U.S.C. 57a note.

[25] Section 5(a)(1) of the FTC Act declares unlawful "unfair or deceptive acts or practices in or affecting commerce" through trade regulation rules. The Commission has concluded that it has jurisdiction over funeral providers because their business is "in or affecting commerce." For example, funeral providers sell a variety of merchandise which is shipped in interstate commerce. Many also ship human remains across state lines for funeral purposes. For discussion of these and other bases of the Commission's jurisdiction over funeral providers, *see* 1978 Staff Report, *supra* note 9, at 468–71.

[26] The Commission's reasons for defining practices as unfair or deceptive are set forth in Part II (A)(1), *infra*.

[33] 1972 Census of Selected Service Industries, Volume I, at 7.

most of the rest operate as partnerships or private corporations.[34] The industry also is characterized by low rates for entry and exit,[35] with most funeral homes operating in local markets. Recently, however, there has been a slight trend toward the development of funeral home chains.[36] The largest chain is Service Corporation International and the second largest is International Funeral Services. These firms have expanded by purchasing existing funeral homes around the country.[37] Recently these two funeral chains merged.

2. *State Licensure.* The first formal instructional programs for the American funeral industry began with a few trade schools which taught embalming, sanitation, anatomy and other related subjects in a program of short duration.[38] Today there are approximately thirty vocational and college level programs accredited at the state level. The curriculum in these educational programs includes instruction in management principles, merchandising techniques, accounting, public speaking and grief counseling as well as in embalming and restorative arts.[39]

State regulation of the industry began in the latter half of the nineteenth century and arose due both to the public's growing concern over sanitation and the efforts of funeral directors to achieve greater professional stature.[40] Today virtually all states license embalmers and/or funeral directors. Generally, state licensing standards require completion of a nine month to one year vocational training program in mortuary science followed by a period of apprenticeship varying from one to three years in length before qualifying to take the state board examination.[41]

3. *Trade Associations.* The development of the funeral industry as a state-licensed occupation occurred along with the formation of a variety of state and national trade associations. The largest of the national funeral trade associations is the National Funeral Directors Association (NFDA) with 14,000 members who conduct approximately 70% of the nation's funerals.[42] The National Funeral Directors and Morticians Association (NFDMA) is the association of black funeral directors and, with over 4,000 members, is the second largest national trade association.[43] National Selected Morticians (NSM) is a national trade group with slightly over 800 member firms.[44] Unlike NFDA, NSM is an association of funeral home firms and not individual funeral directors.[45] Another national trade group is the Order of the Golden Rule (OGR) with 1400 members.[46] A number of smaller organizations serving limited memberships also exist. Two examples are the Jewish Funeral Directors Association (JFDA) and the Pre-Arrangement Interment Association of America (PIAA). JFDA has approximately 200 members,[47] and PIAA has approximately 700 members dedicated to the promotion and sales of the pre-financed funeral.[48] In addition to these national trade associations, all states except Alaska have funeral trade associations. In all but one of these states, membership in the state association brings concurrent membership in NFDA.

State and national funeral trade associations provide a wide range of services to members—newsletters, journals, national and regional meetings, informational and educational programs, consultants, and the collection of statistical information. A number of trade associations also have enacted codes of ethics which set forth conduct which is considered to be unprofessional.

4. *Pre-need Sales Industry.* This segment of the funeral industry is involved in the promotion and sale of funeral-related goods and services prior to the time of death. In this type of arrangement, payment is made to the funeral seller in advance of death and the particular goods and services selected by the buyer are specified in a pre-need contract.[49] Pre-need plans are marketed by insurance companies, funeral homes, and cemetery operators of cemetery lots, vaults, monuments, and crypts.

5. *Immediate Disposition Companies.* In some areas of the country, immediate disposition companies compete with full service funeral homes. These companies provide a single service—direct disposition of human remains by cremation. They generally do not provide facilities for viewing the body or conducting services, nor do these companies attempt to sell merchandise such as caskets or services such as embalming. Immediate disposition companies offer the service of picking up the body, delivering it to the crematory and returning the ashes. The disposition fee in 1977 was generally less than $300.[50]

6. *Memorial Societies.* Memorial societies are non-profit consumer cooperatives organized for the purpose of providing information and assistance to their members concerning funeral arrangements. They do not sell funeral goods and services. Some not only provide information on funeral arrangements to their members, but also enter into agreements with cooperating morticians to obtain specified services for their members at prices determined in advance.[51] The major organization representing the 140 member societies and over 500,000 individual members in the United States is the Continental Association of Funeral and Memorial Societies (CAFMS). These societies are staffed primarily by volunteers and pay operating expenses from membership

fees (usually $5 to $15), contributions and bequests, fundraising events and interest on reserve funds.[52]

E. The Funeral Consumer. Perhaps the most important element in understanding the nature of the problems which have arisen in the funeral market is a thorough understanding of the funeral consumer—the person called upon to make the arrangements for burial or cremation of a spouse, parent, child, other relative or friend. The arrangement of a funeral is often a very expensive transaction. In 1977, annual payments by consumers to funeral homes and crematories exceeded $3.4 billion.[53] A variety of related expenditures such as cemetery charges, flowers and obituary notices represented an additional expenditure of approximately $1.8 billion, bringing the total amount which consumers spent on funeral related expenses to an estimated $5.2 billion.[54] Reducing these numbers to a more personal basis, the average expenditure for a funeral was approximately $2360.[55]

Despite the magnitude of the financial commitment consumers are called upon to make in arranging a funeral, several factors limit their ability to make a carefully considered decision. The funeral transaction is one with which most consumers are unfamiliar. Studies show that over 50% of the adult population, although having attended prior funerals, have never been called upon to arrange one. Yet another 25% of the adult population have only arranged one prior funeral.[56] Thus, close to three-fourths of the population is either wholly inexperienced, or has had only one such experience. Unlike some transactions where consumers will have repeat encounters with sellers in the marketplace, the funeral consumer's purchase decisions are often once-in-a-lifetime decisions, or extremely infrequent ones.

In any transaction where consumers without substantial experience are called upon to make purchase decisions which carry with them substantial price tags, the potential for abuse exists. Other characteristics of the funeral consumer exacerbate this potential for marketplace problems. As discussed below, the two most important of these characteristics are the time-frame in which consumers must act and the psychological state of the persons who must make these important decisions.

While there is no such thing as an "average" or "typical" funeral consumer, some general findings can be made on their mental and emotional state. Often the funeral consumer is grief-stricken, particularly where a close relative or friend is involved; shock and confusion also attend such a death. Research by experts in the field suggests that many consumers feel guilt with respect to the deceased, and view the funeral as the final opportunity to "do right" by the deceased.[57] Others noted the characteristics of dependency and suggestibility following a death.[58] While funeral purchasers are far from helpless, such emotional strains make careful, rational decisions far more difficult than in the typical consumer purchase. In no other situation is a consumer called upon to make decisions about such an expensive purchase under such difficult emotional circumstances.[59]

The need to make prompt decisions about removing the body of the deceased from the place of death and selecting the form of disposition to be employed also serve to distinguish this transaction from other consumer transactions. Where the arranger selects direct cremation or immediate burial, final disposition typically occurs within 24 hours of death. Even in the more traditional funeral setting, involving viewing and ceremony, the necessary decisions still must be made under tight time strictures, normally 24–48 hours from death.[60] Comparison shopping by consumers is not impossible under these circumstances—indeed, one goal of the rule is to facilitate this type of shopping even at the point of need. But under any objective evaluation, comparison shopping is rendered substantially more difficult.

Perhaps the most critical decision which a bereaved consumer must make, and the decision with the tightest time strictures, is whom to contact to remove the body from the place of death. The evidence shows that once a funeral home has been given possession of the body, rarely, if ever, will a consumer move that body to another funeral home in the same community.[61] Thus, in many situations, a consumer may be called upon to select a funeral home on extremely short notice, wholly unexpectedly. The consumer has no time to plan or to arrange finances, or to put the purchase off until a better time. If the home selected does not offer the particular goods or services desired by

[55] *Id.*

[56] M. Simmons, A Comparison of Knowledge and Opinions of the Funeral Industry Held by Urban and Rural Consumers in Central New York State 39 (Table 3) (Jan. 1975), VI–D–4. Another survey by Dr. Richard Kalish, commissioned by the FTC staff, found similar results: 48% of the respondents had never before made funeral arrangements; another 29% only once before. D.C. Ex. 24, Table 7 (hereinafter cited as "Kalish Survey"). The evidence further shows that most consumers, even those who have arranged funerals, lack knowledge about prices and legal requirements. For example, in one survey of persons who had arranged funerals, 75% did not know about the legal requirements for embalming. *See* Maryland Citizens Consumer Counsel, D.C. Ex. 36, at 1–2. Similarly, in a 1965 survey, 78% of the respondents gave no response when asked what the average price of a funeral was in their community. An even higher percentage, 91%, gave no response when asked what the national average price of a funeral was. *See* R. Fulton, *Attitudes of the American Public Toward Death*, in Death and Identity 95 (1965). Other surveys also support the conclusion that consumers lack knowledge about funeral arrangements. *See, e.g.*, Dr. C. Collette-Pratt, Sea. Ex. 1, Tx 5237–44 (survey of 400 persons shows little knowledge of what constitutes funeral or what alternatives are); M. Stillwell, Tx 6032–33 (analysis of 139 responses shows general lack of knowledge about funerals by public).

[57] *See, e.g.*, Rabbi E. Grollman, Industry Consultant, Tx 840; Sister J. Corcoran, Tx 7208–09; Dr. M. Bluebond-Langner, Ass't Prof. of Anthropology, Rutgers Univ., Tx 2372; J. [58] The testimony of experts describes the "hypersuggestibility" of bereaved individuals and their tendency to rely on the funeral director. *See, e.g.*, Dr. N. Humphrey, President of the California Chapter of the National Association of Social Workers, D.C. Ex. 45, at 4; Dr. C. Wahl, psychiatrist psychoanalyst, Southern California Psychoanalytic Institute, Tx 8481; Dr. J. Quint Benoliel, Professor, University of Washington School of Nursing, Tx 5297 (citing I. Glick, R. Weiss, and C. Parkes, *The First Year of Bereavement* 104 (1975)); R. Ebeling, Tx, 6825.

[59] In the majority of cases, a person arranging a funeral is accompanied by another person, most frequently a member of the immediate family. Dr. R. Blackwell, Funeral Services Attitudinal Survey, D.C. Ex. 29 [hereinafter cited as "Blackwell Survey"] (nearly 95% of the persons making arrangements were accompanied by one or more persons; 90% were members of the immediate family.) While support from the family members may help make arranging a funeral less difficult, other members of the immediate family are likely to be under much of the same emotional stress and other disadvantages as the person with primary responsibility for making the arrangement decisions.

[60] Several of the surveys asked consumers why they did not "shop around" before making a decision. Insufficient time was cited by 36% of the respondents in one (*see* D.C. Ex. 45, at A–6), 21% in another (Cohen, Consumer Questionnaire Form A, D.C. Ex. 39, at A–6 (hereinafter cited as "CAFMS Survey"), and between 15–28% in another (D.C. Ex. 11, at 47).

[61] *See, e.g.*, R. Harmer, Bd. member, CAFMS, Prof., California State Poly. U., D.C. Ex. 7, at 6; D. Cornett, California funeral industry sales representative, X–1–124; L. Bowman, The American Funeral 52 (paperback ed. 1964). In addition, a family is likely to be in a very fragile emotional state in the first few hours after death so that any problem in locating or moving the body can cause additional anguish.

the consumer, essentially all options have been foreclosed.

Thus, the funeral transaction possesses some unique characteristics which differentiate it from most, if not all, other consumer transactions. The combination of emotional stress, lack of experience, lack of information and tight time strictures results in the funeral consumer being very susceptible to influence from the funeral director's advice and counsel.[62]

In the sections which follow, the specific unfair and deceptive practices which the Commission has found to occur in this market will be discussed together with an analysis of the Rule provisions adopted by the Commission to address them.

II. The Rule Provisions

A. *Section 453.2—Price Disclosure.* Section 453.2(a) of the rule defines as an unfair act or practice the failure of a funeral provider to furnish information disclosing the cost to the purchaser for each of the specific funeral goods and funeral services used in connection with the disposition of deceased human bodies. There is substantial evidence in the rulemaking record that funeral providers have frequently failed to provide consumers with sufficient information about the prices of funeral goods and services. The record shows that funeral providers generally do not advertise prices, usually do not provide price information over the telephone, and usually do not provide consumers with information on the price of specific items of funeral merchandise and services. As we discuss below, this lack of information, particularly with respect to prices, restricts the consumer's ability to make an informed choice and impairs the efficient operation of the funeral market. The rule is designed to address these problems by requiring funeral providers to give consumers the information necessary for them to make an informed purchase decision.

1. *Unfair Acts or Practices.* Section 453.2 is being issued pursuant to the Commission's authority under Sections 5 and 18 of the Federal Trade Commission Act to proscribe unfair acts or practices. Section 18(a)(1) of the FTC Act states:

> The Commission may prescribe * * * rules which define with specificity acts or practices which are unfair or deceptive acts or practices in or affecting commerce (within the meaning of * * * Section 5(a)(1)).

In December of 1980, the Commission prepared a formal statement analyzing the legal basis for the exercise of its Section 5 consumer unfairness jurisdiction. That document, prepared in response to a request from the Senate Commerce Committee,[63] reviewed the Commission's prior exercise of its unfairness jurisdiction, and clarified the criteria under which this authority will be exercised in the future.[64]

Consumer injury is the focus of the consumer unfairness doctrine. In its recent statement, the Commission observed that:

> Unjustified consumer injury is the primary focus of the FTC Act * * *. By itself it can be sufficient to warrant a finding of unfairness.
>
> * * * The independent nature of the consumer injury criterion does not mean that every consumer injury is legally "unfair," however. To justify a finding of unfairness the injury must satisfy three tests. It must be substantial; it must not be outweighed by any countervailing benefits to consumers or competition that the practice produces; and it must be an injury that consumers themselves could not reasonably have avoided.[65]

Earlier articulations of the consumer unfairness doctrine have also focused on whether "public policy" condemned the practice in question.[66] In its December, 1980 statement, the Commission stated that it relies on public policy to help it assess whether a particular form of conduct does in fact tend to harm consumers.

2. *The Unavailability of Price Information.—a. Price Advertising.* The organized funeral industry has historically opposed price advertising; indeed, the first NFDA code of ethics adopted in 1884 included a provision which prohibited newspaper advertising.[67] Moreover, state legislatures were encouraged by the industry to enact statutes or regulations prohibiting price advertising.[68] The National Funeral Directors Association (NFDA) and its state affiliates condemned price advertising in their codes of ethics. Two of the reasons cited for the prohibition were explained by NFDA's Executive Director in 1964:

> * * * Said funeral director advertising does not create new markets or expand old ones. It does not lower the cost of the "unit" to the public. At best, it shifts the market or helps firms maintain their portion thereof. NFDA has more than one member in most communities. How can it comply with the objectives of its constitution and "safeguard the common interests of its members" by fostering competitive weapons?
>
> * * * * *
>
> Price ads put the emphasis on price disregarding the most important values and inner meaning of the funeral and the funeral director's role in American Society.[69]

Historically, funeral providers have not engaged in price advertising. This tradition has continued despite the elimination of most formal restraints. In 1968, the NFDA settled an antitrust suit brought by the Department of Justice and agreed to refrain from enforcing provisions against advertising in its own code of ethics and discontinuing its affiliation with state associations that had similar restrictions in their own codes.[70] Most states have eliminated legal prohibitions on price advertising of funerals. Moreover, to the extent that any such laws totally ban truthful advertising they are clearly violative of the first amendment.[71]

Nonetheless, there remains strong sentiment throughout the industry against price advertising. The opposition to price advertising expressed by many industry leaders during the rulemaking hearings suggests that considerable peer pressure exists to discourage price advertising.[72] Even in the absence of

formal restraints, the rulemaking record indicates only a small amount of price advertising in a few areas of the country.[73]

b. *Failure to Disclose Prices for Individual Items.* Most consumers do not have information on costs when they go to the funeral home to make arrangements.[74] Even at the funeral home, however, many consumers do not receive detailed price information because of the pricing methods which prevail in the industry.

Statistics from funeral trade associations demonstrate that over half of all funeral providers use some form of package or lump-sum pricing.[75] Two variations of packaging are "unit" pricing, in which a consumer is quoted a single price for a complete package of goods and services, and "bi-unit" pricing, in which the casket is priced separately from the other goods and services. Under the unit pricing system, the funeral provider quotes a single price for a package of services, merchandise and facilities which he or she has pre-selected for the consumer. Thus, a $1200 funeral may include transporting the remains, embalming and other preparation, a casket, use of the funeral home facilities for one day of viewing, a ceremony, use of automotive equipment, the services of the funeral director, a guest book and acknowledgment cards. The key feature of the unit pricing scheme is that all of these goods and services are part of a pre-selected package for which there is a fixed price; none of the components is priced separately. The bi-unit method is similar, except that the cost of the casket is separate. Where either method is used, it is usually impossible for consumers to learn the cost of any of the individual components of the funeral package and to select individual items after considering their relative costs.

Under either form of package pricing, a significant number of funeral directors will not reduce the package price if any services or merchandise are unwanted or unused.[76] While some industry members reduce the price if the buyer does not want a part of the package,[77] even those funeral directors who do give credits upon request usually do not disclose to consumers, prior to making a purchase decision, their option to decline services for a reduction in price.[78]

In addition, surveys indicate that consumers are often unaware of the range of goods which are theoretically available. For example, a number of surveys on the rulemaking record show that funeral directors do not display their least expensive caskets in the same selection room as their higher priced units.[79] The evidence also shows that when such merchandise is not displayed, consumers usually are unaware that it is available and usually do not ask about it.[80]

Further, while some funeral providers do quote prices on a more detailed basis,[81] many of them supply such information only after the purchasing decisions have been made, in the form of an itemized agreement or bill.[82] In

---

managing editor of Mortuary Management, Tx 6860; L. Peake, past Pres., Oregon FDA, Tx 5705; A. Mamary, Pres., Pennsylvania FDA, Tx 12, 883.

[73] *See* 1976 Staff Report, *supra* note 9, at 96, 412–413.

[74] Due to the absence of price advertising and the lack of previous experience, most consumers do not have prior knowledge about the prices charged either by particular funeral homes or by funeral homes generally. (*See* discussion in Section I(E), *supra*.) For example, one survey showed that consumers' estimates of the price for a standard adult funeral ranged from $300 to $10,000. Maryland Citizens Consumer Council, D.C. Ex. 36, at 3. These findings are confirmed by industry studies. *See, e.g.*, Blackwell & Talarzyk, *American Attitudes Toward Death and Funerals* 34 (1974), VI–D–17 [hereinafter cited as "Blackwell & Talarzyk"].

Further, most consumers do not get specific price information before choosing a funeral home. In some instances, consumers felt that time constraints prevented them from getting comparative price information. See note 60, *supra*. In other instances, consumers attempted to get price information by telephone, but had difficulty in doing so, as discussed in section II(A)(2)(c), *infra*. But in most instances, consumers simply do not try to get price information. Instead, they choose a funeral home on the basis of factors other than price. Some of the more important factors are location and convenience, general reputation, ethnic or religious affiliation, knowing the funeral director personally, and recommendations of friends. Blackwell Survey, *supra* note 59. The same study showed that a majority (55%) of consumers already know which funeral home they would call in the event of a death.

Finally, in other instances, price information is irrelevant in choosing a funeral home, as in the case where there is only one funeral director in the community.

[75] 1976 Statistical Abstract, *supra* note 31, at 94–94 (approximately 65% are priced on a unit or bi-unit basis). *See also* Statement of R. Cohen, Exec. Secretary, CAFMS, D.C. Ex. 30, at 22 (hereinafter cited as "Cohen Statement") (1968 figures compiled by Batesville Casket Co. indicate that 84% of firms use unit pricing and 9% use bi-unit); R. Bishop, Director, Florida Consumer Services, Atl. Stmt., App. A, at 4 (Florida survey in 1974 found that 52% of funeral directors use unit or bi-unit pricing).

The widespread use of package pricing is partly explained by the industry's belief that it is simpler for consumers to use, that it is easier for funeral directors to use in determining prices, and that it enables funeral directors to make full traditional funerals available at a lower price. These asserted benefits are discussed in detail in the text, *infra*, II(A)(3)(d).

[76] *See, e.g.*, California Funeral Director Association, L.A. Ex. 23 (survey of 291 funeral directors revealed that 15 percent do not deduct the embalming charge when the service is declined); A. Nix, Pennsylvania funeral director, Tx 12,922; W. Holman, Oregon funeral director, Tx 12,161; R. Lackey, Pres., Alabama chain of funeral homes, II–A–146, at 4. Surveys confirmed that no credit is given for declined services. L. Speer, Director, CalCAG, Tx 7693; C. Skeels, CAMP Consumer Action Project, Tx 8020 (8 of 10 funeral homes make no price reduction); State of Arkansas Office of the Attorney General, Funeral Survey, VI–D–12, at 4–5 (32 of 104 respondents would not make price reductions for declined services); Delaware Div. of Consumer Affairs, Press Release, VI–D–9 (small deductions are given but do not reflect savings to funeral director). Chosen Statement, *supra* note 75, at 25 (20 out of 101 respondents reported paying for services, merchandise or facilities they didn't want). *See also* Blackwell Survey, *supra* note 59 (3.7% of the consumers surveyed were required to pay for services which they did not want).

[77] *See, e.g.*, State of Arkansas Office of the Attorney General, Funeral Survey, VI–D–12, at 4–5 (72 out of 104 firms provide discounts for unused items); Delaware Div. of Consumer Affairs, Survey of the Funeral Industry in Delaware, VI–D–8, at 2 (15 out of 25 firms allow price adjustments for declined items); H. Coates, State Bd. of Embalmers and Funeral Directors of Kentucky, Tx 3983–84; N. Heard, Pennsylvania funeral director, Tx 13,151; J. Kerr, Sec'y-Treas., Kentucky FDA, Tx 3024; R. Coats, Pres., Michigan FDA, Tx 3771; F. Walterman, Pres., Indiana FDA, Tx 5009; N. Greene, owner of Virginia funeral home, Tx 14,188; J. Altmeyer, West Virginia funeral director, Tx 11,775; B. Hirsch, Pennsylvania funeral director, Tx 12,539; A. Leak, Illinois funeral director, Tx 3875.

[78] While NFDA and NSM apparently recognized the right of the consumer to get a credit for an unwanted item, they do not suggest that such credits be disclosed affirmatively and in advance. *See* T. Clark, General Counsel, NFDA, VI–C–6, at 6; NSM Code of Ethics, D.C. Ex. 30. The proposed Guides submitted to the Commission by the major trade associations in 1980 were similarly vague on the funeral director's obligation to disclose all available credits in advance of any purchase decision.

Several funeral directors testified that they will reduce the price for unwanted items if asked, but that they do not inform consumers of this option. *See, e.g.*, N. Greene, Virginia funeral director, Tx 14,188; R. Fitzgerald, New Mexico funeral director, Tx 6246; R. Ninker, Executive-Director, Illinois FDA, Tx 2687–88; B. Hirsch, Pennsylvania funeral director, Tx 12,533; H. Burton, Pres., consultant in before-need memorial estate planning, Tx 6680; R. Johnson, Indiana funeral director, Tx 12,052.

[79] *See, e.g.*, Comments of Maine PIRG, II–C–1400, at 2 (one-third of 116 funeral homes failed to display least expensive casket); FTC Survey of Funeral Prices in the District of Columbia, VI–D–4, at 16 (14 out of 36 funeral homes did not display least expensive casket).

[80] *See* New York PIRG, Ex. 1 (N.Y.), at 8 (out of 127 respondents, only 26 realized there might be caskets other than those displayed; only 7 of the 28 asked if anything less expensive was available).

[81] A 1976 study of funeral homes indicates that 28% of 151,943 funerals included in the results involved a multiunit form of pricing and 7% of the funerals were priced on a triunit basis. *See* 1976 Statistical Abstract, *supra*, note 31, at 94, 74, 94, 94.

[82] The regulations of several states which require itemization specify only that itemized price information be given "at the time of arrangements." These regulations do not specifically direct that consumers be given itemized price information before they decide what to buy. *See, e.g.*, New Jersey State Board of Mortuary Science, Rule 70(a): "Any person engaged in the practice of mortuary science shall, *at the time funeral arrangements are made*, compile a specific itemization of the charges which will be made for such arrangements." (emphasis added); New York State Department of Health, Rule 78.1(a): "Every person licensed pursuant to article 34 * * * shall furnish *at the time funeral arrangements are made* for the care and disposition of the body of a deceased person * * *

such cases, the consumer agrees to buy each item, but is still not given the prices associated with each item at the time he or she must decide whether or not to buy it.

(c) *Failure to Disclose Prices Over the Telephone.* The time constraints in arranging a funeral after a death has occurred make it difficult for consumers to get price information before choosing a funeral home. The initial call to a funeral provider to pick up the body of the deceased from the place of death necessarily must occur within several hours of death. Thus, in many instances, at least where death has not been anticipated, all efforts to get price information must occur in an extremely short time span.

Under these circumstances, the gathering of price information by telephone may often constitute the only practical way in which price information can be obtained before a funeral provider is selected.[83] The record reveals, however, that funeral providers often fail to provide price information over the telephone when asked. Individual consumers and consumer groups complained about difficulties they had experienced when they called a funeral home and asked about costs.[84] Consumer groups and state officials in numerous states reported substantial resistance or flat refusals when they attempted to gather price data by telephone for survey purposes.[85]

After the record was closed in this proceeding, data became available which suggested that only a small percentage of funeral directors refuse to answer requests for price information over the telephone.[86] The data seemed to suggest either that the findings of the studies contained in the record were in error, or that funeral directors had substantially changed their practices.[87] After a thorough review of the data, and a presentation of differing staff opinions, the Commission decided not to reopen the record to include the data.[88] The data were not sufficiently reliable to require the Commission to reopen the record at this stage of the proceeding.[89] Further, the data confirmed that some funeral directors refuse to provide price information over the telephone on request.[90] Perhaps more importantly, the data confirmed the basic finding that the vast majority of consumers do not get price information over the telephone before choosing a funeral home.[91] One of the major purposes of the rule is to signal to those consumers who did not think to ask or were inhibited from asking, that price information is available at this critical moment of decision. That disclosure, and the requirement that price information be given, is part of the remedial scheme which the Commission has chosen to

---

an itemized list of the services and merchandise to be furnished." (emphasis added); Virginia Board of Funeral Directors and Embalmers, Article XVII, Paragraph 3.A: "Every funeral service licensee * * * shall furnish to the party contracting for such funeral arrangements, *at the time such arrangements are made* if such party be present * * * a written itemized statement of any and all charges." (emphasis added).

[83] Of course, many consumers do not try to get price information by telephone prior to choosing a funeral home. *See* discussion at note 74, *supra*. And it is reasonable to believe that funeral directors who refuse to provide price information when asked, as discussed in text and accompanying notes 84–85, are not likely to volunteer this information.

[84] *See, e.g.*, L. Pratt, Washington consumer, II–B–1153; J. Pagdin, Florida consumer, II–B–1534, S. Flanders, Illinois consumer, Tx 4666; E. Sheehan, District of Columbia consumer, Tx 14,666–67; L. MacDonald, NRTA/AARP, Tx 2647. Also, several memorial society representatives cited consumer experiences of unsuccessful attempts to obtain information by the telephone. E. Knapp, Pres., Memorial Society of Metropolitan Washington, II–C–909; L. Tolliver, Pres., Blackhawk Memorial Society, X–1–62.

A number of funeral directors and industry leaders testified that the reason funeral directors could not give information over the telephone was that such information would be confusing, misleading, and deceptive. *See, e.g.*, C. Lightner, former Pres., NFDMA, Tx 10,391; H. Mayes, Oklahoma Funeral Directors Association, Tx 8625; A. Leak, Ill. funeral director. *See also* NFDA Post-Record Comment, XIV–848, at 8.

[85] *See, e.g.*, D. Hoskins, Chairman, Pennsyvania Ass'n of Funeral and Memorial Societies, Tx 13,960; L. Speer, Director, California CAG, Tx 7,717–18; R. Nesoff, Director of Investigation, State Temporary Comm'n on Living Costs and the Economy, Tx 329 (investigator posed as consumer calling for price information but funeral homes refused); M. Edelstein, attorney, New York City Dep't of Consumer Affairs, Tx 163 (three of twelve mortuaries called would not provide price information); R. Pooler, Executive Director, New York State Consumer Protection Bd., Tx 36 (found price information is rarely given on the telephone); NYPIRG Ex. 1 (N.Y.), at 2 (testimony of B. Kronman, research associate) (two-thirds of sixty funeral homes called refused or were uncooperative when asked for price information); Indiana PIRG Reports, A Death in the Family, VI–D–8 at 1; Maine PIRG, II–C–1400, at 4; O. Matthews, Maryland Citizens Consumer Council, Tx 14,053; S. Chenoweth, Director, Minnesota Office of Consumer Services, Tx 3123–24; J. Brown, Assoc. Director, Center for Consumer Affairs of the University of Wisconsin Extension, Tx 4306–07.

One possible factor influencing the funeral directors' response is the advice given by NFDA's General Counsel to its state affiliates that funeral directors not cooperate with any price surveys during the pendency of the Commission's rulemaking proceeding. NYPIRG Ex. 3 (N.Y.). While this advice apparently affected returns on written price surveys, *see* Staff Report, *supra* note 9, at 342–344, its effect on telephone price requests is clear because it would not necessarily be apparent to the funeral director that the questions were part of a price survey.

[86] In 1979, the staff, as part of an on-going program intended to measure the impact of trade regulation rules, began work on an impact evaluation baseline study ("BLS"). The BLS was not intended to be part of the rulemaking record, but was rather intended to gather pre-rule data which could be used as a basis for comparison with a future study to be conducted after the rule had gone into effect. The study was a survey of a national mail panel of consumers, asking for information about funerals that they had arranged in the last year. The data instrument was designed by Market Facts, an independent consultant, along with Commission staff, and information was collected by Market Facts. Due to various delays in the final promulgation, the data from the BLS became available shortly before the Commission's final consideration of the rule. The BLS, and all staff memoranda regarding its findings, were made available to the public but were not made part of the rulemaking record.

[87] The BLS suggested that only 6 percent of the requests for price information over the telephone were rejected.

[88] At its public meeting on July 28, 1982, the Commission heard presentations and considered five memoranda from different staff members, all of which presented different positions. Some staff felt that the record did not need to be reopened because the data were unreliable and did not contradict the record. Other staff felt that the data were reliable and called into question findings of the rulemaking record. All of these staff memos were made available to the public.

[89] The specific questions in the questionnaire were ambiguous, and it was impossible to determine whether all the respondents understood the questions and responded in the same way. A subsequent validation study, for example, showed significant variations with the results found in the original baseline survey, suggesting confusion on the part of respondents. The Commission agreed with the staff analysis that it was impossible to draw any firm conclusions from the study. Indeed, the very breadth of staff opinion on the reliability of the data strongly suggested that the questions of ambiguity and meaning could not be satisfactorily answered by further public comment.

Generally, the Commission is not required to consider relevant evidence that may be generated after the close of the rulemaking record, for the reason that administrative proceedings would otherwise never end. Vermont Yankee Nuclear Power Corp. v. NRD, 435 U.S. 519, 554–555 (1978) (quoting ICC v. New Jersey, 322 U.S. 503, 514 (1944)). The Commission is required to reopen the record for new evidence only when there has been a change in circumstances that is "not merely 'material' but rises to the level of a change in the 'core' circumstances, the kind of change that goes to the very heart of the case." American Optometric Association v. FTC, 626 F. 2d 896, 907 (D.C. Cir. 1980). (quoting Greater Boston Television Corp. v. FCC, 463 F.2d 268, 283 (D.C. Cir. 1971), *cert. denied*, 406 U.S. 950 (1972)).

The data above, in the Commission's consideration, does not challenge the findings of the record because it lacks the requisite certainty needed to rebut the record. While relevant, the serious questions about its reliability render the data less material than otherwise would be the case.

[90] The BLS suggested that a minimum of 6% of funeral directors refused to answer requests for price information. While that finding was a lower figure than that found in the record, the record also showed that a significant number of funeral directors did provide price information on request. *See, e.g.*, NYPIRG, Ex. 1 (N.Y.) (⅓ of sixty funeral homes gave price information).

[91] The data indicated that at the very most, some 35% of those telephoning either asked or were offered price information of some sort over the telephone. (Out of 377 persons who telephoned a funeral home, 72 asked for information on arrangements and prices, while 61 had this information offered to them by the funeral director.)

induce greater price competition and consumer choice in this marketplace.

3. *Consumer Injury Due to Inadequate Price Information.* The failure of funeral providers to furnish basic price information results in substantial economic injury to funeral purchasers. This economic injury takes two related forms: consumers purchase items that they may not want or use, and they pay higher than competitive prices for items they purchase.

(a) *Paying for Unwanted Items.* Package pricing leads consumers to buy items they may not want or use in several ways. As noted above, many funeral directors do not reduce the price of a package even when a consumer asks to have items dropped from the package. By bundling all of the pre-selected goods and services together, the funeral provider is effectively forcing the consumer to buy items as a condition of providing a necessity that only he can provide: disposition. This injury, however, stems less from the lack of price disclosure than from the funeral director's refusal to unbundle the package. Consequently, it is discussed in more detail in Section II(C), *infra.*

Even when funeral directors are willing to unbundle the package upon request, package pricing still causes consumer injury because it denies consumer choice. When a funeral director is willing to give a reduction in price for unwanted goods included in the package, quoting a single price for the full package obscures the fact that the package actually consists of components which may be individually chosen. Further, by the funeral provider's failing to disclose that unwanted components may be declined, consumers are simply likely to assume that the package is not subject to negotiation because all items are necessary or required.[92] Given the funeral purchaser's lack of prior experience and knowledge, and the emotional and time pressures attending the decision, the Commission believes that many funeral purchasers will simply not think to ask whether the package can be broken into parts or to question aggressively the funeral director's offerings.[93] Consequently, consumers are injured in the absence of a disclosure that parts are declinable because they are likely to assume that there are no choices to be made. As a result, they buy the pakages, including items that they would not have bought had they been given information that purchasing the components was optional. In addition, denying consumers information on the *prices* of the parts further injures consumers because they have no idea how much can be saved by declining the components. Lacking such price information, consumers cannot make an informed purchase decision.

Direct evidence of the extent of this injury, through consumer complaint surveys, is difficult to obtain precisely because consumers are often not aware that they had any choice to make.[94] Further, any systematic observation of consumer behavior related to pre-sale itemized disclosures has not been possible, primarily because so few funeral homes provide such information.[95]

Nevertheless, the record establishes significant consumer injury. Some indication of the extent of the injury can be ascertained from attitudinal studies and other surveys, and comments and testimony from individual consumers, consumer groups and experts indicating that, given price and option information, a significant number of consumers would use such information to make informed choices and would often choose to decline items usually included in the package funeral.[96]

A number of consumer surveys show that consumers find cost to be highly important in making funeral arrangements.[97] It is not surprising, then, that large majorities of consumers want detailed price information about funerals [98] and want funeral prices to be quoted on an itemized basis.[99] Consumers believe that such detailed price information will be useful to them in making funeral arrangements.[100]

---

[92] J. Todd, Arkansas Funeral Director, Tx 6733: "Why must a package funeral be bought if you only want to be cremated immediately?" E. Given, Michigan consumer, II–B–180. In addition, since many consumers are ignorant of the laws and cemetery requirements applicable to funeral arrangements, they are likely not to question the inclusion of certain items in a package. For example, according to one study, 51% of the consumers surveyed believed embalming was required by law. The Central Area Motivation Program, Consumer Action Project Survey, Sea. Ex. 14 (hereinafter cited as "CAMP Survey"). It can be inferred from this that many of these consumers would, therefore, not think to question the inclusion of embalming in a funeral package.

[93] *See generally* Section I(E), *supra;* Dr. J. Quint Benoliel, Professor, Univ. of Washingon School of Nursing, Tx. 5297, citing I. Glick, R. Weiss, & C. Parkes, *The First Year of Bereavement* (1975). A study of the funeral industry in Minnesota revealed that only consumers who aggressively questioned funeral directors about the availability of limited services were likely to be informed of all the available options. S. Chenoweth, Director, Minn. Office of Consumer Services, Tx. 3110.

[94] Nevertheless, a number of consumers recite instances in which they were aware that they were being required to pay for goods or services (such as limousines, visitation rooms, and use of the chapel) that were either not wanted or not used. *See e.g.,* Comments in category II–B at 54, 184, 366, 496, 829, 1048, 1106, 1266, 1404, 1486, 1893, 1967, 1984, 2003, 2013, 2034, 2240, 5967, and testimony, S. Ross, Washington consumer, Tx 5274–75.

[95] At the time the hearings were conducted, only four states had enacted laws or regulations requiring mandatory price itemization. *See* 1978 Staff Report, *supra* note 9, at 357, n. 77. (Three other states required itemization to be given only on request, and one other state required only a limited breakdown on the package price.) But even in these four states, the funeral director was not required to give consumers the price disclosures *before* the decisions were made, but only a written record of what had been agreed to. As a consequence, no state had a regulatory price disclosure scheme similar to the FTC's proposed rule.

Since that time, a number of states and localities have passed regulations which are more similar to the FTC's proposed rule and which might be suitable for comparative studies. While such studies might be helpful, the Commission believes that the additional time and expense which would be required to conduct such studies and reopen the rulemaking record is not justified and would not add substantially to the record. The Commission is not required to reopen the record to consider relevant evidence which has become available after the record has closed, ICC v. New Jersey, 322 U.S. 503, 514, (1944), unless the evidence suggests a "change of circumstances" going "to the very heart of the case." American Optometric Association v. FTC, 626 F.2d 896, 907 (D.C. Cir. 1980).

Comments submitted by interested parties in 1979 and 1981 offered parties an opportunity to bring to the Commission's attention any such fundamental change since the hearings conducted in 1976. Comments submitted at that time indicated that no significant changes had taken place.

[96] Many consumers, of course, want the package funeral and are not interested in the prices of the parts of the package. Such consumers are not injured by the funeral director's failure to disclose that components of the package are optional and the price of those components, but only because their wants happen to coincide with the funeral director's offering.

[97] *See, e.g.,* Blum Study, *supra* note 57; CAMP Survey, *supra* note 92.

[98] *See, e.g.,* CAFMS Survey which found that a large majority of consumers surveyed supported required price disclosures. CAFMS Survey, *supra* note 60, at A–7 (Form A, Question 22). A survey of over 1000 consumers sponsored by the Casket Manufacturers Ass'n revealed that two-thirds of consumers responding indicated a preference for detailed funeral price quotation. Blackwell and Talarzyk, *supra* note 74, at 34. While these and other surveys on the record have methodological limitations which prevent projection to the national population, these surveys, combined with others and the extensive written comments and oral testimony, show that consumers typically desire more information.

The desire for more detailed price information also was expressed by a great many individual consumers during the rulemaking proceeding. *See, e.g.,* Comments, in category II–B at 87, 240, 305, 529, 541, 597, 706, 726, 738, 780, 796, 916, 1191, 1316, 1562, 1565, 1571, 1589, 1589, 1823, 1834, 1850, 2042 and 2080; and Testimony, *see, e.g.,* W. London, American Legion, Tx 3465.

[99] *See, e.g.,* Blackwell and Talarzyk, *supra* note 74, at 34–35 (CMA survey revealed that two-thirds of respondents preferred pricing quotation that provides some detail on individual components and over one-half of respondents expressed preference for itemization); Blum Study, *supra,* note 57 (survey of South Florida residents indicated that over 90% of respondents favored regulation requiring a funeral director to provide specific information about the price of each item of service and merchandise); Cohen Statement, D.C. Ex. 38, *supra* note 75 (94% of consumers surveyed desired funeral prices to be quoted on an itemized basis).

[100] *See* Blum Study, *supra* note 57; CAMP Survey, *supra* note 92; Humphreys, D.C. Ex. 45.

Evidence shows that, if given the choice, consumers would not buy various parts of the "average" package funeral ranging from rates of 10 percent (for embalming) to 43 percent (for the use of another family car).[101] Many industry leaders expressly opposed itemization at least in part for the fear that consumers, if given the choice, would not buy items usually included in the package.[102]

The aggregate injury caused by consumers purchasing items that they do not want and would not buy if not required to do so, or if they had itemized pre-sale price information, is substantial. Evidence on the record shows that various optional items included in the funeral package are expensive: for example embalming ($50–$150),[103] and limousines ($15–$75).[104]

(b) *Paying Supracompetitive Prices.* The second source of consumer injury is that the lack of adequate price information may be causing consumers to pay higher than competitive prices for funerals.

Information from a variety of sources has led the Commission to conclude that this economic injury exists. Included in these sources are economic studies of the funeral market, which suggest the existence of consumer injury, because of "a striking absence of price competition in the funeral industry."[105] Industry members have also admitted that funeral directors do not compete on the basis of price at the point of sale.[106] Economic analyses on the record have concluded that price competition in the funeral market is severely inhibited because consumers do not have adequate access to price information.[107] Without the pressure of active price competition, prices for funeral services can be set higher than a competitive equilibrium price.[108]

Information plays an important role in the operation of an efficient market. In particular, the significance of price information to a competitive market is well-documented in the economic literature.[109] Consumer ignorance about prices will permit sellers to charge higher than competitive prices, even in a market with numerous sellers.[110] The reason for this result is that sellers will gain few customers by lowering prices if consumers have difficulty obtaining price information. Inadequate price information, therefore, serves to give even a large number of small sellers a degree of market power. These theoretical observations have been confirmed by a number of empirical studies in other markets.[111]

Exactly why the market has failed to generate price information is impossible to say with certainty. Evidence in the record suggests that some of the unique structural and demand characteristics of this industry may provide some explanations.

First, there is the tradition of restraints on price advertising noted above.[112] Although formal restrictions against price advertising have generally been eliminated, many industry leaders and members continue to view price advertising as unprofessional. Thus, industry custom and substantial peer pressure serve to inhibit competition by advertising.

The second factor which may operate to distort normal market incentives is the nature of demand in the industry. Total demand for disposition is a function of the death rate. Economists studying the funeral industry point out that total demand for disposition in all forms is extremely inelastic, i.e., the number of funerals is not responsive to changes in price.[113] The demand for the services of any individual funeral home or for particular forms of disposition, however, may be price-elastic, thereby giving each firm an incentive to lower prices to increase sales. Lower prices and aggressive marketing, however, will not expand the number of consumers in the market; a funeral home can increase the number of funerals it performs only by taking business away from its competitors. Since competing firms are likely to respond with lower prices, the result is that prices are reduced and sales do not increase, thereby reducing total revenues. The funeral home is better off, therefore, avoiding price competition. One economic analysis of the funeral industry concluded that "the funeral director's awareness of the effects of price competition in this demand-inelastic industry" is a major reason for the lack of price advertising.[114] This finding can be contrasted with the experience in professional markets where advertising has flourished after the removal of formal price advertising restraints. For example, studies in the optical market, where perhaps the most professional advertising has occurred, show that demand is price-elastic.[115]

In addition to these two factors which blunt funeral providers' incentives to provide price information, certain aspects of the market make it difficult for new firms to enter and compete. The evidence suggests that a variety of nonprice factors influence a consumer's choice of funeral provider, such as family tradition, religious or ethnic affiliation, and reputation of the firm.[116] These consumer preferences give established firms in the market a distinct advantage over potential entrants. In an industry with a large number of small sellers and significant consumer loyalty, the prospects for attracting a large enough clientele may appear uncertain at best. As a result,

[113] *See, e.g.*, Kissel, *supra* note 35, at 23.

[114] *Id.* at 41. The ability of funeral directors to enforce an informal understanding not to compete on the basis of price is made easier by the fact that most funeral homes have very limited competition. Nearly 70% of all funeral homes have fewer than 4 competitors. V. Pine, Findings of the Professional Census (1971), D.C. Ex. 4.

[115] *See* Regulating Through the Professions, *supra* note 111, at 436–440. *See also* FTC Staff Report on Effects of Restrictions on Advertising and Commercial Practice in the Professions: The Case of Optometry 31 (1980).

[116] Various consumer surveys on the record examined this issue. *See, e.g.* N.Y. Ex. 1(I) (N.Y.); Kalish Survey, *supra* note 56, at Table 8; "Funeral Services Attitudinal Survey," D.C. Ex. 29 (Odesky) at Question 3; G. Refsland Prof. of Sociology, Montana State Univ., D.C. Stmt. at 4. Funeral industry spokesmen also have pointed to the relatively low priority of price as a factor in selecting funeral homes. *See e.g.*, R. Blackwell, Tx 13,707.

entry by low-cost providers is discouraged.[117]

(c) *Injury is Unavoidable.* The consumer injury caused by the lack of adequate price information—paying for items which consumers may not want, and paying for funerals at supracompetitive prices—are harms which are not reasonably avoidable. A consumer can only avoid paying for items in a package he does not want if he or she is knowledgeable enough to ask whether they are optional. In the funeral transaction, it is not reasonable to put that burden on the funeral consumer, who typically lacks prior experience and prior knowledge about laws and options, and who must decide under circumstances of limited time and emotional strain.

The only way a consumer could avoid such harm would be to compare prices and offerings before choosing the funeral home. Yet, because of time constraints and other factors, most people do not get such information. Further, the record indicates that even where some consumers have tried to get price information over the telephone, they had difficulty in obtaining it.

Finally, it appears that the market forces are insufficient to generate the needed price information. Due to some unique structural and demand characteristics of this market, there appear to be significant obstacles to price competition. Further, the usual market discipline is lacking. In most cases, consumers who have unnecessarily bought items because they lacked sufficient price information will not be dissatisfied because they will not know that such choices were denied. Given these factors, it is unlikely that the market will correct the failure to provide sufficient price information by itself.

(d) *Countervailing Benefits.* In considering whether a practice is unfair, the Commission must determine that there is net injury, *i.e.*, that the injury caused by the practice is not outweighed by countervailing benefits.[118] Many funeral providers and the major trade associations believe that package pricing has important benefits.[119]

One suggested benefit is that package pricing is easier for most consumers to use, since most consumers are interested only in the full traditional funeral and how much the total will cost.[120] Undoubtedly, many consumers will not be interested in declining parts of the traditional funeral package, and those consumers would be interested primarily in the total cost in choosing which funeral package to buy. Itemization, however, does not impose any burdens on such consumers. If consumers are not interested in choosing individual components, they are free simply not to use the price information and to select on the basis of the total cost for all of the components. Further, the rule also allows funeral providers to offer package prices. While itemization thus does not interfere with the ability of those consumers who are interested only in packages to choose the funeral package they want based on the total cost, package pricing, in contrast, precludes consumers who are *not* interested in the full funeral from making informed choices.

Funeral providers also argue that package pricing, as an accounting method, is an easier method to use than itemization for setting prices. Since itemization is a more complex accounting system, funeral directors may be required to seek accounting assistance and to spend more time in tracking costs and in setting prices.[121] These increased costs, it is suggested, will be passed on in the form of higher prices to consumers. The Commission considers the arguments that the rule will increase costs, and thereby raise consumer prices, in detail in Section IV, *infra*. There, the Commission determines that, while the rule will impose some compliance costs, those costs are modest and are outweighed by the benefits of the rule.

By far the most strongly pressed argument in favor of package pricings, however, is the contention that package pricing enables funeral providers to offer funerals at lower prices than they would be required to charge under itemization.[122] The various arguments that itemization will lead to higher prices are discussed in detail in Section V(B). As noted there, the Commission finds that, while itemization provides an opportunity for funeral directors to choose to raise their prices, there is no reason why prices would necessarily be lower under package pricing than under itemization.

The Commission finds that the countervailing benefits of package pricing are not significant. While package pricing is probably a less costly accounting method than itemization, the increased costs caused by switching to itemization, as discussed in detail in Section V(B)(2), *infra*, are modest and outweighed by the far greater benefits expected by increased price competition and greater consumer choice.

(e) *Public Policy.* Finally, as discussed in Section II(A)(1), *supra*, the Commission also looks to established public policy for confirmation (or denial) of its finding that a practice is unfair. While the primary focus of the Commission's decision will usually be a direct analysis of the injury caused by a challenged practice, the decisions of other public bodies addressing similar issues will also be taken into account.

In this case, there is clearly no public policy *against* the disclosure of itemized price information.[123] to the extent that there is any clear public policy at all, as evidenced by recent state laws and legislation, it appears to support the Commission's decision.[124] While this might not be sufficient to rest a finding of unfairness on public policy alone, it provides some support for the Commission's own analysis of the consumer injury.

(f) *The Failure to Disclose Itemized Information is an Unfair Practice.* Based on the above evidence, the Commission concludes that the failure of funeral providers to furnish information on the prices of specific funeral goods and services is an unfair practice in violation of Section 5 of the FTC Act. We find that the practice imposes substantial unjustifiable consumer injury.

(g) *Remedial Requirements.* To remedy the unfair and deceptive failure of funeral providers to furnish information on the price of specific funeral goods and services, § 453.2(b) of the rule requires funeral providers to: (1) Provide price information over the

---

[117] The difficulty of building a clientele has been cited as the primary barrier to entry in the funeral industry. *See* Kissel, *supra* note 35, at 23. While all states require licensure for morticians, there is no evidence to suggest that the entry barriers posed by those licensure schemes serve to exclude new entrants.

[118] Commission Unfairness Statement, *supra* note 84.

[119] As noted previously, however, most trade associations recognize that consumers are entitled to a "reasonable adjustment" when they decline items; only a few funeral providers defend the required purchase of all parts of the funeral package as being beneficial. *See, e.g.*, D. Hanks, Missouri funeral director, II–B 5159; I. Fisher, Mass. funeral director III–H–15, (suggesting that package pricing, as an accounting method, does not permit them to deduct charges for unwanted items).

[120] *See, e.g.*, NFDA Post-Record Comment, XIV–848, at 70, 79, 482; NSM Post-Record Comment, XIV–849, at 93, 95.

[121] *See, e.g.*, NFDA Post.-Record Comment, XIV–848, at 480.

[122] *See, e.g.*, NFDA Post-Record Comment, XIV–848, at 486–493; NSM Post-Record Comment, XIV–849, 95–107.

[123] Indeed a policy against disclosure would be hard to reconcile with the general public policy favoring informed consumers and the efficient operation of the free market. See Trade Regulation Rule concerning the Labeling and advertising of Home Insulation, 16 CFR Part 460.

[124] See Fla. Stat. Ann. § 470.035 (West 1979); *see also* note 82, *supra*.

telephone; (2) furnish consumers with a written price list containing prices of the various individual items and services offered; and (3) give purchasers a written statement indentifying the goods and services selected and their individual prices.

The remedies selected by the Commission to cure the lack of price information must bear a "reasonable relationship" to the unfair practice found to exist. In *Jacob Siegel Co.* v. *FTC*, 327 U.S. 608, 613 (1946), the Supreme Court set forth the standard for review of remedial provisions of Commission adjudicative orders: "[T]he courts will not interfere except where the remedy selected has no reasonable relationship to the unlawful practices found to exist." Periodically the Supreme Court has reaffirmed the Commission's remedial discretion and the limited role of the reviewing Court. *FTC* v. *Ruberoid Co.*, 343 U.S. 470, 473 (1952); *FTC* v. *National Lead Co.*, 352 U.S. 419, 428–30 (1956); *FTC* v. *Colgate-Palmolive Co.*, 380 U.S. 374, 392–95 (1965).

In exercising this remedial authority, the Commission has not been limited to proscribing only the precise practices found to exist, but rather has been free to "close all roads to the prohibited goal." *Ruberoid, supra*, 343 U.S. at 473; *Colgate-Palmolive, supra*, 380 U.S. at 395. *Cf. International Salt Co.*, v. *United States*, 332 U.S. 392–400 (1947); National Soc'y of Professsional Engineers v. *United States*, 435 U.S. 679, 698 (1978).

The Commission's discretion to formulate an appropriate means of preventing the unfair or deceptive acts or practices found to exist also takes into account the nature of rulemaking, which involves "prediction[s] based upon pure legislative judgment" [125] and "judgmental or predictive" [126] determinations such as those involved in fashioning remedies. In making such determinations, the Commission is "entitled to rely on its judgment, based on experience" [127] as to the appropriate remedy to impose in the rule.

The Commission has designed the remedial requirements in § 453.2(b) to restore consumer choice, enhance the operation of market forces and cure the market failure which has occurred in the funeral industry. In the Commission's judgment, the requirements will achieve this result by giving consumers access to price information at a time and in a form which will permit them to consider price when making purchase decisions. Increasing the ability of consumers to locate funeral services whose mix of price and quality they prefer and to express those preferences in the market gives sellers an incentive to compete.

The itemized price list addresses the failure of a substantial portion of the industry to provide information on the prices of components of a funeral package. It will enable consumers to weigh the costs and benefits both of the various alternatives to a traditional funeral and of the individual items which they might select for use with a traditional funeral. The itemized list also will provide consumers with relatively standardized price information, while still allowing funeral providers to provide any additional price information they wish to. The second disclosure requirement, the telephone price disclosure requirement, addresses directly the record evidence that funeral directors have failed to respond to telephone inquiries about prices. Consumers will thus have the ability to call several funeral homes and compare their offerings before deciding where to purchase. In this manner search costs can be significantly reduced. In many instances, obtaining price information by telephone represents the only practical opportunity for comparison shopping, since many options are foreclosed once the funeral home is closed. The third disclosure requirement, the itemized statement of services selected, is designed to complement the price list by ensuring that consumers are not charged for items they did not select.

The effectiveness of the rule is clearly dependent on the extent to which consumers actually use the information provided to them. This does not mean, however, that all consumers must comparison shop in order for the market to realize the benefits of price competition. Economic theory indicates that consumers who seek and use price information will benefit uninformed consumers. [128] Thus, as long as some consumers comparison shop, the market should respond. The discussion which follows will describe in more detail how the remedial requirements in the rule will assist consumers during selection of a funeral home and while comparing alternative funeral arrangements in the funeral home.

(1) *Operation of Price Lists.* At the funeral home, consumers will receive one or more price lists. The rule itself identifies three separate lists. One is a "general price list", specified by § 453.2(b)(4). The second is a "casket price list", specified by § 453.2(b)(2). The third is an "outer burial container price list," specified by § 453.2(b)(3). However, the rule also permits funeral providers to merge either or both of the latter two lists with the general price list, if this is more convenient and if the information provided is the same.

In any event, consumers would have to be given the general price list for retention upon beginning discussion either of funeral arrangements or of the selection of any funeral goods or funeral services. The list would be present for consultation while the consumers were considering what to purchase. It would show them the prices for 16 basic goods and services which they might wish to use. [129] The general price list would have to be printed or typewritten so that it would be available for retention by consumers.

In addition to the general price list, there would be two other price lists containing information on specific merchandise. The casket price list would show the retail prices of all caskets and alternative containers offered which did not require special ordering. The outer burial container price list would provide similar price information about burial vaults and grave liners. Each of these lists would have to be given to consumers upon beginning discussion of, but in any event before showing the merchandise they list. Unlike the general price list, these lists would not have to be offered to consumers if caskets or outer burial containers happened not to be discussed or shown. Similarly, the lists do not have to be printed or typewritten in a manner which enables them to be given to consumers for retention. Rather, the rule only requires that they be available in the funeral home. Because of this, funeral providers would be free to use alternative formats, such as charts or notebooks. [130]

The principal concern expressed about the operation of these lists was that they would drive up funeral costs because they require funeral directors to itemize prices. [131] For reasons discussed extensively in Part V of this Statement, the Commission has concluded that this would not be the case.

[129] The list might not always be this long. All 16 items have to be listed only if the funeral provider offers them for sale. Moreover, the rule does not prohibit listing other items which the funeral provider might offer for sale in addition to those specified.

[130] If the funeral provider merges these lists with the general price list, the combined list would have to be prepared in a format which consumers could retain.

[131] *See* discussion in Part V(B), *infra*.

Several other concerns were also expressed, however. First, some funeral providers stated that use of an itemized price list would force funeral providers to take more time explaining funeral arrangements and thus substantially lengthen the arrangements conference.[132] Other persons testified, however, that itemized price lists either took no longer to explain or shortened the length of the arrangements conference.[133] To the extent that the time involved in the arrangements conference was lengthened because consumers more carefully review their options and select only those items they desire, such an effect is intended.

A second concern was directed at the casket price list. Some funeral providers suggested that the requirement to have the list reflect all caskets offered would be particularly burdensome in light of the fact that a different casket is sold each time a funeral is arranged.[134] Although the rule does require the casket price list to be kept current, this should not impose a substantial burden. Many funeral providers replace the casket they sell with an identical, comparably priced unit.[135] Whenever this happened, no revision of the casket price list would be necessary. The rule requirement also has been written to minimize the burden which would be imposed on funeral providers when they change their inventory. The casket price list does not have to be prepared as a printed or written list. Instead, it may be displayed in other formats, such as a looseleaf notebook with a page for each casket. If the funeral provider elects to use such a format, revising the list would only require removing one description and replacing it with another. Given this sort of flexibility, the requirement should not be unreasonably burdensome.

A third concern expressed was that the general price lists would be expensive to prepare and duplicate.[136] However, funeral directors who currently provide itemized price information testified that the printed forms do not cost more than a few cents each to obtain.[137] Neither does the evidence suggest that itemization, as an accounting method, is significantly more complicated or substantially more expensive than the methods currently used by many funeral providers.[138]

(2) *Statement of Goods and Services Selected.* In addition to the price lists, persons making funeral arrangements in the funeral home would receive a "Statement of Funeral Goods and Services Selected." The statement, required by § 453.2(b)(5), would be given to people at the conclusion of the arrangements conference. Its purpose is to combine in one place the prices of the individual items the person is considering for purchase, as well as their total price, so that a final decision on whether to add or subtract particular items can be based on a review of the total cost of the arrangements.

To help ensure that the total cost of the funeral is disclosed on the statement, funeral providers are required to show prices of cash advance items, if known, or to give a good faith estimate of their cost if the actual price is unavailable. To simplify the operation of the rule and avoid unnecessary paperwork, § 453.2(b)(5) permits funeral providers to combine the information required for the "statement" on any contract, statement, or other document which they currently provide at the conclusion of the arrangements conference.[139]

(3) *Telephone Price Disclosure.* The rule provision primarily designed to help consumers obtain price information for use in selecting a funeral home is the provision requiring telephone price disclosures.[140] The section imposes two obligations on funeral providers. First, they must affirmatively inform people who call their place of business and ask about the terms, conditions, or prices at which funeral goods or funeral services are offered, that price information is available over the telephone. In other words, the provision requires that funeral providers make an oral disclosure letting persons who call know that they can receive price information over the telephone. This provision is intended to inform the large number of consumers who first contact the funeral home by telephone that price information can be obtained before the selection of the funeral home is made. Many consumers who may be interested in price are not presently getting price information because they do not know enough to ask for it, and funeral providers do not volunteer it. Since options may be foreclosed, even under the rule, once a home is selected, this information will help alert consumers to the importance of price at a time when their choices are still open.

If the person calling is not interested in such information, the funeral provider has no further obligations under § 453.2(b)(1). However, if the caller requests price information, the second requirement of the section is triggered. That requirement is to disclose to persons who make telephone inquiries about the funeral provider's offerings or prices any accurate information from the price lists in § 453.2(b)(2) through (4) which reasonably answers the question and any other information which is readily available. The consumer can use this information to compare the prices of different funeral providers in deciding which one to select.

While the Commission believes that the telephone price disclosure provisions will impose a minimal compliance burden on funeral providers, several concerns about the provisions' operation were expressed during the funeral rule proceedings. One was that the provisions would necessitate the hiring of additional personnel to provide the required information.[141] It was argued that many funeral providers currently staff their phones during off-hours with an answering service or with unlicensed employees who lack detailed information about the provider's offerings and prices. Such a concern apparently is based on the view that the rule would require specific price information to be given by the first person answering the phone. However, this view is not the case. To the extent that a funeral home uses a telephone answering service during non-business hours, that service is not subject to the provisions of the rule. While the rule

[138] *See* discussion in Part V(B), *infra;* 1978 Staff Report, *supra* note 9, at 405–06.

[139] The major concerns raised about the statement—the cost of preparing itemized price information—has been discussed above, in conjunction with the description of how Sections 453.2(b) (2) through (4) (price lists) operate.

[140] Theoretically, consumers also would be able to go to different funeral homes and obtain their price lists, then compare these. However, substantial time constraints and emotional barriers to in-person shopping make it unlikely that consumers will avail themselves of this opportunity. While this provision makes it easier for consumers to obtain price information before choosing a funeral home, many consumers may still continue to choose a funeral home without first searching for price information. *See* discussion of the funeral consumer in Part I(E), *supra.*

[141] *See, e.g.*, Dr. V. Pine, NFDA, statistical consultant, Tx 10,827; W. Chesen, Illinois funeral director, II–A–705, at 3.

does cover funeral providers, their employees and agents, the Commission does not construe the rule as reaching entities as far removed as a telephone answering service. Second, to the extent that the concern is that not all employees would possess the substantive knowledge to respond to phone inquiries, the uninformed employees could simply refer calls to someone who was familiar with prices. Moreover, the vast majority of information would be available on the price lists themselves, and thus likely could be given out even by part-time or unknowledgeable employees.

Another concern raised was the possibility that the availability of telephone price information could lead to bait-and-switch practices by funeral providers.[143] Such practices are always a potential problem. However, any funeral providers who gave out false or misleading information over the telephone or engaged in bait-and-switch tactics would be engaged in practices which violate Section 5 of the FTC Act and the laws of virtually every state. Nothing in the rule encourages such deception, nor does the rulemaking record suggest that the practice would be engaged in by the majority of ethical funeral directors.[144]

Third, some funeral providers suggested that the funeral transaction is too complex to explain over the telephone and that telephone price information would tend to confuse consumers.[145] In the Commission's judgment, the informational disclosures which the rule requires can be readily understood and used by the majority of consumers. To the extent that individual consumers find this information too complex, they would always be free, as they now are, to visit the funeral home either to obtain it or any other information which was available. Even if all of the details are not provided over the telephone, general comparisons can be useful.

Fourth and finally, funeral providers suggested that the provision might lead to price fixing because funeral providers would be forced to disclose their prices to competitors. Carried to its logical conclusion, this argument would suggest that price conspiracies are likely in any industry where firms have ready access to competitors' prices. However, access to price information tends to be easiest in precisely those markets where price competition is most intense. Obvious examples are food retailing and new and used car sales. Thus, the ready availability of price information is by no means a cause or a symptom of cartel behavior.

In the funeral market, moreover, where services currently tend to be sold as a fixed package and where little entry by new providers has occurred, funeral homes may already have acquired a fairly accurate knowledge of their competitors' prices. The problem is that *buyers* are currently unable to gather comparative price information efficiently and exert the kind of competitive pressure that would discipline the market. Thus, the Commission has concluded that the rule's price disclosure provisions are much more likely to stimulate competition than to serve as an instrument for policing pricing agreements.

B. *Section 453.3—Misrepresentations.*—1. *Introduction.* Section 453.3 addresses six types of misrepresentations which have occurred in funeral transactions.[146] These misrepresentations concern: (1) Embalming; (2) caskets for cremation; (3) outer burial containers; (4) other legal and cemetery requirements; (5) preservative and protective value claims; and (6) cash advances. To remedy certain of these misrepresentations the rule requires funeral providers to disclose several items of information on the price list which consumers receive at the beginning of the funeral transaction.

The Commission's authority to prevent consumer deception in the marketplace has been well-established through an extensive body of Commission and court cases. Section 5 is violated whenever a seller misrepresents or fails to disclose to a purchaser facts that are material to the consumer's purchasing decision.[148]

A statement is deceptive under Section 5 of the FTC Act if it actually misleads consumers, or has the tendency or capacity to deceive a substantial segment of the purchasing public in some material respect.[147] Thus, Section 5 prohibits not only outright falsities, but also statements which, while literally true, are deceptive in their overall impression.[148] Because deceptive information distorts the marketplace, false or misleading statements are unlawful regardless of whether the seller intends to deceive.[149] In determining whether a claim is deceptive, the seller's claim must be considered in its entirety and evaluated in light of the reasonable expectation or understanding of the expected consumer audience.[150] The deceptive quality of a statement may be shown by evidence of actual deception, or the likelihood of deception can be inferred by the Commission by an examination of the claim itself and on the basis of its accumulated expertise.[151]

Section 5 prohibits not only affirmative misstatements of facts but also the failure to disclose material facts even where the seller has made no representations. In the cases where a failure to disclose material information was found to be deceptive, the Commission has looked to the reasonable assumption which consumers make concerning a product or service based on the product's nature, appearance or intended use.[152] Where

[143] *See* Report of the Presiding Officer, *supra* note 8, at 95.

[144] *See, e.g.*, R. Grayson, Minnesota FDA, Tx 3378; C. Swartz, Pennsylvania funeral director, Tx 13,940; Oklahoma FDA, Tx 8695.

[145] As originally proposed, the rule addressed these misrepresentations through a general provision prohibiting misrepresentations of legal, public health, religious and cemetery requirements. *See* 40 FR 39901, at 39902 (August 29, 1975). The final rule addresses specific misrepresentations (*i.e.*, misrepresentations regarding the legal necessity for embalming, caskets, and outer burial containers) in order to achieve greater specificity in defining the prohibited conduct. This was necessitated by the *Katharine Gibbs* decision. (*See* Part I (B), *supra*). In addition, the Commission has retained a general prohibition against misrepresentations of legal, cemetery, or crematory requirements to prevent misstatements aside from those specifically defined.

The disclosure requirements associated with the misrepresentation provisions also have been modified in the final rule so as to minimize the paperwork burden on funeral providers. The rule proposed in 1975 mandated more detailed information on the legal requirements concerning disposition of dead bodies and provided that separate documents containing disclosures on legal requirements be given in addition to written price lists.

[151] FTC v. Colgate Palmolive Co., *supra* note 147, at 391–92.

[152] Past Commission cases have held that it is a deceptive act or practice to fail to disclose such

the effect of nondisclosure is to deceive a substantial segment of the buying public with respect to a material fact by exploiting the reasonable expectations of consumers, the failure to disclose constitutes a violation of Section 5.[153]

Where proof can be shown that a claim is deceptive, no evidence need be shown as a matter of law that consumers were in fact misled by the claim. Rather, the Commission can make a determination based on its experience, as to what the reasonable expectations of consumers were under the circumstances and hold that the failure to disclose the information in question resulted in harm.[154]

The impact of specific failures to disclose are described below. However, it is the Commission's general finding that, in all these specific cases, many consumers have reasonably believed there were legal or cemetery requirements relating to the disposition of remains. Because the consumers were unfamiliar with the precise nature of the requirements, a significant number of consumers made incorrect assumptions about them. Thus, as we discuss below, many consumers reasonably believe that certain procedures (such as embalming) or particular goods (such as caskets or outer burial containers) are required and, therefore, not subject to individual discretion. Resulting purchase decisions are due, at least in part, to incorrect assumptions by consumers about material facts. Funeral providers have failed to disclose correct information about such facts and have, in some cases, made false claims about them.

2. *Section 453.3(a)(1)—Embalming.*— (a) *Evidence.* Only in exceptional circumstances does state law absolutely require embalming. The two most common occasions are those situations where the body must be transported interstate (where embalming prevents decomposition during transport) and where death has occurred from one of several communicable diseases.[155] Since embalming is not generally required by law, consumers usually have the right to decline to have a body embalmed if they wish. Consumers may wish to decline embalming services because of personal or religious beliefs or in order to avoid the expense of embalming. The record shows, however, that most funeral directors do not disclose that embalming is optional. It is common practice in the industry to embalm without specifically requesting permission.[156] Indeed, industry members stated in comments filed in this proceeding that embalming should be performed unless specificallly rejected by the consumer.[157] The Presiding Officer found that prior express permission for embalming is rarely obtained.[158]

In addition to the widespread failure to disclose that embalming is not required by law, a significant number of funeral providers have affirmatively misrepresented state laws regarding embalming. While such affirmative representations do not appear to be the norm, the record documents numerous instances in which consumers were told that the law required embalming when in fact it did not.[159] In other cases consumers were led to believe that embalming was a legal requirement by statements that embalming is "required" or "necessary."[160] While embalming is a practical necessity where there is viewing for several days before disposition,[161] references to the "necessity" of embalming may mean that the funeral provider requires embalming in all cases. In any event, such representations have generated substantial confusion among consumers as to what the law requires.

The Commission finds that the failure to disclose to consumers that embalming is usually not required as a matter of law is a deceptive act or practice within

[154] *See e.g.*, All-State Industries, Inc. v. FTC, *supra* note 152; Simeon Management Corp. v. FTC, *supra* note 152.

[155] Although there is considerable dispute over the necessity and effectiveness of embalming to prevent the spread of disease, many states require embalming under these circumstances. *See, e.g.*, Rules and Regulations of the State Board of Embalming of the State of Kansas Relative to Embalming, Art. III, §§ 63–3–10 to 63–3–16 (1976); N. H. Rev. Stat. Ann. § 325:40–a (Supp. 1975); Colo. Rev. Stat. § 12–54–112(4) (1973). *See also* CFA, Analysis of State Statutes, Rules, and Regulations Affecting the Funeral Practices Industry, Atl. Stmt. at 18–22 (June 22, 1976).

[156] A number of funeral directors testified during the proceedings that they engage in this practice. Several further felt qualified to describe it as a common practice in their community. *See, e.g.*, W. Rill, Pres., Washington FDA, Tx 5563; F. Noland, Pres., Idaho FDA, Tx 5636; J. Page, California mortician, Tx 7373; L. Ruffner, past Pres., Arizona FDA, Tx 7851; N. Heard, Pennsylvania funeral director, Tx 13,150; V. Polli, Sec.-Treas., Vermont FDA., Tx 2196; R. Murphy, Pres., NSM, Tx 12,596; R. Johnson, Indiana funeral director, Tx 12,595; J. Kaster, Texas State Representative, Tx 6119; S. Waring, Treas., NFDA, Tx 685; R. Thompson, member, Conn. State Board of Examiners of Embalmers and Funeral Directors, Tx 2034. The results of informal surveys of funeral directors also found that a high percentage routinely embalm without seeking permission. *See, e.g.*, CFDA FTC and You, Questionnaire Results, L.A. Ex. 23 (CFDA survey revealed that half of the funeral directors responding do not obtain permission for embalming); S. Chenoweth, Director, Minnesota Office of Consumer Services, II–C–81, at 5–6; H. Sandhu, President, The Memorial Association of Central New Mexico, Inc., II–C–1280. Similarly, a survey of consumers found that embalming took place in 96% of the cases where the respondents had not requested it. P. Sperlich, Ph.D., CalCAG, Tx 7410.

[157] Funeral providers take the position that most consumers expect that funeral directors will immediately embalm the body, and consequently give implied permission to embalm when they authorize the funeral director to pick up the body. They also assert that placing the burden on the consumer to tell the funeral director not to embalm best serves most consumers, because most consumers choose a funeral with viewing, and embalming must be done quickly after a death to ensure the best cosmetic results. *See, e.g.*, B. Hotchkiss, California funeral director, Tx 8520–21; J. Altmeyer, West Virginia funeral director, Tx 11, 735–36; G. Brown, Vermont funeral director, Tx 12,058; C. Lightner, past Pres., NFDMA, Tx 10,417; J. Wright, Mississippi funeral director, Tx 9466–67; H. Ruidl, counsel and Exec. Sec., Wisconsin FDA, Chi. Stmt. at 1–2; T. J. Proko, past Pres., Wisconsin FDA, Tx 4186–87; J. Curran, Pres. New York FDA, Tx 98. *See also* L. Frederick and C. Strub, The Principles and Practice of Embalming 191 (1967) (the act of handing over a dead body carries with it an implied permission to embalm).

[158] Report of the Presiding Officer, *supra* note 8, at 94.

[159] Statement, New York Public Interest Research Group, (NYPIRG), Ex. J at 3 (16% of respondents told that embalming was specifically required by law); Survey, Funerals in Minnesota: Customer Experiences conducted by Minnesota Office of Consumer Services, XI–592, at 27 (hereinafter cited as "Minnesota Survey") (22% of respondents told that embalming is always required by law); Survey, Continental Association of Funeral and Memorial Societies, Inc., D.C., August 5, 1976; (28% of respondents who used embalming told it was required by law). *See* also the following consumer complaints in Category II–B (4, 379, 417, 893, 1090, 1114, 1256, 1534, 1601, 3486, 3821).

[160] Consumer complaints in Category II–B (432, 453, 875, 740, 1863) and Category X (1–77).

[161] Embalming is the only means by which decomposition can be halted temporarily for viewing for more than a day or so. Refrigeration retards decomposition, but does not provide the cosmetic effects of embalming and is not practical when the body is on view for more than several hours. L. Frederick & C. Stub, The Principles and Practices of Embalming (1967). However, where disposition does not involve viewing (e.g., closed casket, direct disposition), the temporary preservation of the body and the cosmetic effects of embalming are not necessary, although some consumers may still desire them.

the meaning of Section 5 of the FTC Act. The evidence discussed above demonstrates that this practice is widespread in the industry, causing many consumers who in fact believe that embalming is required by law, *i.e.*, that it is not an option, to be misled.[162] In addition, the Commission finds the making of affirmative mistatements about legal requirements for embalming to be a deceptive act or practice in violation of Section 5 of the FTC Act. The evidence further indicates that such misinformation causes some consumers to purchase embalming services in situations where the services might otherwise not be purchased.[163] Since embalming generally costs $50 to $150,[164] consumer injury resulting from the misrepresentation is clear.

(b) *Rule Provisions.* Therefore, in § 453.3(a)(1) of the rule, the Commission defines as deceptive: (1) False or misleading statements that state or local law requires that a deceased person be embalmed; and (2) the failure to disclose that embalming is not usually required by law. section 453.3(a)(2) imposes two remedial requirements on funeral providers. First, it prohibits representations that a body must be embalmed in certain specified situations in which embalming is unnecessary, such as direct cremation or immediate burial. Second, it requires that the general price list mandated by § 453.2(b)(4) contain a disclosure concerning embalming requirements. The disclosure informs consumers that embalming is generally not required by law, but that it is usually necessary for certain funeral arrangements, for example, a funeral with viewing. It also states that consumers can usually select an arrangement which does not require embalming.

These requirements are designed to prevent not only the misrepresentations defined in § 453.3(a)(1), but also the acts defined in § 453.4(b)(1). Under that provision, funeral providers may not require consumers to purchase certain goods or services as a condition to obtaining others. Thus, funeral providers may not condition the availability of their services or offerings on agreement by the consumer to purchase embalming. The general rule, accordingly, is that a funeral provider may not require that consumers purchase embalming services as a matter of funeral home policy. There are two exceptions to this. First, in some cases embalming may be required as a matter of law. Second, for certain types of funeral arrangements embalming is a practical necessity because of the natural decomposition of the body. Funeral director are not prohibited from requiring embalming in these instances. Accordingly, § 453.3(a)(2)(i) prohibits statements that a body must be embalmed for specified arrangements for which embalming is not a practical necessity, for example, direct cremations. A funeral director may require embalming for arrangements not listed in § 453.3(a)(2)(i), such as a funeral with a viewing.

2. *Section 453.3(b)(1)—Casket for Cremation.*—(a) *Evidence.* A second misrepresentation identified in the rulemaking record concerns representations by funeral providers that state law requires consumers to purchase caskets to have the deceased cremated. Currently, no state has such a requirement.[165] In the absense of any disclosure to the contrary, many consumers believe that there are no alternatives to caskets or that state and local laws require the use of a casket.[166] Yet few funeral directors provide such a disclosure.[167] Moreover, some funeral providers affirmatively misrepresent the legal requirements for cremation through claims to consumers that state or local law mandates the purchase of a casket. While the evidence suggests that such affirmative misrepresentations are not typical, the record contains consumer testimony and letters which reveal that a number of funeral providers have falsely informed consumers that state law required a casket for direct cremation services,[168] and consumer group representatives have attested that misrepresentations about a casket for cremation requirements are a significant problem.[169] In addition, some funeral directors misrepresent that crematories require the purchase of a casket when such is not the case.[170] Funeral directors also inform consumers who desire direct cremation that a casket is "required" or "necessary" or what they "have to" purchase a casket.[171] There is some evidence to suggest that consumers often interpret these statements to mean that the law requires purchase of a casket [172] and in any event, it is clear that these consumers were not told that the caskets were not legally required.

The misrepresentations by funeral providers regarding legal requirements for cremations result in consumers purchasing caskets when they do not need to and otherwise might not. There are many different types of alternative containers suitable for holding and transporting remains, and for use in

---

[162] One study showed that where consumers arranging funerals were unaware that embalming was not legally required, embalming took place in 88.1% of the cases. On the other hand, where consumers were aware that embalming was not legally required, embalming took place in only 58.5% of the cases. Sperlich, L.A. Ex. 17. *See also* Minnesota Survey, *supra* note 159, at 27; CAFMS Survey, D.C. Ex. 39; CAMP Survey, *supra* note 92; *see also* statements of individual consumers, *supra* note 160.

[163] *See, e.g.*, Blackwell Survey, *supra* note 59 (NFDA-sponsored survey of 400 consumers found that only 60% of respondents would definitely choose embalming, 9.5% would not, and 28% were undecided); D. Daley, Seattle funeral director, Tx 3933 (funeral home which presents embalming as true option reports 30% declination rate); CAMP Survey, *supra* note 92 (less than half of those who had purchased embalming expressed a preference for it).

[164] 1978 Staff Report, *supra* note 9, at 190, n. 94.

[165] *See* "Funeral Practices, Survey of State Laws and Regulations," CAFMS, XVI–118, Appendix III–C (hereinafter cited as "CAFMS Survey of State Laws and Regulations").

[166] Surveys show consumer misunderstanding of state laws. *See, e.g.*, M. Stillwell, CAMP, Tx 6032 (49% of respondents thought a casket was required or didn't know); Blum Study, *supra* note 57, at Short Form (42% of respondents did not know if casket required for cremation or thought one is); CAFMS Survey, D.C. Ex. 39, at Ex. 2 (40% of respondents believed caskets required by state law). Other evidence indicates that consumers are unaware of alternatives to traditional caskets. *See, e.g.*, M. Fought, Ohio consumer, II–C–58; E. Klein, Vice President, CAFMS, Klein Ex. 1 (NY) at 2–3; K. Marsh, California mortician, Tx 6801; C. Moles, Iowa consumer, II–B–318; N. Kobernuss, Arkansas consumer, II–B–657.

[167] Surveys offer proof that consumers are often unaware that state laws do not require caskets even after they have been involved in a funeral transaction. *See, e.g.*, Blum Study, *supra* note 57. This evidence suggests that funeral providers are not disclosing to consumers that caskets are not necessary. Moreover, a number of consumers complained about having to buy caskets for cremation. *See, e.g.*, consumer complaints in category II–B (16, 18, 24, 439, 1067, 1152, 1484, 2174). These complaints indicate that the funeral directors probably did not disclose that state law did not require a casket.

[168] *See, e.g.*, Consumer complaints in Category II–B (271, 346, 417, 458, 602, 719, 1165, 1379, 1444, 1474, 1561, 5753, 6749), Category X–1 (66, 99, 24), written comments and testimony; Comments of NRTA/AARP, II–C–1516, at App. 2 (sample letter 6, #5); J. cremation. Examples of these containers include unfinished wood boxes and a variety of non-metal receptacles designed for the encasement of human remains, such as containers made of cardboard, pressed-wood or composition materials. In addition, pouches of canvas or other materials (such as polyethylene) can be used for direct cremation. Record evidence suggests that substantial numbers of consumers, possibly as many as 25%, would decline to purchase a casket when presented with an option to do so.[173]

(b) *Rule Provisions.* In response to these problems, § 453.3(b)(1) of the rule defines it as a deceptive act or practice for funeral providers either to represent the law as requiring a casket for cremation or otherwise to represent that a casket (other than an unfinished wood box) is required for cremation. These claims clearly cause harm to the extent that they induce consumers to purchase caskets, where they otherwise would not. Accordingly, in § 453.3(b), the Commission prohibits funeral providers from telling consumers that, by law, a casket must be purchased when the remains are going to be cremated. To prevent this deceptive practice, § 453.3(b)(2) requires that funeral providers who arrange direct cremations place on the general price list an affirmative disclosure concerning casket-for-cremation requirements. This disclosure would inform consumers that they can purchase an unfinished wood box or alternative container for direct cremation. It also describes the construction of various types of alternative containers.

The disclosure requirement is intended to prevent the misrepresentations defined in § 453.3(b)(1) and also the unfair or deceptive acts defined in § 453.4(a)(1). Section 453.4(a)(1) prohibits funeral providers from requiring consumers to purchase a casket, other than an unfinished wood box, for direct cremation. The disclosure required by § 453.3(b)(2) prevents funeral providers from requiring caskets for direct cremation by insuring that consumers are aware of their right to select an alternative.

[173] A funeral home chain which operates 27 funeral homes in Oregon, Washington and Arizona advises its customers that a casket purchase is an option. The chain offers its customers minimal body containers in lieu of a casket, or permits them to select no container whatsoever. The president of the chain testified, in analyzing 1,142 cases, that 73.5% of his clients chose some type of casket, 14.9% chose the body container, and 9.1% rejected any container. *See* E. Purdy, Sea. Ex. 3, at 20.

3. *Section 453.3(c)—Outer Burial Containers.*—(a) *Evidence.* Outer burial containers, used to prevent collapse of grave space, are not required by state law.[174] Many cemeteries, however, do require some form of outer burial container, but generally this requirement may be satisfied by a simple grave liner rather than a more expensive burial vault.[175] Some funeral directors, however, have told consumers that state law required the purchase of an outer burial container or have misrepresented cemetery requirements regarding burial vaults.[176]

Additionally, survey evidence shows that many consumers believe that a burial vault or some form of outer burial container is required by law.[177] The rulemaking record also reveals that consumers are generally unaware of the existence and availability of grave liners, and that funeral providers have failed to disclose this information. As a result, many consumers may purchase a burial vault in the erroneous belief that there are no alternatives.[178] Because the cost of burial vaults tends to be substantially higher than that of liners,[179] the monetary injury to consumers from unnecessary purchase of these items can be substantial.

(b) Rule Provisons. In § 453.3(c) of the rule, the Commission defines as deceptive (1) false or misleading representations that state law or individual cemeteries require the use of outer burial containers, and (2) the failure to disclose that state law does not require the purchase of an outer burial container. To prevent these practices, § 453.3(c)(2) requires that a written disclosure appear on the outer burial container price list. The disclosure explains that state law does not require the use of outer burial containers, that outer burial containers are sometimes required by cemeteries to prevent the grave from sinking in and that either a burial vault or grave liner will satisfy this purpose.

4. *Section 453.3(d)—Legal and Cemetery Requirements Generally.*—(a) *Evidence.* As discussed above in connection with § 453.3(a)–(c), the rulemaking record reveals that funeral directors have misrepresented legal, cemetery or crematory requirements regarding the need for embalming, caskets for cremation and outer burial containers. In addition, the record indicates that there are other misrepresentations which have been made to persons purchasing funerals. For example, some funeral providers have told consumers that cremated remains must be buried or that state law required the use of a sealed casket.[180] All of these representations can result in the purchase of unwanted and unnecessary items.

(b) *Rule Provisions.* In § 453.3(d)(1) of the rule, the Commission declares that it is deceptive to misrepresent that federal, state or local laws or particular cemeteries or crematories require the purchase of funeral goods or services. As a remedy, § 453.3(d)(2) provides that a funeral provider who tells a consumer that a legal, cemetery, or crematory requirement mandates the purchase of funeral goods or services must describe that requirement on the statement of funeral goods and services selected, required by § 453.2(b)(5).

The remedial requirement in § 453.3(d)(2) is intended not only to provide consumers with information, but also to aid enforcement of the prohibitions on affirmative misrepresentations. Prohibitions on oral misrepresentations are extremely difficult to police. The requirement of § 453.3(d)(2) serves to document the representation that has been made to the consumer. Since § 453.6 of the rule provides that a copy of the statement of services must be retained for one year, evidence of violations will be preserved.[181] The requirement will

[174] The Commission is aware of only one local jurisdiction in the country which requires use of an outer burial container, and it permits either a grave liner or a burial vault to be used. *See* 1979 Oral Presentations, XV–1, at 151–52 (Statement of Thomas Clark).

[175] *See* Memorandum from N. Norvold, Legislative Research Analyst, to B. Morrision, Arizona State Senator, re: Cemeteries that require vaults, L.A. Ex. 16; Wycoff, President, George Washington Memorial Park, Tx 940.

The National Concrete Burial Vault Association opposed this provision in part because of the fear that consumers would purchase fewer vaults if they were given the proposed disclosures. Arnold Vice-President, National Concrete Burial Vault Association, Tx 11,530–40.

[179] Testimony show that liners range in price from approximately $55, (T. Sampson, Tx 970), to $180, (M. Arnold, Vice-President, National Concrete Burial Vault Ass'n, Tx 11,524), and that vaults range from $190, (T. Sampson, Tx 970) to $1500, (Comments of CFA, II–B–1518, at 40).

[180] *See, e.g.*, J. Fanagan, CAFMS, Atl. Ex. 9, at 3; M. Kent, Michigan consumer, X–1–77, D. Davis, Mississippi consumer, II–B–417.

[181] A funeral provider intending to make a misrepresentation might well choose not to write it

significantly aid the Commission in detecting and proving violations and creates an additional incentive to comply with the rule. This is particularly important in view of the large number of funeral providers throughout the country.

The Commission has included § 453.3(d) in the final rule to deter future misrepresentations not otherwise specifically proscribed by the rule. The Commission's authority to impose fencing-in requirements in adjudicatory proceedings has been confirmed by the Supreme Court.[182] The rationale for fencing-in is equally applicable to rulemaking proceedings, especially, as here, where the provision imposes a minimal cost burden. The reasonableness of a fencing-in provision is to be judged, therefore, in light of the evidence regarding the similar illegal conduct which forms the basis for the fencing-in provision.

5. *Section 453.3(e)—Preservative and Protective Value Claims.*—(a) *Evidence.* While it is possible briefly to delay decomposition of a deceased body, funeral goods and services such as embalming or sealed caskets do not preserve human remains for long periods of time.[183] However, the record indicates that some funeral providers affirmatively misrepresent the preservative value of embalming [184] and burial vaults.[185] Moreover, both funeral providers and manufacturers often make protective value claims with regard to certain funeral goods, such as caskets and burial vaults,[186] stressing that certain products are airtight, watertight, or offer special protection against the elements. It is impossible to estimate how often such claims are false, because consumers are unable to discover whether protective claims are inflated without exhuming the body. There are, however, reports of instances in which exhumation revealed that the casket had failed to protect the remains, despite claims made by manufacturers.[187]

(b) *Rule Provisions.* While the evidence clearly establishes that false claims of this nature have been made, it does not indicate that these claims are widespread. The Commission has, nonetheless, concluded that a prohibition on such false claims is warranted. Claims concerning the ability of a product to protect the body of a close friend or relative can have a significant capacity to induce the purchase of items which otherwise would not be purchased. Indeed, claims that a product or service will protect the integrity of the body of a deceased person are among the most pernicious made for they directly appeal to the vulnerable emotional state of the consumer. Accordingly, the Commission has chosen to include a provision addressing this practice. Section 453.3(e) prohibits representations that funeral goods or services will delay natural decomposition of the body for an extended period of time. It also prohibits false or misleading claims that caskets, burial vaults or other funeral goods will protect the body from gravesite substances.

6. *Section 453.3(f)—Cash Advances.*—(a) *Evidence.* In a typical funeral transaction, the consumer often pays the funeral provider for so-called "cash advance" items. These items are goods and services which the funeral provider arranges to purchase but which are actually provided by a third party, *e.g.*, flowers, obituary notices, limousine rentals. Many funeral providers charge a markup on these items, or they may simply charge consumers the full price for the cash advance item and receive a rebate or volume discount from the supplier for the cash advance item.[188]

The Commission does not suggest that it is improper for funeral providers to profit on items obtained from third parties. It is clear that it is wholly proper for providers to do so. Moreover, it is clear that the services or goods being received by consumers, (*e.g.*, flowers, obituary notices etc.) are goods which they do wish to purchase. If, with knowledge that the funeral provider will profit from ordering flowers or arranging obituary notices, a consumer chooses to use the services of a funeral provider, a charge for that service should be anticipated. However, the undisclosed charging of a markup for cash advance items is deceptive because consumers believe that items labeled "cash advances," "accommodation" or "cash disbursement" are being provided at cost. There is an implicit representation that the cash advance transaction involves merely a forwarding of cash by the funeral provider and a subsequent dollar-for-dollar reimbursement by the consumer.[189]

In spite of this, the evidence demonstrates that many individual funeral providers do charge markups for cash advances. In a 1976 survey of California funeral directors, 12% of the 291 respondents admitted charging "in excess of the amount actually advanced for any items of service labeled as 'cash advances' or 'accommodation items.'" [190] NFDA's annual survey of funeral

---

down. However, the disclosure form which is given to consumers informs them that if state law requires the purchase of goods or services, a written explanation will be provided. Thus, if an oral representation is made, and no disclosure is made of the requirement, the consumer is at least on notice that something may be wrong.

[182] The Court noted in *FTC* v. *Ruberoid*, 343 U.S. 470, 473 (1951): Orders of the Federal Trade Commission are not intended to impose criminal punishment or exact compensatory damages for past acts, but to prevent illegal practices in the future. In carrying out this function the Commission is not limited to prohibiting the illegal practice in the precise form in which it is found to have existed in the past.

[183] *See* L. Frederick and C. Strub, The Principles and Practice of Embalming 131–32, 238–41 (1967).

[184] Several funeral directors commented that embalming does preserve the body, or that they were taught to say it does. *See, e.g.*, J. Todd, co-owner and manager of an Arkansas funeral home, Tx 8752; Ill. F.D.A. XVI–12, at 2; C. Ronald Savage, Oklahoma funeral director, XVI–162, at 2.

[185] *See, e.g.*, O. Matthews, Maryland Citizens Consumer Council, Tx 14,054 (in surveys of Maryland funeral homes, two funeral directors stated that vaults preserved the body); Rev. D. Haun, Oklahoma clergy, Tx 9035.

[186] *See*, J. Harris, Utah consumer, Tx 8092; G. Derrick, Illinois consumer, Chi. Stmt. at 2; C. Gladys, Michigan consumer, Tx 3857–58; B. Hughey, District of Columbia consumer, Tx 10,366–69; M. Blackburn, Florida consumer, VII–176; R. Nesoff, former Director of Investigation, New York State Temporary Commission on Living Costs and the Economy, Tx 345; T. Kuhn, *Undertakers Press Customers to Hike Bills, Reporter Finds*, Arizona Republic September 14, 1975, and articles that follow, VI–D–49, at A–30. (Caskets are often represented as airtight and waterproof). Companies refer to their caskets and vaults with names which imply long-term protections or preservatives, *e.g.*, "Invincible" (Boyertown), X–1–93. *See also* M. Siegel, Illinois consumer, Tx 2957; O. Adams, Michigan consumer, II–B–2119.

[188] *See, e.g.*, G. Marshall, Massachusetts, clergy, Tx 1194 (clergy honoraria); S. Fritchman, California clergy, Tx 6515 (clergy honoraria); Dr. J. Marcelli, member, New York Funeral Directing Advisory Board, Tx 579–80 (florist fees and obituary notices). *See also* J. Todd, Arkansas funeral director, Tx 8754; N. Gregory, former California funeral director, Tx 8645; G. Brown, Vermont funeral director, Tx 12,067; R. Mee, owner of Wisconsin Casket Co., III–F–16; B. Bennett, Florida funeral director, II–A–516; H. Senison, New York funeral director, I–A–145.

[189] Consumer testimony and letters support this conclusion, since a number of consumers complained about having to pay an additional fee for cash advances. *See, e.g.*, L. Shirk, Tex. Consumer, II–B–1210; D. Bailey, Maryland consumer, II–B–358; Maryland consumer, VII–101. Moreover, testimony and statements by industry members support the conclusion that the practice of adding undisclosed markups to cash advance items is deceptive. Two of the major trade associations, NFDA and OGR, agreed that funeral directors should not profit on cash advances. *See* Comments of NFDA, II–A–659, at 52; Comments of OGR, II–A–666, at 16. Counsel for another trade association, NSM, testified that funeral providers should pass along any rebates they receive on items represented as cash advances. *See* Statement of D. Murchison, Tx 12,606.

[190] California Funeral Directors Ass'n Questionnaire, "The FTC and You," L.A. Ex. 23. Considering the fact that many leaders of the industry believe that any mark-up on cash advances is deceptive, see note 189, *supra*, the 12% response is probably understated since many respondents would not want to admit using a deceptive practice.

homes indicates that, on a national level, funeral homes are receiving a 5% mark-up on cash advance items, amounting to $18,000,000 annually.[191] In addition, there is evidence from industry members,[192] consumers,[193] and businesses which provide cash advance items[194] that funeral directors charge more than they pay for items generally considered to be cash advances.[195]

Similarly, the failure to disclose that a markup will be included on a cash advance item misleads consumers who rely on their reasonable expectations. In ordinary usage, terms such as "cash advance," "accommodation items" or "cash advanced for your convenience" imply that the consumer is being charged only for the actual cash outlay. The use of this term in connection with items such as flowers, obituary notices, etc., which the consumer could easily obtain from a third party, creates the expectation that the amount billed the consumer is the same as the amount paid by the funeral provider.[196] Given this expectation, the failure to disclose the existence of a markup is a deceptive practice.

(b) *Provisions.* Section 453.3(f) defines as deceptive: (1) affirmative misrepresentations that the price charged for a cash advance item is the same as the funeral provider's cost; and (2) the failure to disclose to consumers that a markup is being charged on a cash advance item. In order to prevent these practices, § 453.3(f)(2) requires that funeral providers who charge a markup on cash advances disclose this fact on the general price list. It is important to note that this rule provision covers only those situations where the funeral provider makes an affirmative representation that an item is a cash advance, accommodation, cash disbursement item, or any term of similar import. While it may be true that some items are viewed by consumers as inherently "cash advances," the record in this proceeding does not warrant such a finding.

The Commission believes that requiring a disclosure that a markup is being used is a sufficient remedy in light of the evidence discussed below. Prior versions of the rule would have totally prohibited a profit on such items.[197] The Commission has rejected such a remedy because it views the remedy it has selected as being sufficient to correct the identified abuse, while constituting the minimum intrusion into the business practices of the providers.

C. *Section 453.4—Required Purchases of Goods and Services.*—1. *General Discussion.* When the death of a friend or relative occurs, the persons who will ultimately be charged with arranging the funeral will often not have determined what type of services they wish, nor may they be aware of the deceased's wishes concerning the form of disposition. In other instances death may be anticipated, as in the case of prolonged illness, and the preferred form of disposition selected.

When death is anticipated, market-oriented remedies, such as the provision of information through price lists, can serve to facilitate informed comparison shopping. For example, if consumers knew in advance that they would be called upon to arrange a direct cremation, they could select a provider who offered alternative containers for sale. In this manner, the expense of a casket could be avoided by the consumer, if he or she were so inclined. In many cases, however, the ultimate form of disposition simply has not been selected at the time death occurs. Thus, the person charged with contacting a funeral provider to pick up the body of the deceased may simply be unable to select a funeral provider on the basis of what goods or services they sell, or in what combinations those goods and services are offered for sale.

The fact that the funeral provider may, in many cases, receive the body before the form of final disposition has been selected by the consumer creates a situation with the inherent potential to diminish severely a consumer's ability to select only those goods and services desired. The evidence establishes that once a funeral home is in possession of a body, seldom is it removed to another funeral home.[198] As representatives of the funeral industry have acknowledged, competition in the sale of funeral goods and services does not exist at the point of sale.[199] If consumers are to have the ability to select the goods and services they want, and concomitantly to decline those they do not want, some intervention is necessary at the point of sale to eliminate prevailing industry practices which deny that choice.

Accordingly, in § 453.4 of the rule, the Commission prohibits funeral providers from requiring that consumers who are arranging funerals purchase goods or services which they do not want, as a condition of purchasing those which they do want. As discussed above,[200] many funeral industry members have offered their goods and services for sale only in predetermined packages, thereby denying consumers any ability to decline unwanted items. Section 453.4(a) of the rule prohibits funeral providers from requiring that consumers who wish to arrange direct cremations purchase a traditional casket, other than an unfinished wood box, for that cremation. Section 453.4(b) contains the general prohibition on funeral providers conditioning the sale of any goods or services on the required purchase of other goods or services.

2. *Section 453.4(a)—Casket for Cremation.*—(a) *Evidence.* A direct cremation is one which occurs without any intervening viewing, visitation, or ceremony with the body present.[201] Cremation, as an alternative to traditional burial, is increasing both in terms of the absolute numbers performed, as well as the percentage of all dispositions. Statistics indicate that approximately 3.9% of all dispositions in 1975 were direct dispositions, with the trend toward increasing numbers of such dispositions.[202] The evidence in the

[202] Am. Funeral Director, June 1977, at 53. *See also* T. Sherrard, General Counsel, Telophase Society, Tx. 7986. Indicative of the increasing trend in direct dispositions is the increase in cremation rates. Cremation amounted to 9.7% of all dispositions in 1980, *see* Funeral Service Insider, Vol. 5, No. 49 (Sept. 14, 1981), up from 6.55% in 1975 (Cremation Association of North America, Post-Record Comment, XIV–697, at 6 and Exhibit 1). While not all cremations are direct cremations, a substantial percentage are.

record suggests that consumers seek direct cremations for diverse reasons, including simple personal preference and lower cost.[203]

Because cremation reduces a body to ashes, there is no need as there is in ground burial for a permanent container for the body. All that is needed is a container to transport the body to the crematory. If there is to be a viewing before the body is cremated, consumers may prefer to buy a casket to display the body.

The evidence suggests that a significant number of funeral directors require consumers to purchase caskets as a condition of supplying cremation services. Consumer complaints,[204] various surveys,[205] and testimony of funeral directors [206] all suggest that many funeral directors require caskets to be purchased when cremation is desired.

Requiring a consumer to purchase an expensive casket that is unnecessary and unwanted imposes significant consumer injury. While casket prices vary substantially, even the least expensive casket typically carried by a funeral home generally costs substantially more than a non-casket alternative. Although some industry representatives testified that caskets can be purchased by consumers for as low as $85,[207] the evidence indicates that the lowest priced caskets generally available to consumers arranging cremations generally fall in the range of $200 to $250.[208]

There are, however, containers which cost substantially less than even the least expensive casket. These containers, defined as "alternative containers" in the rule,[209] are generally constructed of cardboard, composition board, or are opaque pouches.[210] The record evidence shows that these products sell at retail for anywhere from $20 to $65.[211] Even taking the lowest end of the spectrum of casket prices, a funeral provider imposed requirement that consumers purchase a casket to obtain direct cremation services causes consumers to spend substantial additional money. The extent of this expenditure increases as the minimum price of the caskets offered for sale increases. Thus, a provider-imposed requirement that consumers purchase caskets for any form of disposition imposes a significant cost on those consumers which they might otherwise choose not to assume. As noted in the beginning of this section, this injury is not reasonably avoidable.

In weighing whether a practice is "unfair" under Section 5, the Commission must also consider any countervailing benefits to determine whether the practice imposed net injury. No testimony or comments provided any evidence of countervailing benefits. Indeed, funeral industry representatives agreed that there was "no justification" for requiring the purchase of a casket for direct cremation.[212]

Finally, in assessing a practice's unfairness, the Commission also looks to public policy as expressed in the decisions of other public bodies. No testimony or comments suggested that there was any public policy favoring the requirement of a casket for direct cremation, and at least nine states have actually prohibited such requirements.[213] Thus, to the extent that there is any public policy at all on this point, it clearly supports the Commission's position.

(b) *Rule Provisions.* Section 453.4(a)(1) defines it as unfair or deceptive for a funeral provider or a crematory to require that a casket other than an unfinished wood box be purchased for direct cremation.[214] The prohibition on requiring the purchase of a casket for a direct cremation extends to all funeral providers who arrange direct

[213] Prohibitions on requiring caskets for cremation are effective in Arizona, California, Colorado, Florida, Maryland, Minnesota, New Mexico, Wisconsin and Wyoming. CAFMS Survey of State Laws and Regulations, *supra* note 165, at Appendix III–C.

[214] The cost of a provider-imposed requirement that a casket be purchased, and the resulting consumer injury, is the same whether the form of disposition chosen is direct cremation, immediate burial, or cremation or burial after a service with the body present. At this time, however, the Commission has required that alternative containers be offered only for direct cremations. The evidence in the rulemaking record supports a finding that consumers have sought the option of employing alternative containers for use in direct cremations. *See, e.g.*, E. Purdy, Oregon funeral director, Sea. Ex. 3, at 20. There is little evidence, however, that consumers have sought out these alternatives for other forms of disposition. A distinction can be drawn between traditional burials and cremations on the one hand, and direct cremations on the other. In the former types of disposition, consumers may be able to secure alternative containers from other sources if the funeral provider they have selected does not offer them. Direct cremations, however, have much tighter time strictures, and minimize the ability to secure such a container from a third party. Immediate burials pose much the same, if not identical, problems which attend direct cremations. The record, however, is silent on whether consumers who employ this form of disposition would seek to use alternative containers. Thus, the Commission has declined at this time to extend the protections of this section to immediate burials. The Commission anticipates that where providers arrange direct cremations, and thus note the availability of alternative containers for use in direct cremations on their price lists, those containers will be offered for sale to all consumers, regardless of the type of disposition desired.

cremations, and to all crematories.[215] Some commentors in this proceeding argued that crematories should be permitted to require the use of caskets for safety-related reasons.[216] It was claimed that rigid containers facilitate the handling of the body. The rule accommodates this concern. Funeral providers and crematories are not prohibited from requiring that an unfinished wood box (which is defined as a "casket") or a rigid "alternative container" (*e.g.*, a heavy cardboard container) be purchased as a condition of arranging a direct cremation.

The requirements of this section work in tandem with the requirements of § 453.3(b) of the rule, which prohibits misrepresentations of legal or crematory requirements for purchasing a casket to obtain direct cremation services. In that section the Commission not only proscribes the making of such misrepresentations, but requires that a simple affirmative disclosure be placed on the price lists given to consumers informing them about the existence of alternatives to caskets for use in direct cremations.

The Commission has determined, however, that it is not sufficient simply to prohibit funeral directors from requiring a casket for cremation and to require a disclosure that alternatives for caskets are available. In addition, remedial steps also must be taken to ensure that, at point of sale, consumers retain the ability to decline the purchase of a casket. As we discussed above, in those situations where consumers have anticipated a death and have selected the form of disposition, pre-need comparison shopping can occur. In those instances, prohibiting funeral providers from requiring the purchase of caskets will enable consumers either to seek out a provider who makes alternative containers available, or to make the necessary arrangements to purchase such a container from a third party for use at a funeral home which does not offer them for sale.

As indicated previously, however, many consumers choose a funeral home without obtaining prior information about prices and offerings, some because they have a limited choice, and others for a variety of reasons previously noted. Given the tight time strictures surrounding a direct cremation and the fact that consumers will not remove the body of a deceased from the provider who first acquires possession, a simple prohibition on required purchases of caskets and a disclosure of the availability of alternatives may be insufficient to ensure that consumers do not have to, *de facto*, purchase a casket. For example, a funeral provider might not require the consumer to purchase a casket, but if the provider only sells caskets, consumers must either forgo their desire to employ a direct cremation without a casket, or purchase the only available container—a casket.

The Commission therefore finds it necessary to adopt the remedial requirement, found in § 453.4(a)(2), that funeral providers who arrange direct cremations make unfinished wood boxes or alternative containers available for such services. The rule provision adopted by the Commission does not require funeral providers to maintain an inventory of alternative containers. Rather, the rule requires that providers *make* available either a simple wood box, or some form of alternative container. This distinction is an important one, because it significantly reduces any burden which the provision might otherwise impose. Funeral providers need not maintain a current inventory of alternative containers. Rather, they need only be able to secure one such container, on request, and make it available for use in a direct cremation. Moreover, to the extent that some providers might, because of geographic location or other considerations, feel compelled actually to stock an alternative container, the evidence indicates that containers are available which, because of their construction or size, can be easily stored.[217]

It should be stressed that the rule does not require funeral providers to make a range of alternative containers available to consumers. The rule permits the funeral provider to offer any alternative container for sale—wholly within the discretion and business judgment of the provider. Indeed, in lieu of offering an alternative container, a provider can opt to offer only a plain wood box, which is a form of a casket.

3. *Section 453.4(b)—Other Required Purchases.*—(a) *Evidence.* The record reveals that most funeral providers, in excess of 65%, do not sell their goods and services on an itemized basis.[218] Rather, the industry norm is to offer complete "package funerals" for sale, with all of the items included in the packages having been preselected by the funeral provider.[219] While some industry members reduce the price if the buyer does not want a part of the package, if asked, many funeral providers do not reduce the price of a package funeral even where a consumer asks to have items dropped from the package.[220] By "bundling" all of the preselected goods and services together, the funeral provider is effectively forcing the consumer to buy items he or she doesn't want as a condition of providing a necessity that only he can provide: Disposition of the body. This injury cannot be reasonably avoided. As previously noted, even if the person arranging the funeral is dissatisfied with the terms of this offer, once the funeral home has taken possession of the body, for all practical purposes the consumer will not go somewhere else.[221] The evidence suggests that a significant number of consumers are required to pay the full package price, and that many are thereby required to pay for items they do not want or use.[222]

In weighing this injury to consumers, the Commission must also consider any countervailing benefits that such packaging might create. The only significant benefit advanced by funeral providers is that packaging permits the funeral director to offer lower prices to consumers. That arrangement is considered in detail in Section V(B)(4), *infra*. There, the Commission finds that, while itemization presents opportunities for funeral directors to raise prices, packaging does not inherently permit lower prices for consumers. Therefore, the Commission finds that the injury to consumers is not offset by any savings made possible by packaging.

The Commission also notes that the major trade associations recognize the basic unfairness in requiring buyers of

[219] *Id.*

[220] *See* discussion in Section II(A)(2)(b), *supra*, and note 76.

[221] *See* discussion in Section I(E), *supra*. Further, for those consumers served by only one funeral director, which may be nearly one in four, there is no other place to go. And nearly 70% of all funeral homes have less than 4 competitors, suggesting that the choice may be limited in any event. *See* note 114, *supra*.

[222] Evidence of consumers being aware that they were required to pay for items they did not want comes from consumers complaints from across the country, (*see, e.g.*, the following complaints in category II–B: 54, 164, 366, 496, 528, 829, 1048, 1108, 1298, 1404, 1486, 1893, 1987, 1994, 2003, 2013, 2134, 2240, 5967), testimony (S. Ross, Tx. 5274–75; Msgr. R. O'Keefe, Arizona St. Bd. of Funeral Directors and Embalmers, Tx. 7084–7085); and surveys (Cohen, D.C. Ex. 39 [20 out of 101 respondents reported paying for services, merchandise, or facilities they didn't want); Blackwell Survey, *supra* note 50 [3.7% reported paying for services they did not want]). For a number of reasons discussed in the text, *infra*, these results probably underrepresent the number of consumers who bought items that they would not have bought had they been aware of their prices and the fact that they were optional.

funerals to purchase items that they do not want. Both associations take the position that consumers are entitled to a "reasonable adjustment" of the package price when the consumer asks if credits are available for unwanted items.[223] While the problems with that industry position have been discussed above,[224] the industries view seems to confirm that refusing to give any discount for unwanted items takes unfair advantage of funeral purchasers.

(b) *Rule Provisions.* Accordingly, in § 453.4(b) of the rule, the Commission finds that it is an unfair act or practice in violation of Section 5 for funeral providers to require that consumers purchase unwanted goods and services, as a condition of obtaining those which they do want. Section 453.4(b)(2), requires funeral providers to place a disclosure on the general price lists which they must deliver to consumers, informing them of their option to make an itemized selection of goods and services with certain exceptions discussed below. The disclosure imposes the legal requirement that selection be permitted on an itemized basis.

After the effective date of the rule, it will be an unfair act or practice for any funeral provider to require consumers to purchase goods or services which they do not wish to purchase. This does not mean, however, that funeral providers will not be prohibited from offering prearranged packages for sale. So long as they comply with the required form of itemized pricing, and permit consumers to select from those itemized lists, providers may, *in addition,* continue to offer packaged funerals for sale. Consumers may continue to select these packages if they desire to do so. The rule simply prohibits the imposition of packages by the provider.

There are several important exceptions to this general right to select requirement. First, consumers may not decline the basic services of the funeral provider.[225] Irrespective of the combination of goods and services which a consumer may choose to select, the very process of selection itself will involve use of the funeral provider's services. Accordingly, the Commission has made the services of the funeral provider non-declinable. This may be done in one of two ways. On the general price list, which informs consumers of their general right to select goods and services on an itemized basis, the funeral provider must disclose either that: (1) The service charge will be added to the cost of the goods and services; [226] or (2) the service fee has been added to the casket price.[227]

The second major exception to this provision concerns embalming. As we discuss in the next section, the selection of certain forms of disposition, primarily those with a viewing, makes embalming a practical necessity.[228] Thus, funeral providers are permitted to require that embalming be selected by a consumer for all dispositions other than direct cremation and immediate burial.

Third, the Commission also was concerned that § 453.4(b) might be viewed as preventing funeral providers from refusing to deal with consumers who make impractical or idiosyncratic purchase requests.[229] Consequently, the Commission has added a provision in § 453.4(b)(2)(ii) which indicates that the rule does not force funeral providers to comply with a request for a combination of goods which would be impossible, impractical, or excessively burdensome to provide.[230]

It is the Commission's judgment that the remedies it has selected in § 453.4(b) are the least intrusive remedies which will serve to correct the pervasive abuses documented in the record.[231] In the Commission's view, the remedies chosen bear a close relationship to those abuses. Thus, the Commission has not prohibited funeral providers from selling their goods and services in prearranged packages if those sellers view the alternative as desirable in their business judgment. Rather, the rule only prohibits them from imposing that determination on the consumer, in view of the unique characteristics of the funeral transaction.[232]

D. *Section 453.5—Services Provided Without Prior Approval.*—(1) *Description of the Evidence.* The record shows that funeral directors customarily embalm a body without obtaining express authorization from the family to do so. Support for this finding comes from testimony of individual funeral directors stating that they do not attempt to obtain authorization from the family prior to embalming,[233] testimony

---

[223] *See* note 78, *supra.*

[224] *See* Section II(A)(2)(b), *supra.*

[225] *See* § 453.2(b)(4)(iii)(C).

[226] Section 453.2(b)(4)(iii)(C)(aa).

[227] Section 453.2(b)(4)(iii)(C)(bb).

[228] *See* Section II(D), *infra.*

[229] The Commission therefore specifically asked for comment from interested parties on the question of whether the rule provisions could be reworded to avoid creating technical rule violations in the case of aberrant selections, without vitiating the goals of the rule's itemized selection provisions. *See* 46 FR 6981 (Jan. 22, 1981) (Question 9). Few comments were received. Of those comments, none provided the Commission with any evidence that such idiosyncratic selection behavior either has occurred in states requiring itemization, or would be likely to occur.

[230] For example, the Commission would not consider it a violation of § 453.4(b) for a funeral provider to refuse doing business with a consumer who said "We have our own casket, transportation, flowers, etc., but wish to use your viewing facilities for two hours next Monday." The Commission wishes to stress, however, that this provision does not give funeral providers the option to reject arrangements which are practical to provide but which do not comport with the provider's judgment of what is appropriate under the circumstances.

[231] *See* Section II(A)(3)(g), *supra,* for a discussion of the legal standards applicable to remedial requirements in Commission rules.

[232] The rule does not affect, of course, other rights that the funeral director may have under law to refuse to deal with certain consumers or certain requests. Section 453.4(b)(2)(ii) is only intended to clarify the extent of obligation which may be created by the operation of § 453.4(b)(2).

of funeral industry trade association representatives and state licensing board representatives,[234] informal surveys of morticians in various parts of the country,[235] individual consumers,[236] consumer group representatives,[237] state agencies,[238] memorial societies,[239] and consumer surveys.[240]

Indeed, while some funeral providers testified to the contrary,[241] the industry acknowledges that express prior permission is not usually sought. Instead, embalming is considered to be a negative option; the consumer must affirmatively state that embalming is not to be done or the process will be automatically performed.[243] The funeral industry contends that funeral directors receive implied permission to embalm from the authorization to pick up the body.[243] Authorization to embalm is also inferred from circumstances, such as from having handled the funeral of another member of the family in question in which embalming was requested [244] or from general authorization "to take care of the preparation" without any specific mention of the embalming process.[245]

The evidence reveals that, contrary to the funeral industry's assumption, a substantial portion of consumers do not in fact intend to authorize embalming by giving the funeral director limited authority to pick up the body.[246] While a precise estimate is not possible, surveys conducted by both industry and consumer groups suggest that a substantial number of funeral consumers would decline embalming if offered an informed choice.[247] This group would include those who object to embalming on a personal or religious basis, as well as many others who simply desire a less elaborate or less expensive funeral service.

Some caution is warranted in projecting what percentage of consumers would actually decline embalming when making an informed choice. It is possible that some consumers who indicate in the abstract that they would decline embalming might actually purchase such services in order to arrange a funeral with a viewing or visitation. Nonetheless, as the limited purchase data show, a substantial number of consumers do decline embalming when presented with the option in a real purchase situation.[248]

While some consumers may not be injured if a funeral director embalms without obtaining authorization,[249] many other consumers suffer substantial economic and emotional injury from unauthorized embalming. In terms of the economic injury, there is a charge for embalming, ranging from $50 to 150,[250] which a consumer interested in a simple, direct or less expensive disposition might not wish to spend. Beyond the actual charge for the service itself, embalming is a necessary predicate to selling techniques which encourage the purchase of higher priced goods and services. Embalming is a practical necessity if there is to be a viewing and an open casket funeral service which normally requires the purchase of a casket, burial clothes, and other servicesand facilities of the funeral home.[251]

Unauthorized embalming may result in substantial emotional injury to the family of the deceased, as well. For some funeral purchasers, personal convictions may dictate that embalming is not appropriate. For others, embalming may be incompatible with religious beliefs. Orthodox Judaism, for example, forbids embalming as a desecration of the body.[252] A funeral director who has performed embalming without prior approval has inflicted substantial, irremediable emotional injury upon the survivors of the deceased. That the funeral director may voluntarily forego his or her embalming

Hodge, Sec., New Jersey State Board of Mortuary Science, Tx 2056; M. Damiano, past Pres., New Jersey FDA, Tx 1299; C. Hite, Dean, Simmons School of Mortuary Science, Tx 1523.

[242] According to National Selected Morticians, one of the two major trade associations: Preparation and preservation of a dead human body are standard procedures in funeral service unless there are instructions to the contrary during the initial death call because of religious beliefs or known requests for immediate disposal. Comments of NSM, II–A–661, at 21.

[243] For example, the President of the New York Funeral Directors Association testified that funeral directors often assume the authority to embalm simply because the services of that provider were retained: There has always been an inherent assumption when a funeral director was engaged by a family for one of its members that all necessary authority flows from that engagement. J. Curran, Pres., New York FDA, Tx 90.

Indeed, basic textbooks used in mortuary school instruct that turning a body over to a funeral home authorizes embalming. L. Frederick and C. Strub, The Principles and Practice of Embalming 191 (1967) states: the act of handing over a dead body * * * carries with it an implied permission to embalm that individual.

But see H. Raether and R. Slater, The Funeral Director and His Role as A Counselor (1975). In this book by Howard Raether, Executive Director of the National Funeral Directors Association, and Robert Slater, Director of the Department of Mortuary Science, University of Minnesota the authors advise funeral directors to seek explicit permission to embalm.

fee is likely to be of little or no consolation to the family.

The Commission finds that unauthorized embalming results in substantial consumer injury, both in economic and non-economic terms. The test for unfairness, however, requires that the Commission balance against the harmful effects of conduct, the benefits which may flow from the practice in question. In essence, the unfairness of a practice must be measured by its net effects. Funeral providers have advanced two arguments to support "routine" embalming or embalming predicated on general expression of authority: First, embalming is virtually always desired by funeral consumers; and second, the subject of embalming is repulsive to people and therefore it would be offensive to ask a family about embalming. The record demonstrates, however, that many consumers do not in fact want embalming and would decline it given an option, and that many consumers do not give permission to embalm by authorizing the funeral director to pick up the body.[253] Given consumers' lack of prior experience and knowledge, it is unreasonable to expect that consumers will affirmatively decline embalming in the first telephone contact with the funeral home.

The response to the second argument is twofold. First, evidence suggests that many if not most consumers would not be uncomfortable in giving express permission to embalm. Two surveys of consumer attitudes found that four out of five consumers favor the idea of requiring funeral directors to obtain embalming permission.[254] In addition, the numerous consumer complaints received on the subject of embalming suggest that funeral purchasers are able and willing to address this subject. Furthermore, several funeral director witnesses testified that the subject of embalming did not offend their consumers.[255]

Second, and perhaps more fundamental, the speculative concern of funeral providers that some consumers will be offended by the simple question "May we embalm?," is simply not a justifiable basis for refusing to ask the question at all, thereby imposing the expense of embalming on that segment of the population that would decline if asked.

The Commission finds that consumers cannot readily avoid the harm caused by this practice, since it often occurs at the point of initial contact with the funeral home. To protect themselves from this harm, consumers would have to know that they must affirmatively instruct the funeral provider not to embalm at the moment the pick-up call is placed, or else embalming will be performed. Such knowledge is highly unlikely, given consumers' lack of prior experience with arranging funerals. Further, as discussed in Section II(B)(2)(a), *supra*, the evidence shows that many consumers believe that embalming is legally required and that they may have no choice.

Charging a buyer for goods or services which the buyer did not agree to buy plainly violates established principles of public policy found in fundamental levels of contract law. The common law insists on mutual consent for there to be a binding contract.[256] While consent may be reasonably implied in some circumstances, courts have also made it clear that acceptance cannot be implied where the offeror knows, or should have known, that the offeree does not understand the terms of the offer. In such cases, clear expressions of acceptance are required.[257] For that reason, the Commission and Congress have, in other contexts, reined in marketing schemes which relied upon unknowing or ambiguous consent on the part of consumers.[258] In addition, seven states have enacted provisions which specifically require funeral directors to receive express permission before embalming,[259] confirming the conclusion that such practices are unjustifiable and injurious.

(2) *Rule Provisions.* Accordingly, § 453.5(a) of the rule defines it as unfair for any funeral provider to embalm a deceased human body for a fee without prior approval from a family member or other authorized person, except in certain unusual circumstances.

In determining which practices to proscribe in the rule, however, the Commission is cognizant of the fact that in virtually all instances where disposition does not occur within a very short time span, (*e.g.*, 24 hours) either embalming must be performed or the body refrigerated to delay decomposition. Concerns were raised in the rulemaking proceeding that if prior approval for embalming were required, funeral providers would be unable to embalm in those situations where the family or legal representative of the deceased could not be immediately contacted. Unless embalming were performed, it was argued, decomposition would begin thereby precluding the possibility of a traditional funeral.[260]

The Commission recognizes that the majority of consumers arranging funerals, according to all survey evidence, do want embalming because of their intent to have a traditional funeral with viewing and visitation. Thus, the Commission has cast the unfair acts and practices proscribed by § 453.5(a) in the alternative. As noted above, the general rule adopted by the Commission prohibits funeral providers from embalming for a fee[261] without obtaining prior approval from the family or authorized representative of the deceased.[262] Excepted from this general rule are two situations. First, if state or local law require embalming in certain situations, such as where death has occurred from certain communicable diseases or where the body will be transported interstate,[263] the funeral provider must follow the applicable law.

Second, the provision allows for certain exigent circumstances by providing that if the funeral director is unable to contact a family member or other authorized person after exercising due diligence, has no reason to believe that the family does not want embalming performed, and obtains subsequent approval from the family, the funeral director may charge for embalming without violating the rule.[264] In seeking subsequent approval, the funeral director must first disclose that embalming has been performed, but that no fee will be charged if the family selects a funeral arrangement which would not require embalming, such as direct cremation or immediate burial. If the family then selects a funeral arrangement which would require embalming, such as a funeral with viewing, visitation, or the body present, subsequent approval may be inferred and a fee charged.

[261] Section 453.5(a)(2).

[262] If the funeral director is unable to locate an appropriate family member, the rule permits the required authorization to come from a local official who has legal authority to make such a decision. This may be, depending on the circumstances and the state law, a coroner, sheriff, public health official, a judge, or one expressly authorized to direct disposition of the dead.

[263] Section 453.5(a)(1).

[264] Section 453.5(a)(3).

To help prevent a funeral director from charging for embalming in those situations where the rule does prohibit it, § 453.5(b) of the rule requires funeral directors to place a written disclosure on the final bill or agreement given to customers informing them of their right not to pay for embalming performed without prior approval unless they select a type of funeral which would require embalming. Moreover, the disclosure must state that if a fee is charged for embalming, a written explanation will appear on the final bill or agreement given to a customer.

E. *Section 453.1—Definitions.* In § 453.1, the Commission defines several terms of particular importance in the rule. Some of these terms such as "Commission," "cremation" and "person" require no elaboration. Others, which raise significant issues about the scope and coverage of the Commission's rule are discussed below. We have placed this discussion after the discussion of the substantive provisions of the rule to facilitate understanding of the issues they raise.

1. *Section 453.1(a), (c), and (o)—Definitions of "alternative container," "casket," and "unfinished wood box".* The rule defines three categories of receptacles for human remains: Caskets, alternative containers, and unfinished wood boxes. These terms are used in § 453.4(a) which ensures the consumer's right to use an alternative to a traditional casket when choosing a direct cremation. Caskets are defined generally as containers made of wood or metal, ornamented and lined with fabric. An alternative container, on the other hand, is non-metal, without ornamentation or fixed interior lining, and may be made of a variety of materials, such as cardboard, pressed wood or canvas.

The term "unfinished wood box" has been included in the rule because of a concern that what is perhaps the traditional low cost container, *i.e.*, the plain pine box, could fall within either the definition of casket or that of alternative container.[265] The Commission, therefore, has defined an unfinished wood box as a particular type of casket—one which is made of wood and without lining or ornamentation. Under the rule, an unfinished wood box is treated like an alternative container; that is, a funeral provider may satisfy the requirement in § 453.4(a) to offer an alternative to a casket for use in direct cremations by offering an unfinished wood box.

[265] *See, e.g.*, Rebuttal Comments of NCSC/ADA/CAFMS, XVII–16, at 64–66.

2. *Sections 453.1 (i), (j), and (k)—Definitions of "funeral goods," "funeral provider," and "funeral services".* The definitions of "funeral goods," "funeral provider" and "funeral services" in § 453.1 (i), (j) and (k) are critical because they define the scope of the rule's coverage. Only those persons who fall into the class of "funeral provider" are subject to the rule, and in order to do so a person must sell both "funeral goods" and funeral "services." "Funeral goods," under § 453.1(i), consist of all products sold to the public for use in connection with funeral services. Thus, the definition of "funeral services" is the core on which the definitions of both "funeral provider" and "funeral goods" are based.

Two types of functions come under the definition of "funeral services" in § 453.1(k): (1) Those services used to care and prepare human bodies for burial or other disposition and (2) those services used to arrange, supervise or conduct the funeral or disposition. Both the preparatory and the supervisory types of functions must be performed in order to come within the definition of "funeral services."

A "funeral provider" under § 453.1(j) must sell both "funeral goods" and "funeral services." In order to be classified as a "funeral provider", a person must perform both types of functions listed in § 453.1(k). A cemetery, therefore, would generally not be considered a "funeral provider" under the rule because it only arranges or conducts final dispositions. It does not prepare human remains for burial or other dispositions.[266]

3. *Sections 453.1(g) and (l)—Definitions of "direct cremation" and "immediate burial".* The rule prohibits funeral providers from requiring that consumers choosing direct cremation purchase a casket.[267] In addition, consumers choosing immediate burial or direct cremation may not be required by funeral providers to purchase embalming services.[268] The terms "direct cremation" and "immediate burial" refer to forms of direct disposition of human remains which take place without formal viewing, visitation, or ceremony with the body present.[269] The definitions of these terms do not prescribe a precise time period between death and disposition of the body, but rather refer to the lack of ceremony surrounding the cremation or burial.

[266] Of course, those cemeteries which do prepare human remains for burial would be considered "funeral providers" and therefore covered under the rule.

[267] *See* Section 453.4(a).

[268] *See* Sections 453.4(b) and 453.3(a)(2).

[269] Except perhaps for a brief graveside service in the case of immediate burial.

4. *Section 453.1(g)—Definition of "crematory".* The definition of "crematory" in Section 453.1(g) includes only those persons, partnerships and corporations that both perform cremations and sell funeral goods. The Commission is aware that some crematories do not sell funeral goods and therefore would not fall within this definition. However, the Commission believes that § 453.1(g) is consistent with Section 19 of the 1980 Improvements Act which limits the rule's coverage to persons who sell both funeral goods and funeral services.[270]

5. *Section 453.1(m)—Definition of "outer burial container".* Burial vaults, grave boxes and grave liners are terms commonly used by funeral providers and refer to containers designed for placement in the grave around the casket. The Commission has used the single term "outer burial container" to include the various types of containers which may be used.

6. *Section 453.1(o)—Definition of "services of funeral director and staff".* This term refers to the services which may be furnished by a funeral provider in connection with the arranging of a funeral, including such services as conducting the arrangements conference or planning the funeral services. It does not include services otherwise listed in § 453.2(b)(4), such as embalming, transferring remains to the funeral home, etc.

F. *Section 453.6—Retention of Documents.* Section 453.6 of the rule requires funeral providers to retain a copy of certain documents which must be provided to consumers under the substantive provisions of the rule. Specifically, the retention of documents provision requires funeral directors to retain copies of the price lists required by the rule, and copies of each individual statement of services selected by the consumer for each funeral for a period of one year. Funeral directors would also be required to make these records available to FTC officials upon request for inspection.

The Commission's goal in adopting a recordkeeping requirement is to help ensure compliance with the substantive provisions in the rule. As part of its enforcement program, the Commission will check the records of individual funeral homes to ensure that the price lists and statements required by the rule are complete. Since most of the

[270] *See* Section 19(c)(1)(A) (the Commission has authority over persons "* * * furnishing goods and services relating to funeral"), 15 U.S.C. 57a note.

information which the rule requires be given to consumers will be contained on the price lists and statement of services selected, availability of those documents for inspection will make it feasible to detect rule violations efficiently and thus to enforce the rule effectively. The recordkeeping provision will thereby deter potential violators and help prevent the unfair and deceptive practices defined by the rule.

During the rulemaking proceeding several concerns were expressed about the operation of this provision. Some of the most frequent were: (1) That the requirement was burdensome because funeral providers would be required to store large numbers of documents in order to comply with the rule;[271] (2) that the time period for retention of records was unreasonably long and should be substantially reduced;[272] and (3) that the requirement would unreasonably invade the privacy of persons arranging funerals.[273] The Commission has considered each of these criticisms and has been as responsive as possible, consistent with the goal of efficient enforcement of the rule.

When compared with the version of the rule first published for public comment in 1975,[274] the version which the Commission has now approved has a recordkeeping requirement which substantially reduces the paperwork storage burden on funeral providers.[275] In response to concerns that the period for record retention was too long, the Commission reduced the period from three years to one year. A one-year record retention period will be less useful than a three-year period in helping identify funeral providers who are engaging in a pattern of rule violations or in identifying all consumers who would be entitled to redress under Section 19 of the FTC Act.[276] The Commission has nonetheless concluded that a one-year record retention period will provide an adequate incentive for funeral providers to comply with the rule's substantive provisions and has, accordingly, revised the rule to reduce the burden on funeral providers.

The recordkeeping requirement has not been revised, however, in response to the concern that it would constitute an unwarranted invasion of the privacy of the persons arranging funerals. The Commission views this concern as unfounded. The rule does not require funeral providers routinely to submit records for examination by Commission officials. To the extent that Commission officials obtain any information from the records of funeral providers as part of an investigation, such information would be subject to the provisions of the Privacy Act [277] and Section 21 of the FTC Act,[278] which provide guarantees against unwarranted disclosure of personal information.

G. *Section 453.7—Comprehension of Disclosures.* The Commission has included a requirement in the rule that the disclosures which funeral providers must provide to consumers must be made in a manner which is clear and conspicuous. The Commission's goal is to ensure that the information provided under the rule will be presented in a manner readily discernible by consumers.

H. *Section 453.8—Declaration of Commission Intent.* In § 453.8 of the rule the Commission clarifies three issues with respect to how it interprets its rule on funeral practices. The Commission has included these statements within the rule itself rather than only in the Statement of Basis and Purpose to assist those persons who are covered by the rule in understanding the scope of the rule and the obligations it imposes.

First, the Commission declares its intent that a violation of either the definitional provisions or the remedial provisions of the rule constitutes a violation of the rule, unless otherwise stated. In each provision of the rule, the Commission first describes with particularity the acts or practices which have occurred in the past which the Commission finds to be unfair or deceptive acts or practices. Thereafter, the rule describes what remedial provisions, if any, must be complied with. This format is necessitated by the decision of the Second Circuit in *Katharine Gibbs.*[279]

An example of where a violation of either the definitional or remedial sections would be a violation of the rule is found in § 453.3 concerning misrepresentations. If a funeral provider makes the disclosure required by the rule concerning caskets for cremation (*i.e.*, the remedial provision, § 453.3(b)(2)), but continues to make false claims that the law requires a casket for direct cremation (*i.e.*, the definitional provisions, § 453.3(b)(1)), the funeral provider would be in violation of the definitional section and this would constitute a violation of the rule.

Section 453.2(a) dealing with price disclosure is the one exception to the general standard that a violation of either the definitional or remedial sections constitutes a violation of the rule. In § 453.2(a) the Commission explicity states that a funeral provider who complies with the remedial requirements concerning price disclosure in § 453.2(b) is not engaged in the unfair or deceptive acts or practices as defined in § 453.2(a).

Second, the Commission states its intent that each of the provisions of the rule are separate and severable from one another. If one or more parts of the rule are found to be invalid by a reviewing court, the Commission intends that the other portions of the rule will continue in effect.

The third issue addressed by this section concerns the effect of the rule on burial insurance and the rule's consistency with the exemptions for the business of insurance embodied in the McCarran-Ferguson Act [280] as restated in Section 5 of the FTC Improvements Act of 1980.[281] This section declares the Commission's intent that the rule be inapplicable to the business of insurance or to acts in the conduct thereof. This explicit declaration was included in the rule in response to several comments questioning the effect of the proposed rule on prearranged funerals governed

[273] *See id.*

[274] *See* 40 FR 33901 (1975).

[275] The most significant change in this connection is the elimination of the requirement that funeral providers give to each customer (and, therefore, retain a copy) a separate "Statement of Funeral Goods and Services Selected" required by § 453.2(b)(5). The information which formerly would have appeared on the Statement may be incorporated onto the final contract, bill, or other document which the funeral provider already uses to memorialize sales agreements with customers. Since such documents would ordinarily be retained as business records or for tax purposes, the additional burden imposed by the Commission is minimal.

Two other changes in the final rule have significantly reduced the burden imposed by the recordkeeping requirement. First, as published in 1975, the rule required that funeral providers give out a separate sheet describing the legal requirements which a funeral provider claimed required consumers to purchase goods or services. Those disclosures have now been incorporated onto the price lists and statement of services selected, eliminating the need to keep separate records showing compliance with the provision. Second, the rule now permits funeral providers to consolidate certain price information onto one document, *i.e.*, the general price list. Thus, funeral providers may choose to list prices for caskets and outer burial containers on one list, rather than to prepare three separate documents.

by burial insurance.[282] The Commission's declaration of intent is included to address these concerns and clarify that the rule does not apply to such arrangements and other areas involving the business of insurance.

I. *Effect of the Rule on State Law—Section* § 453.9. In § 453.9 of the rule, the Commission has specified a process by which the states may obtain exemptions from part of all of the rule's requirements. The purpose of this section is to encourage federal-state cooperation by permitting appropriate state agencies to enforce their own state laws that are equal to or more stringent than the trade regulation rule. [283] To the extent specified by the Commission, the rule will not be in effect in a state obtaining an exemption. Otherwise, any state laws which conflict with this rule after its effective date are preempted to the minimum extent necessary to resolve that conflict. [284] The following discussion first sets out the basis for the Commission's preemptive authority and then describes how that authority affects existing state laws.

1. *Preemptive Authority.* In general, federal authority to preempt or override state law stems from the Supremacy Clause of the United States Constitution. [285] The Supreme Court of the United States has clearly established the principle that "state legislation which frustrates the full effectiveness of federal law is rendered invalid by the Supremacy Clause." [286] The Court has also made clear that this principle applies to federal agency regulations which have the force and effect of law as well as to acts of Congress. [287]

More specifically, the courts have recognized that federal law may preempt state laws or regulations to the extent that the federal provision requires or authorizes conduct which is inconsistent with state law. [288] This form of preemption is referred to as "conflict" or "inconsistency" preemption. [289] In *Katharine Gibbs*, the United States Court of Appeals held that Magnuson-Moss trade regulation rules promulgated by the Commission preempt inconsistent state law under traditional notions of "conflict" preemption. [290]

2. *Effect of Rule on State Law.* Every state regulates the licensing of funeral directors and funeral establishments, including such subjects as the educational, apprenticeship and examination requirements for licensees and public health standards for handling human remains. This entire area of state regulation remains intact because it does not conflict with or frustrate the purposes of the rule. The rule also specifically recognizes state regulatory limitations imposed on licensees for public health reasons with respect to embalming. [291]

Some states also have enacted certain protections for funeral consumers which appear similar to those in the rule. [292] State laws exist for example, which prohibit funeral directors from embalming remains without permission (Section 453.5(a)(2)) [293] or requiring a casket for cremation (Section 453.4(a)). [294] At least one other state has enacted into law a provision which appears similar to an earlier proposed version of the rule's requirements concerning pre-selection disclosure of itemized prices. [295] Since such provisions do not conflict with the rule, they are not preempted or affected in any way. A violation of such provisions would simply be a violation of both the rule and state law.

Other states have enacted provisions which are directed at the same practices as the rule but appear not to address these problems in a manner similar to the rule. For example, several states require that funeral providers disclose their prices, but require less disclosure than would occur under the rule's itemization requirement. [296] The rule would not conflict with and preempt such regulations either, because a funeral provider complying with the rule also could comply with the more permissive state law provisions. However, in such cases, funeral directors must also comply with the additional requirements of the rule.

While the Commission is aware of no state laws which are in conflict with the rule, individual states may wish to exercise their right, under § 453.9, to exempt their laws entirely from the rule. Under § 453.9, the rule will not be in effect in a state to the extent specified by the Commission where: (1) Application for an exemption is made by a state; (2) there is a state requirement in effect which applies to any transaction to which the rule applies; and (3) the state requirement provides an overall level of protection which is as great as, or greater than, the protection afforded by the rule. If an exemption is granted, it shall be in effect only for as long as the state administers and enforces effectively the state requirement.

The Commission here offers no opinion as to whether existing state laws or regulations provide a level of protection as great as or greater than that provided by the analogous rule provisions. As set forth in § 453.9, the Commission will instead determine the appropriate relationship between the rule and state law on a case-by-case basis in the context of an exemption proceeding conducted pursuant to § 1.16 of the Commission's Rules of Practice. The Commission will evaluate appropriate petitions for exemption made by state governmental agencies to determine the overall level of protection to consumers and whether the state regulation is administered and enforced effectively. Factors which will be considered by the Commission in determining whether an exemption is warranted include such things as the means available to the state to enforce its provisions, the existence of any private rights of action by an aggrieved consumer, and the scope and format of

[296] For example, most states only require a written agreement; they do not require price lists. The written agreements usually may be in the form of a single (package) price for all of the funeral homes customary charges, with separate prices only for cash advance items and supplemental items. *See* "CAFMS Survey of State Laws and Regulations," *supra* note 165, at Appendix III–C. Any funeral provider itemizing to comply with the rule also would provide the disclosure required by these states.

required price disclosures to funeral consumers.

Only state governmental entities may request exemptions from the Commission's rule under § 453.9. Funeral providers may not use this process. The determination to grant an exemption to state law will necessarily place the primary enforcement burden back onto the state to enforce its provision. Such a decision should be made solely by the state entity involved.

III. Alternatives Considered

During the course of this proceeding the Commission carefully considered several alternatives to the final rule ultimately adopted by the Commission. These options fall into three general categories: (1) Alternatives to the adoption of any rule; (2) specific rule provisions which were ultimately rejected by the Commission in any form; and (3) variations of rule provisions which were included in the final rule. The most significant of those alternatives considered which fall into the third category have been discussed in Part II of this Statement.[297]

The alternatives to the adoption of any final rule which were considered by the Commission include: (1) Taking no action; (2) issuing a nonbinding industry guide; and (3) issuing a model state law for consideration by the states. The alternative requirements which the Commission considered but did not include in the final rule were: (1) Prohibiting funeral providers from removing the remains of a deceased without authorization, or refusing to release the remains of the deceased; (2) prohibiting funeral providers from employing certain techniques and sales practices to steer consumers away from inexpensive funeral merchandise; (3) prohibiting funeral providers from engaging in concerted activity through threats or boycotts aimed at other funeral providers; and (4) permitting funeral providers to use a form of package pricing with declination credits in lieu of itemized pricing. Each of these alternatives will be discussed below.

A. *Alternatives to Any Commission Rule.*—1. *Take No Action.* Throughout the course of the funeral rule proceeding, one option considered by the Commission was that of taking no action, *i.e.*, terminating the proceeding without issuing a rule or other guidelines. This approach would essentially have maintained the status quo. Thus, the principal benefit of adopting this option is that it would impose no compliance costs on funeral providers, since they could continue their existing practices without change. In addition, this course would not have required the expenditure of any funds to enforce a rule.

The Commission has concluded, however, that these benefits are substantially outweighed by the costs to consumers arising from the unfair and deceptive practices currently engaged in by funeral industry members, costs which would continue unabated if the status quo were maintained in this market. The practices described in detail in Section II of this Statement cause consumers to pay higher prices for funeral goods and services because funeral providers are insulated from the need to set prices competitively, and cause consumers to purchase and pay for items which funeral providers misrepresent as being required by law or cemetery regulations. These and other practices prohibited by the rule result in substantial injury to consumers, injury which can be eliminated at minimal compliance costs under the provisions of the rule.[298] The Commission has concluded, therefore, that there will be a significantly greater net benefit to society if it issues the rule than if it takes no action.

2. *Rely on Industry Guides.* Under this option, the Commission would issue voluntary trade practice guides instead of a binding rule. This option was first considered by the Commission in 1976, when two industry trade associations petitioned the Commission to convert the rulemaking proceeding into one for the consideration of guides.[299] The Commission rejected this petition, declining to decide what type of action, if any, was warranted until it had an opportunity to review the evidence in the rulemaking proceeding and make findings based on that evidence.[300]

In passing the FTC Improvements Act of 1980, Congress permitted the Commission to issue a funeral rule but specifically encouraged the Commission to consider whether the goals of the rule could be achieved through voluntary guidelines.[301]

After reviewing the rulemaking record, the Commission has concluded that voluntary industry guides are not an appropriate solution to existing problems. If guides containing the rule's substantive provisions were adopted and complied with by the industry, essentially the same compliance costs would be imposed on the industry as would be imposed by the promulgation of a rule. The major "benefit" in such an instance would be the public savings which would accrue from not having to expend resources to enforce a rule.[302] Adoption of this approach, however, would not ensure that funeral providers would comply with the guides, and the benefits to consumers would be reduced by non-compliance. Clearly, if all providers complied with guidelines, consumers would receive the same benefits that the rule will provide. There is no assurance, though that voluntary guides would substantially alter the business practices of this market, since comments by industry members on the rulemaking record clearly show that there is no consensus among funeral providers on the need to revise their current sales techniques.[303] It is the Commission's judgment that voluntary guides, absent such a consensus, would not be complied with by significant numbers of funeral providers.[304] The guides would, therefore, not provide the net benefits to consumers which would be provided by issuance of a rule.

Guides might also offer the benefit of some flexibility, giving opportunities for experimentation with, among other things, different disclosure formats. Given the lack of industry consensus on the basic issue of the fairness of several major industry practices, however, this approach does not seem practical.

3. *Rely on State Action to Correct Abuses.* A third approach to correcting funeral industry abuses would be to await action at the state level, rather than to issue a federal rule. This alternative has been suggested repeatedly during the rulemaking proceeding, usually in conjunction with the expression of beliefs that existing state regulation is adequate to correct

---

[297] *See* Section II, *supra*.

[298] The benefits and costs of issuing a rule are described in some detail in Section IV, *infra* (Benefits, and costs, and Other Effects of Rule Provisions). The reasons why existing practices cause consumer injury are described in detail in Section II, *supra*.

[299] Petition of National Selected Morticians, I–A–22. The petition was joined by the National Funeral Directors Association.

[300] Letter from Charles A. Tobin to David D. Murchison, Attorney for National Selected Morticians (April 10, 1978). *See* Binder 215–46–1–1.

[301] Statement of Congressman Broyhill, 126 Cong. Rec. H3859 (daily ed. May 20, 1980).

[302] This savings would be offset somewhat, however, by the costs attributable to guideline self-enforcement by industry members. In light of this, the Commission has concluded that there would not be a significant reduction in net enforcement costs to society if the guides are enforced actively.

[303] *See, e.g.*, Summary of Post-Record Comments on Funeral Industry Practices rule, XV, at 160–164 (comments in opposition to mandatory itemization).

[304] The result might be to give an unfair competitive advantage to funeral providers who chose not to comply with the guidelines.

whatever abuses might exist.[305] A proposal to the Commission by several major industry trade associations in 1980 also reflected preference for state level regulation. That proposal consisted of a set of model laws which the proposers suggested be issued by the Commission for voluntary adoption by the states.[306]

The Commission recognizes that state action to correct existing industry abuses, if such action were taken, would have significant benefits over regulation at the federal level. First, it would allocate all funeral industry regulation to one level of government (*i.e.*, the state), potentially allowing economies in the cost of enforcing regulations. Second, it would simplify the compliance burden on funeral providers, by giving them a single source of guidance for answers to their questions about their regulatory obligations. Third, state regulators should be able better to keep abreast of non-compliance in local areas than the Commission, and thus should be better able to enforce rule provisions with maximum effectiveness.

The Commission is concerned, however, that state regulation in the past has not addressed the problems which the Commission's rule is designed to correct. A review of state law submitted to the Commission in 1976 [307] and another review conducted in 1980 [308] indicate, while there has been some improvement at the state level since the proceeding commenced, that most states have not moved to enact requirements comparable to those which the Commission is adopting, particularly in the area of price disclosure.[309] The failure of state funeral licensing boards to enact regulations requiring itemized price disclosure is not surprising, given the fact that most state licensing boards are dominated by funeral directors who are likely to share the traditional view of the major trade associations that package pricing is a perfectly permissible practice.[310] Reliance on state laws would, therefore, not fully correct the significant problems identified in the record in this proceeding. Nor is there any evidence that states will be likely in the near future to enact such provisions. The Commission thus rejects the notion that promulgation of any rule should be delayed pending action by the states. The effects of current industry practices on funeral consumers are sufficiently serious that action is warranted now.

It should be noted, however, that the rule provisions presently being adopted by the Commission can serve as a model state law. Where states act to pass laws which meet the minimum level of protection for the funeral consumer established by the rule, states may secure exemptions from the operation of the rule. Section 453.9 of the rule establishes criteria which, if met, would enable states to obtain exemptions from the rule.[311] Once the exemption is received, the Commission's rule will not be in effect in that state as long as the criteria continue to be met.

B. *Alternative Rule Provisions.* The version of the funeral rule published in the initial notice of rulemaking contained four sets of provisions which the Commission has considered and decided not to incorporate in the final version of the funeral rule. Those provisions are described here, with an explanation of the Commission's reasons for deciding against their issuance.

1. *Unauthorized Removal of Remains and Refusal to Release Remains.* In the rule originally proposed by the Commission, funeral providers would have been prohibited from obtaining custody of deceased human remains without permission from a family member or other legally authorized person. They also would have been required to release remains to a family member or other legally authorized person upon request, whether or not they were owed money for services provided.[312] Both provisions were proposed to address practices which take advantage of consumers' strong reluctance to move a body once it is in a particular funeral home, even if the consumer might prefer to do business with a different funeral provider.[313]

In recommending that the Commission prohibit the unauthorized removal of remains from the place of death, the rulemaking staff cited instances in which funeral providers acquired possession of a body from a hospital or nursing home without permission from the relatives, obtained a body because the provider also served as the coroner, or because a provider misinterpreted a call for information as authorization to pick up the body.[314]

The prohibition on unauthorized removal of remains was intended to ensure that the funeral provider who received the body initially was one who was acceptable to the family or their representative. The prohibition on refusal to release remains was intended to ensure that a funeral director could not prevent dissatisfied customers from moving the body to a competitor, should they so desire.

The Commission has concluded, however, that the practices described above are not widespread and that there are sufficient safeguards in state law to protect consumers for these practices. Unlike other practices addressed by the rule, these practices are widely condemned by the industry and contrary to law in most states.[315] They are the type of conduct which consumers are likely to complain about, and consequently trigger state enforcement action. Barring such practices in the rule would contribute little, if anything, to deterring such conduct. Consequently, in

---

[305] *See, e.g.*, Summary of Post-Record Comments, XV, at 123–29 (adequacy of existing state regulation).

[306] Proposed "Guides" [model law] and transmittal letter (Oct. 8, 1980), VI–7.

[307] *See* Consumer Federation of America, State Statutes, Rules and Regulations Affecting Funeral Practices, Atl. Ex. 7 (1976).

[308] *See*, CAFMS Survey of State Laws and Regulations, *supra* note 165, at Appendix III–C. The CAFMS study is based, in part, on a survey of state laws conducted by the rulemaking staff in 1980 and submitted for the record in *Funeral Industry: FTC Proposed Rulemaking: Hearings Before the Subcomm. on Oversight and Investigations of the House Comm. on Interstate and Foreign Commerce*, 96th Cong., 2d Sess. 141–144 (1980).

[309] *See* text and accompanying note 95, *supra*.

[310] Until recently, virtually all of the state licensing board members were licensed funeral directors, Consumer Federation of American, State Statutes, Rules and Regulations Affecting Funeral Practices, Atl. Ex. 7. In the last several years, the Conference of Funeral Service Examining Boards has been encouraging the appointment of "lay" members to funeral boards. As a result, most state licensing boards now have "lay" representatives, although only two states have licensing boards where funeral directors are not the controlling majority. *See Hearings on Funeral Industry*, *supra* note 308, at 258–280 (testimony of Royal Keith, Past Pres., NFDA).

Members of state licensing boards are, in many instances, chosen because they are respected industry leaders in their communities and states. As a result, they also tend to be active in trade associations. Funeral directors who have served as officers of state and national funeral trade associations have also served as state licensing board members. *See* 1978 Staff Report, *supra* note 9, at 132–136. While peer review is not inherently a conflict of interest or necessarily bad policy, it does suggest that the state boards are likely to share many of the basic values and opinions of the industry itself. While state boards are thus likely to be active in enforcing regulations against conduct or practices which the industry also condemns (*e.g.*, refusal to release a body, obtaining possession of body without permission, or misrepresentation), it is unlikely to be active in identifying as consumer problems those practices which the industry as a whole condones.

[311] Section 453.9 and the exemption process it establishes are discussed in more detail in Section II(I)(2), *supra*.

[312] The provisions are set out at 40 *Fed. Reg.* 30901 (1975) (Notice of Proposed Rulemaking, Section 453.2(b)) and were supported by the staff, after minor revisions, in the rule version appearing in the 1978 Staff Report, *supra* note 9, at 176–86 and 208–14.

[313] *See* discussion in Part II(A), *supra*.

[314] 1978 Staff Report, *supra* note 9, at 176–77, 208–09.

[315] *See* Report of Presiding Officer, *supra* note 8, at 54–59.

view of the small number of abuses and the availability of other adequate remedies, including such provisions in the rule is not warranted.

2. *Merchandise and Service Selection Techniques.* The Commission has considered and rejected a number of related recommendations of the rulemaking staff [316] which were intended to reduce funeral industry abuses by regulating the manner in which funeral providers presented caskets, as well as other merchandise and services. These provisions would have required that funeral providers:

(i) Display their three least expensive caskets in the same general manner as their other caskets are displayed; [317]

(ii) Disclose that their three least expensive caskets are available in different colors and arrange to obtain caskets in those colors upon customer request, if the caskets can be obtained within 12 hours; [318]

(iii) Not discourage a customer's selection of less expensive merchandise by disparaging its quality, misrepresenting its availability, offering defective or soiled merchandise for sale, or suggesting that a customer's concern for price reflects lack of respect for the deceased. [319]

(iv) Refrain from using any sales plan or compensation method which discourages salespersons from selling any goods or services which are offered for sale. [320]

The purpose of these provisions was to prohibit sales techniques which attempt to exploit a customer's grief or desire to show affection for the deceased in order to manipulate the customer into the purchase of more expensive merchandise. The Commission has concluded, however, that the provisions would not necessarily provide consumers with significant benefits above and beyond those provided by the information disclosure provisions in the rule. Those provisions require full information about a funeral provider's offerings and prices to be disclosed on a general price list, casket price list, and outer burial container price list. Such disclosures would let consumers know what merchandise and services the funeral providers sell, including the three least expensive caskets. The Commission was concerned that the provisions seeking to regulate oral representations would be difficult to enforce. [321] In addition, the Commission felt that the provisions singling out a funeral provider's three least expensive caskets for special treatment could result in significant compliance costs without ensuring that the goals of the provision were met. In particular, the provisions could have the adverse effect of funeral providers choosing not to sell certain low-price caskets which they currently made available to customers. The Commission has concluded, therefore, that reliance on rule provisions designed to stimulate information disclosure is the most effective way to ensure that consumers have a *bona fide* opportunity to purchase low-cost caskets and other merchandise if they so desire.

3. *Market Restraints.* As originally proposed, [322] the market restraints provision would have made it a rule violation for funeral providers to prohibit, hinder, or restrict other persons from (i) offering inexpensive funerals; (ii) entering into contracts with groups (called "memorial societies") which assist their members in making funeral arrangements; or (iii) price advertising. The provision also would have required funeral providers to place a notice in any advertising or promotional materials advising readers that funeral home prices vary considerably and that price information is available over the phone. The intent of the provision was to eliminate practices designed to stifle vigorous price competition.

The Commission has determined not to include a market restraints provision in the funeral rule. Any such provision would have to fall within the limitations specified by Section 19(c)(1)(B)(ii) of the FTC Improvements Act of 1980. [323] Section 19 permits the Commission only to prohibit or prevent the use of "threats or boycotts" by funeral providers against other funeral providers. In 1981, the Commission published a revised version of the provision which was so limited. [324] To comply with Section 19, the 1981 version of the rule did not contain prohibitions on the use of disparagement or blacklists, or the misuse of state administrative or judicial processes. Moreover, Section 19 limited such a provision to acts and practices directed against funeral providers. The scope of Section 19 did not extend to other persons who could be affected by funeral providers' market restraining practices, [325] such as casket wholesalers or body pick-up services.

After receiving comment on the midified version of the market restraints provision proposed in 1981, the Commission has decided that its inclusion in the rule is not warranted.

---

[316] The provisions were set out at 40 FR 39902 (1975) (Notice of Proposed Rulemaking, § 453.4), and except for one noted below, were also proposed, with some revisions, in the 1978 Staff Report, *supra* note 9, at 301–339.

[317] The provision was directed at the practice of funeral homes not displaying their least expensive casket(s) in the same selection room as most other caskets to discourage purchase of such merchandise by all but the most persistent consumers. A number of surveys, and other evidence, showed that inexpensive caskets are often not shown in the main selection room. *See, e.g.*, Comments of Maine PIRG, II–C–1400, at 2 (one-third of 116 funeral homes failed to display least expensive casket); FTC Survey of Funeral Prices in the District of Columbia (1974) VI–D–3 (14 out of 36 funeral homes failed to display least expensive casket); H. Buckingham, Maryland consumer, II–B–1159; H. Staples, Florida consumer, II–B–1444. The evidence also indicated that this practice will be successful in preventing most consumers from purchasing the least expensive casket. A NYPIRG survey of 127 consumers found that only 28 realized that there might be caskets available besides those they saw, and only 7 of those respondents asked if anything less expensive was available. NYPIRG Ex. 1 (N.Y.), at 6.

[318] There was some evidence of funeral providers intentionally displaying inexpensive caskets in a damaged condition to discourage their purchase. Instances were cited of inexpensive caskets with nails showing, straw sticking out, and with linings that were worn or ripped. *See* J. Page, California funeral home employee, Tx 7375–77. *See also* R. Mee, former Wisconsin casket salesman, III–F–16, at 5. *But see* Rebuttal of NSM, X–8 (Q–R); Rebuttal of NFDA, X–9 (20).

[319] A number of reports on the record indicate that purchase of inexpensive caskets has been discouraged by referring to them as "welfare" caskets, or "pauper's boxes." *See, e.g.*, J. Greyson, Indiana consumer, II–B–1436; W. Troemel, New Jersey consumer, II–B–436; J. Sagan, Massachusetts consumer, II–B–2239 at 3; C. Moles, Iowa consumer, II–B–316. Similarly, funeral directors appear to have attempted to discourage cremation by referring to that form of disposition as "disposals." *See* L. Smith, California student, VI–D–54, at 7; E. Morgan, author, Tx 9663. The various ways in which concern for price might be discouraged by funeral providers are described generally in the 1978 Staff Report, *supra* note 9, at 320–25.

[320] The evidence indicated that a few of funeral homes in different parts of the country used compensation systems which linked pay to the size of funeral sales. *See* J. Page, California funeral home employee, Tx 7346; K. Marsh, California funeral director and attorney, Tx 6757; H. Semicon, New York funeral director, II–A–145. However, staff deleted the provision from their 1978 recommended rule based upon their view that the limited incidence of the practice and the lack of evidence that it produced significant consumer injury did not warrant the provision's inclusion in the rule. *See* 1978 Staff Report, *supra* note 9, at 337. The Commission also finds that the provision is not appropriate for inclusion in the rule.

[321] The provisions banning the disparagement of merchandise or a concern for costs were not based on deception, but unfairness. As a result, it was not possible to prevent the abuse through affirmative disclosures, as was the case with other oral misrepresentations addressed by the rule. *See* Section II(B), *supra*. Enforcement would have depended solely upon consumer complaints, which would have made enforcement difficult. Further, the scope of the provisions was so vague as to raise serious questions whether funeral providers would have an adequate understanding of the conduct proscribed by the rule.

[322] *See* 40 *Fed. Reg.* 39904 (1975) (Notice of Proposed Rulemaking, Section 453.5).

[323] Public Law 93–252, 87 Stat. 361, 15 U.S.C. 57a note.

[324] *See* 46 FR. 6979 (1981) (Notice of Publication of Revised Proposed Rule and Notice of Opportunity to Comment, Section 453.4).

[325] *See* Section 19(c)(1)(B)(ii), 15 U.S.C. 57a note.

One reason is that the conduct proscribed in the provision was, as limited, already against the law. Since the Commission has the authority to bring individual actions against such violations of the antitrust law, adding such provisions to the rule would be superfluous. In addition, much of the evidence to support earlier version related to abuses which could no longer be covered by the rule under Section 19. It related to activities which are not "threats" or "boycotts" or to activities directed against persons or entities other than funeral providers.[326] The Commission finds that the acts and practices described in the record which fall within the limitations of Section 19 do not warrant a rule provision.

While the Commission has chosen not to include a "market restraints" provision in the final rule, it wishes to make clear its resolve to proceed on a case-by-case basis against any such future activities. The record contains allegations that boycotts and other concerted activity may have been directed at entities attempting to enter the funeral market and offer non-traditional services, such as direct disposition.[327] The Commission encourages industry members, consumers, and others to bring such incidents to its attention.

4. *Nonitemized general price list.* In 1981 the Commission received a proposal from two funeral director trade associations for an alternative version of the rule which would be acceptable to their memberships.[328] The proposal was not accepted, however, by NFDA, the largest funeral trade association. The proposal was supported by some of the Commission's staff.[329] A central feature of the proposal was its price disclosure provision, which gave funeral providers the option not to quote separate prices for the individual goods and services they sell.

Under this proposal, funeral providers would have had the option of listing their funeral arrangements by packages, with each package stating a price and including a description of every funeral good or service it contained. Funeral providers who chose this option also would have had to prepare a credit list, which would have separately indentified the funeral goods and services in the packages and would have shown a dollar amount which would be subtracted from the package price if a consumer declined a particular funeral good or funeral service included in that price. This "package with credits list" proposal would have affirmatively informed consumers of their right to decline.

In opposing this alternative disclosure format, many consumers and consumer groups argued that sanctioning package pricing would encourage consumers to continue purchasing packages;[330] indeed, some contended that the alternative would have the effect of establishing the so-called "traditional" funeral as the standard or norm.[331]

After careful consideration, the Commission rejected the proposal and adopted itemization instead. While the Commission is aware that the proposal would have ensured significantly greater opportunity for choice than present industry practices permit, the Commission was concerned that placing the burden on consumers to affirmatively reject goods and services "bundled" by funeral providers was inappropriate given the consumer's unique vulnerability and dependence on the funeral director for guidance. The "package with credits list" format suggests that the consumer who wants less than a full funeral must choose something other than "normal," whereas the itemization format legitimizes the concept that each part of the funeral is something that is affirmatively chosen by a consumer. Further, in view of the traditional reluctance to "bargain" or "negotiate" prices when arranging a funeral, stemming in part from natural reservations about the propriety of price concerns when arranging a funeral for a loved one, putting the consumer in the position of deciding how to *save* money, rather than deciding how to *spend* money, is likely to have very different results. In short, the Commission decided that it was necessary, in light of the consumer's unique position and past industry sales practices, to remove any vestiges of "packaging" which would suggest to consumers what was appropriate.

In addition, allowing alternative formats would inhibit the consumer's ability to compare prices, one of the goals of the rule. Under the itemization proposal adopted by the Commission, every funeral director is required to have a relatively standardized price list, which can be used to give prices over the telephone or which consumers can obtain from different homes.[332] Under the package with declination proposal, some funeral directors would have itemized lists, while others would have package-with-credits lists, making comparison shopping more difficult.

Finally, itemization is more consistent with the trend in state laws and with trends in the industry itself.[333]

The primary benefit of the alternative price list would be a possible reduction in compliance costs to funeral providers. This reduction might be possible because it would take less time for those funeral providers who currently quote package prices to prepare the alternative price list than to prepare a list with separate prices. However, it is the Commission's judgment that the burden of preparing itemized price lists is itself quite low [334] and that the incremental savings in compliance costs from allowing use of an alternative price list would be minimal.[335]

The trade associations supporting the proposal also believed that the "package with credits" proposal would enable funeral providers to continue using a "graduated recovery" [336] approach, thereby avoiding the itemization's alleged effect of raising prices for low-cost package funerals. As discussed in more detail in Section V(B), *infra*, itemization does not preclude "graduated recovery" and it will not necessarily result in higher prices for low-cost package funerals.

[328] Letter and attached Comment, David C. Murchison and Daniel P. Oppenheim, attorneys for National Selected Morticians and Larry C. Williams, Sr., attorney for National Funeral Directors and Morticians Association, XVI–89 (March 23, 1981).

[329] Staff recommendations on the funeral rule, XVIII–1 (June 26, 1981); Letter of Albert H. Kramer, Director, Bureau of Consumer Protection (March 19, 1981), XVI–89, Ex. A. *But see* Memorandum from L. Dorian, Deputy Director, Bureau of Consumer Protection (June 29, 1981), XVIII–2 (recommending that the Commission not adopt the proposal).

[330] *See, e.g.*, Rebuttal Comment of NRTA/AARP, at XVII–23 (May 13, 1981); Rebuttal Comment of NCSC/ADA/CAFMS, XVII–16, at 30, 32 (May 13, 1981).

[331] *See, e.g.*, Rebuttal Comment of NRTA/AARP, *supra* note 330, at 10.

[332] Of course, funeral directors may offer packages *in addition to* itemized price lists, as discussed, *infra*.

[333] Possibly as a result of the increasing number of state and localities who are requiring itemization, *see* note 95, *supra*, the percentage of funeral directors using itemization has increased over the last fifteen years. For example, in 1971, 74% of funeral directors used unit or bi-unit pricing. *See* 1971 Professional Census, *supra* note 114. In 1976 the number of funeral directors using unit or bi-unit pricing had dropped to 66%. *See* 1976 Statistical Abstract, *supra* note 31.

[334] *See* discussion of costs and benefits for price disclosure provisions of rule in Section IV, *infra*.

[335] The proponents of the alternative price list also suggested that it would benefit consumers through lower costs for funeral arrangements. However, this "benefit" is based upon the view that itemized prices are higher than package prices. The Commission rejects such a view for the reasons stated in Section V, *infra*.

[336] For a more detailed discussion of "graduated recovery" see Section V(B)(6), *infra*.

IV. Analysis of Projected Benefits, Costs, and Effects of Funeral Rule

This section provides a summary analysis of the costs and benefits of the individual provisions of the funeral rule. Each provision of the rule is designed to address particular abuses reflected in the rulemaking record. As a result, the provisions of the rule are largely segregable from each other for purposes of analyzing its projected benefits, costs, and effects.

The costs and benefits of certain provisions are interrelated, however. The interrelated provisions are:

1. Section 453.2 which requires the disclosure of prices on an itemized basis and § 453.4(b) which ensures that consumers can purchase on an itemized basis;

2. Section 453.3(a) which prohibits misrepresentations concerning when embalming is required and § 453.5 which requires funeral providers to obtain prior approval for embalming;

3. Section 453.3(b) which prohibits misrepresentations concerning the legal requirements for purchasing a casket for cremation and § 453.4(a) which prohibits funeral providers from imposing that requirement themselves;

4. Sections 453.3 (c) through (f) which address other misrepresentations; and

5. Section 453.6 which imposes a recordkeeping requirement.

The costs and benefits of these five groups of provisions will be discussed together.

A. *Section 453.2 (price disclosures) and § 453.4(b) (optional purchases).* These portions of the rule address funeral industry practices which prevent consumers from selecting a funeral home on the basis of the prices it charges and from selecting different options for funeral arrangements once at the home. Most consumers do not get price information over the telephone, and in some instances, consumers cannot get price information over the telephone even when they ask.[337] Yet choosing a funeral home is a serious financial decision, since consumers will not change funeral homes once the funeral director has taken possession of the body. If price information is to be obtained prior to selecting a home, it must be obtained quickly since the body must be moved soon after death.

The record also indicates that after consumers have chosen a particular funeral provider, the practice of "package pricing" makes it difficult or impossible for consumers to select the type of funeral option which most suits their needs. The package price does not disclose the individual prices of the arrangement's components, or even that the arrangement consists of discrete components.[338] Many funeral providers refuse to sell other than a complete funeral package and refuse to give consumers a discount even if the consumer desires not to purchase all items in the package.[339]

The fact that consumers fail to obtain detailed price information before selecting a funeral provider and often cannot get such information even at the funeral home tends to insulate individual funeral providers from price competition. The lack of competition suggests that the overall level of prices in the funeral industry are higher than they otherwise would be in a properly functioning competitive market. Moreover, the refusal to sell on an item-by-item basis in the funeral home limits consumers' options and forces them to pay for items which they might refuse to purchase if given the opportunity to do so.[340]

1. *Benefits.* The rule benefits consumers by reducing the economic injury resulting from the aforementioned practices. It does so through a twofold approach. First, it alerts consumers that price information is relevant and available at the critical moment of choosing a funeral provider, and ensures that consumers can obtain sufficient price information to comparison shop among different funeral providers. The telephone price disclosure provision (Section 453.2(b)(1)) requires that funeral providers make price information available over the telephone. The provisions requiring itemized information on a general price list (Section 453.2(b)(2)), casket price list (Section 453.2(b)(2)), and outer burial container price list (Section 453.2(b)(3)), provide a relatively uniform format for the information which will be given to consumers over the telephone, further facilitating comparison shopping. Comparison shopping will help stimulate price competition among funeral providers, thereby better enabling consumers to get the maximum benefit for their money.

Second, the rule gives consumers in the funeral home an opportunity to consider various options and purchase only those items they desire. The itemized price lists disclose the costs of different goods and services, making such comparisons possible. Itemized information also would be made available on the itemized statement required by § 453.2(b)(5). This information would allow consumers to see the total cost of the items they tentatively have decided to purchase for a given funeral and to evaluate them in conjunction with each other. Section 453.4(b), the "optional purchase" provision, ensures that consumers can make use of such price information by making a decision to decline items which they do not wish to purchase.

The Commission anticipates that these provisions will reduce economic injury through both a short term and a long term effect. In the short term, the greater ease with which consumers will be able to obtain price information for purposes of comparison shopping should substantially increase the number of consumers who do so.[341] This in turn, will create a pressure on funeral providers to price their products at competitive levels in order to continue receiving business from consumers who comparison shop. Even consumers who do not comparison shop will benefit from this overall tendency toward lower prices. In addition, all consumers will have the opportunity in the funeral home to purchase only the items they want and to pay accordingly. This will provide them with another opportunity to exercise their choice and save money.[342] Such an opportunity will be the only one directly available to consumers who are unable to comparison shop among funeral homes.

In the long term, increased competition may further benefit consumers by changing the structure of the funeral industry. As prices decrease, the principal way by which existing funeral providers will be able to keep up their profit margins will be by lowering their costs per funeral. This should give at least some firms an incentive in the long term to become more efficient, possibly by adapting their physical plant and marketing strategies or providing more specialized services at greater volume.

---

[337] *See* discussion in Part II(A), *supra*.

[338] *Id.* at note 75 and accompanying text.

[339] *Id.* at note 76 and accompanying text.

[340] *Id.* at notes 92–102 and accompanying text.

[341] Surveys of consumer attitudes and other evidence on the rulemaking record suggest that a substantial number of consumers would use such information. *See* 1978 Staff Report, *supra* note 9, at 510–11. For example, a 1974 survey sponsored by The Casket Manufacturers Association reported that 95% of the respondents felt that such information was "somewhat" or "very helpful."

[342] A trade association survey revealed that from 10% to 40% of consumers responding would not use such services as embalming (9.5%), other care of the body (9.7%), visiting hours (20.9%), funeral services in the funeral home (11.4%), family car (29.1%), and other automobiles (40.6%). Moreover, in every one of these categories, another one-quarter to one-third of the respondents were undecided. The survey received these responses based on questions which quoted specific dollar amounts for the services in question. Blackwell Survey, *supra* note 50, at Question 8.

In addition, greater availability of price information may encourage entry into the funeral market of new competitors seeking to attract business by offering lower prices. Such potential competitors appear to be inhibited from entry into the market in most areas of the country by existing practices which make price comparisons difficult and which, thereby, decrease the likelihood that consumers will comparison shop.[343] This decreases the pool of potential customers for any new venture and increases the likelihood that the venture will fail.

2. *Costs.* The Commission believes that the price disclosure provisions will result in two types of compliance costs to funeral providers. First, most funeral providers will be faced with the initial cost of revising their method of quoting prices so as to come into compliance with the rule. Second, they will incur some ongoing costs as they remain in compliance with the rule.

The most substantial initial compliance cost which faces funeral providers will be that falling on those funeral providers who do not currently quote their prices in an itemized manner, approximately 65%.[344] These individuals will be required to produce price information in a format different from that which they currently use.

The Commission estimates that the compliance costs for these funeral providers to revise their pricing formats will be relatively low. One reason is that the preparation of itemized price information will not require that most funeral providers search out new cost data. Rather, the basic data which they will need to use is already available to them and, in fact, is currently used by them, albeit in a different format. Most funeral directors who presently use package pricing also offer credits for unwanted items, and such credits can be a basis for the itemized prices. For others, a number of business texts provide basic "do it yourself" methods for determining prices under an itemization system.[345] It can also be expected that state and national associations will assist in giving advice, and that the experience of funeral providers who have been required to switch to itemization under state law will be useful.

In addition to this cost, which only some funeral providers will incur, all providers will be required to prepare the printed papers, notebooks, charts, or other forms which are the tangible medium on which price lists and statements will be shown to consumers. The time involved in designing the lists also will be minimized, however, through availability from the Commission and other sources of model forms.[346] Funeral providers will be able to convert the model forms into actual price lists and statements simply by inserting in appropriate places the necessary information (such as name, address, and prices) for their particular business.

Besides these initial costs, there will be three relatively minor ongoing costs of complying with the price disclosure provisions. One will be the increased time spent explaining prices over the telephone as more consumers use the telephone to comparison shop. The absolute amount of additional time spent answering price questions over the phone would be minimal, however, given that the prices which are listed on the general price list are basic and relatively few in number and given that, for the most part, the funeral provider need only read these few prices (or a subset of them, if only that is requested) over the phone.

The second ongoing cost would be the cost of reproducing the price lists and statements so that copies of the forms could be made available to consumers. This cost would be nominal for the casket and outer burial container price lists, which do not have to be given to consumers for retention. It also would be negligible for the statement, since it can be merged with forms which funeral providers already use. The marginal cost therefore would be small. The only potentially significant cost would be that of reproducing the general price list, which must be provided to consumers for retention. Given that the average funeral provider conducts 94 funerals a year, however,[347] even in this case the actual number of forms given out would be small and the cost of complying with the provision would be only a few dollars a year.[348]

The third ongoing compliance cost would be the time involved in updating the price lists as the funeral provider's prices or offerings change. However, the incremental burden imposed by the rule in this connection would be small, since funeral providers are already obliged to recalculate their prices whenever their costs or offerings change, irrespective of the pricing method they currently use. If any additional effort were imposed by the rule, it would be time involved in transposing these prices to the price lists required by the rule.

B. *Section 453.3(a) (embalming misrepresentations) and Section 453.5 (prior permission for embalming).* Section 453.3(a) prohibits funeral providers from representing that embalming is required by law when it is not or failing to disclose to consumers that embalming is not required by law except in certain special cases. To prevent such practices, the provision requires that consumers be given a written disclosure advising them of their right, except in special cases, to select arrangements which do not require embalming. The purpose of § 453.3(a) is in short, to ensure that consumers know that embalming is an option.

Section 453.5 works together with § 453.3 by requiring funeral providers in most instances to obtain permission before embalming. Section 453.5 also requires that funeral providers give consumers a disclosure advising them that they have the right not to pay for embalming performed without their prior permission if they select arrangements which do not require embalming. Thus, § 453.5 ensures that most consumers will have the opportunity to exercise a choice in deciding whether or not embalming should be performed.

1. *Benefits.* A significant benefit of these provisions will be to end practices which deceive consumers into purchasing embalming through misrepresentations of those instances where providers embalm without permission. Where embalming would be prevented through the operation of the rule, a savings of the cost of embalming, which amounts to between $50 and $150 per arrangement, will result.[349] The rulemaking record suggests that a substantial percentage of consumers would decline embalming if offered a true choice, possibly as many as thirty percent.[350] While it is impossible to

---

[343] *See* discussion in Part II(A), *supra*, at notes 98–103.

[344] *Id.* at note 83.

[345] *See, e.g.*, Blackwell, Talarzyk and Beever, A Manual for the Return-on-Investment Approach to Professional Funeral Pricing (1976); Pine and Pine, Adaptive Funeral Pricing and Quotation (1975).

[346] In addition, the model price lists and statement which the Commission is publishing simultaneously with the rule provide simple, basic guidance on the type of prices which funeral providers must use.

Shortly after the funeral rule was proposed, the National Funeral Directors Association distributed model price disclosure forms. Similarly, state trade associations have helped their members by providing sample forms in states which have enacted itemization requirements. *See* 1978 Staff Report, *supra* note 9, at 488, n. 40. The Commission anticipates similar trade association activities in helping funeral providers comply with the rule.

[347] *See* 1978 Staff Report, *supra* note 9, at 85.

[348] The rulemaking record indicates, of course, that one effect of the rule will be to encourage consumers to contact two or more funeral providers before deciding with whom to make arrangements. Most such contacts will be by phone, however, and would not involve handing out price lists.

[349] *See* discussion in Part II(D), *supra*, at note 248.

[350] *Id.* at notes 247–248.

predict with certainty the number of consumers who will decline embalming given a choice, even a relatively small percentage of declination can amount to large savings. The total benefit to consumers from these provisions alone, therefore, could be expected to equal millions of dollars a year in savings.[351]

2. *Costs.* The provisions will result in minimal initial and ongoing compliance costs for funeral providers. The only initial costs will be those involved in preparing the disclosures required by §§ 453.3(a) and 453.5. There disclosures can be copied verbatim from the model general price list and model statement of funeral goods and services selected which the Commission is publishing along with the rule.

In addition to these initial costs there will be minimal ongoing compliance costs. The only such costs of significance are attributable to § 453.5, and are the costs of the time involved in obtaining prior permission for embalming. These costs should be negligible, however, since approval may be obtained either orally or in writing, and in whatever manner is most expeditious under the circumstances. Typically, permission could be requested of the family during the "first call", when the funeral provider is asked to pick up the body, or during the funeral arrangements conference if that conference is held within a few hours of death. Moreover, § 453.5 has a built-in limitation to ensure that costs of seeking prior permission do not become excessive in extraordinary cases. The Section specifically permits embalming without prior permission if the funeral provider is unable to contact a family member or other authorized person after exercising due diligence (and has no reason to think that the family does not want embalming performed). Thus, the cumulative burden of obtaining prior permission for embalming should be minimal.

C. *Section 453.3(b) (casket for cremation misrepresentations) and § 453.4(a) (alternative container requirements).* The rulemaking record indicates that consumers seeking to arrange direct cremations want to buy inexpensive cremation containers in lieu of an ornamented, and correspondingly more expensive, casket.[352] Sections 453.3(b) and 453.4(a) of the rule are intended to eliminate two related practices. Section 453.3(b) prohibits funeral providers from representing that the law requires a casket for cremation. Section 453.4(a) correspondingly prohibits funeral providers from imposing that requirement themselves. The provision further requires that funeral providers who arrange direct cremations make simply constructed body receptacles (unfinished wood boxes and alternative containers) available to consumers desiring to use such items for direct cremations. Finally, § 453.3(b) requires that funeral providers give consumers a written disclosure to inform them of their right to purchase merchandise other than ornamented caskets for direct cremations.

1. *Benefits.* These provisions will enable persons desiring low-cost, simple dispositions to obtain unfinished wood boxes or alternative containers. The benefit to consumers will be a savings in their total funeral costs. As is the case with embalming, discussed above, these economic savings can be substantial. For example, cardboard, composition, and wooden alternative containers typically cost no more than $20 to $65 at retail, while ornamented metal or solid wood caskets sell for at least $150 to $250.[353] The total savings, of course, would depend on the rate at which consumers will choose to buy such containers in lieu of caskets. While a precise prediction of the rate is impossible, even a modest rate could result in significant aggregate savings.[354]

2. *Costs.* The only potentially significant compliance costs imposed by either § 453.3(b) or § 453.4(a) will be imposed by § 453.4(a). Section 453.3(b) will result in some very minor initial compliance costs, because it requires funeral providers to place a written disclosure on the general price list. However, this can be done quickly and simply by copying the disclosure appearing on the model general price list which accompanies the rule.

On the other hand, the requirement in § 453.4(a) that unfinished wood boxes or alternative containers be "made available" to customers arranging direct cremations could impose somewhat more significant costs on some funeral providers. Even so, these would be negligible for the great majority of funeral providers because the Commission deliberately has drafted § 453.4(a) only to require that unfinished wood boxes or alternative containers be "made available" to customers. Most funeral providers, therefore, would not have to stock such items, since the items could be made available to customers from the stock of the casket wholesaler with whom the funeral provider normally does business. Consequently, most funeral providers would not have inventory or storage costs; the item would be bought only after being ordered by a consumer. The Commission thus anticipates that most funeral providers will be able to comply with § 453.4(a) without any special expenditure of time or money.

A relatively small number of funeral providers, such as those in isolated rural areas, would have to stock unfinished wood boxes or alternative containers so that they would be available to customers arranging direct cremations. For such funeral providers, the compliance burden would be inventory and storage costs. None of these costs should be substantial, however. Funeral providers would only be required to stock a sufficient number of containers to meet expected demand. An average funeral home might arrange 3 or 4 direct dispositions per year.[355] Of course, funeral directors can rely on their experience in predicting the demand for such items in their own community. Inventory costs, then, will be low: for most homes having to stock them, having one or two such unfinished wood boxes or alternative containers would be sufficient. The record shows that such containers have a wholesale cost of as little as $5.[356] Storage costs are also minimal, since many types are collapsible, thereby minimizing storage problems.[357] It is the Commission's

---

[351] Approximately 1.9 million funerals are arranged per year. An NFDA-sponsored survey indicated that 9.5% of consumers would decline embalming in an "average" funeral home, while 24.7% more were undecided. Taking a hypothetical declination rate of 10% and an embalming cost of $75, the total savings to them would be over $14 million. Blackwell Survey, *supra* note 50, at Question 5.

[352] *See* Section II(B)(2)(a), *supra*.

[353] 1978 Staff Report, *supra* note 9, at 239, nn. 110, 112. The rule does not, of course, require that funeral providers charge $20–$65, or any other prices for unfinished wood boxes or alternative containers. However, the rule does require that the items be constructed of a limited range of typically inexpensive materials. This will make it difficult for funeral providers to sell such merchandise at an abnormal mark-up.

[354] In 1977, the direct disposition rate was approximately 4.5%. Where cremation is the form of direct disposition, caskets would be unnecessary and consumer could save from $70 to $200 (the difference between the price of alternative containers and the least expensive casket.) If 70% of direct dispositions are cremations, and if only 10% of those consumers choose to save the minimum amount ($70), total aggregate savings would be $418,950. On a high range, if 90% of the consumers buying direct cremation save the maximum amount ($200), total consumer savings would be $10,733,000. In one chain of funeral homes which disclosed that caskets are optional, nearly 15% of the *total* dispositions (including burials and full funerals) involved the purchase of a minimal container. Purdy, Oregon funeral director, Sec. Ex. 3.

[355] Based on an average 84 funerals per year and a 4.5% direct disposition rate. *House Small Business Comm. Hearings*, *supra* note 30.

[356] Progressive Mortuary Methods, 1976, II–A–660, at 8.

[357] *See* Staff Report, *supra* note 9, at 245.

conclusion that the direct compliance costs will be relatively minor.

One indirect effect of this Section of the rule may also impose costs on consumers. Some funeral directors may find it more profitable to stop offering cremation altogether, rather than offer cremation with alternative containers. While this possibility exists, the Commission believes that several factors make such an outcome unlikely. A funeral director who does not offer cremation at all is likely to lose some customers to other funeral homes who do offer it or, in some areas of the country, to immediate disposition firms. While a direct cremation may not be as profitable as a full funeral, it is more profitable than losing a customer altogether. Since many funeral homes operate barely over break-even points,[359] many funeral directors may be reluctant to take the risk of losing even several customers who will make at least some contribution to fixed costs while paying variable costs.[359] Finally, the price lists required by the rule and the telephone price information requirement will make it easy for consumers to determine whether a funeral home offers cremation. To the extent the rule encourages such shopping, it is unlikely that the overall availability of cremation will decline even if individual firms decide to stop offering it.

D. *Sections 453.3(c)–(f) (misrepresentations other than embalming or casket for cremation).* These provisions address a variety of factual misrepresentations and failures to disclose material information. Specifically:

(i) Section 453.3(c) prohibits funeral providers from claiming that laws or cemetery regulations require the purchase of outer burial containers if they do not. The section also requires that funeral providers disclose this information to consumers by means of a statement on the outer burial container price list.

(ii) Section 453.3(d) is a general prohibition against misrepresentations of requirements imposed by federal, state, or local laws or by cemetery or crematory regulations. To decrease the frequency of such misrepresentations, the provision requires that funeral providers briefly describe in writing any requirements orally represented to a customer.[360]

(iii) Section 453.3(e) prohibits two types of false claims about product characteristics. First, it prohibits funeral providers from claiming that funeral goods or services can delay decomposition for a long-term or indefinite time. Second, it prohibits claims that funeral goods (primarily caskets and outer burial containers) will protect the body from gravesite substances (such as water) if they cannot.

(iv) Finally, § 453.3(f) prohibits funeral providers from claiming that they are billing their customers at cost for items purchased for the customer from other persons ("cash advance items"), *e.g.*, flowers or obituary notices, if this is not the case. Correspondingly, the Section requires that funeral providers disclose in writing that they charge for their services in obtaining cash advance items if they do.

Unlike the three sets of provisions described in the immediately preceding sections, these provisions do not address interrelated problems. However, these provisions operate in similar ways to address their discrete problems. For this reason, their benefits and costs can be described together.

1. *Benefits.* With the partial exception of the provision on cash advance items, all of the misrepresentation provisions produce benefits in identical ways: They reduce the economic injury which consumers suffer when misrepresentations or failures to disclose material information induce consumers to purchase unnecessary products. Such losses can be substantial. For example, burial vaults range in price from $190 to $1,500.[361] If a consumer is told falsely that such items are required by law or cemetery regulations, the economic injury can thus be considerable. Even if the cemetery does, in fact, require use of some sort of outer burial container, misrepresentations about such requirements can still cause substantial economic losses to consumers. Cemeteries do not require use of burial vaults *per se*. They permit, alternatively, the use of grave liners, which range in price from $55 to $180. *See* Part II(B)(3)(a), *supra*, at note 175. The difference between this price and the price of a burial vault represents economic injury to a consumer who would have purchased a grave liner if told of the option to do so. Similarly, a consumer who purchases a "sealer" casket (one which keeps out water and other gravesite substances) in the mistaken believe that such a casket will preserve the body may pay $300 to $500 above the price for comparable caskets which are not sealers.[362] However, the merchandise will not perform the function for which a premium price was paid. By preventing misrepresentations and providing accurate information to consumers through disclosures, § 453.3(c)–(e) help ensure that consumers only pay for items which are truly necessary or desired by the consumer for the arrangements selected or which have a genuine ability to perform in the manner described.

The provision on cash advance items also can save consumers money, although in a slightly different manner. Section 453.3(f) helps ensure that consumers are told if they are being charged an amount above and beyond the funeral provider's stated fee for professional services to obtain cash advance items. The consumers then may elect to obtain the items directly and save on the service fee. While these savings would vary depending on the amount of the funeral provider's surcharge, they could be substantial.[363]

2. *Costs.* With the exception of § 453.3(d) the costs of these provisions are virtually nonexistent. They impose only two types of obligations on funeral providers. First, most provisions require that funeral providers prepare standard preprinted (or written) disclosures for inclusion on one of the price lists or the statement which the rule requires. However, these disclosures simply can be copied from the Commission's model forms. Second, the provisions require that funeral providers cease to make certain misrepresentations. This does not require funeral providers to take any affirmative steps or to incur corresponding compliance costs.

Section 453.3(d) is somewhat different from the rest of the provisions because it also requires that funeral providers briefly describe in writing any legal or cemetery requirements which they represent orally to a customer. The amount of time to do so can be expected to vary from one arrangement to another. However, it will be largely

---

[359] Blackwell, Appendix B of prepared stmt, D.C. Ex. 20.

[360] *Cf.* S. Shavell, Pro. Economics, Tx 11, 909, 11,924.

[360] Of course, funeral providers desiring to make misrepresentations without detection might consider simply not writing such misrepresentations down. However, the rule requires a preprinted disclosure on the statement of goods and services selected informing consumers that oral claims about legal or cemetery requirements also will be noted in writing. If this does not occur, that fact alone would serve to alert consumers that something was amiss.

[361] *See* Part II(B), *supra*, at note 179.

[362] *See* 1978 Staff Report, *supra* note 9, at 202.

[363] The National Funeral Directors Association's 1977 annual survey of funeral home economic data revealed a 5% difference between the reported income attributable to cash advance items and the corresponding expense figure. This statistic suggests an average national service charge equal to 5% of the cost of cash advance items. The total mark-up amounts to nearly $18,000,000. 1977 Statistical Abstract, *supra* note 101.

within the funeral provider's own control, since statements need not be described in writing unless the funeral provider elects to make them orally in the first place. At most, it might involve a brief description of an embalming regulation and a cemetery requirement. In many situations it would not even be necessary to describe the cemetery requirement, if the customer expressed a desire to purchase an outer burial container for other reasons. Thus, the overall time necessary to comply with § 453.3(d) should be small.

E. *Section 453.6 (recordkeeping requirement).* Section 453.6 of the rule requires that funeral providers keep a copy of each nonidentical casket price list, outer burial container price list, and general price list disseminated to customers as well as a copy of each statement disseminated to customers. The provision does not directly remedy specific abuses. Rather, it is a remedial requirement which will help end the unfair and deceptive practices identified in § 453.2 and § 453.3 of the rule. It will simplify rule enforcement by enabling Commission staff to examine written records rather than having to conduct more time-consuming oral interviews to detect rule violations.

1. *Benefits.* As noted above, the recordkeeping provision will benefit consumers by helping to ensure compliance with the substantive provisions of the rule. As part of its enforcement program, the Commission will check the records of individual funeral homes to ensure that the price lists and statements required by the rule are complete. Since most of the information which the rule requires be given to consumers will be contained on the price lists and statement of services selected, availability of those documents for inspection will make it possible to detect rule violations efficiently and thus to enforce the rule effectively. The recordkeeping provision will thereby have substantial deterrent value.

The principal alternative to a recordkeeping provision would be to use consumer complaints to detect rule violations. However, evidence on the rulemaking record shows that the frequency with which consumers complain about problems in this area does not appoach the frequency with which they occur.[364] In part, this absence of complaints is attributable to the fact that the experience of making funeral arrangements is unpleasant, so that consumers are anxious to put the experience behind them rather than to relieve it by registering a complaint. In part, the lack of complains also is attributable to the fact that consumers are not sufficiently informed to be aware that any improper practices have occurred.

To a considerable extent, therefore, the Commission will need to rely on its own resources to monitor compliance with the rule. The recordkeeping requirement significantly increases the effectiveness of such monitoring by requiring that a substantial majority of the information which the rule requires to be disclosed is readily available for examination by Commission officials.

2. *Costs.* The compliance burdens attributable to Section 453.6 are the tasks of: (1) Storing forms; and (2) removing forms from storage. The amount of time which would be required to perform these functions would depend on the number of funerals arranged yearly by a funeral provider. However, the Commission estimates that the amount of time required to comply with the provision will average under one hour per year for individual funeral providers.[365]

V. Other Economic Issues Raised in the Proceeding

In this section of the regulatory analysis, the Commission discusses two economic issues not specifically addressed in the analysis of the costs and benefits for particular rule provisions. One issue is the general effect of the rule on consumers and small businesses. The other issue is whether or not itemization will cause funeral prices to rise.

A. *Effects of the rule on small businesses and consumers.* There are approximately 22,000 funeral providers in the United States.[366] A 1973 report by the U.S. Department of Commerce indicates that most have a small payroll, with 80% employing seven or fewer persons.[367] Trade association statistics show that in 1972, the average number of deaths per funeral establishment was ninety-four,[368] or fewer than two a week, although actual case volume varies greatly.[369] These statistics and others are consistent with a conclusion that funeral establishments are primarily small businesses.

Thus, it is evident that the primary impact of the rule will be on small businesses. The Commission anticipates that the impact of the rule will be primarily manifest in three areas. First, compliance costs will slightly increase funeral providers' business expenses. The review of the rule's costs and benefits in Part IV indicates, however, that compliance costs will not be significant. Most would be one-time costs attributable to initial preparation of the price lists and "statements of funeral goods and services selected" required by the rule. The only potentially ongoing compliance costs would be those involved in updating the price lists, providing the general price list for retention to customers, and retaining records for a period of one year. There is no reason, however, to believe that these costs would be anything more than minor.

Indeed, evidence on the rulemaking record confirms the fact that compliance costs would be negligible.[370] For example, a survey on the subject of compliance costs,[371] authorized by the Commission, concluded that the cost of complying with the rule would not be significant. These results derived from direct queries to funeral providers about the difficulty they would have had complying with the 1975 version of the funeral rule. In-depth interviews were conducted at a variety of different funeral homes in the Atlanta area, including urban and rural, large and small firms. Compliance costs for the 1975 rule version, according to the survey, were not significant for the industry members surveyed. Even so, the Commission has subsequently revised the rule to futher reduce compliance costs.

Additional evidence that the rule would not be burdensome comes from the expressed views of two of the major funeral trade associations. These associations proposed an alternative rule virtually identical to the final rule promulgated by the Commission with

[369] *See, e.g.* Kissel, *supra* note 35, at 47–49 (25–400 funerals per year); and F. Bates, National Selected Morticians, Tx 12,580 (75–5,000 funerals per year).

[370] In reaching this conclusion, the Commission is mindful that some participants felt compliance costs would be significant. Thus, trade associations and individual funeral providers typically expressed concern about compliance costs. *See, e.g.*, National Funeral Directors Association, Post-Record Comment, XIV–848, at 809. On the other hand, consumer groups and individual consumers expressed views that compliance costs would not be substantial. *See, e.g.*, Post-Record Comment, Consumer Federation of America, XIV–869, at 3. The Commission has considered all such views in reaching its own determination.

[371] R. Perry, MacFarlane & Co., Tx 9,149.

the exception of a provision for use of an alternative price disclosure system.[372] In submitting their proposal, the trade associations noted that such a rule would not be unduly burdensome to funeral providers.[373]

The second effect of the rule upon small businesses will be increased price competition, which could have a positive impact on prices in several ways. First, competition induced by greater price information could serve actually to reduce prices as price sensitivity by funeral consumers is increased—or, at least, competitive pressures could place a downward pressure on future price increases. Second, greater price information may serve to shift some consumers away from higher priced sellers to lower priced providers, thereby reducing overall consumer expenditures (and consequently the mean price). Both of these predicted results have in fact occurred in other markets where the Commission has acted to infuse greater price information.[374] Given the relatively fixed demand for funeral services, increased competition will likely lead to an actual reduction in total funeral expenditures, or at least a substantial reduction in the rate of growth. Third, several individual rule provisions will eliminate practices which induce consumers to purchase certain goods and services through misrepresentations or failures to disclose material facts. All of this will mean a loss of revenues to funeral providers. Such revenues are, however, attributable to deceptive practices or to practices which foster noncompetitive market conditions. The loss of such revenues to funeral providers will enable the economy to allocate them to more productive users.

Indeed, these lost industry revenues represent the principal benefit which the rule will provide to consumers. As the discussion in Part IV indicates, the total revenues generated by unfair and deceptive industry practices are substantial. Thus, the Commission anticipates that the rule will produce significant benefits to consumers by allowing them to save on expenses. These savings will much more than offset any price increase which might be attributable to the costs of complying with the rule.

In the Commission's view, these are the only principal effects which the rule will produce for consumers and funeral providers. In concluding this, the Commission rejects the view expressed during the rulemaking proceeding that the rule will cause the funeral industry to become dominated by large firms or chains.[375] Those firms which meet a specific demand—such as serving a small community or a particular racial, ethnic, or religious group—are unlikely to lose business because of generally increased competition.[376] The Commission does recognize, however, that there may be some increase in concentration within the industry resulting from the increased competition. The evidence suggests that there is substantial unused capacity in the funeral market. Notwithstanding this excess capacity and low utilization rates, the absence of competition has permitted inefficient sellers to remain in the market. To the extent that the rule achieves its intended effect, inefficient providers will have to change their operations to become more efficient or risk going out of business. It would be expected, therefore, that some inefficient businesses, including inefficient small businesses, will suffer an adverse competitive impact.

B. *The Effects of "Itemization" Upon Funeral Prices.* One of the designated issues discussed during the rulemaking proceeding was whether mandatory itemization forces up prices.[377] After reviewing the evidence, the Commission concludes that mandatory itemization presents opportunities for raising prices but that it does not, by itself, require funeral directors to raise prices.

The Commission has discerned six different arguments presented in support of the view that itemization would raise prices. Each is discussed below.

1. *Consumers will choose more.* Some funeral providers and others commented or testified that itemization will raise prices because consumers will buy more. It was suggested that when consumers see items broken out on a list, they find the prices so reasonable that they end up choosing more than they would if the items had been packaged.[378]

The record contains no empirical evidence supporting or refuting this claim. However, even if itemization had the effect of allowing consumers to choose more than they would have under itemization, that result would not be a reason not to require itemization. It is evident that such a result would be the operation of consumer choice, not any result of increased costs or marketplace distortions introduced by the rule. The purpose of the rule is to enhance consumer choice. If some consumers choose to buy more, with a clear understanding of the price associated with that choice, that is not a concern to the Commission. Other consumers will have the right to choose less.

2. *Prices will be changed.* Other funeral directors testified that if they were required to examine their pricing structure as a result of having to compile a new price list, many would decide that the prices that they had been charging in the past were too low and that the prices ought to be raised.[379]

Again, such an argument is not of concern to the Commission. The argument is not that the rule will impose costs which must be passed on to consumers in the form of higher prices, but simply that funeral directors have decided to increase profits by raising prices. Funeral directors are, of course, perfectly free to do that at any time. The rule has nothing to do with such a decision other than the fact that it requires funeral directors to think about prices in compiling a new price list. While funeral directors may choose to raise their prices in order to increase their profits, it is certainly not a necessary result of the rule.

---

[372] This alternative is discussed in Part III(B)(4), *supra*.

[373] Letter of D. Murchison to A. Kramer, XVI–159, at 00. The principal difference between the rule and the proposal of the trade associations is that their proposal permitted a package price with disclosed discounts for parts of the package not selected.

[374] Following promulgation of the Commission's trade regulation rule on the Advertising of Ophthalmic Goods and Services, 16 CFR Part 456, (permitting price advertising) available evidence indicates that the rate of inflation for eyeglasses and eye examinations has been substantially lower than other medical care services and other consumer goods and services, and in some categories, such as soft contact lenses, average prices have actually declined.

For example, in the year following promulgation of the Eyeglasses rule, prices for soft contact lenses actually decreased from a 1978 average of $256 to a 1981 average of $204. (Includes full package price for eye exam, lenses, fitting, care kit and follow-up care. Source: Health Products Research, Inc., Morristown, N.J.; Prices are those collected in an annual consumer survey.) From October, 1978 to October, 1979, the unadjusted percentage price increase for eyeglasses (6.5), was less than for all consumer goods (12.2), durable goods (9.6), or medical care (9.4). [U.S. Department of Labor, Bureau of Labor Statistics, CPI Detailed Report (Oct. 1979)].

3. *Compliance Costs.* Some funeral providers [380] commented that the direct compliance costs imposed by the rule will be passed on in the form of higher prices to the consumer.

For the reasons discussed above, the Commission believes that the direct compliance costs will be minimal. While such costs will undoubtably be passed on to consumers, rather than absorbed by funeral homes,[381] such increases should be as modest as the compliance costs themselves.

4. *The "economies of packaging argument".* Other funeral providers appear to argue that an identical set of goods and services will inherently cost more on an itemized basis than on a packaged basis and that the higher cost will be passed on in the form of higher prices to consumers. In other words, the argument is that there are "economies of packaging" which result in a lower cost for packaged services and merchandise. The analogy is often made to the "blue plate special" versus the "a la carte" menu.[382]

There are economies of packaging for many goods and services in our economy. Some products can be offered more cheaply to consumers by being packaged because it costs less to produce them in a packaged form than in an unpackaged form.[383]

There is no evidence to suggest, however, that there are any significant economies of packaging in funerals. The cost to the funeral director of offering a set of goods and services is much the same whether the parts are offered separately or together. The only potential savings in packaging is the savings in time that it may take to discuss individual requests under itemization.[384]

Even if there were modest cost differences, however, the rule expressly permits funeral directors to offer packages as long as they also offer goods and services on an itemized basis. Therefore, if there are any savings in packages, they can be passed on to those consumers who are interested in package prices. Consumers who are not interested in packages may have to pay somewhat more in order to buy on an itemized basis, but that is their choice. Further, any increase in price for the total package may be more than offset by the consumer's ability to decline unwanted items.

5. *The effect of declination.* The remaining arguments do not claim that itemization will affect the funeral director's cost, but instead recognize that itemization may result in a shift of prices presently charged. The arguments assume that overall revenues and overall profits will remain unchanged.[385]

Some funeral providers and others argued that if a substantial number of consumers decline items that would ordinarily be included in the package, in order to retain the same revenue and profit level, other prices would have to be increased to make up for the lost revenue.[386]

The rule does not regulate how funeral directors determine prices. Consequently, funeral directors may shift prices and set prices for parts of the funeral which they believe are appropriate. Some funeral directors may well choose to charge more for items which consumers are less likely to decline in order to make up for revenue lost on items consumers are more likely to decline. Other pricing strategies are also possible. As a resut, in the short term, there is the possibility that some consumers will be paying more, while others are paying less, than they would under a package pricing scheme.

The argument that some prices will go up depends, however, on the assumption that funeral directors will simply be able to recover any lost revenue simply by raising prices. As price competition increases, such a strategy may not be possible. Instead competition will generate pressure on funeral directors to become more efficient and to cut costs as the primary means of retaining profitable levels, rather than by raising prices. Further, to the extent that itemization allows consumers to choose less than traditional funerals, the increased demand for less than full funerals may stimulate innovative new services and allow the market to respond. As a result, the long run effect of itemization is expected to drive all prices down to the competitive level.

6. *The effect of itemization on the lowest-priced package funeral.* The major argument advanced by funeral providers and trade associations, however, is that itemization will necessarily cause the price of the lowest-priced package funerals to increase. Again, the argument assumes that revenue and profitability will remain the same: therefore, the argument also assumes that the price of the *average* package funeral will stay the same, while the price of the highest-priced package funeral will actually decrease.[387]

Under the present system of package pricing, many funeral directors apparently determine prices using a "graduated recovery" approach.[388] Basically, this method means that packages are priced so that buyers of higher-priced funerals are contributing proportionately more to overhead and fixed costs than are buyers of lower-priced package funerals. Since the only variable between a higher-priced funeral and a lower-priced funeral is the casket selected,[389] another way of explaining this method is that buyers of the low-priced funerals are paying more than the buyer of the low-priced funeral for the identical services. "Graduated recovery" therefore allows the funeral provider to lower the price of the package funeral on the low-price end, since any loss is made up by raising prices on the high-priced end.[390] In essence, buyers of higher-priced package funerals are subsidizing buyers of lower-priced package funerals.[391]

---

[380] *See, e.g.*, R. Dyer, New York Funeral Director, Tx 1870–71; J. Caran, Pres., New York FDA, Tx 132.

[381] Profit margins in the funeral industry are general small and demand is not sensitive to price. Blackwell, Comprehensive Outline, D.C. Ex. 29, at 14, 20. As a result, any increases in costs will undoubtedly be fully passed on to consumers.

[382] In fact, the "economies of packaging" argument is never made explicitly, but only by analogy to situations in which such economies exist, *e.g.*, the blue plate special. *See, e.g., House Small Business Subcomm. Hearings, supra* note 30, at 71 (testimony of H. Raether, Exec. Dir. NFDA).

[383] To take an obvious example, it is often cheaper to buy a radio on a car when it comes as standard equipment than to order it separately, since the manufacturer can cut costs by simply including a radio in every car. The manufacturer can buy the radios at a lower price because it is buying them in greater volume and can cut labor costs by installing radios on all cars rather than on some cars but not on others.

[384] The record shows that the great majority of the costs of funeral homes are fixed costs for overhead which will not vary whether funerals are offered on a package basis or an itemized basis. *See, e.g.*, Blackwell, D.C. Ex. 29, Appendix B, Exhibits 5–7.

[385] Blackwell, D.C. Ex. 29, Comprehensive Outline, Exhibits 6–8.

[386] NFDA Post-Record Comment, XIV–348; *Id.*

[387] Dr. Alfred Rappaport "The Expected Impact of Fragmented Quotation on Funeral Service Prices," III–4–2; NSM Post-Record Comment, XIV–348, at 25–107.

[388] *Id.*

[389] 1978 Staff Report, *supra* note 9, at 393.

[390] Some funeral providers indicated that the desire to create subsidized low-priced funerals stemmed from the funeral director's belief that a full package funeral should be affordable even in the low income range, so that everyone can afford a full, dignified funeral. *See, e.g.*, NFDA Post-Record Comment, XIV–348. Other commentators note, however, that such a pricing strategy could increase profits. *See, e.g.*, Dr. Michael Lawson, D.C. Ex. 26, at 14; Shavell, D.C. Ex. 13, at 18.

[391] Some have suggested that this undisclosed subsidy is improper in that buyers are not paying the "the true cost" for the items bought. Others have suggested that it is not the funeral director's role to re-allocate income by subsidizing the funerals of lower-income consumers with the funerals of high-income consumers. And others have commented that even if such a goal is appropriate, there is no guarantee that graduated recovery achieves that result. Poorer consumers may often be the consumers who buy the more expensive funeral. (Evidence in the record supports the claim, for example, that blacks buy more expensive funerals

The rule requires the prices of each part of the package to be disclosed separately. Funeral providers argue that this means that they will be required to charge all buyers the same price for the same services.[302] Since this would prevent funeral directors from charging buyers of higher-priced package funerals more than buyers of the lower-priced funeral for the same item, it would end the present subsidy of the buyers of the lower-priced funeral. As a consequence, it is argued that the prices of the lowest-priced funerals would have to increase.

The Commission recognizes that funeral directors may chose to respond to the rule by raising the prices of the lowest-priced funeral. The Commission does not believe, however, that this result is required by the rule. The rule does not preclude the use of "graduated recovery." Under one alternative format, for example, funeral directors may quote a single price for professional services and caskets. That price can be structured to achieve a graduated recovery effect. Even under the alternative list, funeral directors can price caskets to achieve the same result.

Nevertheless, some funeral directors may choose to raise the prices of the lowest-priced package funeral. The impact of this change, however, may not be great for two reasons. First, such increases may be offset by savings which consumers can achieve by declining unwanted items. Second increased price competition will generate pressure to keep prices down. Finally, nothing in the rule will prevent funeral directors from meeting any perceived social responsibility to make services available at nominal charges for welfare cases or from charging special lower prices for infant deaths or other special cases.

The evidence submitted during the rulemaking proceeding is consistent with the Commission's finding that while itemization presents opportunities for funeral providers to raise prices, which some funeral directors have in fact done, it is not necessarily required by the rule itself. Many funeral directors testified that prices increased after itemization,[303] while others testified that their prices did *not* increase.[304]

VI. Other Matters

A. *Effective Dates.* Because of the legislative review provisions set forth in Section 21 of the FTC Improvements Act of 1980, the effective date of this rule is most appropriately tied to the conclusion of the legislative veto period.[305] Under the terms of the statute, that period runs for ninety calendar days of continuous legislative session.

Industry members have been on notice since July, 1981, of the terms of the rule. In addition, the rule and this statement will be available during the legislative review process, which is likely to take at least four months. We have determined that the rule should become effective three months after conclusion of Congressional review. We believe that three months is a sufficient amount of time both the industry and consumers to become familiar with the requirements of the rule given the opportunity to become familiar with the rule during the legislative review. The Commission will accept petitions for exemption, pursuant to § 453.9 of the rule, during this period.

B. *Mandatory Review.* Section 432.10 requires the Commission to initiate a rulemaking amendment proceeding, pursuant to Section 18(d)(2)(B) of the Federal Trade Commission Act, within four years after the effective date of this rule, to determine whether the rule should be amended or terminated. Under the terms of Section 18(d)(2)(B) and the Commission's rules of practice, an amendment proceeding will provide full opportunity for all interested parties to provide data and views on the question of whether the rules should be modified or terminated, and will include the rights available under a Magnuson-Moss proceeding to limited cross-examination.

In addition, the Commission is required to decide, within eighteen months after the rulemaking amendment proceeding has been initiated, whether the rule should be modified or terminated.

The Commission has established this early review procedure to ensure that there is a need to continue the rule after it has had an opportunity to work in the marketplace. If the rule operates as expected, there should be increased competition in the market which may obviate the need for continued federal intervention. Requiring an early amendment proceeding commits the Commission to conducting a public proceeding, open to full participation, to review the operation of the rule and its effect. At this time, the Commission expects to have data from its own internal impact evaluation to aid in the consideration of these issues. The Commission will consider whether the rule should be modified or terminated at that time.

While the rule is expected to increase price competition, the Commission cannot say on the basis of the present record when the rule's impact will begin to be felt. For a number of reasons, the effect of the rule may take longer than in other industries.[306] Nevertheless, the Commission is committed to reviewing, at an early date, whether the rule appears to be operating as expected or whether some modification is required. If the marketplace problems addressed by the rule appear to be largely solved by increased competition, the Commission will consider terminating the rule at that time.

Accordingly, Title 16 of the Code of Federal Regulations is amended by the addition of new Part 453.

PART 453—FUNERAL INDUSTRY PRACTICES

Sec.

453.1 Definitions.
453.2 Price disclosures.
453.3 Misrepresentations.

than educated white consumers, *see* CalCAG Study, *supra* not 247, at 30–31).

The Commission does not suggest that such subsidization is improper, nor does it believe that it is the Commission's function to judge the social value of such a pricing scheme. The Commission recognizes that many items in our economy have a pricing structure in which some items contribute proportionately more to profit than to other items.

[302] This result does not follow directly from the rule, but from the funeral director's reluctance to disclose different prices to different people for the same items. A Rappaport, III–I–111, at 10–11; Oral Presentation of Tom Clark, GC, NFDA, at 154.

Hultquist, California FDA, Tx 7602. *Cf.* J. Wylie, Exec. Director, Florida FDA, Tx 8723–24.

[305] The present legislative review provision is scheduled to terminate on September 30, 1982. If no other legislative review process applies after that date, the legislative review process will be considered concluded for the purposes of determining the effective date of the rule.

[306] As discussed previously, the purchase of a funeral is infrequent. Consequently, many consumers will not have exposure to price lists or other provisions of the rule for many years. Thus, the stimulus for price competition, at least initially, is likely to come from sellers rather than buyers. The extent to which new entrants begin to compete on the basis of price, or which existing sellers begin to compete or advertise prices, is likely to determine how quickly competition begins to affect the marketplace. Considering the industry's tradition opposition to price advertising, and other constraints on price competition and barriers to entry, it is difficult to predict how quickly such competition will emerge.

453.4 Required purchase of funeral goods or funeral services.
453.5 Services provided without prior approval.
453.6 Retention of documents.
453.7 Comprehension of disclosures.
453.8 Declaration of intent.
453.9 State exemptions.
453.10 Mandatory review.

Authority: Sec. 6(g) 38 Stat. 721 (15 U.S.C. 46(g); 80 Stat. 383, as amended, 81 Stat. 54 (5 U.S.C. 552).

§ 453.1 Definitions.

(a) *Accounting year.* "Accounting year" refers to the particular calendar year or other one year period used by a funeral provider in keeping financial records for tax or accounting purposes.

(b) *Alternative container.* An "alternative container" is a non-metal receptacle or enclosure, without ornamentation or a fixed interior lining, which is designed for the encasement of human remains and which is made of cardboard, pressed-wood, composition materials (with or without an outside covering) or pouches of canvas or other materials.

(c) *Cash advance item.* A "cash advance item" is any item of service or merchandise described to a purchaser as a "cash advance," "accommodation," "cash disbursement," or similar term. A cash advance item is also any item obtained from a third party and paid for by the funeral provider on the purchaser's behalf. Cash advance items may include, but are not limited to, the following items: Cemetery or crematory services; pallbearers; public transportation; clergy honoraria; flowers; musicians or singers; nurses; obituary notices; gratuities and death certificates.

(d) *Casket.* A "casket" is a rigid container which is designed for the encasement of human remains and which is usually constructed of wood, metal, or like material, and ornamented and lined with fabric.

(e) *Commission.* "Commission" refers to the Federal Trade Commission.

(f) *Cremation.* "Cremation" is a heating process which incinerates human remains.

(g) *Crematory.* A "crematory" is any person, partnership or corporation that performs cremation and sells funeral goods.

(h) *Direct cremation.* A "direct cremation" is a disposition of human remains by cremation, without formal viewing, visitation, or ceremony with the body present.

(i) *Funeral goods.* "Funeral goods" are the goods which are sold or offered for sale directly to the public for use in connection with funeral services.

(j) *Funeral provider.* A "funeral provider" is any person, partnership or corporation that sells or offers to sell funeral goods and funeral services to the public.

(k) *Funeral services.* "Funeral services" are any services which may be used to care for and prepare deceased human bodies for burial, cremation or other final disposition; and arrange, supervise or conduct the funeral ceremony or the final disposition of deceased human bodies.

(l) *Immediate burial.* An "immediate burial" is a disposition of human remains by burial, without formal viewing, visitation, or ceremony with the body present, except for a graveside service.

(m) *Outer burial container.* An "outer burial container" is any container which is designed for placement in the grave around the casket including, but not limited to, containers commonly known as burial vaults, grave boxes, and grave liners.

(n) *Person.* A "person" is any individual, partnership, corporation, association, government or governmental subdivision or agency, or other entity.

(o) *Services of funeral director and staff.* The "services of funeral director and staff" are the services, not included in prices of other categories in § 453.2(b)(4) which may be furnished by a funeral provider in arranging and supervising a funeral, such as conducting the arrangements conference, planning the funeral, obtaining necessary permits and placing obituary notices.

(p) *Unfinished wood box.* An "unfinished wood box" is an unornamented casket made of wood which does not have a fixed interior lining.

§ 453.2 Price disclosures.

(a) *Unfair or deceptive acts or practices.* In selling or offering to sell funeral goods or funeral services to the public, it is an unfair or deceptive act or practice for a funeral provider to fail to furnish price information disclosing the cost to the purchaser for each of the specific funeral goods and funeral services used in connection with the disposition of deceased human bodies, including at least the price of embalming, transportation of remains, use of facilities, caskets, outer burial containers, immediate burials, or direct cremations, to persons inquiring about the purchase of funerals. Any funeral provider who complies with the preventive requirements in paragraph (b) of this section is not engaged in the unfair or deceptive acts or practices defined here.

(b) *Preventive requirements.* To prevent these unfair or deceptive acts or practices, as well as the unfair or deceptive acts or practices defined in § 453.4(b)(1), funeral providers must:

(1) *Telephone price disclosures.* (i) Tell persons who call the funeral provider's place of business and ask about the terms, conditions, or prices at which funeral goods or funeral services are offered, that price information is available over the telephone.

(ii) Tell persons who ask by telephone about the funeral provider's offerings or prices any accurate information from the price lists in paragraph (b)(2) through (4) of this section which reasonably answers the question and any other information which reasonably answers the question and which is readily available.

(2) *Casket price list.* (i) Give a printed or typewritten price list to people who inquire in person about the offerings or prices of caskets or alternative containers. The funeral provider must offer the list upon beginning discussion of, but in any event before showing caskets. The list must contain at least the retail prices of all caskets and alternative containers offered which do not require special ordering, enough information to identify each, and the effective date for the price list. In lieu of a written list, other formats, such as notebooks, brochures, or charts may be used if they contain the same information as would the printed or typewritten list, and display it in a clear and conspicuous manner. *Provided however,* that funeral providers do not have to make a casket price list available if the funeral providers place on the general price list, specified in paragraph (b)(4) of this section, the information which is required by this paragraph (b)(2)(i) of this section.

(ii) Place on the list, whether a printed or typewritten list or other format is used, the name of the funeral provider's place of business and a caption describing the list as a "casket price list."

(3) *Outer burial container price list.* (i) Give a printed or typewritten price list to persons who inquire in person about outer burial container offerings or prices. The funeral provider must offer the list upon beginning discussion of, but in any event before showing the containers. The list must contain at least the retail prices of all outer burial containers offered which do not require special ordering, enough information to identify each container, and the effective date for the prices listed. In

lieu of a written list, the funeral provider may use other formats, such as notebooks, brochures, or charts, if they contain the same information as the printed or typewritten list, and display it in a clear and conspicuous manner. *Provided however,* that funeral providers do not have to make an outer burial container price list available if the funeral providers place on the general price list, specified in paragraph (b)(4) of this section, the information which is required by this paragraph (b)(3)(i) of this section.

(ii) Place on the list, whether a printed or typewritten list or other format is used, the name of the funeral provider's place of business and a caption describing the list as an "outer burial container price list."

(4) *General price list.* (i) Give a printed or typewritten price list for retention to persons who inquire in person about funeral arrangements or the prices of funeral goods or funeral services. When people inquire in person about funeral arrangements or the prices of funeral goods or funeral services, the funeral provider must offer them the list upon beginning discussion either of funeral arrangements or of the selection of any funeral goods or funeral services. This list must contain at least the following information:

(A) The name, address, and telephone number of the funeral provider's place of business;

(B) A caption describing the list as a "general price list";

(C) The effective date for the price list; and

(D) In immediate conjunction with the price disclosures required by paragraph (b)(4)(ii) of this section, the statement: "This list does not include prices for certain items that you may ask us to buy for you, such as cemetery or crematory services, flowers, and newspaper notices. The prices for those items will be shown on your bill or the statement describing the funeral goods and services you selected."

(ii) Include on the price list, in any order, the retail prices (expressed either as the flat fee, or as the price per hour, mile or other unit of computation) and the other information specified below for at least each of the following items, if offered for sale:

(A) Forwarding of remains to another funeral home, together with a list of the services provided for any quoted price;

(B) Receiving remains from another funeral home, together with a list of the services provided for any quoted price;

(C) The price range for the direct cremations offered by the funeral provider, together with: *(1)* A separate price for a direct cremation where the purchaser provides the container; *(2)* separate prices for each direct cremation offered including an unfinished wood box or alternative container; and *(3)* a description of the services and container (where applicable), included in each price;

(D) The price range for the immediate burials offered by the funeral provider, together with: *(1)* A separate price for an immediate burial where the purchaser provides the casket; *(2)* separate prices for each immediate burial offered including a casket or alternative container; and *(3)* a description of the services and container (where applicable) included in that price;

(E) Transfer of remains to funeral home;

(F) Embalming;

(G) Other preparation of the body;

(H) Use of facilities for viewing;

(I) Use of facilities for funeral ceremony;

(J) Other use of facilities, together with a list of facilities provided for any quoted price;

(K) Hearse;

(L) Limousine;

(M) Other automotive equipment, together with a description of the automotive equipment provided for any quoted price; and

(N) Acknowledgment cards.

(iii) Include on the price list, in any order, the following information:

(A) Either of the following:

(1) The price range for the caskets offered by the funeral provider, together with the statement: "A complete price list will be provided at the funeral home."; or

(2) The prices of individual caskets, disclosed in the manner specified by paragraph (b)(2)(i) of this section; and

(B) Either of the following:

(1) The price range for the outer burial containers offered by the funeral provider, together with the statement: "A complete price list will be provided at the funeral home."; or

(2) The prices of individual outer burial containers, disclosed in the manner specified by paragraph (b)(3)(i) of this section; and

(C) Either of the following:

(1) The price for the services of funeral director and staff, together with a list of the principal services provided for any quoted price and, if the charge cannot be declined by the purchaser, the statement: "This fee for our services will be added to the total cost of the funeral arrangements you select. (This fee is already included in our charges for direct cremations, immediate burials, and forwarding or receiving remains.)"; or

(2) The following statement: "Please note that a fee for the use of our services is included in the price of our caskets. Our services include (specify)." The statement must be placed on the general price list together with casket price range, required by paragraph (b)(4)(iii)(A)*(1)* of this section, or together with the prices of individual caskets, required by (b)(4)(iii)(A)*(2)*.

(5) *Statement of funeral goods and services selected.* (i) Give an itemized written statement for retention to each person who arranges a funeral or other disposition of human remains, at the conclusion of the discussion of arrangements. The statement must list at least the following information:

(A) The funeral goods and funeral services selected by that person and the prices to be paid for each of them;

(B) Specifically itemized cash advance items. (These prices must be given to the extent then known or reasonably ascertainable. If the prices are not known or reasonably ascertainable, a good faith estimate shall be given and a written statement of the actual charges shall be provided before the final bill is paid.); and

(C) The total cost of the goods and services selected.

(ii) The information required by this paragraph (b)(5) of this section may be included on any contract, statement, or other document which the funeral provider would otherwise provide at the conclusion of discussion of arrangements.

(6) *Other pricing methods.* Funeral providers may give persons any other price information, in any other format, in addition to that required by paragraph (b) (2), (3), and (4) of this section so long as the statement required by paragraph (b)(5) of this section is given when required by the rule.

§ 453.3 Misrepresentations.

(a) *Embalming Provisions.*—(1) *Deceptive acts or practices.* In selling or offering to sell funeral goods or funeral services to the public, it is a deceptive act or practice for a funeral provider to:

(i) Represent that state or local law requires that a deceased person be embalmed when such is not the case;

(ii) Fail to disclose that embalming is not required by law except in certain special cases.

(2) *Preventive requirements.* To prevent these deceptive acts or practices, as well as the unfair or deceptive acts or practices defined in §§ 453.4(b)(1) and 453.5(2), funeral providers must:

(i) Not represent that a deceased person is required to be embalmed for

direct cremation, immediate burial, a funeral using a sealed casket, or if refrigeration is available and the funeral is without viewing or visitation and with a closed casket when state or local law does not require embalming; and

(ii) Place the following disclosure on the general price list, required by § 453.2(b)(4), in immediate conjunction with the price shown for embalming: "Except in certain special cases, embalming is not required by law. Embalming may be necessary, however, if you select certain funeral arrangements, such as a funeral with viewing. If you do not want embalming, you usually have the right to choose an arrangement which does not require you to pay for it, such as direct cremation or immediate burial."

(b) *Casket for cremation provisions.* (1) *Deceptive acts or practices.* In selling or offering to sell funeral goods or funeral services to the public, it is a deceptive act or practice for a funeral provider to:

(i) Represent that state or local law requires a casket for direct cremations;

(ii) Represent that a casket (other than an unfinished wood box) is required for direct cremations.

(2) *Preventive requirements.* To prevent these deceptive acts or practices, as well as the unfair or deceptive acts or practices defined in § 453.4(a)(1), funeral providers must place the following disclosure in immediate conjunction with the price range shown for direct cremations: "If you want to arrange a direct cremation, you can use an unfinished wood box or an alternative container. Alternative containers can be made of materials like heavy cardboard or composition materials (with or without an outside covering), or pouches of canvas." This disclosure only has to be placed on the general price list if the funeral provider arranges direct cremations.

(c) *Outer burial container provisions.*—(1) *Deceptive acts or practices.* In selling or offering to sell funeral goods and funeral services to the public, it is a deceptive act or practice for a funeral provider to:

(i) Represent that state or local laws or regulations, or particular cemeteries, require outer burial containers when such is not the case;

(ii) Fail to disclose to persons arranging funerals that state law does not require the purchase of an outer burial container.

(2) *Preventive requirement.* To prevent these deceptive acts or practices, funeral providers must place the following disclosure on the outer burial container price list, required by § 453.2(b)(3)(ii), or, if the prices of outer burial containers are listed on the general price list, required by § 453.2(b)(4), in immediate conjunction with those prices: "In most areas of the country, no state or local law makes you buy a container to surround the casket in the grave. However, many cemeteries ask that you have such a container so that the grave will not sink in. Either a burial vault or a grave liner will satisfy these requirements."

(d) *General provisions on legal and cemetery requirements.*—(1) *Deceptive acts or practices.* In selling or offering to sell funeral goods or funeral services to the public, it is a deceptive act or practice for funeral providers to represent that federal, state, or local laws, or particular cemeteries or crematories, require the purchase of any funeral goods or funeral services when such is not the case.

(2) *Preventive requirements.* To prevent these deceptive acts or practices, as well as the deceptive acts or practices identified in § 453.3(a)(1), § 453.3(b)(1), and § 453.3(c)(1), funeral providers must identify and briefly describe in writing on the statement of funeral goods and services selected (required by § 453.2(b)(5)) any legal, cemetery, or crematory requirement which the funeral provider represents to persons as compelling the purchase of funeral goods or funeral services for the funeral which that person is arranging.

(e) *Provisions on preservative and protective value claims.* In selling or offering to sell funeral goods or funeral services to the public, it is a deceptive act or practice for a funeral provider to:

(1) Represent that funeral goods or funeral services will delay the natural decomposition of human remains for a long-term or indefinite time;

(2) Represent that funeral goods have protective features or will protect the body from gravesite substances, when such is not the case.

(f) *Cash advance provisions.*—(1) *Deceptive acts or practices.* In selling or offering to sell funeral goods or funeral services to the public, it is a deceptive act or practice for a funeral provider to:

(i) Represent that the price charged for a cash advance item is the same as the cost to the funeral provider for the item when such is not the case;

(ii) Fail to disclose to persons arranging funerals that the price being charged for a cash advance item is not the same as the cost to the funeral provider for the item when such is the case.

(2) *Preventive requirements.* To prevent these deceptive acts or practices, funeral providers must place the following sentence in the general price list, at the end of the cash advances disclosure, required by § 453.2(b)(4)(ii)(C): "We charge you for our services in buying these items," if the funeral provider makes a charge upon, or receives and retains a rebate, commission or trade or volume discount upon a cash advance item.

§ 453.4 Required purchase of funeral goods or funeral services.

(a) *Casket for cremation provisions.*—(1) *Unfair or deceptive acts or practices.* In selling or offering to sell funeral goods or funeral services to the public, it is an unfair or deceptive act or practice for a funeral provider, or a crematory, to require that a casket other than an unfinished wood box be purchased for direct cremation.

(2) *Preventive requirement.* To prevent this unfair or deceptive act or practice, funeral providers must make an unfinished wood box or alternative container available for direct cremations, if they arrange direct cremations.

(b) *Other required purchases of funeral goods or funeral services.*—(1) *Unfair or deceptive acts or practices.* In selling or offering to sell funeral goods or funeral services, it is an unfair or deceptive act or practice for a funeral provider to condition the furnishing of any funeral good or funeral service to a person arranging a funeral upon the purchase of any other funeral good or funeral service, except as required by law or as otherwise permitted by this part.

(2) *Preventive requirements.* (i) To prevent this unfair or deceptive act or practice, funeral providers must:

(A) Place the following disclosure in the general price list, immediately above the prices required by § 453.2(b)(4)(ii) and (iii): "The goods and services shown below are those we can provide to our customers. You may choose only the items you desire. If legal or other requirements mean you must buy any items you did not specifically ask for, we will explain the reason in writing on the statement we provide describing the funeral goods and services you selected."

Provided, however, That if the charge for "services of funeral director and staff" cannot be declined by the purchaser, the statement shall include the sentence: "However, any funeral arrangements you select will include a charge for our services" between the second and third sentences of the statement specified above herein; and

(B) Place the following disclosure on the statement of funeral goods and services selected, required by § 453.2(b)(5)(ii): "Charges are only for

those items that are used. If we are required by law to use any items, we will explain the reasons in writing below."

(ii) A funeral provider shall not violate this section by failing to comply with a request for a combination of goods or services which would be impossible, impractical, or excessively burdensome to provide.

§ 453.5 Services provided without prior approval.

(a) *Unfair or Deceptive Acts or practices.* In selling or offering to sell funeral goods or funeral services to the public, it is an unfair or deceptive act or practice for any provider to embalm a deceased human body for a fee unless:

(1) State or local law or regulation requires embalming in the particular circumstances regardless of any funeral choice which the family might make; or

(2) Prior approval for embalming (expressly so described) has been obtained from a family member or other authorized person; or

(3) The funeral provider is unable to contact a family member or other authorized person after exercising due diligence, has no reason to believe the family does not want embalming performed, and obtains subsequent approval for embalming already performed (expressly so described). In seeking approval, the funeral provider must disclose that a fee will be charged if the family selects a funeral which requires embalming, such as a funeral with viewing, and that no fee will be charged if the family selects a service which does not require embalming, such as direct cremation or immediate burial.

(b) *Preventive requirement.* To prevent these unfair or deceptive acts or practices, funeral providers must include on the contract, final bill, or other written evidence of the agreement or obligation given to the customer, the statement: "If you selected a funeral which requires embalming, such as a funeral with viewing you may have to pay for embalming. You do not have to pay for embalming you did not approve if you selected arrangements such as a direct cremation or immediate burial. If we charged for embalming, we will explain why below."

§ 453.6 Retention of documents.

To prevent the unfair or deceptive acts or practices specified in § 453.2 and § 453.3 of this rule, funeral providers must retain and make available for inspection by Commission officials true and accurate copies of the price lists specified in § 453.2(b) (2) through (4), as applicable, for at least one year after the date of their last distribution to customers, and a copy of each statement of funeral goods and services selected, as required by § 453.2(b) (5) for at least one year from the date on which the statement was signed.

§ 453.7 Comprehension of disclosures.

To prevent the unfair or deceptive acts or practices specified in § 453.2 through § 453.5, funeral providers must make all disclosures required by those sections in a clear and conspicuous manner.

§ 453.8 Declaration of intent.

(a) Except as otherwise provided in § 453.2(a), it is a violation of this rule to engage in any unfair or deceptive acts or practices specified in this rule, or to fail to comply with any of the preventive requirements specified in this rule;

(b) The provisions of this rule are sparate and severable from one another. If any provision is determined to be invalid, it is the Commission's intention that the remaining provisions shall continue in effect.

(c) This rule shall not apply to the business of insurance or to acts in the conduct thereof.

§ 453.9 State exemptions.

If, upon application to the Commission by an appropriate state agency, the Commission determines that:

(a) There is a state requirement in effect which applies to any transaction to which this rule applies; and

(b) That state requirement affords an overall level of protection to consumers which is as great as, or greater than, the protection afforded by this rule;

then the commission's rule will not be in effect in that state to the extent specified by the Commission in its determination, for as long as the State administers and enforces effectively the state requirement.

§ 453.10 Mandatory review.

No later than four years after the effective date of this rule, the Commission shall initiate a rulemaking amendment proceeding pursuant to section 18(d)(2)(B) to determine whether the rule should be amended or terminated. The Commission's final decision on the recommendations of this proceeding shall be made no later than eighteen months after the initiation of the proceeding.

Dissenting Statement of James C. Miller III, Chairman, Federal Trade Commission on Funeral Rule

I cannot in good conscience go along with a final rule affecting the funeral industry at this time. I do not oppose a rule in principle. Indeed, I've always said that this is an area worthy of Commission investigation. But for the reasons set forth below, I believe that action at this time is ill-advised.

Furthermore, I want to make it clear that I respect the views held by my colleagues on the Commission. This is neither a Republican nor a Democratic issue. It is neither conservative nor liberal. The question is whether the action taken today can be defended. I believe it cannot.

The basic reason for my opposition to today's action is the lack of evidence in the record. That record is woefully inadequate for a proceeding that has lasted 10 years. In my view, the Commission does not have a reliable description of the industry, much less a working knowledge of how it operates. The facts presented are often contradictory, are heavily anecdotal, and may not be representative of industry practices. From what description can be gleaned from the record, two theories seem to fit equally well: (a) That the industry is operating quite effectively, and (b) that the industry is vitiated with market imperfections crying out for governmental intervention.[1]

Nor do we have any basis in the record to conclude that the rule approved today will adequately deal with alleged market imperfections, *assuming* they exist. For example, the requirement that services be "unbundled" can easily be circumvented by funeral directors' simply charging higher prices for services a' la carte. (The point about the price of a new automobile's being far less than the summed prices of all new parts is particularly relevant here.)

Moreover, certain provisions may actually harm consumers. For example, the only empirical evidence we have of the effects of forced unbundling (in Minnesota) suggests increased costs to consumers. Also, the requirement of prior authorization before embalming may well raise costs to consumers, diminish their satisfaction with the overall service, or have both effects.

Because of the paucity of evidence in the record, I believe it is likely the courts would sustain a legal challenge to the rule. This risk could have been mitigated if the Commission had taken my recommendation and had reopened the rulemaking record for the submission of additional evidence. The Commission's own "baseline" study, in particular, should have been entered into the record, even if this would have meant a few months delay while the Commission accepted public comment on it.

Portions of the baseline study seriously challenge the theory of market imperfections that is implicit in the Commission's action. For those who think the baseline study actually supports the Commission's rule, it is ironic that by refusing to admit it into evidence the Commission forgoes the opportunity to use the study's results to support the rule, but enable anyone to use it in challenging the Commission's action.

Beyond the integrity and sufficiency of the formal record—on which of course the Commission's decision must be based—there is one other matter I wish to touch upon

[1] The memoranda of Timothy J. Muris, Director of the Bureau of Consumer Protection, and Robert D. Tollison, Director of the Bureau of Economics, disclose in detail these deficiencies in the record.

briefly. I believe that the Commission's action today will make it considerably more difficult to resist efforts by the "learned professions" to obtain exemption from FTC laws concerning unfairness and deception, and from FTC enforcement of the antitrust laws. Indeed, there is a plausible argument that the objects of the Commission's action—funeral directors—would be exempt under the language already adopted by the Senate Commerce Committee ("Federal Trade Commission Amendments Act of 1982").

In conclusion, I fear that the Commission has deceived a very vulnerable segment of American consumers. The Commission's action is deceptive because it raises expectations of lower prices for funerals and better service, when in fact we have little evidence to believe the rule would have these effects. It is also deceptive because the rule may well be reversed in the courts. As if this were not enough, the Commission's action places in further jeopardy a much more important matter—the Commission's efforts to police anticompetitive, unfair, and deceptive practices in the professions.

In view of the inadequacy of the record, I respectfully dissent from the Commission's action. In the larger view of all that is at stake, I fear that in this case the Commission is showing signs of returning to its errant past of regulating first and asking the right questions later.

Part IV

Office of Personnel Management

Demonstration Project: An Integrated Approach to Pay, Performance Appraisal, and Position Classification

OFFICE OF PERSONNEL MANAGEMENT

Demonstration Project: An Integrated Approach to Pay, Performance Appraisal, and Position Classification

AGENCY: Office of Personnel Management.

ACTION: Notice of amendment of demonstration project plan and inclusion of technical specialists, administrative specialists, and clerical/assistant positions in the demonstration project.

SUMMARY: This notice identifies the Technical Specialist, Administrative Specialist, and Clerical/Assistant career paths by classification level and shows their relationships to current grade levels. In addition, the notice modifies the amount of salary increase for promotions, changes the labeling of performance groups, permits the combination of performance rating groups within RIF retention groups, and revises the description of the performance rating reconsideration process.

EFFECTIVE DATE: September 19, 1982.

FOR FURTHER INFORMATION CONTACT:

(1) In San Diego, California: Susan Rainville (714) 225–2131;
(2) In China Lake, California: Robert M. Glen (714) 939–2434;
(3) In Washington, D.C.: Donald Hill (202) 254–6486.

SUPPLEMENTARY INFORMATION:

Background

The Office of Personnel Management (OPM) approved a demonstration project, "An Integrated Approach to Pay, Performance Appraisal, and Position Classification for More Effective Operation of Government Organizations," and published the final project plan in the **Federal Register** on Friday, April 18, 1980 (45 FR 26504). Under the section "Types and Numbers of Participating Employees" (45 FR 26513), the approved project plan provides for the addition of other categories of employees as project number limitations and successful experience permit, subject to consultation and agreement with OPM.

Administrative personnel at the GS–12 level entered the demonstration project on January 11, 1981, to complete classification/pay ban level III. In a notice published in the **Federal Register** on July 28, 1981 (46 FR 38660), OPM identified the technician career path by classification level and showed its relationship to grade levels in the General Schedule. Technicians entered the demonstration project on August 23, 1981. In addition, the Notice amended procedures for converting employees existing from the demonstration project to positions in the General Schedule.

Additional Categories of Participating Employees.

Administrative and technical specialists GS 5–11 will enter the Navy Demonstration Project this year on or after September 19, 1982. Clerical and other assistant positions are scheduled to enter the demonstration project in August 1983. However, management's ability to handle additional personnel and the absence of clerical employee objection to early entrance into the project persuaded OPM to approve Navy's request for early entrance of clerical and assistant positions into the demonstration project. Therefore, all clerical/assistant positions at the Naval Ocean Systems Center (NOSC) only will enter the demonstration project on or after September 19, 1982. Because demonstration projects are limited to 5,000 employees, both Centers cannot enter their total clerical work force. Therefore, to provide for a realistic evaluation of a total clerical career path, the Naval Weapons Center (NWC) will limit the project to the other career paths to allow NOSC to use the available numbers to cover clerical/assistant positions.

Project Plan Modifications

The technician career path has been modified by NOSC and the administrative and technical specialist career paths modified by both Centers as indicated in revised Table 5.

The performance appraisal section has been modified to eliminate specific requirements to use the performance labels "O, E, M, B and N." Conforming changes have been made to the RIF section which refers also to "O, E, M, B and N." Additionally, the Centers are permitted to combine performance rating groups within RIF retention groups. The principle of performance as the primary retention criterion is unchanged, as is the relative importance of the remaining factors, tenure, veterans' preference and length of service. The two lower performance rating groups (formerly "B" and "N"), which both represent marginal performers, can be combined under this modification into the lowest RIF retention group.

The provision which specifies the minimum amount an employee may receive at the time of promotion has been modified.

The wording of the "Reconsideration of Performance Rating" section has been modified to more closely parallel the Navy grievance procedure under which Merit Pay performance ratings are reconsidered. The Navy grievance procedure had not been developed at the time the Project Plan was written. This revision will simplify the procedure while protecting employees' due process rights.

OPM Review of Navy Project Plan Modifications

Draft modifications to the Navy demonstration project were transmitted to OPM via telecopier in January 1982 and discussed by NOSC, NWC, and OPM staff in a meeting held at OPM on January 19, 1982. OPM staff members concurred generally with the requested modifications to the project plan. The Commanders of the Naval Weapons Center and the Naval Ocean Systems Center sent a joint letter dated April 9 and 16, 1982 to OPM requesting an August 1982 entry into the demonstration project of administrative and technical specialists at both Centers and clerical/assistants at NOSC only. The letter contained a description of the demonstration career paths and pay levels and requested approval of other project modifications. OPM program staff concurred with the proposed modifications to the project plan and asked NWC and NOSC to proceed with employee discussion and informal hearings. Briefings and meetings were held with employees during April and May. Various written materials and articles were distributed to employees also.

Comments

Informal hearings during which employees could comment on the entry of additional employees into the project plan, the proposed career paths and pay levels, and project modifications were held in Hawaii on May 12, 1982, in San Diego on May 18, 1982, and in China Lake on May 26, 1982. Suitable periods were provided for written comments. Three employees made comments during the hearing at Hawaii, none at San Diego, and four at China Lake. Twelve employees at NOSC and four at NWC submitted written comments. These comments were directed at the following concerns:

1. Six of the eight persons commenting from the Naval Weapons Center objected to the change in the administrator/specialist pay band in which GS–11 was moved from level II to level III to form a pay band composed of GS–11 and GS–12. GS–13 was removed from level III. An administrative employee under the modification must

now be moved up by positive management action to the DP career band which contains both GS–12 and 13. Employees complained that the modification to the career paths and pay levels (a) deviated from earlier understandings and proposals for the administrative career paths and pay levels; (b) moved away from the stated objective of the demonstration project to base salary on performance and returned to the old classification system with its emphasis on the full journeyman level; and (c) set up separate career paths for administrators (DA) and specialists (DS) which are similar to the one-grade-advancement-level technician career path (DT), thereby considering them as less than professionals, in spite of their degrees and credentials, with the implication that they are "less valued" to the organization. In responding to OPM's inquiry concerning these comments and the reasons for the change in career paths, NWC explained that it decided to separate the administrator/specialist career paths, redefine the level III in those career paths as 11/12 instead of 11/13 after considering the following factors:

—Lack of honogeneity of the administrative and specialist population.
—Pay equity within NWC and throughout the Federal system.
—Multiple full performance levels in administrative/specialist occupations.
—Higher starting pay for scientists and engineers and higher salary (grade levels) in general in the market place.
—Different rates of development and promotions for the occupational groups.
—Degree vs non-degree (scientists and engineers require a degree or equivalency).

NWC management decided that the advantages of resolving "the pay equity" issue outweighed the disadvantages of not resolving the "relative status" issue.

2. The remaining two comments from NWC were complaints about (a) management's alleged emphasis on degrees and time in service, rather than properly on performance, and (b) a system which permits an employee to become a supervisor without getting a salary increase.

3. Four NOSC employees offered their support for the demonstration project. Three of the four offered suggestions for further improvement of the project. The employees suggested that the Centers should:

—Consider the quality and total effort expended, in addition to quantitative measures, when assessing performance. Additionally, the Centers should base merit pay increases on salary amounts rather than incentive points.
—Create additional career paths which permit movement from the clerical/assistant career path to the administrative specialist career path.
—Eliminate barriers between division secretary jobs (GS–5) and department secretary jobs (GS–6) and reward their accomplishments.

4. Four NOSC employees objected to modification of the RIF section and one employee urged management to go further than it has gone by suggesting an additional modification. The suggested modification is that NOSC give managers flexibility to make as many divisions of retention groups as there are performance ratings and assess performance on the immediate past performance rating. The objections are:

—Basing retention standing on only one performance rating. Employees suggested use of a weighted point system.
—Including an employee with a "below objectives" performance rating in the lowest retention standing with employees who have been given the "needs improvement" performance rating. Suggested that retention standing be based on two successive performance rating periods.
—Placing too much emphasis on subjective performance appraisals.
—Determining retention in a system which judges performance in relation to current pay. Inequities occur because entry-level employees within a pay band will be judged against lower salaries, and higher ratings will be easier to achieve. In the event of RIF, the system will be biased toward retaining the less experienced entry level employee.

5. Three NOSC employees commented on the performance appraisal system. One employee stated that performance objectives were watered down and too subjective and suggested that points be assigned. Another employee complained that upper-level management changes performance reward recommendations of the employee's immediate supervisor and modifies the original performance rating structure. The third employee noted that the point distribution system causes higher graded personnel to receive a higher percentage of the two highest performance categories than lower graded personnel.

6. One NOSC employee requested that the 10% promotion policy be retained because such factors as date of pay raise, being at the bottom of a pay level because of a recent promotion, and being at the top of a pay level for a long time because of unavailable promotions cause inequities.

7. Other comments were phrased as questions about aspects of the project, such as the combination of former grade levels, dollar value of performance award points, and the difference between career levels.

Office of Personnel Management.

Donald J. Devine,

Director.

The demonstration project plan, An Integrated Approach to Pay, Performance Appraisal, and Position Classification for More Effective Operation of Government Organizations, published in the **Federal Register** on Friday, April 18, 1980, 45 FR 26504–26543, amended by a Notice published in the **Federal Register** on Tuesday, July 28, 1981, 46 FR 38660–38661, is further amended as follows:

1. *Pen and Ink Changes to Methodology Section.* In 45 FR 26507, under the section titled "Methodology", delete the words "one of five" in item (2). Change the title of Figure 1 to "An Example of a Pay and Performance Plan."

2. *Career Paths and Pay Levels as Related to Current GS Grade Levels.* Delete the section "Demonstration Elements, Classification levels", and Tables 4, 4A and 5, which are found in 45 FR 26513–26516 and 46 FR 38660–38661 and replace with the following new text and revised Tables 4 and 5:

Demonstration Elements

Classification levels. The heart of the project is the grouping of the currently used General Schedule (Grades GS 1–18 and PL) pay/classification system into fewer, broader levels of classification. The current GS system will remain as pay anchor for the project.

The project features five discrete career paths as follows: Demonstration Professional (DP)—Scientific, Engineering, and appropriate Supervisory, Managerial, and Specialist positions.

Demonstration Administrative (DA)—Professional Administrative positions;
Demonstration Specialists (DS)—Technical Specialist positions;
Demonstration Technical (DT)—Technician positions;
Demonstration General (DG)—Secretarial, Clerical and Assistant positions.

Table 4 illustrates typical (not all inclusive) GS series that comprise these Career Paths.

The broad pay bands will serve to enhance competitive recruitment of

quality candidates, as well as allow tangible performance-linked distinction between existing employees. Classification of employees under this system will be less burdensome and less susceptible to judgmental errors in precise grade placement.

The system, in fact, incorporates a rank in person system with its inherent flexibilities while retaining through the broad groupings the overall benefit of rank-in-job distinctions that can be reasonably applied by supervisors and managers.

BILLING CODE 6325-01-C

3. *Modification of Classification/ Performance/Qualification Standards Section.* In 45 FR 26516, under the section titled "Classification/ Performance/Qualification Standards", delete the first six paragraphs which begin with "The Classification levels for professionals * * *" through and including the paragraph which begins with "Level V." Replace with the following new text:

Within each career path, classification levels will differentiate between broad groups of employees based on degree of difficulty and responsibility.

Level A has been included, which covers cooperative education positions as well as apprentices and student aides.

Level V will be used where necessary to accommodate GS–16 through Public Law level candidates who are not offered or who decline Senior Executive Service (SES) membership.

4. *Modification of Incentive Pay Group Labels.* (a) In 45 FR 26516, under the section titled "Incentive Groups", delete starting with the sentence on line 5 which begins "Five incentive pay groups * * *" through the end of the paragraph and replace with the following new text:

Incentive pay groups will be established. Pay for these groups may be fixed as follows. Employees in the lowest performance category will not receive a salary increase. Employees in each of the remaining higher performance rating categories may receive correspondingly larger salary increases from available funds.

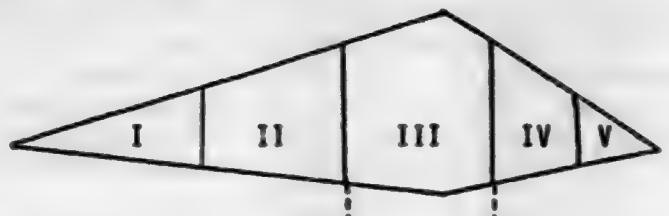
(b) Change the title of Figure 3 to read "Example of Incentive Pay Groupings Within Each Level."

5. *Modification of Mechanics of Incentive Pay and Promotions.* (a) In 45 FR 26517, under the section titled "Schedule and Mechanics of appraisals and Incentive Groupings," delete starting with the fourth sentence which begins with "In Incentive Group N * * *" through the rest of the paragraph and replace with the following new text:

Employees whose performance needs substantial improvement (but is not low enough for adverse or performance-based action) will be rated in the lowest incentive group. Those in this group will receive no salary increase. Higher performing emloyees will be placed in higher incentive groups and will receive salary increases based on the incentive group to which assigned. Placement in these groups will be recommended by individual supervisors. Involvement of higher level management will be used to ensure a broad-based equity among employees in separate work groups.

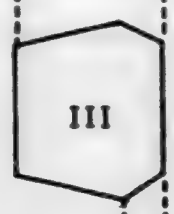
(b) In 45 26518, under the section titled "Compensation", delete the first sentence of the second paragraph and replace with the following new text:

For discussion purposes, a five incentive grouping system (O, E, M, B, N) as depicted earlier in Figure 3 will be used. Incentive group N is a zero increase category.



(c) In 45 FR 26518 and the continuation on page 26519, change the title of Table 6 to read "Example of Distribution of Individual Incentive Funds."

(d) In 45 FR 26519, under the section titled "Promotions," delete the words "increase of no less than 10%", and replace with the following text: "increase of up to 10% or the minimum salary of the level to which promoted, whichever is higher."



6. *Modification of the Reduction in Force Section.* (a) In 45 FR 26520, under the section titled "Reduction in Force," delete from the first sentence the words "fields (Technical Professional, Administrative, Technical, and Clerical)." and replace with the word "paths."

(b) In 45 FR 26521, delete Figure 5. Replace with the following revised Figure 5.

BILLING CODE 6325-01-M

Classification Levels (pay bands) within a career path

A Level (pay band)

Electronics Engineer, Level III
(Weapons Systems)
(Development)

A Single Competitive Level

NAME	TENURE	PREF	SCD

FIGURE 5. EXAMPLE OF RETENTION REGISTER FOR RIF PURPOSES

BILLING CODE 6325-01-C

(c) In 45 FR 28522, delete the chart and all text following the chart through the end of the section. Replace with the following new chart and text:

Incentive pay group (retention group)	Career (I) or career conditional (II)	Veteran (A) or non veteran (B)	30-Compensable (D)
1	I	A	D.
1	I	A	
1	I	B	
1	II	A	D.
1	II	A	
1	II	B	
2	I	A	D.
2	I	A	
2	I	B	
2	II	A	D.
2	II	A	
2	II	B	
3	I	A	D. etc.

The incentive pay group is the primary displacement tool. Performance rating groups may be combined into two or more "retention groups." Within each competitive level, employees in the higher retention group(s) are placed at the top of the retention register in standard tenure, veterans' preference, and length of service order. Employees in the lower performance group(s) are placed at the bottom of the retention register, in standard order, and are first to be released from the competitive level. Individuals in the higher retention groups always displace those in the lower group(s).

For discussion purposes, the higher retention group will be called Performance Group 1, and the lower, Performance Groups 2 and 3 respectively. The following example is an illustration of how RIF rules are applied. A Level III professional Electronics Engineer (specialty) within this competitive level, who is in retention group 1 and is a 30-compensable veteran with career tenure (1–I–A–D), would displace by inverse order of competitive level any employee of lesser retention standing in the same competitive level.

The same individual could bump any individual in the same professional career path with a retention standing of 1–I–A or lower who occupies a position for which the employee is qualified.

If this employee is unable to displace someone in the same competitive level or bump someone in another competitive level in the professional career path, the employee could retreat to a level II position he/she was promoted from or through, if the position is occupied by someone of lower subgroup or within the same subgroup but of lesser service computation date.

For retreat purposes (competition for a position from or through which the employee was promoted), employees in the lower retention group(s) may compete for lower level positions occupied by employees in the higher retention group(s). This special retreat provision recognizes that lower performing employees have reasonable potential for higher quality performance in a lower level position that they formerly held on were promoted through.

7. Modification of the Adverse Actions and Reconsiderations Section.

(a) In 45 FR 28522, under the section titled "Adverse Actions and Reconsiderations," delete sub-paragraph 1. Replace with the following revised sub-paragraph 1:

1. Reconsideration of Performance Ratings. A procedure for reconsideration of performance ratings is established wherein:

a. The deciding official is at a higher organization level than the individual who approved the original rating; and

b. When considered necessary by the deciding official, a fact finder from outside the chain-of-command of the employee may be appointed. The fact finder will gather and report the pertinent facts, and when requested, make a recommendation to the deciding official. A member of the personnel office staff will be available to assist the fact finder and the deciding official.

c. The decision of the deciding official is final.

The intent of the reconsideration process is to make it as informal as possible with a minimum of paperwork and at the same time to make it equitable to the affected employee.

(b) In 45 FR 28522, under the section titled "Adverse Actions and Reconsiderations," delete from the title and text of subparagraph 2 references to "N and B ratings" and substitute "lower performance ratings." In the second paragraph of subparagraph 2, delete the phrase "Incentive Group N." Replace with "the lowest performance rating group."

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 4974 of September 23, 1982

National School Lunch Week, 1982

By the President of the United States of America

A Proclamation

The National School Lunch Program—now in its 36th year—operates to provide nutritious and well-balanced meals for needy young people of our country. School lunch is an outstanding example of a close partnership of the Federal government with State governments and local communities to provide food, funds, and technical assistance for our efforts to provide nutrition assistance to these students.

The children and youth of our Nation are our greatest resource. The School Lunch Program demonstrates our awareness, our concern, and our willingness to work together to promote the health and well-being of our needy youth.

There are over 23 million lunches served every day in over 90,000 schools throughout the country. In an era of limited public resources, this effort is being met by resourceful and creative efforts at all levels of government and through the cooperation of parents, teachers, and civic groups.

By joint resolution approved on October 9, 1962, the Congress designated the week beginning on the second Sunday of October in each year as National School Lunch Week and requested the President to issue annually a proclamation calling for observance of that week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby urge the people of the United States to observe the week of October 10, 1982, as National School Lunch Week and to give special and deserved recognition to those people at the State and local level who, through their innovative efforts, have made it possible to have a successful school lunch program.

IN WITNESS WHEREOF, I have hereunto set my hand this 23rd day of Sept. in the year of our Lord nineteen hundred and eighty-two, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Proclamation 4975 of September 23, 1982

National Forest Products Week, 1982

By the President of the United States of America

A Proclamation

America's forests—and the products from those forests—have contributed greatly to our Nation's development and progress for more than two centuries.

The seemingly inexhaustible supply of wood, water, wildlife, and other resources challenged our forefathers to carve a civilization out of the wilderness during our Nation's first century.

Then, during the second century, we came to recognize our responsibilities to conserve the forest resources and use them wisely.

Today, as we look forward to the year 2000, we have the knowledge to make the most of our forests and to make them more productive and to protect them more effectively. We need them to be prepared to meet increasing demands for homes, for wood, for paper, and for forest recreation. We know that in the decades ahead, demands for wood products—and for other uses of the forest—will increase dramatically.

Under careful management, our forests can produce more than twice the volume of timber now being grown, without damaging our environment. This means that we can meet our own increasing demands and still export wood products, thus strengthening both our economy and our independence.

Our forests can also be managed to provide not only abundant timber, but also water, wildlife and fish, recreation, paper resources, grazing for domestic livestock, and even mining—while still ensuring a quality environment.

As Americans we are fortunate in having a very large base of public forestlands that are managed for all our people. These forests are serving us well and can meet more of our immediate and future needs than they do now, with careful management. We also have millions of acres of private lands that must be managed to help meet future needs—needs that are not just economic and material, but inspirational as well. The human spirit needs the beauty, solitude, and renewal that are found in forests.

In recognizing the unique qualities and values of America's forest resources, the Congress has by Public Law 86–753, 36 U.S.C. 163, designated the third week in October as National Forest Products Week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of October 17 through October 23, 1982, as National Forest Products Week and call upon all Americans to express their gratitude for the abundant forests with which this Nation has been blessed, and which have benefited us materially, economically, and spiritually.

IN WITNESS WHEREOF, I have hereunto set my hand this 23rd day of Sept., in the year of our Lord nineteen hundred and eighty-two, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Executive Order 12383 of September 23, 1982

Amendments to the Manual for Courts-Martial, United States, 1969 (Revised Edition)

By the authority vested in me as President by the Constitution of the United States of America and by Chapter 47 of Title 10 of the United States Code (the Uniform Code of Military Justice), in order to prescribe amendments to the Manual for Courts-Martial, United States, 1969 (Revised edition), prescribed by Executive Order No. 11476, as amended by Executive Order No. 11835, Executive Order No. 12018, Executive Order No. 12198, Executive Order No. 12233, Executive Order No. 12306, Executive Order No. 12315, and Executive Order No. 12340, it is hereby ordered as follows:

Section 1. Paragraph 127*c*, Section A (Table of Maximum Punishments) of the said Manual for Courts-Martial is amended by deleting the following language: "Drugs, habit forming, wrongful possession, sale, transfer, use or introduction into a military unit, base, station, post, ship, or aircraft" and the maximum punishments prescribed therefor, and "Drugs, marijuana, wrongful possession, sale, transfer, use or introduction into a military unit, base, station, post, ship, or aircraft" and the maximum punishments prescribed therefor, and by inserting in their place the following entries and maximum punishments:

"Drugs, wrongful use, possession, manufacture, or introduction of amphetamine, cocaine, heroin, lysergic acid diethylamide, marijuana (except possession of less than 30 grams or use of marijuana), methamphetamine, opium, phencyclidine, secobarbital, and Schedule I, II, and III controlled substances.". Maximum punishment: Dishonorable discharge, forfeiture of all pay and allowances, and confinement at hard labor not to exceed 5 years.

"Drugs, wrongful possession of less than 30 grams or use of marijuana, and wrongful use, possession, manufacture, or introduction of phenobarbital, and Schedule IV and V controlled substances.". Maximum punishment: Dishonorable discharge, forfeiture of all pay and allowances, and confinement at hard labor not to exceed 2 years.

"Drugs, wrongful distribution of, or, with intent to distribute, wrongful possession, manufacture, or introduction of amphetamine, cocaine, heroin, lysergic acid diethylamide, marijuana, methamphetamine, opium, phencyclidine, secobarbital, and Schedule I, II, and III controlled substances.". Maximum punishment: Dishonorable discharge, forfeiture of all pay and allowances, and confinement at hard labor not to exceed 15 years.

"Drugs, wrongful distribution of, or, with intent to distribute, wrongful possession, manufacture, or introduction of phenobarbital and Schedule IV and V controlled substances.". Maximum punishment: Dishonorable discharge, forfeiture of all pay and allowances, and confinement at hard labor not to exceed 10 years.

Sec. 2. Paragraph 127*c*, Section B of the said Manual for Courts-Martial is amended by adding the following new paragraph following the last paragraph therein:

"When any offense described in paragraph 213*g* is committed while the accused is: on duty as a sentinel or lookout; on board a vessel or aircraft used by or under the control of the armed forces; in or at a missile launch facility used by or under the control of the armed forces; in a hostile fire pay zone; or in time of war, the maximum period of confinement at hard labor and

forfeiture of pay and allowances authorized for such offense shall be increased by 5 years.".

Sec. 3. Paragraph 213 of the said Manual for Courts-Martial is amended by deleting the last paragraph of subparagraph 213*b* and by adding the following new subparagraph after the end of subparagraph *f*:

"*g.* Offenses involving controlled substances.

"*Discussion.* Possession, use, introduction into a military unit, base, station, post, ship, or aircraft, manufacture, distribution, and possession, manufacture, or introduction with intent to distribute, of a controlled substance are offenses under Article 134.

"(1) *Controlled substance.* "Controlled substance" means amphetamine, cocaine, heroin, lysergic acid diethylamide, marijuana, methamphetamine, opium, phencyclidine, phenobarbital, and secobarbital. "Controlled substance" also means any substance which is included in Schedules I through V established by the Comprehensive Drug Abuse Prevention and Control Act of 1970, as amended (21 U.S.C. 801 *et seq.*).

"(2) *Possess.* "Possess" means to exercise control of something. Possession may be direct physical custody like holding an item in one's hand, or it may be constructive, as in the case of a person who hides an item in a locker or car to which that person may return to retrieve it. Possession must be knowing and conscious. Possession inherently includes the power or authority to preclude control by others. It is possible, however, for more than one person to possess an item simultaneously, as when several people share control of an item. An accused may not be convicted of possession of a controlled substance if the accused did not know that the substance was present under the accused's control. Awareness of the presence of a controlled substance may be inferred from circumstantial evidence.

"(3) *Distribute.* "Distribute" means to deliver to the possession of another. "Deliver" means the actual, constructive, or attempted transfer of an item, whether or not there exists an agency relationship.

"(4) *Manufacture.* "Manufacture" means the production, preparation, propagation, compounding, or processing of a drug or other substance, either directly or indirectly or by extraction from substances of natural origin, or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis and includes any packaging or repackaging of such substance or labeling or relabeling of its container. The term "production", as used above, includes the planting, cultivating, growing, or harvesting of a drug or other substance.

"(5) *Wrongfulness.* To be punishable under Article 134, possession, use, distribution, introduction, or manufacture of a controlled substance must be wrongful. Possession, use, distribution, introduction, or manufacture of a controlled substance is wrongful if it is without legal justification or authorization. Possession, use, distribution, introduction, or manufacture of a controlled substance is not wrongful if such act or acts are: (A) done pursuant to legitimate law enforcement activities (for example, an informant who receives drugs as part of an undercover operation is not in wrongful possession); (B) done by authorized personnel in the performance of medical duties; or (C) without knowledge of the contraband nature of the substance (for example, a person who possesses cocaine, but actually believes it to be sugar, is not guilty of wrongful possession of cocaine). But, possession, use, distribution, introduction, or manufacture of a controlled substance may be inferred to be wrongful in the absence of evidence to the contrary. The burden of going forward with evidence with respect to any such exception in any court-martial or other proceeding under the code shall be upon the person claiming its benefit. If such an issue is raised by the evidence presented, then the burden of proof is upon the United States to establish that the use, possession, distribution, manufacture, or introduction was wrongful.

"(6) *Intent to distribute.* Intent to distribute may be inferred from circumstantial evidence. Examples of evidence which may tend to support an inference of intent to distribute are: possession of a quantity of substance in excess of that which one would be likely to have for personal use; market value of the substance; the manner in which the substance is packaged; and that the accused is not a user of the substance. On the other hand, evidence that the accused is addicted to or is a heavy user of the substance may tend to negate an inference of intent to distribute.

"(7) *Certain amount.* When a specific amount of a controlled substance is believed to have been possessed, distributed, introduced, or manufactured by an accused, the specific amount should ordinarily be alleged in the specification. It is not necessary to allege a specific amount, however, and a specification is sufficient if it alleges that an accused possessed, distributed, introduced, or manufactured "some," "traces of," or "an unknown quantity of" a controlled substance.

"*Proof.*

"(1) *Wrongful possession of controlled substance.* (a) That the accused possessed a certain amount of a controlled substance; (b) that the possession by the accused was wrongful; and (c) that, under the circumstances, the conduct of the accused was to the prejudice of good order and discipline in the armed forces or was of a nature to bring discredit upon the armed forces.

"(2) *Wrongful use of controlled substance.* (a) That the accused used a controlled substance; (b) that the use by the accused was wrongful; and (c) that, under the circumstances, the conduct of the accused was to the prejudice of good order and discipline in the armed forces or was of a nature to bring discredit upon the armed forces.

"(3) *Wrongful distribution of controlled substance.* (a) That the accused distributed a certain amount of a controlled substance; (b) that the distribution by the accused was wrongful; and (c) that, under the circumstances, the conduct of the accused was to the prejudice of good order and discipline in the armed forces or was of a nature to bring discredit upon the armed forces.

"(4) *Wrongful introduction of controlled substance.* (a) That the accused introduced onto a vessel, aircraft, vehicle, or installation used by the armed forces or under the control of the armed forces a certain amount of a controlled substance; (b) that the introduction was wrongful; and (c) that, under the circumstances, the conduct of the accused was to the prejudice of good order and discipline in the armed forces or was of a nature to bring discredit upon the armed forces.

"(5) *Wrongful manufacture of controlled substance.* (a) That the accused manufactured a certain amount of a controlled substance; (b) that the manufacture was wrongful; and (c) that, under the circumstances, the conduct of the accused was to the prejudice of good order and discipline in the armed forces or was of a nature to bring discredit upon the armed forces.

"(6) *Wrongful possession, manufacture, or introduction of controlled substance with intent to distribute.* (a) That the accused possessed, manufactured, or introduced a certain amount of a controlled substance; (b) that the possession, manufacture, or introduction was wrongful; (c) that the possession, manufacture, or introduction was with the intent to distribute; and (d) that, under the circumstances, the conduct of the accused was to the prejudice of good order and discipline in the armed forces or was of a nature to bring discredit upon the armed forces.".

Sec. 4. Appendix 6c is amended by deleting sample specifications 144, 145, and 146 and the marginal notes with them and inserting in place thereof the following:

"144. In that _____ (personal jurisdiction data) did, (at/on board—location) (subject-matter jurisdiction data, if required) on or about _____ 19 ___, wrongfully (possess) (distribute) (manufacture) _____

(grams) (ounces) (pounds) (_____) of _____ (a Schedule _____ controlled substance), (with the intent to distribute the said controlled substance) [while on duty as a sentinel or lookout] [while (onboard a vessel/aircraft) (in or at a missile launch facility) used by the armed forces or under the control of the armed forces, to wit: _____] [while in a hostile fire pay zone] [during time of war].".

Marginal note: "Drugs—wrongful possession, manufacture, or distribution".

"145. In that _____ (personal jurisdiction data), did, (at/on board—location) (subject-matter jurisdiction data, if required), on or about _____ 19___, knowingly and wrongfully use _____ (a Schedule _____ controlled substance), [while on duty as a sentinel or lookout] [while (onboard a vessel/aircraft) (in or at a missile launch facility) used by the armed forces or under the control of the armed forces, to wit: _____] [while in a hostile fire pay zone] [during time of war].".

Marginal note: "—wrongful use".

"146. In that _____ (personal jurisdiction data), did, on or about _____ 19___, (at/on board—location) wrongfully introduce _____ (grams) (ounces) (pounds) (_____) of _____ (a Schedule ___ controlled substance), onto a vessel, aircraft, vehicle, or installation used by the armed forces or under control of the armed forces, to wit: _____ (with the intent to distribute the said controlled substance) [while on duty as a sentinel or lookout] [while in a hostile fire pay zone] [during a time of war].".

Marginal note: "—wrongful introduction".

Sec. 5. These amendments shall be effective on October 1, 1982. These amendments shall apply to offenses committed on or after that date.

Sec. 6. The Secretary of Defense, on behalf of the President, shall transmit a copy of this Order to the Congress of the United States in accord with Section 836 of Title 10 of the United States Code.

Ronald Reagan

THE WHITE HOUSE,

Rules and Regulations

Federal Register
Vol. 47, No. 187
Monday, September 27, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 123

[Rev. 9, Amdt. 19]

Disaster Loans: Change in Policy

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This amendment to Part 123 prohibits the guarantee of disaster home loans which exceed SBA's administrative limits. This final rule considers the written comment received in response to the proposed rule which was published in the Federal Register on May 12, 1982 (47 FR 20315). The above change results from the serious adverse impact upon the nation's credit markets of Federal and federally-assisted borrowing.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: Questions regarding this final rule may be directed to: Bernard Kulik, Deputy Associate Administrator for Disaster Assistance, (202) 653–6879.

SUPPLEMENTARY INFORMATION: SBA received only one written response to the proposed rule. The primary objections raised by the respondent were that insurance against certain hazards is not required by mortgage lenders and that insurance against all hazards is cost prohibitive to homeowners. SBA's position continues to be that it is the responsibility of each homeowner to insure against all insurable hazards likely to occur in their locations. It is doubtful that homeowners who could not afford certain insurance protection could demonstrate the ability to repay a disaster loan(s) made to restore damage inflicted by those certain hazards. It is contemplated that the gross amount of disaster loan funds which will be made unavailable to homeowner disaster victims may be utilized in other areas of the economy.

The $5,000 loan cancellation feature for disasters occurring between January 1, 1972, and April 20, 1973, has been deleted because it is obsolete.

Business loan regulations are also revised to incorporate both the $500,000 statutory limit on total disaster loan assistance to any one business for any one disaster and the exemption from this limit provided for a business which constituted a major source of employment in an area suffering a disaster.

For the purposes of Executive Order 12291, SBA hereby determines that this rule will not constitute a major rule.

In addition, it is hereby certified pursuant to Section 605 of the Regulatory Flexibility Act, 5 U.S.C. 605, that this rule will not have a significant economic impact on a substantial number of small entities. In this regard this rule affects only the applications of homeowners for SBA guaranteed disaster loan assistance, and, it merely sets forth statutory language with respect to businesses. Therefore, it does not have any economic impact upon small entities as defined in section 601 of that Act, 5 U.S.C. 601.

Disaster assistance, Loan programs—business, Small businesses.

PART 123—DISASTER LOANS

§ 123.5 [Amended]

Accordingly, notice is given that, pursuant to the authority of section 5(b)(6) of the Small Business Act, as amended, 15 U.S.C. 634(b)(5), § 123.5(a) of Chapter I of Title 13 of the Code of Federal Regulations is revised by removing subparagraph (4) in its entirety and revising subparagraphs (1) and (3) to read as follows:

(a) * * *

(1) SBA's share in a direct, immediate participation or guaranteed loan to any homeowner, including all members of the household, shall not exceed $50,000 for repair or replacement of the land or building, and shall not exceed $10,000 to repair or replace household goods and personal items: Provided, however, That SBA's share of any such loan or loans to repair or replace a home and household goods for any homeowner shall not exceed $55,000 in the aggregate for any one disaster, excluding eligible refinancing in an amount not to exceed the lesser of the physical damage to the real property or the amount of the loan made to repair such property. Persons living in a damaged home who are not dependents of the homeowner may also apply for disaster assistance for personal property loss, up to $10,000.

* * * * *

(3) The total of SBA's direct loans plus SBA's share of immediate participation and guaranteed loans to any one business concern for any one disaster may not exceed the statutory limit ($500,000). In the case of a major source of employment in an area suffering a disaster, the Administration may waive the $500,000 limitation. Applicants applying for such waiver shall be required to demonstrate to SBA's satisfaction that applicant has used all funds from its own resources and from non-Federal credit available at reasonable interest rates and terms to alleviate the physical damage and/or economic injury sustained, plus eligible refinancing.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-CE-26-AD; Amdt. 39-4465]

EMBRAER Models EMB-110P1 and EMB-110P2 Airplanes; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to EMBRAER Models EMB-110P1 and EMB-110P2 airplanes, which supersedes AD 82-15-06, Amendment 39-4421 (July 26, 1982; 47 FR 32064). It continues in effect the requirement in the AD for installation of a temporary revision in the "Pilot's Operating Handbook (POH) and Centro Technico

Aeroespacial (CTA) Approved Airplane Flight Manual" (POH/AFM) limiting flap extension when there is known or suspected ice accumulation on the horizontal stabilizer. Additionally, it authorizes removal of this revision upon incorporation of certain modifications described in EMBRAER Service Bulletins No. 110–30–013 dated March 23, 1982 and No. 110–55–020, Change No. 1, dated April 22, 1982, and sets a date for incorporation of these changes. This action is needed to provide relief to operators who have already incorporated these modifications by authorizing removal of the temporary POH/AFM revision limiting flap operation on their airplanes. A final date for incorporation of the modification is needed to assure that the original level of safety established by the type certification basis of the airplane design is restored.

EFFECTIVE DATE: September 30, 1982.

Compliance required as indicated in the body of the AD.

ADDRESSES: The applicable service bulletins may be obtained from Empresa Brasileira de Aeronautica S/A (EMBRAER), P.O. Box 343–CEP, 12.200, Sao Jose Dos Campos, Sao Paulo, Brazil.

A copy of these service bulletins and temporary POH/AFM revision is also contained in the Rules Docket, Office of the Regional Counsel, FAA, Room 1558, Federal Building, 601 East 12th Street, Kansas City, Missouri 64106, and in Room 275, Atlanta Aircraft Certification Office, FAA, 3400 Norman Berry Drive, East Point, Georgia 30344.

FOR FURTHER INFORMATION CONTACT: George Carver, ACE–130A, Atlanta Aircraft Certification Office, FAA, P.O. Box 20636, Atlanta, Georgia 30320; Telephone (404) 763–7781.

SUPPLEMENTARY INFORMATION: The FAA issued AD 82–15–06, Amendment 39–4421 (47 FR 32064) to prevent a sharp and unexpected nose-down pitching movement at flap deflections greater than 50 percent if ice is accumulated on the horizontal stabilizer due to an ineffective or malfunctioning horizontal stabilizer deicing system on EMBRAER Models EMB–110P1 and EMB–110P2 airplanes. This AD requires incorporation of a temporary revision in the POH/AFM prohibiting flap extension beyond 50 percent when known or suspected horizontal stabilizer ice exists. When this action was taken, the FAA was aware that the manufacturer was developing modifications which would assure proper operation of the stabilizer deicing system. The manufacturer has now published instructions for accomplishing these modifications in EMBRAER Service Bulletins No. 110–30–013 dated March 23, 1982, and No. 110–55–020, Change No. 1, dated April 22, 1982. The FAA has learned that some operators have incorporated or are in the process of incorporating these modifications in their airplanes. The flap restriction imposed by the temporary AFM/POH revisions are not required on the modified airplanes. Consequently, this requirement by AD 82–15–06, is an unnecessary burden on the operators of modified airplanes and the level of safety in the operation of the affected airplanes is increased when flap usage is unrestricted. Since the flap restriction was imposed by AD 82–15–06 as an interim measure to provide an acceptable level of safety until such time as a modification to assure proper functioning of the stabilizer deice system is available, the FAA finds that establishing a reasonable date for accomplishing the modifications which will impose the minimum cost and loss of airplane availability to the operator is necessary in the interest of safety.

Therefore, the FAA is superseding AD 82–15–06 with a new AD, applicable to the above EMBRAER airplane models, which continues the requirement for installation of a temporary revision to the POH/AFM limiting flap extension to 50 percent when stabilizer ice is known or suspected, allows removal of this revision when the stabilizer deice system is modified per certain requirements of EMBRAER Service Bulletins No. 110–30–013 dated March 23, 1982 and No. 110–55–020, Change No. 1, dated April 22, 1982 and sets a date for completion of these modifications.

Since this amendment is in part relieving in nature, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aircraft, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD:

EMBRAER: Applies to Models EMB–110P1 and EMB–110P2 (S/Ns 110001 through 110415) airplanes certificated in any category.

Compliance: Required as indicated unless previously accomplished.

To prevent loss of control of the airplane during approach and landing in icing conditions, accomplish the following:

(a) Within the next 25 hours time-in-service after July 29, 1982, on airplanes not in compliance with AD 82–15–06 or modified in accordance with paragraph (b) of this AD:

(1) Incorporate a temporary POH/AFM revision (immediately following page 2–10) in the affected airplane POH/AFM. This revision is set forth in Figure I of this AD.

(2) Make the following pen and ink changes in the Log of Revisions, page IX, of the POH/AFM: "Temporary Revision No. 1," "add page 2–10A," "include temporary landing flap limitations" and "in accordance with Airworthiness Directive 82–15–06."

(3) The incorporation of the temporary POH/AFM revision and Log of Revisions entry required by this AD may be accomplished by the owner/operator of the airplane. This person must make the prescribed entry in the aircraft maintenance records, indicating compliance with paragraph (a) of this AD.

(b) On or before December 31, 1982:

(1) Modify the horizontal stabilizer pneumatic deicing system tubing, including the relocation of the pressure switch and associated cabling, in accordance with EMBRAER Service Bulletin No. 110–30–013, March 23, 1982.

(2) Provide inspection openings in the empennage in accordance with Part I of EMBRAER Service Bulletin No. 110–55–020, Change No. 1, April 22, 1982.

(3) Replace pneumatic supply hoses, P/N 121–770–21–19, with new hoses, P/N B118–1, in accordance with EMBRAER Service Bulletin No. 110–30–012, March 15, 1982.

(4) Upon completion of the above modifications, test the system according to procedures outlined in EMBRAER Maintenance Manual T.O. 1C95–2–6, assuring that there are no leaks.

(5) If installed, remove the temporary revision to the Pilot's Operating Handbook and Centro Technico Aeroespacial (CTA) Approved Airplane Flight Manual (POH/AFM), which was installed according to AD No. 82–15–06.

(c) Aircraft may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(d) An equivalent method of compliance with this AD may be used if approved by the Chief, Atlanta Aircraft Certification Office, FAA, P.O. Box 20636, Atlanta, Georgia 30320.

This amendment supersedes AD 82–15–06, Amendment 39–4421 (47 FR 32064), effective July 29, 1982.

This amendment becomes effective on September 30, 1982.

(Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR 11.89))

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft and provide relief to those operators of aircraft on which it has already been corrected. It has been further

determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket identified under the caption "ADDRESSES."

This rule is a final order of the Administrator under Federal Aviation Act of 1958, as amended. As such, it is subject to review only by the various Courts of Appeal of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Kansas City, Missouri, on September 15, 1982.

John E. Shaw,

Acting Director, Central Region.

[FR Doc. 82-26294 Filed 9-24-82; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Airworthiness Docket No. 82-ASW-33; Amdt. 39-4463]

Hughes Helicopter Model 269 Series Helicopters; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, revision of existing Airworthiness Directive (AD).

SUMMARY: This amendment amends an existing Airworthiness Directive (AD), 82-15-01, (Amendment 39-4414), applicable to certain Hughes Model 269 series helicopters, by making the AD applicable to Hughes Model 269B helicopters. The amendment is needed because the Model 269B helicopters were inadvertently omitted from the applicability section of AD 82-15-01, Amendment 39-4414.

DATES: Effective October 4, 1982.

Compliance required within 50 hours' time in service after the effective date of this amendment to the AD unless already accomplished.

ADDRESSES: The applicable service information may be obtained from Hughes Helicopters, Inc., Centinela and Teale Streets, Culver City, California 90230. A copy of the service information is contained in the Office of Regional Counsel, Federal Aviation Administration, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas 76106.

FOR FURTHER INFORMATION CONTACT: Harold Ferris, Aerospace Engineer, Propulsion Section, ANM-174W, Western Aircraft Certification Field Office, Federal Aviation Administration, Northwest Mountain Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009. Telephone (213) 536-6381.

SUPPLEMENTARY INFORMATION: There have been reports that the bolts that attach the main transmission ring gear to its carrier have become loose in service. This loss of torque could cause fretting corrosion, fatigue cracking of the carrier assembly, and fatigue fracture of the attaching bolts resulting in loss of power to the rotor system or jamming of the main transmission and could result in loss of control of the helicopter. The Federal Aviation Administration (FAA) issued AD 82-15-01 Amendment 39-4414 (47 FR 30050) which required inspection, rework, or replacement (as required), and increased bolt torque on the main transmission ring gear/carrier assembly on certain Hughes Model 269 series helicopters. The main transmission assemblies to which the AD applied are also found on the Model 269B helicopters, and the omission of that model from the applicability of the original AD was inadvertent.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aircraft, Aviation safety, Safety, Air transportation.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, by the Administrator, Amendment 39-4414 (44 FR 30050), AD 82-15-01, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13), is amended by revising the first paragraph to read as follows:

Hughes Helicopters.—Applies to Model 269A (all S/N's), TH-55A (all S/N's converted to civil use), 269A-1 (all S/N's), 269B (all S/N's), and 269C (S/N's 0001 through 1074) helicopters equipped with main transmission assemblies P/N 269A5175-7, -9, -11, -13, -15, and -17, except those transmissions with the letter "W" on the transmission nameplate below and adjacent to the transmission serial number. Applies to helicopters certificated in all categories.

This amendment becomes effective October 4, 1982.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportaion Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

This rule is a final order of the Administrator under the Federal Aviation Act of 1958, as amended (49 U.S.C. 1486(a)). As such, it is subject to review only by the various courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Fort Worth, TX, on September 9, 1982.

C. R. Melugin, Jr.,

Director, Southwest Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 82-AWA-9]

Designation of Federal Airways, Alteration of VOR Federal Airway

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment realigns VOR Federal Airway V-203 between Massena, NY, and Montreal, Canada. The realignment enhances traffic flow into Canadian airspace and improves traffic flow in the Mirabel and Dorval International Airports, Canada.

EFFECTIVE DATE: December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On August 2, 1982, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the description of V-203 between Massena, NY, and Montreal, Canada, by realigning the airway via an east dogleg (47 FR 34998). Interested parties were invited to participate in this rulemaking

proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3 dated January 29, 1982.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations realigns V-203 between Massena, NY, and Montreal, Canada. The realignment enhances traffic flow into Canadian airspace and improves traffic flow into the Mirabel and Dorval International Airports, Canada.

List of Subjects in 14 CFR Part 71

Federal airways.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., December 23, 1982, as follows:

V-203 [Amended]

By deleting the words "Massena, NY, St. Eustache, PQ, Canada." and substituting for them the words "Massena, NY, INT Massena 045° and Montreal, Canada, 188° radials Montreal."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) amd 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on September 20, 1982.

John W. Baier,

Acting Manager, Airspace and Air Traffic Rules Division.

BILLING CODE 4910-13-M

[Docket No. 21022A; Reg. Notice No. 91-100]

14 CFR Part 91

Emergency Air Traffic Regulations

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Update of emergency air traffic regulations.

SUMMARY: Section 91.100 of the Federal Aviation Regulations (FAR) (14 CFR 91.100) requires aircraft operators to comply with emergency air traffic regulations issued under that section and covered by Notices to Airmen (NOTAMs) that are also issued under that section. This document provides notice of regulations already adopted that were immediately effective under § 91.100, for which the FAA has also issued NOTAMs. It adds, to Notice 91-100, emergency regulations implementing Special Federal Aviation Regulation (SFAR) No. 44, as amended, that were necessary to respond to a shortage in air traffic control personnel.

EFFECTIVE DATE/TIME: As stated in each regulation listed.

ADDRESSES: Send comments on the listed regulations, in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Docket No. 21022A, 800 Independence Avenue, SW., Washington, DC 20591.

Comments may be examined in the Rules Docket, Room 915, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: B. Keith Potts, Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 426-3731.

SUPPLEMENTARY INFORMATION:

Comments Invited

The regulations issued under § 91.100 and listed herein are emergency final rules involving immediate air traffic requirements throughout the United States. The need for immediate regulatory response under § 91.100 is stated at 46 FR 16666, *et seq.* In issuing the regulations in this notice, the FAA has found that the conditions cited in § 91.100 exist or will exist and that the regulations are necessary in order to respond to those conditions in the public interest. Where necessary, these regulations may be supplemented or amended hourly, or even more frequently, as air traffic conditions change. Accordingly, good cause exists for making these regulations effective immediately, without prior notice and public procedure.

Comments are invited on any aspect of the listed regulations, individually or cumulatively, and on any aspect of the emergency air traffic control conditions they respond to. When § 91.100 was issued, the FAA noted that it was an emergency regulation under Executive Order 12291 and DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), and had no cost impact in itself since it was only procedural. However, the FAA also stated (at 46 FR 16669) that the regulations distributed in accordance with § 91.100 will be evaluated individually, as appropriate, to determine whether they have cost impacts. To assist the FAA in determining, as soon as practicable after issuance, the cost impacts of the regulations issued under § 91.100, comments on economic impact are specifically invited.

"Commenters wishing the FAA to acknowledge receipt of their comments in response to these rules must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 21022A." The postcard will be date/time stamped and returned to the commenter.

Effect of Publication

Publication, in the **Federal Register**, of emergency air traffic regulations issued under § 91.100 provides constructive legal notice of those regulations to all persons who may not have received the NOTAMs concerning those regulations or who otherwise may not have legal notice of the adoption of those regulations. This document provides this constructive legal notice of immediately effective emergency regulations that have already been adopted. Additional emergency rules will be published periodically if the need for their adoption continues.

Availability Prior to Publication: Preflight Requirement

Since there is a necessary time lag between the issuance of emergency air traffic regulations and NOTAMs under § 91.100 and the publication of these regulations in the **Federal Register**, and since these regulations and NOTAMs respond to emergency conditions that exist, or will exist, relating to the FAA's ability to operate the Air Traffic Control System, the NOTAMs concerning these regulations are available at operating air traffic facilities and Regional Air Traffic Division offices prior to **Federal Register** publication and as long as they remain

effective. Under § 91.5 *Preflight Action* (14 CFR 91.5), each pilot in command is required to familiarize himself or herself with all available information concerning each flight.

Air Traffic Controller Shortage: SFAR No. 44, as Amended

The air traffic regulations listed in this amendment to Notice 91–100 follow the adoption of SFAR Nos. 44 through 44–5, in response to an organized air traffic controller job action. The emergency aspects of that action are described at 46 FR 39997, *et seq.* As a result, air traffic control facilities have experienced staffing shortages that have reduced the level of air traffic that can be handled with the required levels of safety and efficiency. To ensure that these levels of safety and efficiency are fully maintained during this shortage of air traffic personnel, the emergency regulations listed in section 2 of this notice have been issued under § 91.100.

Regulatory Impact

The FAA has determined that the regulations listed in this notice are emergency regulations that are not major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to these regulations, since they were issued in response to existing or expected emergency conditions relative to FAA's ability to operate the Air Traffic Control System. It has been further determined that the listed regulations are emergency regulations under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If these regulations are later determined to be significant, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

List of Subjects in 14 CFR Part 91:

Air traffic control, Airspace, Aviation safety.

Notice of Adoption

Accordingly, pursuant to the authority delegated to me by the Administrator in § 91.100 of the Federal Aviation Regulations (14 CFR 91.100; 46 FR 16666, March 13, 1981) and that cited below, the following emergency air traffic regulations have been adopted and covered by NOTAMs under that section.

(Secs. 307, 313(a), 601, 603, 902, 1110, and 1202, Federal Aviation Act of 1958, as amended (49 U.S.C. §§ 1348, 1354(a), 1421, 1442, 1443, 1472, 1510, and 1522); sec. 6(c), Department of Transportation Act (49 U.S.C. § 1655(c)).)

In consideration of the foregoing, § 2 of Notice 91–100 is hereby amended by adding the following emergency regulations following the regulation numbered FDC No. 2/1662.

Air Traffic Controller Shortage of 1981, and Related Emergency Conditions (SFAR–44, as amended; Docket No. 21022A).

FDC 2/1999 Emergency Flight Rules October 18 through 23, 1982. Flight Plan Filing/Annual Permian Basin Oil Show Reservation Rule/Odessa, Texas, effective August 20, 1982, 1621 GMT.

The Permian Basin Oil Show is expected to cause approximately 2,400 IFR aircraft operations to be added to the air traffic control (ATC) system. Current rules issued under SFAR 44, as amended, do not provide the air traffic system with the flexibility to accommodate much of this added traffic. For example, only a departure reservation, regardless of destination, is required under the General Aviation Reservation Rule (GAR). This precludes ATC facilities from effectively managing an above normal and concentrated arrival demand for a specific destination. Further, under the GAR, departure reservations cannot be obtained earlier than 24 hours prior to the estimated departure time. This provision does not facilitate accommodation planning.

To accommodate this traffic without excessive delays and inconvenience to the public, increased ATC staffing and reservations will be required. Pilots proposing general aviation flight to the Permian Basin area will be excluded from the requirements of the GAR once they have obtained an IFR arrival reservation. Departure reservations for IFR flight from the Permian Basin area will be required and advance requests and filing will be necessary.

Reservations for VFR flight will not be required; however, appropriately rated pilots should anticipate the possibility of instrument meteorological conditions and flight plan accordingly. Pilots who plan IFR return flights and obtain IFR departure reservations under this rule have the advantage of being able to know their return departure date and time prior to leaving their "home" for the Permian Basin area.

Accordingly, pursuant to the SFAR 44, as amended, and Federal Aviation Regulations Section 91.100, the following rule is effective immediately to provide for the orderly handling and safe movement of IFR traffic:

1. No person may operate a nonscheduled general aviation flight under IFR into/or out of the Permian Basin area during the effective periods of this rule without a reservation issued under this rule.

2. The Permian Basin area includes the airspace within a 30-nautical mile radius of Midland Regional Airport, Midland, Texas, and includes the following airports:

Midland Regional, Midland Airpark, Schlemeyer.

3. The effective periods are October 20 through 23, 1982, daily from 0600 CDR until 2000 CDT.

4. Each person planning IFR flight under this rule shall comply with, in lieu of the GAR, the following:

A. Reservations may only be requested after 1400 GMT on October 18, 1982.

B. An arrival reservation to the Permian Basin area is required and must be obtained from the Central Flow Control Facility (Telephone No. (202) 382–6866).

C. A departure reservation from the Permian Basin area is required and must be obtained from the Midland FSS (Telephone No. (915) 563–2611).

D. A flight plan may only be filed after receiving a reservation, but must be filed at least 4 hours prior to the proposed departure time.

5. Each person receiving a reservation number under this rule must include it in the remarks section of the appropriate flight plan as filed with ATC.

FDC 2/2030 Cancel FDC Nos. 1/1539, 1/1855, 1/2261, 1/2414, 1/2434, 1/2602, and 1/2631.

FDC 2/2037 EMERGENCY FLIGHT RULES September 4–17, 1982. Flight Plan Filing/Tool Manufacturers Convention, Chicago, Illinois, effective August 26, 1982, 1832 GMT.

The Tool Manufacturer's Convention is expected to generate an above normal and concentrated arrival demand at Chicago's Midway and Meigs Airports. In order to accommodate this demand without impacting other operations in the area, and because the General Aviation Reservation Rule (GAR) is oriented toward metering departures rather than arrivals, special regulations and procedures are required.

During this period, reservations will be required for nonscheduled general aviation IFR arrivals into the impacted

area. Once an IFR arrival reservation is obtained, the operator will not be bound by the GAR Rule for the segment of their trip to the impacted area. The GAR Rule will still apply to flight from the impacted area.

Reservations for VFR flight will not be required; however, appropriately rated pilots should anticipate the possibility of instrument meteorological conditions and flight plan accordingly.

Therefore, pursuant to Special Federal Aviation Regulation No. 44, as amended, and Federal Aviation Regulation § 91.100, the following rule is effective immediately to provide for the safe, orderly handling, and movement of IFR traffic:

1. No person may operate a nonscheduled general aviation flight under IFR into the Chicago Midway/Meigs Airports during the effective periods of this rule without a reservation issued under this rule.

2. The effective periods are as follows:

Arrivals—1100 until 1959 GMT daily from September 7 through September 11, and September 13 through September 17 (exclude Sunday, September 12).

3. Each person planning IFR under this rule shall comply with, in lieu of the GAR, the following:

A. Reservations may only be requested after 1400 GMT on September 4, 1982.

B. An arrival reservation to the Chicago Midway/Meigs Airports is required and must be obtained from the Central Flow Control Facility (Telephone No. (202) 382-6866).

4. Each person receiving a reservation number under this rule must include it in the remarks section of the appropriate flight plan as filed with ATC.

FDC 2/2040 Emergency Flight Rules—IFR Flight Plan Filing/General Aviation Reservation Rule effective September 1, 1982, 0600 Local Time.

The IFR capacity of the enroute ATC system is increasing and permits relaxation of the IFR Flight Plan Filing/General Aviation Reservation Rule (GAR). Previously, the GAR Rule allowed certain aircraft to operate within certain ARTCC areas without a reservation. Conditions are such that now all operations in and between the designated ARTCC's airspace in paragraph 4K can be accommodated without reservations.

Accordingly, pursuant to SFAR No. 44, as amended, and Federal Aviation Regulation Section 91.100, the following regulation is effective in the 20 conterminous ARTCC areas to provide for the orderly handling and safe movement of IFR traffic.

1. All aircraft operators planning a flight under IFR with a proposed departure/enroute pick-up time from 0600 local to 1959 local shall file a flight plan with and obtain a departure/enroute pick-up reservation from an FAA flight service station at least 30 minutes before but not more than 24 hours before his/her proposed departure/enroute time if any segment of the flight will enter ARTCC airspace.

2. ATC clearance must be requested not later than 1 hour after proposed departure/enroute pick-up time.

3. Multiple-Leg Flight Plans may be filed provided:

A. The conditions of paragraph 1 above, are met.

B. The last proposed departure/enroute pick-up time does not exceed the 24-hour filing time limitation specified in paragraph 1 above.

C. The same departure/enroute pick-up point is not specified twice in the request.

D. The request does not involve more than three departure/enroute pick-up points.

4. The provisions of this regulation do not apply to the following operators and flights:

A. FAR Part 121 or Part 135 operators with FAA/ICAO approved two-letter or three-letter call signs.

B. Military flights

C. Medical emergency flights.

D. Presidential or Vice-Presidential flights.

E. FAA critical flights.

F. NASA flights supporting space shuttle launch and recovery operations during periods designated by the Director, Air Traffic Service.

G. Flights to or from the high density airports designated in Subpart K of FAR Part 93 during the periods when reservations are required. (NOTE: Slot allocations for John F. Kennedy, LaGuardia, and O'Hare Airport may be adjusted consistent with pro rata reductions issued under SFAR 44, as amended.)

H. Flights originating within the airspace areas of Anchorage and Honolulu ARTCC's.

I. Turbojet aircraft operations at FL 290 and above to a destination 200 nautical miles or more from the point of departure.

J. Nonstop flights destined for airports outside the continental United States.

K. Operations affecting certain ARTCC's are as follows:

Intra-ARTCC	Inter-ARTCC
Albuquerque Salt Lake	Seattle-Salt Lake City

5. Limitations on obtaining an IFR clearance while airborne remain in effect in the Anchorage ARTCC area as specified in the pertinent regulatory NOTAM.

FDC 2/2147 EMERGENCY FLIGHT RULES September 19–24, 1982. Flight Plan Filing/National Business Aircraft Association (NBAA) Convention, St. Louis, Missouri, effective September 6, 1982, 12:55 GMT.

The NBAA Convention is expected to generate an above normal and concentrated air traffic demand within the St. Louis area. In order to accommodate this demand without impacting other operations in the area, and because the General Aviation Reservation Rule (GAR) is oriented toward metering departures rather than arrivals, special regulations and procedures are required.

During this period, reservations will be required for nonscheduled general aviation IFR flight to and from the impacted area. Once a reservation is obtained, the operator will not be bound by the GAR Rule for that segment of their flight for which the reservation was obtained.

Reservations for VFR flight will not be required; however, appropriately rated pilots should anticipate the possibility of instrument meteorological conditions and flight plan accordingly.

Therefore, pursuant to the Special Federal Aviation Regulations § 91.100, the following rule is effective immediately to provide for the orderly handling and safe movement of IFR traffic.

1. No person may operate a nonscheduled general aviation flight under IFR to or from the St. Louis area during the effective periods of this rule without a reservation issued under this rule.

2. The St. Louis area includes the airspace within a 25-nautical mile radius of St. Louis, Missouri, and includes the following airports:

BiState Parks (CPS)
Lambert-St. Louis International Airport (STL)
Spirit of St. Louis (SUS)

The effective periods are as follows:

A. *Arrivals:* September 19, 1200 until 2300 CDT, September 20 through 23, 0700 until 2300 CDT daily.

B. *Departures:* September 21 through 24, 0700 until 2300 CDT daily.

4. Each person planning IFR under this rule shall comply with, in lieu of the GAR Rule, the following:

A. Reservations may only be requested after 1400 GMT on September 17, 1982.

B. An arrival reservation to the St. Louis area is required and must be

obtained from the Central Flow Control Facility (Telephone No. (202) 382–6866).

C. A departure reservation from the St. Louis area is required and must be obtained from the St. Louis FSS (Telephone No. (314) 532–1011).

D. Flight plans may only be filed after receiving a reservation but must be filed at least 4 hours prior to the proposed departure time.

E. Flight plans for flight from the St. Louis area should be filed with the St. Louis FSS between the hours of 1100 and 0300 GMT.

5. Each person receiving a reservation number under this rule must include it in the remarks section of the appropriate flight plan as filed with ATC.

Issued in Washington, DC, on September 17, 1982.

B. Keith Potts,

Acting Director, Air Traffic Service.

BILLING CODE 4910-13-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 357

Revision of Annual Report of Carriers by Pipeline: Form P

[Docket No. RM82-5-000; Order No. 260]

September 21, 1982.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule.

SUMMARY: By this rule the Federal Energy Regulatory Commission (Commission) revises Form P, the annual report filed by oil pipeline companies and the related regulations at 18 CFR § 357.2, and redesignates the form as FERC Form No. 6. In creating new FERC Form No. 6, the Commission deletes some schedules entirely and deletes portions of other schedules previously included in Form P. These revisions are made as part of the Commission's ongoing program to review all of its reporting requirements and to eliminate those requirements that are not necessary to the performance of the Commission's responsibilities.

DATE: The final rule is effective October 27, 1982. It applies to reports filed on or before March 31, 1983, and all reports thereafter.

ADDRESS: Copies of FERC Form No. 6 are available at: Federal Energy Regulatory Commission, Division of Public Information, 825 North Capitol Street, N.E., Room 1000, Washington, D.C. 20426 (202) 357–8055.

FOR FURTHER INFORMATION CONTACT:

Elaine Dawson, Office of Chief Accountant, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Room 3405N, Washington, D.C. 20426, (202) 357–9190

Yvonne Owens, Office of Pipeline and Producer Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Room 6006–B, Washington, DC 20426, (202) 357–9104

SUPPLEMENTARY INFORMATION: The Federal Energy Regulatory Commission (Commission) is revising Form P, "Annual Report of Carriers by Pipeline", redesignating it as FERC Form No. 6, "Annual Report of Oil Pipeline Companies",[1] and revising the related regulations at 18 CFR § 357.2. These revisions are part of the Commission's ongoing program to review and evaluate all of the information it collects for regulatory purposes and to eliminate any unnecessary reporting requirements. This rulemaking reduces the data collected in the old Form P by about 20 percent.

I. Background

A. History of Form P

In 1977, the responsibility to regulate oil pipeline companies was transferred to the Commission from the Interstate Commerce Commission (ICC).[2] In accordance with the transfer of authority, the Commission was delegated the responsibility under section 1 of the Interstate Commerce Act (49 U.S.C. § 1) to regulate the rates and charges for transportation of oil by pipeline and establish valuation of those pipelines, and under section 20 of that Act to require pipelines to file annual reports of information that is necessary to the Commission's exercise of its statutory responsibilities.[3]

Form P was originally developed by the ICC to collect information on an annual basis, to enable it to carry out its regulation of oil pipelines under the Interstate Commerce Act.[4] Many of the schedules in Form P were modeled after schedules in annual reports that were filed by other common carriers other than oil pipelines and, therefore, some of the information collected on Form P is unnecessary for the Commission's regulation of oil pipeline companies.

B. Summary of Notice of Proposed Rulemaking

On December 4, 1981, the Commission issued a Notice of Proposed Rulemaking to amend Form P and the related regulations at 18 CFR § 357.2. The proposed revisions to Form P included the following: (1) redesignating Form P as FERC Form No. 6, "Annual Report of Oil Pipeline Companies"; (2) eliminating information requirements from several schedules; (3) consolidating and clarifying the instructions in the form; (4) adding one new schedule entitled, "Statement of Changes in Financial Position", and (5) eliminating the following schedules entirely:

Title of schedule	Schedule No. in form P
Guaranties and Suretyships	110
Compensating Balances and Short-term Borrowing Arrangements	200
Special Deposits	208
Notes Receivable	210
Accounts Receivable	212
Companies Controlled Through Nonreporting Intermediaries	223
Sinking and Other Funds	225
Rental Expense of Lessee	243
Minimum Rental Commitments	244
Lessee Disclosure	245
Lease Commitments—Present Value	246
Income Impact—Lessee	247
Notes Payable	250
Accounts Payable	252
Long-Term Debt Changes During the Year	261
Security for Long-Term Debt	262
Stock Liabilities for Conversion of Securities of Other Companies	272
Abstracts of Terms and Conditions of Leases	342
Rentals	420
Abstracts of Leasehold Contracts	422
Compensation of Officers, Directors, etc	562

[1] FERC Form No. 6 (reproduced as *Appendix B* of the final rule) will not be printed in the **Federal Register**. A summary of the data required in the new form No. 6, however, is included as Appendix A of this rule. Copies of this final rule, including all appendices, are available at the Federal Energy Regulatory Commission, Division of Public Information, 825 North Capitol Street, N.E., Room 1000, Washington, D.C. 20426, (202) 357–8055. Blank copies of the form may be obtained, after October 1982, from the National Energy Information Center, Energy Information Administration.

[2] Section 402(b) of the Department of Energy Organization Act (DOE Act) (42 U.S.C. § 7172) provides that: "[t]here are hereby transferred to and vested in, the Commission all functions and authority of the Interstate Commerce Commission or any officer or component of such Commission where the regulatory function establishes rates or charges for the transportation of oil by pipeline or establishes the valuation of any such pipeline."

[3] The Secretary of Energy delegated to the Federal Energy Regulatory Commission the authority under the Interstate Commerce Act which was formerly vested in the ICC, as that statute relates "to the transportation of oil pipeline to the extent that such * * * [statute is] not transferred to, and vested in, FERC by Section 402(b) of the DOE Act * * *" (Delegation Order No. 0204–1, October 1, 1977).

[4] The filing of Form P had been required by § 1241.61 of the ICC's regulations (49 CFR § 1241.61). The Form P filings were required to be submitted to this Commission after passage of the DOE Act, under the authority of the ICC regulations. By Order No. 119, "Regulation of Interstate Oil Pipelines", Docket No. RM81–6, (issued December 18, 1980), 46 *Fed. Reg.* 9043 (January 28, 1981), the Commission transferred, among other things, the regulations requiring the filing of Form P to Title 18 of the Code of Federal Regulations. Thus, 49 CFR § 1241.61 was transferred to 18 CFR § 357.2.

Title of schedule	Schedule No. in form P
Competitive Bidding—Clayton Antitrust Act	[1]585

[1] The deletion of Schedule 585 in no way affects the requirement for carriers to file a statement of competitive bidding transactions pursuant to the requirements in 49 CFR Part 1018.

The Commission stated in the notice that Form P could be revised to eliminate data without impairing the Commission's ability to regulate the rates and charges for transportation of oil by pipeline and to establish valuation of the pipelines. The Commission estimated that these revisions could reduce pipelines' reporting burden by about 20 percent.

II. Summary and Analysis Of Comments

In response to the Notice of Proposed Rulemaking, the Commission received twelve comments, all from jurisdictional oil pipeline companies.[5] In general, they agreed with the proposed revisions and supported the efforts of the Commission to reduce the reporting burden on oil pipelines. They offered several suggestions to further reduce and improve of the proposed form. These suggestions fall under three categories: general issues and procedures in filing the form, the format of the form, and comments to specific schedules of the form.

A. General Issues and Procedures

Commenters made certain suggestions respecting five general matters for the form. These were: (1) the complete elimination of the form, (2) classification of the respondents to the form, (3) reduction in the filing burden, (4) effective date of the final rule to revise the form, and (5) publication of statistics from the form.

1. *Complete Elimination of the Form.* One commenter questioned the need to gather information required in the annual report and proposed to eliminate Form P altogether as a step to decontrol oil pipelines.

The Commission will continue to collect data from oil pipeline companies because the Commission's responsibility to regulate rates and charges for transportation of oil by pipeline and to establish the valuation of any such pipelines continues under the DOE Act and the Interstate Commerce Act. Furthermore, this rulemaking eliminates from the form all but the most essential data that the Commission needs in the annual filing to effectively regulate oil pipelines. These changes should reduce the respondents' reporting burdens as compared to the old Form P.

2. *Classification of Respondents.* Another commenter proposed that companies be classified according to the amount of their assets or revenues so that companies below a minimum size (approximately $25,000,000) should not be required to file. As an alternative, the commenter suggested that small companies should only be required to submit the basic financial statements and not the detailed schedules as well.

The Commission believes some type of classification for oil pipelines may be worthy of consideration in the future. However, this matter beyond the scope of this rule, and the Commission is not prepared to consider it at this time. [6]

3. *Reduction in Filing Burden.* One commenter asserted that, while the changes proposed by the Commission should reduce the preparation time for the report, somewhat, the Commission's estimate of a burden reduction of 20 percent appeared very optimistic. Another commenter also observed that, while the proposed changes will reduce the number of schedules in the report by one-third and the number of pages by nearly one-half, this will not necessarily result in a commensurate reduction in the task of preparing the report.

The Commission realizes that not all of the oil pipelines will realize a 20 percent reduction in burden; some will realize less, others more. The basis for determining the estimated burden reduction was derived from the total number of elements of information deleted or simplified. The actual burden reduction for filing companies cannot be measured more accurately until the Commission gains experience with the new form. However, the Commission and the commenters were in agreement that there would probably be at least some reduction in the overall burden.

4. *Effective Date.* One commenter urged the Commission to revise Form No. 6 in sufficient time so that companies could use the new form to file data for the year ending December 31, 1981 (due March 31, 1982).

The Commission realized from the outset that it would be virtually impossible to make the proposed changes in time to file data for the year ending December 31, 1981. The comment period in this rulemaking ended February 2, 1982, leaving only a few weeks to complete work on the final rule at the Commission, obtain approval from the Office of Management and Budget for collection of the form under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501–3520), print the new form, and circulate it to filing companies before the reporting deadline of March 31, 1982. The Commission, therefore, proposed, and now makes final, the new Form No. 6 effective for the calendar year 1982 and each year thereafter, and the filings of the form are due on March 31st of each year. The first filing of the new form will be March 31, 1983.

5. *Publication of Statistics.* Three commenters suggested that the Commission compile and publish statistics from the Form No. 6 reports, similar to the transport statistics that were previously published by the Department of Energy. The commenters said that these publications would be useful to the public. Although the Commission understands this need, the Commission will not publish these statistics. Pursuant to section 205 of the DOE Act, the publication of such statistical compilations is within the responsibility of the Energy Information Administration. The Commission's publication of these statistics could be viewed as an inappropriate use of administrative resources. However, the completed forms, which would include these statistical data, will be available for review by the public at the Commission.

B. Format of the Form

The commenters discussed three matters related to the format of the form. These were: (1) the name of the form, (2) the identification of the pages in the form, and (3) the reporting of dollar amounts in the form.

One commenter suggested that the name of the form not be changed. However, the Commission believes that changing the form's name to "Annual Report of Oil Pipeline Companies" will more accurately describe the report from the standpoint of the Commission's regulatory responsibilities. In addition, the form's new designation of "FERC Form No. 6" will conform the report more closely to the Commission's reporting requirement classification system.

One commenter proposed that page numbers for the new form be in numerical sequence without use of

[5] ARCO Pipe Line Company, Buckeye Pipeline Company, Four Corners Pipe Line Company, Getty Oil Company, Mid-America Pipeline Company, Mobil Pipe Line Company, Shell Pipe Line Company, Sohio Pipe Line Company, Sonat Oil Transmission Inc., Texas Pipe Line Company, Union Alaska Pipeline Company, and Williams Pipe Line Company.

[6] The Commission is reluctant to make any determinations respecting reclassification before the resolution of the issues in the *Williams Pipe Line Company* case (Docket No. OR79–1) currently pending before the Commission. The changes to the Form P in this rulemaking are made for the purpose of reducing reporting burdens, and eliminating the filing of data that are unnecessary to the Commission, regardless of the outcome of the *Williams* case.

alphabetical designations and that the page numbers appear at the bottom of each page rather than the upper right corner. Other commenters suggested that the reference page numbers be retained in the Table of Contents because they are helpful to the use of the report.

The Commission has organized the schedules to which the pages refer to correspond to the account numbers in the Uniform System of Accounts and has eliminated all the alphabetical designations for the pages in the report. In addition to the other changes, the Commission has decided to replace its system of separate schedule numbers and reference page numbers with a system in which the schedule numbers and page numbers are the same. The page numbers are centered at the bottom of each page. The schedules will continue to be identified in a "Table of Schedules" at the beginning of the report.

One commenter proposed that, whenever possible, pipelines should be permitted to round reported dollar amounts to the nearest thousand dollars. The Commission has decided that it will continue to require reporting of dollar amounts on the basis of whole dollars, *i.e.*, rounding cents to the nearest dollar. One reason is that rounding dollars to the nearest thousand may inaccurately reflect the operations of smaller companies. In addition, dollar amounts are rounded to the nearest dollar in other Commission filings, including oil company evaluation reports and reports from companies that have both oil and natural gas operations. The Commission believes that this practice should continue here to establish a useable cross-reference between the various filings and reports.

As part of its format revisions, the Commission has also consolidated all of the definitions used in Form No. 6 in the General Instructions. The Commission has revamped most of the instructions in the form and increased the space for reporting data in the schedules. The Commission believes that all of these changes will make the form easier to use by the companies and will provide better data to the Commission.

C. Particular Schedules in the Form

1. *Schedules 120 and 121—Statement of Changes in Financial Position (New).* The four commenters who discussed this new schedule all favored its addition to the form. They agreed that the requested data would assist the Commission in analyzing operations of the individual pipelines and that the schedule would add only a minimal reporting burden.

2. *Schedule 104—Principal General Officers (Old Schedule 103).* One commenter proposed that column (b) of Schedule 103 entitled, "Department or departments over which jurisdiction is exercised" should be eliminated because officers could have corporate-wide functions rather than only the narrowly-defined departmental responsibilities. The Commission agrees with this comment and has eliminated column (b). The old description is too narrow and, as such, could result in burdensome reporting.

3. *Schedules 230 and 231—Data Pertaining to Federal Income and Other Taxes on the Comparative Balance Sheet (on Old Schedule 200).* One commenter proposed that "Comparative Balance Sheet Statement Notes" (on old Schedule 200) be revised to include a new category for cumulative tax savings from depreciation provided by the recently enacted tax legislation. [7] Another commenter recommended updating some sections on that statement (particularly those relating to deferred taxes) to make them correspond to changes occasioned by the new tax laws.

The Commission agrees with these suggestions and has accordingly provided a line item for ACRS—Accelerated Cost Recovery System-Economic Recovery Tax Act of 1981 in the new Schedules 230 and 231, "Analysis of Federal Income and Other Taxes Deferred".

4. *Schedules 208 and 209—Securities, Advances, and Other Intangibles, Owned or Controlled Through Nonreporting Carrier and Noncarrier Subsidiaries (Old Schedule 224).* Two commenters objected to the Commission's requirement of Schedule 224, claiming that the information reported on this schedule is not necessary to the Commission's regulatory responsibilities. One of these commenters also suggested that the Commission obtain this information directly from a company, as needed, rather than impose a reporting burden on all companies.

The Commission disagrees. The data in this schedule are used to compare the operations of the various companies and to determine historical trends of the industry. The Commission has, however, deleted from this schedule all but essential information to minimize, as much as possible, the reporting burden on companies that respond to it. Furthermore, as revised, the schedule should provide no burden to companies that are not utilizing an intermediary holding company.

5. *Schedules 214 and 215—Depreciation Base and Depreciation Rates (Old Schedule 231).* One commenter proposed that the instructions in Schedule 231 be clarified. The commenter stated that the schedule requires the balancing of the depreciation base with the total assets as of December 31st listed on Schedule 230. However, many companies base their depreciation on the prior month's balance (i.e., November) so that the correct balance for computing December's depreciation would, in fact, be the November ending balance. The commenter added that a reconciling process is needed to include the December data in order to comply with the instructions on Schedule 231.

The Commission has decided to retain the method of reporting of this information in new Schedules 214 and 215 because the information is designed to correspond to data in other subsidiary reporting schedules in the form and to the balance sheet. A revision to these schedule would, therefore, require corresponding changes to the other schedules and the resulting data reported would not be as useful to the Commission as it is in the current format. The Commission does also not feel that reconciling process poses a significant burden for the reporting companies.

6. *Schedule 220—Other Deferred Charges (Old Schedule 240).* Two commenters said that the information in this schedule is not necessary for the performance of the Commission's regulatory responsibilities. One of the commenters suggested that the Commission should obtain information on deferred charges directly from particular companies, as needed, rather than from all companies in an annual report. Two commenters suggested that the schedule require disclosure only of individual items over $100,000, and one commenter requested that the Commission permit items smaller than $100,000 to be grouped for reporting purposes.

The Commission has decided to retain this schedule because it is the only source of information on deferred charges that the Commission receives from all reporting companies. The Commission uses the data on the schedule for comparisons among the various companies, and for decisionmaking in its rate proceedings. The Commission, however, agrees with the suggestion respecting the threshold, and, accordingly has raised the reporting minimum for deferred charges

[7] Economic Recovery Tax Act of 1981, 26 U.S.C. § 1, *et seq.*

from $20,000 to $100,000. The data reported with a higher threshold should be sufficient for Commission purposes and the new threshold should further reduce respondent burdens.

7. *Lease Information—Deleted (Old Schedule Nos. 243, 244, 245, 246 and 247).* Two commenters approved of the elimination of the schedules pertaining to accounting for leases: Schedules 243 (Rental Expense of Leasee), 244 (Minimum Rental Commitments), 245 (Lessee Disclosure), 246 (Lessee Commitments, Present Value), and 247 (Income Impact-Lessee). They recommended, however, that the Commission continue to use generally accepted accounting principles in the regimen of oil pipeline accounting and financial reporting.

The Commission notes that the elimination of these schedules will not change the Commission's oil pipeline accounting procedures.

8. *Schedule 336—Interest and Dividend Income Information (Old Schedule 345).* Two commenters suggested that information reported on this schedule is not necessary for the performance of the Commission's regulatory responsibilities. One of the commenters suggested that the Commission obtain the information collected on this schedule on a case-by-case basis rather than impose a reporting burden on all companies.

The Commission believes the continued reporting of information on this schedule in the current format is necessary. This is because the Commission uses the information to compare interest and dividend income for all of the reporting companies, and to make decisions in rate proceedings.

9. *Schedules 600 and 601—Statistics of Operations (Old Schedule 400).* One commenter objected to this schedule because it requires too many details of deliveries into and out of pipeline systems, that are unnecessary for the Commission's regulatory purposes. The commenter, therefore, recommended that only the totals of these deliveries continue to be required. The commenter said that these revisions would save it an estimated 40 hours in the preparation of the annual report.

The Commission has decided to retain this schedule in its current format at this time because the Commission uses the data to determine any fluctuations in the companies' operation and maintenance expenses as a basis for field audits. However, the Commission may reconsider the requirement to report these data in a future revision of the form.

10. *Schedules 602 and 603—Miles of Pipeline Operated at Close of Year (Old Schedule 410).* Two commenters stated that a significant portion of the information reported on this schedule is already provided in the Form ACV 1, "Statement of Property Changes Other Than Land and Rights-of-Way", and in ACV–4, "Summary of Cost of Reproduction New and Cost of Reproduction New Less Depreciation". The commenter, therefore, suggested that this schedule be deleted. Another commenter also recommended the deletion of the schedule because it is not useful to the Commission and is burdensome to pipeline companies. In the alternative, the company suggested the eliminaton of the detailed information concerning gathering, crude oil, and refined products.

The Commission notes that the Forms ACV 1 and 4 are currently under review, as are other important pipeline proceedings. Until these matters are resolved, the Commission believes that it should continue to collect the data currently required on this schedule. In the future, the Commission may reconsider the requirement to report the data on this schedule.

11. *Schedule 350—Employees and Their Compensation (Old Schedule 561).* Two commenters objected to this schedule, stating that it collects data that are not necessary to the performance of the Commission's regulatory responsibilities. The commenters suggested that the Commission could obtain this detailed information from a company, as needed, rather than impose the reporting burden on all companies.

The Commission will continue collecting this information because it is used by the Commission to develop historical trends in the industry respecting employee services and the related costs reported each year. In addition, the Commission uses these data to evaluate the companies' labor costs projections as part of their justifications for a tariff increase.

12. *Schedule 351—Payments for Service Rendered by Other Than Employees (Old Schedule 563).* Two commenters objected to this schedule because it allegedly collects data that are not necessary for the performance of the Commission's regulatory responsibilities. They suggested that the information could be obtained directly from a company, when needed, rather than from all companies in an annual reporting requirement. As an alternative, one of the commenters suggested that the reporting minimums for service payments be raised to $100,000.

The Commission has decided to continue to collect this information because it enables the Commission to develop historical trends of services provided by reporting companies and to determine which costs should be included in a company's cost-of-service. The Commission will not raise the threshold because it would result in the loss of too many important data respecting payments smaller than $100,000.

III. Certification of No Significant Economic Impact

The Regulatory Flexibility Act (RFA), (5 U.S.C. §§ 601–612) requires certain statements, descriptions, and analyses of proposed and final rules that will have "a significant economic impact on a substantial number of small entities".

Of the 138 oil pipeline companies required to file the annual report, only about 25 companies have annual operating revenues below $1 million. The Commission does not consider this to be a substantial number of small entities. Moreover, this rule, if promulgated, should result in an overall reduction in the filing burden on all oil pipeline companies, both large and small, because most of the revisions either delete or consolidate the schedules presently included in the annual report, and clarify and simplify the requirements for filing the report. Therefore, under section 605(b) of the RFA, the Commission certifies that this rule will not have a significant economic impact on a substantial number of small entities.

IV. Summary of Changes

The Commission has adopted the changes to the new Form No. 6 that were proposed in the notice,[1] except as modified by the revisions in response to the comments, discussed above. A summary of all of the changes to the form is attached at Appendix A.

The Commission has also adopted the changes to its regulations at § 357.2 that were proposed in the notice, and, in addition, makes certain nonsubstantive revisions. These revisions include identifying the form by its title in the body of the regulations, making an editorial change to the requirements of "when to file", and making minor reorganizational changes to the regulations.

V. Effective Date

This final rule is effective 30 days after the date of its publication in the **Federal Register**. It applies to reports to be filed on or before March 31, 1983, and for reports filed thereafter.

---

[1] *See* Part I of this final rule.

(Department of Energy Organization Act, 42 U.S.C. §§ 7101–7352; E.O. 12009, 3 CFR 142 (1978); Interstate Commerce Act, 49 U.S.C. § 1, et seq.)

List of Subjects in 18 CFR Part 357

Pipelines, Uniform system of accounts.

In consideration of the foregoing, the Commission amends Form P and redesignates the form as FERC Form No. 6 as discussed above and as set forth in *Appendix B* which is not printed in the Federal Register and amends Part 357 of Subchapter R, Chapter I, Title 18 of the Code of Federal Regulations, as set forth below, effective thirty days after publication in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

PART 357—ANNUAL SPECIAL OR PERIODIC REPORTS: CARRIERS SUBJECT TO PART I OF THE INTERSTATE COMMERCE ACT

Section 357.2 is revised to read as follows:

§ 357.2 FERC Form No. 6, Annual report of oil pipeline companies.

Every carrier by pipeline subject to the provisions of section 20 of the Interstate Commerce Act must file with the Commission copies of FERC Form No. 6, "Annual Report of Oil Pipeline Companies" pursuant to the General Instructions set out in that form. This report must be filed on or before March 31st of each year for the previous calendar year, beginning with the year ending December 31, 1982.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 7836]

Income Tax; Taxable Years Beginning After December 31, 1953; State and Local Government Deferred Compensation Plans

AGENCY: International Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to deferred compensation plans maintained by State and local governments and rural electric cooperatives. Changes to the applicable tax law were made by the Revenue Act of 1978. The regulations would provide the public with the guidance needed to comply with that Act, and would affect State and local governments and rural electric cooperatives that maintain deferred compensation plans, and employees whose compensation is deferred under the plans.

EFFECTIVE DATES: The regulations are generally effective for taxable years beginning after December 31, 1978. However, the rules relating to the tax treatment of participants in ineligible plans under § 1.457-3 are effective for taxable years beginning after December 31, 1981. In addition, the transitional rules of § 1.457-4 are effective for taxable years beginning after December 31, 1978, and before January 1, 1982.

FOR FURTHER INFORMATION CONTACT: Charles K. Kerby, III of the Employee Plans and Exempt Organizations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, (Attention: CC:EE-176-78) (202-566-3422) (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On December 24, 1980, the **Federal Register** published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 457 of the Internal Revenue Code of 1954 (45 FR 85077). The amendments were proposed to conform the regulations to section 131 of the Revenue Act of 1978 (92 Stat. 2779). A public hearing on the proposed regulations was held on May 5, 1981. After consideration of all comments regarding the proposed amendments, these amendments are adopted (as revised) by this Treasury decision.

Exclusion From Income by Individuals

Under section 131 of the Revenue Act of 1978, employees and independent contractors who provide services for a State or local government or a rural electric cooperative that maintains an eligible deferred compensation plan may exclude from gross income compensation deferred under the plan until it is paid or otherwise made available.

General Plan Requirements

In order to be an eligible plan, the plan must provide that compensation deferred under the plan for any year may not exceed 33⅓% of the participant's includable compensation (in general, gross salary less any amount excludable from gross income) or $7,500, whichever is less. A plan may, however, inlcude a limited "catch-up" provision for any, or all, of the last three taxable years of a participant ending before the participant attains normal retirement age under the plan. Under the catch-up provision, a participant may defer an additional amount equal to any deferral limitations not utilized for prior taxable years after December 31, 1978, in which the participant was eiligible to participate under the plan and was subject to the normal deferral limitations. The amount that can be deferred under the catch-up prcvision is, however, limited to $15,000. The final regulations make clear that a plan may not permit the catch-up provision to be used more than once, whether or not the participant rejoins the plan or joins a new plan, and whether or not the catch-up is utilized in one or all three of the applicable taxable years. Under the final regulations, normal retirement age is expanded to include a limited range of ages at the option of the participant.

An individual may be a participant in more than one eligible plan. If an individual participates in two or more plans that are maintained by the same employer, any amount deferred under one plan reduces the amount that may be deferred under another, so that the total deferred under all the plans does not exceed the amount which could be deferred under a single plan. If an individual participates in two or more plans maintained by different employers, the maximum amount excludable from the gross income of the participant for a taxable year on account of amounts deferred under the plans cannot exceed $7,500, or, as applicable, the maximum permitted under the "catch-up rules.

If a participant in an eligible plan also has amounts contributed by the same employer for the purchase of a tax-sheltered annuity under Code section 403(b), the maximum amount that may be deferred under the eligible plan is reduced by the amount contributed for the purchase of the annuity contract. If the employer contributing amounts for the purchase of the annuity contract and the employer maintaining the eligible plan are different employers, the maximum deferral permitted under the eligible plan is not reduced by the amount contributed for the purchase of the annuity contract. However, the maximum amount excludable from the participant's gross income on account of amounts deferred under the eligible plan of the one employer is reduced to take into account amounts excludable under section 403(b) on account of contributions by the other employer for the purchase of the annuity contract. In general, in any case in which an individual is both a participant in an eligible plan and is an employee for whom amounts are contributed toward the purchase of an annuity contract under section 403(b), the deferral of compensation under the eligible plan will reduce the amount excludable from gross income under section 403(b), without regard to whether it is a single employer or different employers maintaining the eligible plan and contributing amounts for the purchase of the annuity contract.

Plan Distribution Requirements

An eligible plan is considered to provide a retirement benefit for the participant. Consistent with this view, the proposed regulations prescribed detailed rules limiting the period within which amounts deferred may be paid to the participant and limiting the manner in which distributions could be made to the participant's beneficiary. Commentators objected to the rules prescribed as much too complex and not justified in the case of governmental deferred compensation plans. Upon reconsideration, these rules are withdrawn and the more general incidental benefit rules applicable to qualified pension plans are substituted therefore.

Although the proposed regulations provided that distributions under an eligible plan need not commence until the year in which a participant attains age 70½, the final regulations may require the commencement of distributions at an earlier date if the plan does not specify a normal retirement age or if it specifies a normal retirement age under age 70½. It is not intended that this change adversely affect any eligible plan participant who, in reliance on the proposed regulations, made an irrevocable election to defer the distribution of amounts deferred under the plan until the year in which he or she attains age 70½. Accordingly, an eligible plan need not modify the distribution commencement date of any participant who made such an election prior to October 27, 1982.

PLan to Plan Transfers

The proposed regulations under § 1.457–2(k) prohibited transfers of amounts deferred between different eligible plans. After consideration of the comments received in opposition to this prohibition, the final regulations permit an eligible plan to provide for the transfer of amounts between eligible plans, so long as the entities sponsoring the plans are located in the same State, the plan provides for the automatic transfer of such amounts, and the new plan accepts such amounts.

Pre-1979 Deferred Amounts

The proposed regulations indicated that amounts deferred under an agreement or arrangement in taxable years beginning before January 1, 1979, were not to have the provisions of section 457 apply. The final regulations make clear that amounts deferred under a State deferred compensation plan before 1979 are subject to section 457 if made a part of an eligible plan.

Amounts Made Available

At the behest of commentators, the provisions illustrating when amounts will be made available have been clarified to confirm that redirection of past deferrals as well as current deferrals into different investment modes will not result in those amounts being made available. Other provisions and more examples have been added to further illustrate when amounts will be considered made available, in the case of participants and beneficiaries.

Comments were received urging that participants be permitted to retain the right to accelerate payments once payments have commenced. The final regulations, through examples, reject this suggestion and provide that deferrals under such arrangements will be considered made available. However, in keeping with past practice, payments already commenced will be permitted to be accelerated upon an unforeseeable emergency.

Commentators further urged that the distribution of *de minimis* accounts be expressly permitted in order to accommodate those who have reconsidered participation in the plan shortly after beginning participation. In the absence of any authority in the statute or legislative history to provide for this arrangement, the regulations do not adopt this suggestion. The right to withdraw such amounts from the plan will be considered to make the amounts deferred made available to the participant. Furthermore, a plan that provides for such an arrangement will contravene the payment requirements under § 1.457–2(h)(1) and will not be considered an eligible plan.

Regular Retirement Plan of a State

At the time that the proposed regulations were published in the **Federal Register**, comments were invited with respect to whether regulations could appropriately be promulgated that would exclude unfunded regular retirement plans of a State for the purpose of section 457(e)(1) notwithstanding the limited exceptions provided by section 457(e)(2), and, if so, under what circumstances. Many helpful comments were received on this issue. Nevertheless, in the absence of statutory authority to provide for the exclusion of such plans from section 457(e)(1) and without clearer legislative guidance as to what form this exclusion should take, it has been decided that it is inappropriate to provide for this exclusion through regulations. Consequently, deferrals under an unfunded regular retirement plan of a State will be considered to be made under an ineligible plan, and not excludable from income under section 457(a).

Transitional Rules

All plans to which section 457 applies will have until January 1, 1982, to satisfy the requirements for classification as an eligible State deferred compensation plan. However, for taxable years beginning after December 31, 1978, and before January 1, 1982, transitional rules provide that any amount of compensation deferred under a plan of deferred compensation, regardless of whether the plan is an eligible plan, is excludable from the gross income of the participant until paid or otherwise made available to the participant. However, the maximum amount that may be excluded from gross income for any year is $7,500 or 33⅓% of the participant's includible compensation. Under the transitional rules, increased deferrals under the limited "catch-up" provision are permitted only if the plan is an eligible plan.

Non-Applicability of Executive Order 12291

The Treasury Department has determined that this regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of the Order dated April 28, 1982.

Regulatory Flexibility Act

No general notice of proposed rulemaking is required by 5 U.S.C. 553(b) for interpretative regulations. Accordingly, the Regulatory Flexibility Act (5 U.S.C. Chapter 6) does not apply and no Regulatory Flexibility Analysis is required for this rule.

Drafting Information

The principal author of this regulation was Ray K. Kamikawa of the Employee Plans and Exempt Organizations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

List of Subjects

26 CFR 1.61–1—1.281–4

Income taxes, Taxable income, Exclusions.

26 CFR 1.401–0—1.425–1

Income taxes, Deferred compensation, Pension plans.

26 CFR 1.441–1—1.483–2

Income taxes, Accounting, Deferred compensation plans.

Adoption of Amendments to the Regulations

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Accordingly, 26 CFR Part 1 is amended as follows:

Paragraph 1. Paragraph (a)(2) of § 1.101–1 is amended by deleting "or" at the end of subdivision (i), deleting the period at the end of subdivision (ii) and inserting in lieu thereof "; or", and by adding a new subdivision (iii) to read as follows:

§ 1.101–1 Exclusion from gross income of proceeds of life insurance contracts payable by reason of death.

(a) * * *

(2) *Cross reference.* * * *

(iii) Under eligible State deferred compensation plans described in section 457(b), see paragraph (c) of § 1.457–1.

* * * * *

Par. 2. Paragraph (b)(2) of § 1.101–2 is amended by deleting the period at the end of subdivision (iii) and inserting in lieu thereof a semicolon, and by adding a new subdivision (iv) to read as follows:

§ 1.101–2 Employees' death benefits.

* * * * *

(b) * * *

(2) *Cross references.* * * *

(iv) Under eligible State deferred compensation plans described in section 457 (b), see paragraph (c) of § 1.457–1.

* * * * *

Par. 3. Paragraph (d)(1) of § 1.403 (b)–1 is amended by revising subdivision (ii) and the flush paragraph which follows it to read as follows:

§ 1.403(b)–1 Taxability of beneficiary under annuity purchased by a section 501(c)(3) organization or public school.

* * * * *

(d) *Exclusion allowance*—(1) *In general.* * * *

(i) * * *

(ii) The aggregate of (*a*) the amounts which have been contributed by the employer for annuity contracts for such employee and which were excludable from the gross income of the employee for any taxable year prior to the taxable year for which the exclusion allowance is being determined, and (*b*) the amounts of compensation excludable from the gross income of the employee under section 457(a) (relating to eligible State deferred compensation plans) for any prior taxable year that is taken into account as a year of service under paragraph (f) of this section. Compensation deferred under an eligible State deferred compensation plan shall be taken into account as described in subdivision (ii) of this subparagraph even if the entity sponsoring the eligible plan is not the employer purchasing the annuity contract with respect to which the employee's exclusion allowance is to be determined. See paragraph (e) of this section for the definition of an employee's includible compensation in respect of a taxable year and paragraph (f) of this section for rules for computing an employee's total number of years of service for an employer.

* * * * *

Par. 4. The following new §§ 1.457–1, 1.457–2, 1.457–3 and 1.457–4 are added in the appropriate place.

§ 1.457–1 Compensation deferred under eligible State deferred compensation plans.

(a) *Year of inclusion in gross income*—(1) *In general.* For taxable years beginning after December 31, 1978, section 457(a) provides that amounts deferred (within the meaning of § 1.457–1(d)(3)) under an eligible State deferred compensation plan that satisfies the requirements of § 1.457–2 (an "eligible plan") are includible in gross income only for the taxable year in which paid or otherwise made available to the participant or beneficiary under the plan.

(2) *Maximum deferral; in general.* Under section 457(c)(1), the exclusion from gross income described in this paragraph (a) does not apply to compensation deferred under one or more eligible plans to the extent that the compensation so deferred during a participant's taxable year exceeds the greater of—

(i) $7,500, or,

(ii) As applicable, the sum of the plan ceilings determined under § 1.457–2(f), to the extent such sum does not exceed $15,000.

(3) *Maximum deferral; exclusions under section 403(b) taken into account.* Under section 457(c)(2), for a participant's taxable year for which an amount is contributed to an annuity contract described in section 403(b) (including a custodial account described in section 403(b)(7)) on behalf of the participant, subparagraph (2) of this paragraph (a) is applied by substituting—

(i) For $7,500, an amount equal to $7,500, less the amount excludable from the participant's gross income under section 403(b) for the taxable year,

(ii) For the sum of the plan ceilings determined under § 1.457–2(f), an amount equal to the sum of the plan ceilings determined under § 1.457–2(f), less the amount excludable from the participant's gross income under section 403(b) for the taxable year, if such amount is not taken into account under such § 1.457–2(f), and

(iii) For $15,000, an amount equal to $15,000, less the amount excludable from the participant's gross income under section 403(b) for the taxable year.

(b) *Amounts made available to participant or beneficiary.*—(1) *In general.* For purposes of section 457(a) and this section, amounts deferred under an eligible plan will not be considered made available to the participant or beneficiary if under the plan the participant or beneficiary may irrevocably elect, prior to the time any such amounts become payable, to defer payment of some or all of such amounts to a fixed or determinable future time. In addition, amounts deferred (including amounts previously deferred) under an eligible plan will not be considered made available to the participant solely because the participant is permitted to choose among various investment modes under the plan for the investment of such amounts whether before or after payments have commenced under the plan.

(2) *Examples.* Further examples of when amounts deferred will or will not be considered as being made available to the participant or beneficiary are provided below:

Example (1). (i) C, an individual, is a participant in an eligible State deferred compensation plan that provides the following:

(A) The total of the amounts deferred under the plan is payable to the participant in 120 substantially equal monthly installments commencing on the date 30 days after the participant attains normal retirement age under the plan (age 65), unless the participant elects, within the 90 day period ending on the date the participant attains normal retirement age, to receive a single sum payment of the deferred amounts. The single sum payment is payable to a participant on the date the first of the monthly payment would otherwise be payable to the participant.

(B) If a participant separates from the service of the State before attaining normal retirement age, the total of the amounts deferred under the plan is payable to the participant in a single sum payment on the date 90 days after the date of the separation, unless, before the date 30 days after the separation, the participant elects not to receive the single sum payment. The election is irrevocable. If the participant makes the election, the total of the amounts deferred under the plan is payable to the participant as described in (A), either in monthly installments or, at the election of the participant, in a single sum payment.

(ii) On June 6, 1982, C, a calendar year taxpayer aged 59, separates from the service of the State. On June 18, 1982, C elects not to receive the single sum payment payable on account of the separation. Because of C's election, no amount deferred under the plan is considered made available in 1982 by reason of C's right to receive the single sum payment.

(iii) On February 6, 1988, C attains age 65. C did not, within the 90 day period elect the single sum payment that is payable in lieu of the monthly installments. Amounts deferred under the plan are includible in C's gross income as they are paid to C in the monthly installments. No amount is considered made available by reason of C's right to elect the single sum payment.

Example (2). Assume the same facts as in example (1), except that the plan provides that notwithstanding that monthly installments have commenced under the plan, as described in (i)(A), the participant may, without restriction, elect to receive all or any portion of the amount remaining payable to the participant. The total of the amounts deferred under the plan is considered made available in 1988.

Example (3). Assume the same facts as in example (1), except that the plan provides that once monthly installment payments have commenced under the plan, as described in (i)(A), the participant may accelerate the payment of the amount remaining payable to the participant upon the occurrence of an unforeseeable emergency as described in § 1.457–2(h)(4) in an amount not exceeding that described in § 1.457–2(h)(5). No amount is considered made available to C on account of C's right to accelerate payments upon the occurrence of an unforeseeable emergency.

Example (4). Under an eligible plan of which individual D is a participant, normal retirement age is age 65 at which time payments must begin. Payments may begin earlier upon a separation from the service. Under the plan, a participant who separates from the service before age 65 or the participant's beneficiary (if the separation is due to the participant's death) may elect to defer the distribution of the amounts deferred until the year in which the participant attains or would have attained age 65. This election may be made only prior to the time any payments commence and once made may not be revoked. If such an election is made, the participant, former participant, or beneficary need not elect the method of payment, or if one is elected may change the method elected, until the date 30 days preceding the date upon which payments are to commence. No amount is considered made available by reason of D's right to defer the distribution of the amounts deferred until age 65, nor on account of D's right to delay the election of the method of payout. Similarly, if D dies at age 60, no amount is considered made available to D's beneficiary by reason of the beneficiary's right to defer the distribution of the amounts deferred until the year in which D would have attained age 65, nor on account of the beneficiary's right to delay the election of the method of payout.

Example (5). Under an eligible plan of which individual E is a participant, the maximum that may be deferred in any taxable year is 33⅓% of includible compensation, not to exceed $7,500. The plan does not provide for a catch-up deferral under section 457(b)(3). In one taxable year, E elects to have amounts deferred in excess of the limitation provided for under the plan. The amounts deferred in excess of the limitation will be considered to have been made available to E in the taxable year in which deferred.

Example (6). Assume the same facts as in example (5), except that E's employer also contributes amounts for the purchase of an annuity contract under section 403(b). In one taxable year, E has amounts contributed for the annuity within the limitations of section 403(b)(2), and also has amounts deferred under the eligible plan for the same year. The aggregate of the amounts contributed for the annuity contract and the amounts deferred under the plan exceed the deferral limitations under the plan. The excess deferrals will be considered made available to E in the year in which the amounts were deferred.

Example (7). Under an eligible plan of which F is a participant, amounts deferred have been invested in a money market investment fund. The plan then transfers the amounts deferred to a life insurance company for the purchase of life insurance contracts as an investment medium. However, the entity sponsoring the plan (1) retains all of the incidents of ownership of the contracts, (2) is the sole beneficiary under the contracts, and (3) is under no obligation to transfer the contracts or to pass through the proceeds of the contracts to any participant or a beneficiary of any participant. The movement of the amounts deferred to the life insurance company (whether or not made at the request of any plan participant) will not be considered to make the amounts available to the plan's participants. The cost of current life insurance protection under the life insurance contracts will not be considered made available to the plan's participants.

(c) *Life insurance proceeds and death benefits paid under eligible plan.* No amount received or made available under an eligible plan is excludable from gross income under section 101(a) (relating to life insurance contracts) or section 101(b) (relating to employees' death benefits).

(d) *Definitions.* For purposes of §§ 1.457–1 through 1.457–4:

(1) *Participant.* "Participant" means an individual who is eligible under § 1.457–2(d) to defer compensation under the plan.

(2) *Beneficiary.* "Beneficiary" means a beneficiary of a participant, a participant's estate, or any other person whose interest in the plan is derived from the participant.

(3) *Amounts deferred.* "Amount(s) deferred" under an eligible plan means compensation deferred under the plan, plus income attributable to compensation so deferred. Income attributable to compensation deferred under an eligible plan includes gain from the disposition of property. The term "amounts deferred" includes amounts deferred in taxable years beginning before January 1, 1979, if such amounts were deferred under a plan described in § 1.457–2(b), and such amounts were made a part of an eligible plan.

§ 1.457–2 Eligible State deferred compensation plan defined.

(a) *In general.* For purposes of §§ 1.457–1 through 1.457–4, an "eligible State deferred compensation plan" (sometimes referred to as "eligible plan") is a plan satisfying the requirements of paragraphs (c) through (k) of this section.

(b) *Plan.* For purposes of this section and § 1.457–3, the term "plan" includes any agreement or arrangement between a State (within the meaning of paragraph (c) of this section) and a participant or participants, under which the payment of compensation is deferred, but only if such agreement or arrangement is not described in § 1.457–3(b).

(c) *State.* The plan must be established and maintained by a State. For this purpose, the term "State" includes:

(1) The 50 states of the United States and the District of Columbia;

(2) A political subdivision of a State;

(3) Any agency or instrumentality of a State or political subdivision of a State;

(4) An organization that is exempt from tax under section 501(a) and engaged primarily in providing electrical service on a mutual or cooperative basis; and

(5) An organization that is described in section 501(c)(4) or (6) and exempt from tax under section 501(a) and at least 80% of the members of which are organizations described in subparagraph (4).

Where it appears in this § 1.457–2, the term "State" means the entity described in this paragraph (c) that sponsors the plan.

(d) *Participants.* The plan must provide that only individuals who perform services for the State, either as an employee of the State or as an independent contractor, may defer compensation under the plan.

(e) *Maximum deferrals*—(1) *In general.* The plan must provide that the amount of compensation that may be deferred under the plan for a taxable year of a participant shall not exceed an amount specifed in the plan (the "plan ceiling"). Except as described in paragraph (f) of this section, a plan ceiling shall not exceed the lesser of:

(i) $7,500, or

(ii) 33⅓% of the participant's includible compensation for the taxable

year, reduced by any amount excludable from the participant's gross income for the taxable year under section 403(b) on account of contributions made by the State.

(2) *Includible compensation.* For purposes of this section, a participant's includible compensation for a taxable year includes only compensation from the State that is attributable to services performed for the State and that is includible in the participant's gross income for the taxable year. Accordingly, a participant's includible compensation for a taxable year does not include an amount payable by the State that is excludable from the employee's gross income under section 457(a) and § 1.457–1 or under section 403(b) (relating to annuity contracts purchased by section 501(c)(3) organizations or public schools), section 105(d) (relating to wage continuation plans) or section 911 (relating to citizens or residents of the United States living abroad). A participant's includible compensation for a taxable year is determined without regard to any community property laws.

(3) *Compensation taken into account at its present value.* For purposes of subparagraph (1) of this paragraph, compensation deferred under a plan shall be taken into account at its value in the plan year in which deferred. However, if the compensation deferred is subject to a substantial risk of forfeiture (as defined in section 457(e)(3)), such compensation shall be taken into account at its value in the plan year in which such compensation is no longer subject to a substantial risk of forfeiture.

(f) *Limited catch-up*—(1) *In general.* The plan may provide that, for 1 or more of the participant's last 3 taxable years ending before the participant attains normal retirement age, the plan ceiling is an amount not in excess of the lesser of:

(i) $15,000, reduced by any amount excludable from the participant's gross income for the taxable year under section 403(b) on account of contributions made by the State, or

(ii) The amount determined under subparagraph (2) of this paragraph.

(2) *Underutilized limitations.* The amount determined under this subparagraph (2) is the sum of:

(i) The plan ceiling established under paragraph (e)(1) of this section for the taxable year, plus

(ii) The plan ceiling established under paragraph (e)(1) of this section for any prior taxable year or years, less the amount of compensation deferred under the plan for such prior taxable year or years. A prior taxable year shall be taken into account under subdivision (ii) of this subparagraph (2) only if (A) it begins after December 31, 1978, (B) the participant was eligible to participate in the plan during all or any portion of the taxable year, and (C) compensation deferred (if any) under the plan during the taxable year was subject to a plan ceiling established under paragraph (e)(1) of this section. A participant will be considered eligible to participate in the plan for a taxable year if the participant is described in paragraph (d) of this section for any part of that taxable year. A prior taxable year includes a taxable year in which the participant was eligible to participate in an eligible plan sponsored by a different entity, provided that the entities sponsoring the plans are located within the same State as that term is used in § 1.457–2(c)(1).

(3) *Restriction on limited catch-up.* The plan shall not provide that a participant may elect to have the limited catch-up provision of this paragraph (f) apply more than once, whether or not the limited catch-up is utilized in less than all of the three taxable years ending before the participant attains normal retirement age, and whether or not the participant or former participant rejoins the plan or participates in another eligible plan after retirement. For example, if the participant elects to utilize the limited catch-up only for the one taxable year ending before normal retirement age, and, after retirement at that age, the participant renders services for the State as an independent contractor or otherwise, the plan may not provide that the participant may utilize the limited catch-up for any of the taxable years subsequent to retirement.

(4) *Normal retirement age.* For purposes of this paragraph (f), normal retirement age may be specified in the plan. If no normal retirement age is specified in the plan, then the normal retirement age is the later of the latest normal retirement age specified in the basic pension plan of the State, or age 65. A plan may define normal retirement age as any range of ages ending no later than age 70½ and beginning no earlier than the earliest age at which the participant has the right to retire under the State's basic pension plan without consent of the State and to receive immediate retirement benefits without actuarial or similar reduction because of retirement before some later specified age in the State's basic pension plan. The plan may further provide that in the case of a participant who continues to work beyond the ages specified in the preceding two sentences, the normal retirement age shall be that date or age designated by the participant, but such date or age shall not be later than the mandatory retirement age provided by the State, or the date or age at which the participant separates from the service with the State.

(g) *Agreement for deferral.* The plan must provide that, in general, compensation is to be deferred for any calendar month only if an agreement providing for such deferral has been entered into before the first day of the month. However, a plan may provide that, with respect to a new employee, compensation is to be deferred for the calendar month during which the participant first becomes an employee, if an agreement providing for such deferral is entered into on or before the first day on which the participant becomes an employee.

(h) *Payments under the plan*—(1) *In general.* The plan may not provide that amounts payable under the plan will be paid or made available to a participant or beneficiary before the participant separates from service with the State, or, if the plan provides for payment in the case of an unforeseeable emergency, before the participant incurs an unforeseeable emergency.

(2) *Separation from service; general rule.* An employee is separated from service with the State if there is a separation from the service within the meaning of section 402(e)(4)(A)(iii), relating to lump sum distributions, and on account of the participant's death or retirement.

(3) *Separation from service; independent contractor*—(i) *In general.* An independent contractor is considered separated from service with the State upon the expiration of the contract (or in the case of more than one contract, all contracts) under which services are performed for the State, if the expiration constitutes a good-faith and complete termination of the contractual relationship. An expiration will not constitute a good faith and complete termination of the contractual relationship if the State anticipates a renewal of a contractual relationship or the independent contractor becoming an employee. For this purpose, a State is considered to anticipate the renewal of the contractual relationship with an independent contractor if it intends to again contract for the services provided under the expired contract, and neither the State nor the independent contractor has eliminated the independent contractor as a possible provider of services under any such new contract. Further, a State is considered to intend to again contract for the services provided under an expired contract, if

the State's doing so is conditioned only upon the State's incurring a need for the services, or the availability of funds or both.

(ii) *Special rule.* Notwithstanding subdivision (i), if, with respect to amounts payable to a participant who is an independent contractor, a plan provides that—

(A) No amount shall be paid to the participant before a date at least 12 months after the day on which the contract expires under which services are performed for the State (or, in the case of more than one contract, all such contracts expire), and

(B) No amount payable to the participant on that date shall be paid to the participant if, after the expiration of the contract (or contracts) and before that date, the participant performs services for the State as an independent contractor or an employee,

the plan is considered to satisfy the requirement described in subparagraph (1) that no amounts payable under the plan will be paid or made available to the participant before the participant separates from service with the State.

(4) *Unforeseeable emergency.* For purposes of this paragraph (h), an unforeseeable emergency is, and if the plan provides for payment in the case of an unforeseeable emergency must be defined in the plan as, severe financial hardship to the participant resulting from a sudden and unexpected illness or accident of the participant or of a dependent (as defined in section 152(a)) of the participant, loss of the participant's property due to casualty, or other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the participant. The circumstances that will constitute an unforeseeable emergency will depend upon the facts of each case, but, in any case, payment may not be made to the extent that such hardship is or may be relieved—

(i) Through reimbursement or compensation by insurance or otherwise,

(ii) By liquidation of the participant's assets, to the extent the liquidation of such assets would not itself cause severe financial hardship, or

(iii) By cessation of deferrals under the plan.

Examples of what are not considered to be unforeseeable emergencies include the need to send a participant's child to college or the desire to purchase a home.

(5) *Emergency withdrawals.* Withdrawals of amounts because of an unforeseeable emergency must only be permitted to the extent reasonably needed to satisfy the emergency need.

(i) *Distributions of deferrals*—(1) *Commencement of distributions.* A plan is not an eligible plan unless under the plan the payment of amounts deferred will commence not later than the later of—

(i) 60 days after the close of the plan year in which the participant or former participant attains (or would have attained) normal retirement age (within the meaning of § 1.457–2(f)(4)), or

(ii) 60 days after the close of the plan year in which the participant separates from service (within the meaning of §§ 1.457–2(h) (2) and (3)) with the State.

A plan is not other than an eligible plan merely because, prior to October 27, 1982, the distribution of amounts deferred under the plan may commence no later than the close of the participant's taxable year in which the participant attains age 70½.

(2) *Limitations on distributions.* Distributions must be made primarily for the benefit of participants (or former participants). Thus, the schedule selected by the participant for payments of benefits under the plan must be such that benefits payable to a beneficiary are not more than incidental. For example, if provision is made for payment of a portion of the amounts deferred to a beneficiary, the amounts payable to the participant or former participant (as determined by use of the expected return multiples in § 1.72–9, or, in the case of payments under a contract issued by an insurance company, by use of the mortality tables of such company), must exceed one-half of the maximum that could have been payable to the participant if no provision were made for payment to a beneficiary.

(3) *Distributions to beneficiaries.* A plan is not an eligible plan unless the plan provides that, if the participant dies before the entire amount deferred is paid to the participant, the entire amount deferred (or the remaining part of such deferrals if payment thereof has commenced) must be paid to a beneficiary over—

(i) The life of the beneficiary (or any shorter period), if the beneficiary is the participant's surviving spouse, or

(ii) A period not in excess of 15 years, if the beneficiary is not the participant's surviving spouse.

(j) *Administration of plan.* A plan is not an eligible plan unless all amounts deferred under the plan, all property and rights to property (including rights as a beneficiary of a contract providing life insurance protection) purchased with the amounts, and all income attributable to the amounts, property, or rights to property, remain (until paid or made available to the participant or beneficiary under the plan) solely the property and rights of the State (without being restricted to the benefits under the plan) subject to the claims of the general creditors of the State only. However, nothing in this paragraph (j) prohibits a plan's permitting participants to direct, from among different modes under the plan, the investment of the above amounts (see § 1.457–1(b)).

(k) *Plan-to-plan transfers.* The plan may provide for the transfer of amounts deferred by a former participant to another eligible plan of which the former participant has become a participant if the following conditions are met—

(1) The entities sponsoring the plans are located within the same State (as that term is used in § 1.457–2(c)(1)),

(2) The plan receiving such amounts provides for the acceptance of the amounts, and

(3) The plan provides that if the participant separates from service in order to accept employment with another such entity, payout will not commence upon separation from service, regardless of any other provision of the plan, and amounts previously deferred will automatically be transferred.

(l) *Effect on plan when not administered in accordance with paragraphs (c) through (k).* A plan that is administered in a manner which is inconsistent with one or more of the requirements of paragraphs (c) through (k) of this section ceases to be an eligible plan on the first day of the first plan year beginning more than 180 days after the date of written notification by the Internal Revenue Service that the requirements are not satisfied, unless the inconsistency is corrected before the first day of that plan year.

(m) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. A, born on June 1, 1917, is a participant in an eligible State deferred compensation plan providing a normal retirement age of 65. The plan provides limitations on deferrals up to the maximum permitted under § 1.457–2 (c) and (f).

For 1979, A, who will be 62, is scheduled to receive a salary of $20,000 from the State. A desires to defer the maximun amount possible in 1979. The maximum amount that A may defer under the plan is the lesser of $7,500, or 33⅓% of A's includible compensation (generally the equivalent of 25 percent of gross compensation). Accordingly, the maximum that A may defer for 1979 is $5,000 [$5,000 = $20,000 × .25]. Although A's taxable year 1979 is one of A's last 3 taxable years before the year in which A attains normal retirement age under the plan, A is not able to utilize the catch-up provisions of § 1.457–2(f) in 1979 because only taxable

years beginning after December 31, 1978, may be taken into account under those provisions.

Example 2. Assume the same facts as in example 1. In A's taxable year 1980, A receives a salary of $20,000, and elects to defer only $1,000 under the plan. In A's taxable year 1981, A again receives a salary of $20,000 and elects to defer the maximum amount permissible under the plan's catch-up provisions prescribed under § 1.457–2(f). The applicable limit on deferrals under the catch-up provision is the lesser of $15,000 or the sum of the normal plan ceiling for 1981, plus any underutilized deferrals for any taxable year before 1981. Thus, the maximum amount that A may defer in 1981 is $9,000, the normal plan ceiling for 1981, $5,000, plus the under-utilized deferrals for 1980, $4,000.

Example 3. Assume the same facts as in examples 1 and 2. In A's taxable year 1982, the year in which A will attain age 65, normal retirement age under the plan, A desires to defer the maximum amount possible under the plan. For 1982 the normal limitations of § 1.457–2(e) are applicable, and the maximum amount that A may defer is $5,000, assuming that A's salary for 1982 was again $20,000. The plan's catch-up provisions prescribed under § 1.457–2(f) are not applicable because 1982 is not a year ending before the year in which A attains normal retirement age.

§ 1.457–3 Tax treatment of participants where plan is not an eligible plan.

(a) *In general.* If a State (within the meaning of § 1.457–2(c)) provides for a deferral of compensation (after the effective date described in paragraph (c)) under any agreement or arrangement described in § 1.457–2(b) that is not an eligible plan within the meaning of § 1.457–2—

(1) Compensation deferred under the agreement or arrangement shall be includible in the gross income of the participant of beneficiary for the first taxable year in which there is no substantial risk of forfeiture (within the meaning of section 457(e)(3)) of the rights to such compensation,

(2) Earnings credited on the compensation deferred under the agreement of arrangement shall be includible in the gross income of the participant or beneficiary only when paid or made available, provided that the interest of the participant or beneficiary in the assets (including amounts deferred under the plan) of the entity sponsoring the plan is not senior to the entity's general creditors, and

(3) Amounts paid or made available under the plan to a participant or beneficiary shall be taxable to the participant or beneficiary under section 72, relating to annuities.

(b) *Exceptions.* Paragraph (a) does not apply with respect to—

(1) A plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

(2) An annuity plan or contract described in section 402,

(3) A qualified bond purchase plan described in section 405(a),

(4) That portion of any plan which consists of a transfer of property described in section 83, and

(5) That portion of any plan which consists of a trust to which section 402(b) applies.

(c) *Effective date.* This section is effective for taxable years beginning after December 31, 1981. For rules applicable in taxable years beginning after December 31, 1978, and before January 1, 1982, see § 1.457–4.

§ 1.457–4 Transitional rules.

(a) *In general.* Subject to the limitations described in paragraphs (b) and (c) of this section, amounts deferred (within the meaning of § 1.457–1(d)(3)) in taxable years beginning after December 31, 1978, and before January 1, 1982 under a plan described in § 1.457–2(b) (including an eligible plan within the meaning of § 1.457–2, but not including a plan described in section 457(e)(2) and § 1.457–3(b)) shall be includible in gross income only for the taxable year in which paid or otherwise made available to the participant or other beneficiary.

(b) *General limitation.* Except as described in paragraph (c) of this section, and excluding amounts deferred in taxable years beginning before January 1, 1979, compensation deferred under one or more plans described in paragraph (a) of this section is excludable from a participant's gross income under this section for a taxable year only to the extent it does not exceed the lesser of—

(1) $7,500, or

(2) 33⅓% of the participant's includible compensation (within the meaning of § 1.457–2(e)(2)) for the taxable year, reduced by any amount excludable from the participant's gross income for the taxable year under section 403(b) on account of contributions made by the State (within the meaning of § 1.457–2(c)). For purposes of this paragraph, compensation deferred under a plan shall be taken into account at its value in the plan year in which deferred. However, if the compensation deferred is subject to a substantial risk of forfeiture (as defined in section 457(e)(3)), such compensation shall be taken into account at its value in the plan year in which such compensation is no longer subject to a substantial risk of forfeiture.

(c) *Limited catch-up.* This paragraph (c) applies if all plans described in paragraph (a) of this section in which an individual is a participant are eligible plans within the meaning of § 1.457–2, and the participant's taxable year is a taxable year described in section 457(b)(3) and § 1.457–2(f). In such a case, compensation deferred under the plans for the taxable year is excluded from gross income under paragraph (a) of this section to the extent it does not exceed the amount determined under § 1.457–1(a)(2) or, as applicable, § 1.457–1(a)(3).

(d) *Example.* The provisions of this section may be illustrated by the following example:

Example. A is a participant in a State deferred compensation plan that is not an eligible plan within the meaning of § 1.457–2. The plan provides no limitations on the amount of compensation that may be deferred during any taxable year. For the taxable years 1979, 1980, and 1981 A has includible compensation of $40,000. In each of those years, A has deferred $10,000 of compensation. Under the transitional rules described in this section, $7,500 of A's deferrals in each year will be includible in gross income in the taxable year in which paid or made available to A or A's beneficiary. The remaining $2,500 of each year's deferrals ($10,000 – $7,500) are includible in A's gross income for the deferral year. Thus, $2,500 is includible in A's gross income for each of the taxable years 1979, 1980, and 1981. The tax treatment of amounts deferred by A in taxable years after 1981 is described in § 1.457–3.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Dated: September 14, 1982.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved:

John E. Chapoton,

Assistant Secretary of the Treasury.

[T.D. 7835]

Income Tax; Taxable Years Beginning After December 31, 1953; Limitation on Additions to Bank Loss Reserves

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to limitation on additions to bank loss reserves. Changes to the tax law were made by the Economic Recovery Tax Act of 1981. The regulations would provide guidance to commercial banks that compute their bad debt deductions under the percentage of outstanding loans method.

DATE: The regulations are effective for taxable years beginning after 1981.

FOR FURTHER INFORMATION CONTACT: Susan K. Thompson of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202–566–3294).

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the Income Tax Regulations (26 CFR Part 1) under section 585(b)(2) of the Internal Revenue Code of 1954. These amendments conform the regulations to section 267 of the Economic Recovery Tax Act of 1981 (95 Stat. 266) and are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Explanation of New Provisions

Section 585 of the Internal Revenue Code of 1954 requires commercial banks to compute their bad debt deductions under either the "experience method" or the "percentage of outstanding loans" method. The latter method is being phased out under existing law. Section 267 of the Economic Recovery Tax Act of 1981 delays this process as it affects taxable years beginning in 1982. Under the Act, the applicable percentage of loans to be used by commercial banks in computing the bad debt deduction is 1.0 percent, rather than 0.6 percent, for these taxable years.

Regulatory Flexibility Act

No general notice of proposed rulemaking is required by 5 U.S.C. 553(b) for interpretative regulations. Accordingly, the Regulatory Flexibility Act does not apply and no Regulatory Flexibility Analysis is required for this rule.

Non-Application of Executive Order 12291

The Treasury Department has determined that this regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of the Order dated April 28, 1982.

Drafting Information

The principal author of these regulations is Susan K. Thompson of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

List of Subjects in 26 CFR Part 1.

Income taxes, Banks.

Adoption of Amendments to the Regulations

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Accordingly, 26 CFR Part 1 is amended as follows:

Section 1.585–2(b)(1)(i), relating to the maximum addition to reserves under the percentage method, and § 1.585–2(e)(1)(i), relating to the definition of base year under the percentage method, are amended to read as follows:

§ 1.585–2 Addition to reserve.

* * * * *

(b) *Percentage method*—(1) *In general*—(i) *Maximum addition.* Except as limited under subparagraph (2) of this paragraph, the maximum reasonable addition to the reserve for losses on loans under the percentage method for a taxable year is the amount determined under paragraph (b)(1) (ii), (iii), or (iv) of this section, whichever is applicable. For purposes of this paragraph, the term "allowable percentage" means 1.8 percent for taxable years beginning before 1976; 1.2 percent for taxable years beginning after 1975 but before 1982; 1.0 percent for taxable years beginning in 1982; and 0.6 percent for taxable years beginning after 1982 and before 1988. This paragraph does not apply for taxable years beginning after 1987.

* * * * *

(e) *Definitions*—(1) *Base year*—(i) *Percentage method.* For purposes of paragraph (b) of this section (relating to the percentage method), the term "base year" means: For years beginning before 1976, the last taxable year beginning on or before July 11, 1969; for taxable years beginning after 1975 but before 1983, the last taxable year beginning before 1976; and, for taxable years beginning after 1982, the last taxable year beginning before 1983. However, for purposes of section 585(b)(2)(A) the term "base year" means the last taxable year before the most recent adoption of the percentage method, if later than the base year as determined under the preceding sentence.

* * * * *

Because this Treasury decision will not be detrimental to any taxpayer, it is found unnecessary to issue this Treasury decision with notice and public procedure thereon under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved: August 23, 1982.

David G. Glickman,
Acting Assistant Secretary of the Treasury.

Various Excise Tax Amendments Relating to Lubricating Oil, Buses and Light-Duty Truck Parts Under the Energy and Revenue Tax Act of 1978, and the Technical Corrections Act of 1979

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to various excise tax amendments with respect to parts for light-duty trucks, rerefined lubricating oil and buses. Changes to the applicable tax laws were made by the Energy Tax Act of 1978, the Revenue Tax Act of 1978, and the Technical Corrections Act of 1979. The regulations would provide the public with guidance needed to comply with these Acts.

EFFECTIVE DATE: The regulations are generally effective for sales made on or after December 1, 1978.

FOR FURTHER INFORMATION CONTACT: Annie R. Alexander of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: CC:LR:T, 202–566–3287, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

On January 2, 1981, the Federal Register published proposed amendments to the Manufacturers and Retailers Excise Tax Regulations (26 CFR Part 48) under sections 4063(e), 4083(b), 4221(e) (5) and (6), and 4222(d) of the Internal Revenue Code of 1954 (Code) (46 FR 129). The amendments were proposed to conform the regulations to changes made by section 701(ff) of the Revenue Act of 1978 (Pub. L. 95–600, 92 Stat. 2924), and sections

404, 232 and 233(c) of the Energy Tax Act of 1978 (Pub. L. 95–618, 92 Stat. 3204, 3189, and 3191). In addition, the amendments reflect the changes made by section 108(c)(5) of the Technical Corrections Act of 1979 (Pub. L. 96–222, 94 Stat. 227). There was no public hearing since none was requested. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

Summary of the Acts

The Revenue Act of 1978 amended section 4063 to provide an exclusion from the manufacturers excise tax imposed by section 4061(b) on parts or accessories for light-duty trucks when sold by the manufacturer, producer or importer for resale by the purchaser, or for resale by the second purchaser on or in connection with the first retail sale of a light-duty truck.

The Energy Tax Act of 1978 amended section 4093 to provide an exemption from the 6-cents-per gallon manufacturers excise tax imposed on lubricating oil by section 4091, if the lubricating oil is sold for use in mixing with previously used or waste lubricating oil which has been cleaned, renovated, or rerefined. The Energy Tax Act of 1978 also amended section 4221 to provide an exclusion from the manufacturers excise tax imposed by section 4071 on tires, tubes, and tread rubber if the tires, tubes, and tread rubber are sold by a manufacturer, producer, or importer for the purchaser's use on or in connection with an intercity, local, or school bus.

The Technical Corrections Act of 1979 amended section 4221 by repealing the 8-percent manufacturers excise tax on parts and accessories imposed by section 4061 if the parts and accessories are sold for use by the purchaser on or in connection with an automobile bus or are to be resold by the first or second purchaser for use on or in connection with an automobile bus.

Summary of Public Comments and Final Regulations

Parts or Accessories for Light-Duty Trucks.

The proposed regulations under section 4063(e) required registration of vendors and vendees as a prerequisite for a tax-free sale of parts or accessories sold on or in connection with the first retail sale of a light-duty truck. A number of comments were received objecting to the registration requirement on the grounds that it was unduly burdensome to parts and accessories manufacturers to secure the registration of over 8,000 dealers.

Commentators also objected to the registration requirements under the proposed regulation because it would place the manufacturer who only makes parts and accessories at a competitive disadvantage as compared to the manufacturer who makes both light-duty trucks and the parts and accessories for those trucks. The competitive disadvantage arises because the manufacturer who sells light-duty trucks and the parts and accessories for those trucks contemporaneously is able to sell the parts and accessories to dealers tax free under section 4061, which does not impose any registration requirement. Since a dealer can obtain the part or accessory tax free without registering by buying the parts from a manufacturer who is subject to section 4061, a dealer would not purchase the part or accessory from a manufacturer who is subject to section 4063. To eliminate this competitive disadvantage, the commentators suggest that the registration requirement under the proposed regulation be eliminated, and in lieu of registration, they suggested the use of an exemption certificate to effectuate the tax-free sale. This suggestion was rejected because the elimination of that requirement might create a precedent under other sections of the Code.

Several commentators also suggested that if dealers are required to register, then rather than require each dealer to file Form 720 quarterly for any part not used on or in connection with the first retail sale of a light-duty truck, each registered dealer should be required to notify the manufacturer of the non-exempt use and pay the Federal excise tax to the manufacturer. The manufacturer would then be required to file a return and pay the tax to the Service. Although this suggestion was not adopted, the final regulations eliminated the requirement that a dealer file Form 720.

Commentators also suggested allowing a tax-free sale under section 4063 when a manufacturer sells directly to an ultimate consumer who uses the part rather than to a dealer who resells the part. One comment was received from a field office objecting to allowing tax-free direct sales from a manufacturer to the ultimate consumer on the grounds that the Code expressly uses the language ". . . resold by the purchaser . . ." However, even though section 4063 uses the language "* * * resold by the purchaser * * *", which indicates that the purchaser must resell the part, a credit or refund is provided by section 6416(b)(2) to the person who paid the tax when the part is sold directly to the ultimate purchaser. To require the taxpayer to pay the tax and then file a claim for refund would create unnecessary paperwork for both the public and the Service. Therefore, the final regulations adopt the rule that a manufacturer may sell directly to an ultimate purchaser tax free. However, the final regulations do require a written certification from the ultimate purchaser in the form of an exemption certificate stating that the part or accessory was purchased for use on or in connection with a substantially contemporaneous purchase of a new light-duty truck.

Parts or Accessories for Buses

Several commentators suggested that the regulations expressly provide means whereby purchasers purchasing "tax paid" parts or accessories for use on or in connection with an automobile bus could avail themselves of the credit or refunds provided by section 6416(b)(2)(I). The suggestion was rejected because there is no authority under any section of the Code for purchasers who purchased "tax paid" to obtain a direct refund from the Service. The credit or refund provided by section 6416(b)(2)(I) is available only to the person who paid the tax to the Service.

Numerous commentators suggested that the final regulations under § 48.4221–12 eliminate the registration and record-keeping requirements for the tax-free sale of parts or accessories that can be readily identifiable by the manufacturer as parts only usable on a bus and thus eliminate further substantiation as required in the proposed regulations. The final regulations do not adopt this rule because under section 4222 registration is required to sell an article tax-free under section 4221 unless the tax-free sale is within one of the exceptions listed under section 4222(b). Since tax-free sales of parts and accessories for buses are not one of these exceptions, registration is required.

Regulatory Flexibility Act and Executive Order 12291

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. Although a notice of proposed rulemaking which solicited public comments was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure

requirement of 5 U.S.C. 553 did not apply. Accordingly, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Drafting Information

The principal author of this regulation is Annie R. Alexander of the Legislation and Regulations Division of the office of Chief Counsel Internal Revenue Service. However, personnel from other offices of the Internal Revenue and Treasury Department participated in developing the regulation, both on matters of substance and style.

List of Subjects in 26 CFR Part 48

Agriculture, Arms and munitions, Automobile buses, Coal excise taxes, Light-duty truck parts, Lubricating oil, Gasohol, Gasoline, Motor vehicles, Petroleum, Sporting goods, Tires, Tubes, Tread rubber.

Adoption of Amendments to the Regulations

PART 48—MANUFACTURERS AND RETAILERS EXCISE TAXES

Accordingly, 26 CFR Part 48 is amended as follows:

Paragraph 1. Section 48.4063–2 is redesignated § 48.4063–3 and a new § 48.4063–2 is added to read as follows:

§ 48.4063–2 Tax-free sales of parts or accessories sold for resale on or in connection with the first retail sale of a light-duty truck.

(a) *In general.* Under section 4063(e), the 8-percent manufacturers excise tax imposed by section 4061(b) on the sale of truck parts or accessories does not apply to the sale by the manufacturer, producer, or importer of any parts which are to be resold by the purchaser on or in connection with the first retail sale of a light-duty truck as defined in section 4061(a)(2), or which are to be resold by the purchaser to a second purchaser for resale by the second purchaser on or in connection with the first retail sale of a light-duty truck. A tax-free sale is also allowed under section 4063(e) if an ultimate purchaser makes a direct purchase from a manufacturer of a part or accessory for use on or in connection with a substantially contemporaneous purchase of a new light-duty truck.

(b) *Evidence required for tax-free sales of light-duty truck parts and accessories*—(1) *In general.* The provisions of section 4063(e) do not apply with respect to any sale unless the manufacturer, the first purchaser, and the second purchaser, if any, are all registered as required under section 4222, and unless they comply with all the requirements under that section relating to tax-free sales. To effectuate a tax-free sale directly from the manufacturer, first or second purchaser to an ultimate purchaser, the ultimate purchaser must, in every case, satisfy the provisions of paragraphs (b)(3)(i), (ii) and (iii) of this section. Persons not required to be registered under section 4222(b) may purchase articles tax free by following the same procedures that apply to them in the case of other tax-free sales. See § 48.4222(b)–1.

(2) *Revocation or suspension of registration or right to use exemption certificate.* A person's registration and right to sell or purchase articles tax free through the use of an exemption certificate may be revoked or suspended. See § 48.4222(c)–1. Such a revocation or suspension shall be in addition to any other penalties that may apply. Any person who purchases articles tax free and who sells or uses them for a non-exempt purpose shall notify its vendor of the taxable sale or use.

(3) *Exemption certificate*—(i) To establish exemption from tax under section 4061(b) in those instances where a sale is made directly to an ultimate purchaser, the manufacturer, first, or second purchaser must obtain (prior to or at the time of sale) from the ultimate purchaser and retain in its possession a properly executed exemption certificate in the form prescribed in paragraph (b)(3)(iii) of this section.

(ii) Where only occasional sales are made, a separate exemption certificate shall be furnished for each order. However, where sales are regularly or frequently made to a purchaser for such exempt use, a certificate covering all sales for a specified period not to exceed 12 calendar quarters will be acceptable. Such certificates and proper records of invoices, orders, etc. relative to tax-free sales must be kept for inspection by the district director as provided in section 6001 and the regulations thereunder.

(iii) The following form of exemption certificate will be acceptable for purposes of this section and must be adhered to in substance.

Exemption Certificate

(For use by ultimate purchaser who purchase parts or accessories from a manufacturer, producer, importer, first or second purchaser for use on or in connection with the first retail sale of a light-duty truck. (Section 4063 of the Internal Revenue Code.))

(Date)———— 19———,

1. I, the undersigned, certify that I am, or the (Name of company ———— of which I am (Position held————, is purchasing from the manufacturer, producer, importer, first or second purchaser the parts or accessories specified in section 2 below (or in the purchase order or invoice attached hereto) for use on or in connection with a substantially contemporaneous purchase of a new light-duty truck specified in section 3 below. I also certify that (check applicable type of certificate) ——— the article or articles specified in the accompanying order, as described below, or ———— all orders placed by the purchaser for the period commencing (Date)——— and ending (Date)——— (period not to exceed 12 calendar quarters), will be used only for the above stated tax-exempt purposes and will not be used as a replacement part.

I understand that the willful use of this exemption certificate to evade or defeat the manufacturers excise tax otherwise applicable to these parts or accessories will subject me to a fine of not more than $10,000 or imprisonment for not more than 5 years, or both, together with cost of prosecution.

(Signature)————,

(Address)————,

2. *Description of parts and accessories*

Type	Quantity	Price	Total

3. *Description of new light-duty truck*

(a) Type: (b) Quantity, (c) Serial Number. (d) GVWR: (e) Date of Sale, (f) Invoice Number.

(g) Name and Address of Vendor of Vehicle.

(c) *Information; records*—(1) *Information to be furnished to vendee.* A vendor (including the manufacturer) selling light-duty truck parts and accessories tax free under section 4063(e) shall indicate to its vendee that the vendee is obtaining the parts or accessories tax free for the purpose of resale (or use) on or in connection with the first retail sale of a light-duty truck. This information may be transmitted by any convenient means, such as coding of sales invoices, provided that the information is presented with sufficient particularity so that the purchaser is informed that the purchaser has obtained the light-duty truck parts or accessories tax free.

(2) *Records of vendor.* A manufacturer or vendor selling light-duty truck parts or accessories tax free under section 4063(e) shall maintain in its records the identity of the purchaser, a signed statement of the exempt purpose for purchasing the light-duty truck parts or accessories, and the quantity of light-duty truck parts or accessories sold tax free to each purchaser.

(3) *Records of vendee.* A person purchasing light-duty truck parts or accessories tax free under section 4063(e) must maintain sufficient records to establish that the parts or accessories purchased tax free have actually been

resold (or used) on or in connection with the first retail sale of a light-duty truck or have been resold to a second purchaser for such a resale by the second purchaser.

(d) *Duty of selling manufacturer to ascertain validity of tax-free sale.* The selling manufacturer of light-duty truck parts is not relieved of liability under the provisions of section 4063(e) by reason of section 4221(c) for the tax imposed by section 4061(b) if at the time of sale the selling manufacturer has knowledge or reason to believe that the light-duty truck parts or accessories sold by it to the purchaser are not intended for resale (or use) on or in connection with the first retail sale of a light-duty truck. The selling manufacturer is also not relieved of liability if it has knowledge or reason to believe that the purchaser has failed to register, refused to execute an exemption certificate, or that its registration or its right to purchase tax free through the use of an exemption certificate has been revoked or suspended.

(e) *Cross reference.* For credit or refund, see section 6416(b)(2).

(f) *Effective date.* Section 4063(e) (relating to light-duty truck parts and accessories) applies to sales on or after December 1, 1978. Light-duty truck parts or accessories sold prior to that date are not exempt from tax under section 4061(b) by reason of section 4063(e).

Par. 2. Immediately after § 48.4093–1 there is added the following new section.

§ 48.4093–2 Tax-free sales of new lubricating oil sold to produce rerefined lubricating oil.

(a) *In general.* Under section 4093(b), the 6-cents-per-gallon excise tax imposed by section 4091 on the sale of lubricating oil does not apply to new lubricating oil which is sold by the manufacturer directly to a producer of rerefined oil for the purpose of producing rerefined lubricating oil if the requirements of this section are met. Rerefined lubricating oil is a mixture of new oil with used or waste oil in which 25 percent or more of the mixture is used or waste lubricating oil which has been cleaned, renovated, or rerefined. Any person to whom lubricating oil is sold tax free under section 4093(b) shall be treated as the producer of the lubricating oil.

(b) *Use of new oil to produce rerefined oil.* Under section 4093(b), all the new lubricating oil in a mixture is exempt from the six-cents-per-gallon manufacturers excise tax imposed by section 4091 if the rerefined oil contains 55 percent or less new oil. To the extent that the rerefined oil contains more than 55 percent new oil, then that portion of new lubricating oil which exceeds 55 percent of the mixture is subject to the section 4091 excise tax, and only that part of the new oil that does not exceed 55 percent of the mixture is exempt from the tax.

(c) *Requirement for lubricating oil purchasers purchasing tax free.* In order for the sale of lubricating oil by the manufacturer to the purchaser to be exempt from tax under section 4093(b), both the purchaser and the manufacturer must be registered as required under section 4222, and they must comply with all the requirements under that section relating to tax-free sales. See § 48.4222(a)–1. Persons not required to be registered under section 4222(b) may purchase tax free by following the procedures that apply to them in the case of other tax-free sales. See § 48.4222(b)–1. For revocation or suspension of registration, see § 48.4222(c)–1.

(d) *Duty of selling manufacturer to ascertain validity of tax-free sale.* The selling manufacturer of lubricating oil is not relieved of liability under the provisions of section 4093(b) by reason of section 4221(c) for the tax imposed by section 4091 if at the time of sale the selling manufacturer has knowledge or reason to believe that the lubricating oil sold by it to the purchaser is not intended for mixing with used or waste oil for the purpose of producing rerefined oil, or that the purchaser has failed to register, or that its registration has been revoked or suspended.

(e) *Information; records*—(1) *Information to be furnished to purchaser.* A manufacturer selling lubricating oil tax free under section 4093(b) shall indicate to the purchaser that the purchaser is obtaining the lubricating oil tax free for the purpose of making rerefined lubricating oil. The manufacturer may transmit this information by any convenient means, such as coding of sales invoices, provided that the information is presented with sufficient particularity so that the purchaser is informed that the purchaser has obtained the lubricating oil tax free and the purchaser can compute and remit the tax due if the lubricating oil is diverted to a taxable use.

(2) *Records of Manufacturer.* A manufacturer selling lubricating oil tax free under section 4093(b) shall maintain in its records the identity of the purchaser, a signed statement of the exempt purpose for purchasing the lubricating oil, and the quantity of lubricating oil sold tax free to each purchaser.

(3) *Records of Purchaser.* A person purchasing lubricating oil tax free under section 4093(b) must maintain sufficient records to establish that the lubricating oil purchased tax free has actually been mixed with used or waste oil to make rerefined lubricating oil (as defined under paragraph (a) of this section) and that the quantity of new lubricating oil used in the mixture meets the requirements under paragraph (b) of this section.

(f) *Credit or refund.* A credit or refund is available for the 6-cents-per-gallon excise tax paid on up to 55 percent of new lubricating oil contained in a mixture of new lubricating oil with waste or rerefined oil of which at least 25 percent is waste lubricating oil. The refund or credit will be available when the mixture is used or sold. See section 6416(b)(2).

(g) *Effective date.* Section 4093(b) (relating to rerefined lubricating oil) applies to sales on or after December 1, 1978. Lubricating oil sold prior to December 1, 1978 is not exempt from tax under section 4093(b).

Par. 3. Section 48.4221–1 is amended as follows:

1. Paragraph (b)(2)(v) is revised to read as set forth below.

2. Paragraph (b)(2)(viii) is redesignated as paragraph (b)(2)(ix).

3. A new paragraph (b)(2)(viii) is added to read as set forth below.

4. Paragraph (b)(2)(ix) is redesignated as paragraph (b)(2)(x) and is revised to read as set forth below.

5. Paragraph (b)(2)(x) is redesignated paragraph (b)(2)(xi) and revised to read as set forth below.

6. Paragraph (b)(2)(xii) is added to read as set forth below.

The new and revised provisions read as follows:

§ 48.4221–1 Tax-free sales; general rules.

* * * * *

(b) Manufacturer relieved of liability in certain cases * * *

(2) The following are situations wherein sections 4221(c) is applicable with respect to sales made tax free on the assumption that one of the following sections of the Code provides exemption for such sales.

* * * * *

(v) Section 4063(a)(6), relating to sales of any automobile bus chassis or automobile bus body (see regulations thereunder),

* * * * *

(viii) Section 4063(e), relating to light-duty truck parts (see regulations thereunder),

* * * * *

(x) Section 4093, relating to the sale of lubricating oil or rerefined oil to a manufacturer or producer of lubricating or rerefined oil (see regulations thereunder),

(xi) Section 4221(e)(5), relating to the sale of tires, tubes, and tread rubber used on intercity, local, or school buses (see regulations thereunder), and

(xii) Section 4221(e)(6), relating to the sale of bus parts and accessories (see regulations thereunder),

Par. 4. Sections 48.4221–11 and 48.4221–12 are added immediately after 48.4221–10 to read as follows:

§ 48.4221–11 Tax-free sales of tires, tubes, and tread rubber used on intercity, local, and school buses.

(a) *In general.* Under section 4221(e)(5), the taxes imposed by section 4071(a)(1), (3) and (4) shall not apply to sales by a manufacturer, producer, or importer of tires of the type used on highway vehicles or inner tubes for tires sold for use by the purchaser on or in connection with a qualified bus, or to the sales by a manufacturer, producer, or importer of tread rubber sold for use by the purchaser in the recapping or retreading of any tire to be used by the purchaser on or in connection with a qualified bus if the requirements of this section are met.

(b) *Meaning of terms.*—(1) *Qualified bus.* "Qualified bus" means an intercity, local, or school bus.

(2) *Intercity or local bus.* "Intercity or local bus" means any automobile bus which is used predominantly (more than 50 percent) in furnishing (for compensation) passenger land transportation available to the general public if such transportation is scheduled and along regular routes, or if the seating capacity of the bus is at least 20 adults (not including the driver). In determining predominant use, mileage travelled with passengers as well as mileage travelled incidental to such passenger transportation, such as "deadheading", is counted. Under the first alternative, the size of the bus is not relevant for purposes of determining whether or not the use of the bus qualifies for the exemption. Under the second alternative, for non-scheduled bus operations, such as that provided by charter buses, the exemption is available only if the bus has a passenger seating capacity of at least 20 adults and the transportation is available to the general public. For purposes of determining whether the bus has a seating capacity of at least 20 adults, the bus driver is not included. Service is available to the general public if bus service is used in a passenger transportation business in which service is offered to more than a limited number of persons, groups, or organizations.

(3) *School bus.* "School bus" means any automobile bus in which "substantially all" (85 percent or more) of the use involves transporting students and employees of a school. Incidental use (deadheading) of the school bus without passengers to or from a point to which students or employees of school are transported is considered to be a use which involves transporting students or employees of schools. A school is any educational organization which normally maintains a regular faculty and curriculum and normally has a regularly enrolled body of pupils or students in attendance at the place where its educational activities are carried on. Tax-exempt schools, taxable schools, and a private contractor who operates a bus for tax-exempt or a taxable school may qualify for the tax exemption if all the requirements of this section are met.

(b) *Registration requirements for tires, tubes, and tread rubber; vendees purchasing tax free.* The provisions of section 4221(e)(5) do not apply with respect to any sale unless the manufacturer and the vendee are registered as required under section 4222, and unless they comply with all the requirements under that section relating to tax-free sales. See § 48.4222(a)–1. Persons not required to be registered under section 4222(b) may purchase articles tax free by following the same procedures that apply to them in the case of other tax-free sales. See § 48.4222(b)–1. A person's registration and right to sell or purchase articles tax free may be revoked or suspended as provided in § 48.4222(c).1. Such a revocation or suspension shall be in addition to any other penalties that may apply.

(c) *Cross reference.* For credit or refund, see section 6416(b)(2).

(d) *Information; records*—(1) *Information to be furnished to purchaser.* A manufacturer selling tires, tubes, or tread rubber tax free under section 4221(e)(5) shall indicate to the purchaser that the purchaser is obtaining the tires or tubes tax free for the purpose of use on or in connection with a qualified bus, and that the purchaser is obtaining the tread rubber tax free for use in the recapping or retreading of tires to be used by the purchaser on or in connection with a qualified bus. The manufacturer may transmit this information by any convenient means, such as coding of sales invoices, provided that the information is presented with sufficient particularity so that the purchaser is informed that the purchaser has obtained the tires, tubes, and tread rubber tax free.

(2) *Records of Manufacturer.* A manufacturer selling tires, tubes, or tread rubber tax free under section 4221(e)(5) shall maintain in its records the identity of the purchaser, a signed statement of the exempt purpose for purchasing the tires, tubes, or tread rubber, and the quantity of tires, tubes, or tread rubber sold tax free to each purchaser.

(3) *Records of Purchaser.* A person purchasing tires, tubes, or tread rubber tax free under section 4221(e)(5) must maintain sufficient records to establish that the tires, tubes, or tread rubber purchased tax free has actually been used for that purpose.

(e) *Duty of selling manufacturer to ascertain validity of tax-free sale.* The selling manufacturer is not relieved of liability under the provisions of section 4221(e)(5) by reason of section 4221(c) for the tax imposed by section 4061(b) if at the time of sale the selling manufacturer has knowledge or reason to believe that the tires, tubes, or tread rubber sold by it to the purchaser are not intended for use on an intercity, local, or school bus, or that the purchaser has failed to register, or that its registration has been revoked or suspended.

(f) *Effective date.* Section 4221(e)(5) (relating to tires, tubes, and tread rubber) applies to sales on or after December 1, 1978. The sale of tires, tubes, or tread rubber sold prior to that date is not exempt from tax under section 4221(e)(5).

§ 48.4221–12 Tax-free sales of bus parts and accessories.

(a) *In general.* Under section 4221(e)(6), the 8-percent manufacturers excise tax on parts and accessories imposed by section 4061(b) shall not apply to sales by a manufacturer, producer, or importer of any part or accessory which is sold for use by the purchaser on or in connection with an automobile bus, or is to be resold by the first purchaser to a second purchaser or by a second purchaser to an ultimate purchaser for such use.

(b) *Registration requirements for bus parts and accessories; vendees purchasing tax free.* The provisions of section 4221(e)(6) do not apply with respect to any sale unless the manufacturer, the first purchaser, and the second purchaser and the ultimate purchaser, if any, are all registered as required under section 4222, and unless they comply with all the requirements under that section relating to tax-free sales. See § 48.4222(a)–1. Persons not

required to be registered under section 4222(b) may purchase articles tax free by following the same procedures that apply to them in the case of other tax-free sales. See § 48.4222(b)–1. A person's registration and right to sell or purchase articles tax free may be revoked or suspended as provided in § 48.4222(c)–1. Such a revocation or suspension shall be in addition to any other penalties that may apply.

(c) *Cross reference.* For credit or refund, see section 6416(b)(2).

(d) *Information; records*—(1) *Information to be furnished to vendee.* A vendor (including the manufacturer) selling parts and accessories tax free under section 4221(e)(6), shall indicate to its vendee, that the vendee is obtaining the parts or accessories tax free for the purpose of use on or in connection with an automobile bus, or for resale by the vendee for such use. This information may be transmitted by any convenient means, such as coding of sales invoices, provided that the information is presented with sufficient particularity so that the purchaser is informed that the purchaser has obtained the parts or accessories tax free.

(2) *Records of vendor.* A vendor (including the manufacturer) selling parts or accessories tax free under section 4221(e)(6) shall maintain in its records the identity of the purchaser, a signed statement of the exempt purpose for purchasing the parts or accessories, and the quantity of parts or accessories sold tax free to each purchaser.

(3) *Records of vendee.* A person purchasing parts or accessories tax free under section 4221(e)(6) must maintain sufficient records to establish that the parts or accessories purchased tax free have actually been used on or in connection with an automobile bus or have been resold for such a use.

(e) *Duty of selling manufacturer to ascertain validity of tax-free sale.* The selling manufacturer of parts and accessories is not relieved of liability under the provisions of section 4221(e)(6) by reason of section 4221(c) for the tax imposed by section 4061(b) if at the time of sale the selling manufacturer has knowledge or reason to believe that the parts and accessories sold by it to the purchaser are not intended for use on or in connection with an automobile bus or have been resold for such use, or that the purchaser has failed to register, or that its registration has been revoked or suspended.

(f) *Effective date.* Section 4221(e)(6) (relating to bus parts and accessories) applies to sales on or after December 1, 1978. Parts or accessories sold for use on a bus prior to that date are not exempt from tax under section 4221(e)(6).

Par. 5. Section 48.4222(d)–1 is amended as follows:

1. Paragraph (a) is deleted.

2. Paragraphs (b) and (c) are redesignated as paragraphs (a) and (b) respectively.

3. New paragraphs (c) and (d) are added to read as set forth below.

4. Paragraph (d) is redesignated as paragraph (e).

5. Paragraph (e) is redesignated as paragraph (f) and revised to read as set forth below.

6. Paragraph (f) is redesignated as paragraph (g).

§ 48.4222(d)–1 Registration in the case of certain other exemptions.

The registration procedure set forth in § 48.4222(a)–1 also applies in the following cases:

* * * * *

(a) (Reserved)

* * * * *

(c) Tax-free sales under section 4063(e) of parts or accessories sold for resale on or in connection with the first retail sale of a light-duty truck. Both the vendor and vendee must be registered (or the vendee must execute an acceptable exemption certificate as set forth on § 48.4063–2(b)(3)(iii)). See section 4063(e) and the regulation thereunder.

(d) Tax-free sales under section 4064(b)(1)(C) of emergency vehicles. Both the vendor and vendee must be registered. See section 4064 and the regulations thereunder.

* * * * *

(f) Tax-free sales under section 4093 of lubricating oil or rerefined oil by a manufacturer or producer of lubricating oil or rerefined oil for resale, or for use in producing rerefined oil. Both the vendor and the vendee must be registered. See section 4093 and the regulations thereunder.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: September 8, 1982.

John E. Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 934

Permanent State Regulatory Program of North Dakota

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: The Secretary of the Interior is modifying the deadline for North Dakota to meet one of the conditions of approval of the State permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act), 30 U.S.C. 1201 *et seq.* The Secretary is extending the deadline for the State to resolve condition "e" as specified in the Secretary's notice of conditional approval of North Dakota's program (45 FR 82241–82248, December 15, 1980) until July 1, 1983.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: Arthur W. Abbs, Chief, Division of State Program Assistance, Office of Surface Mining, Department of the Interior, 1951 Constitution Avenue, NW., Washington, D.C. 20240. Telephone: (202) 343–5351.

SUPPLEMENTARY INFORMATION: On July 23, 1982, the Secretary published a proposed rule to extent the deadline for North Dakota to meet one of the conditions of approval on its approved permanent regulatory program under the Act (47 FR 31896–97). Public comments were invited for 30 days ending August 23, 1982.

Parts 730–732 of OSM's regulations establish the procedures for the submission, review, and decision on the State permanent regulatory programs whereby the State assumes primary jurisdiction to regulate surface coal mining under the Act. Under § 732.13(i), the Secretary may conditionally approve a State program which contains minor deficiencies if the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval. The schedule is established in consultation with the State, based on its administrative needs and the time required for changes to be adopted under State rulemaking or legislative procedures.

The North Dakota program was conditionally approved on December 15, 1980 (45 FR 82241–82248). The Secretary's approval was conditioned

on the State's correction of 13 minor deficiencies by July 1, 1981.

That deadline was later extended, upon the State's request, to January 1, 1983 (46 FR 54070–54071). In a letter to the Director dated June 14, 1982, the North Dakota Public Service Commission requested a further extension of that deadline to July 1, 1983, to meet condition "e" as listed at 30 CFR 934.11(e).

Condition "e" stipulates that the Secretary's approval of the North Dakota program will terminate on January 1, 1983, unless North Dakóta submits to the Secretary by that date copies of fully enacted regulations amending the North Dakota Administrative Code 69–05.2–10–03(i) to prohibit issuance of permits to any person with an outstanding violations or a pattern of violation outside of North Dakota in a same or similar manner as Section 510(c) of SMCRA, 30 CFR 786.17 and 30 CFR 786.19(i) or otherwise amends its program to accomplish the same results.

In a notice published July 23, 1982, the Director invited comment on extending the deadline for the State to meet condition "e" until July 1, 1983 (47 FR 31896–97). Comment was invited for 30 days ending August 23, 1982.

Secretary's Findings

The Secretary has decided to grant the State's request for an extension to meet condition "e" until July 1, 1983. In order to satisfy that condition, North Dakota will be required to make a change in the North Dakota Century Code Chapter 38–14.1. The Commission indicated that it would draft the required change for consideration by the Legislative Assembly when it convenes in January 1983. Since statutory changes normally become effective on the first of July following legislative action, the extension to July 1, 1983, will allow time for the statutory change to take effect.

Public comment:

The public comment period on the proposed extension ended August 23, 1982. No comments were received.

Other information:

On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for all actions to approve or conditionally approve State regulatory programs, actions or amendments. Therefore, a Regulatory Impact Analysis and regulatory review by OMB is not needed for this extension.

This rule is deemed not to be a major Federal action within the meaning of section 102(2)(c) of NEPA under sections 501(a) or 702(d) of SMCRA. It is hereby designated as a categorical exclusion from the NEPA process. Therefore, this rule is exempt from the requirements of an Environmental Assessment, EIA or FONSI.

Pursuant to the Regulatory Flexibility Act, Pub. L. 96–334, I have certified that this rule will not have a significant economic effect on a substantial number of small entities as the rule is essentially a timing change with no direct or indirect impact on small entities.

Indexing Requirements:

List of Subjects in 30 CFR Part 934

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, Part 934 of Title 30 is amended as set forth herein.

Dated: September 20, 1982.

Daniel N. Miller, Jr.,

Assistant Secretary for Energy and Minerals.

PART 934—NORTH DAKOTA

30 CFR Part 934 is amended by revising § 934.11(e) to read as follows:

§ 934.11 Conditions of State regulatory program approval.

* * * * *

(e) The approval found in § 934.10 of this part will terminate on July 1, 1983, unless North Dakota submits to the Secretary by that date copies of fully enacted regulations amending NDAC 69–05.2–10–03(i) to prohibit issuance of permits to any person with an outstanding violation or pattern of violations outside of North Dakota in a same or similar manner as Section 510(c) of SMCRA, and 30 CFR 786.19(i) or otherwise amends its program to accomplish the same results.

BILLING CODE 4310-05-M

---

30 CFR Part 944

Approval of Amendments to the Utah Permanent Program Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule: Approval of amendments.

SUMMARY: On January 21, 1981, the Secretary conditionally approved the Utah permanent program under the Surface Mining Control and Reclamation Act (SMCRA or the Act) (46 FR 5899–5915). On July 26, 1982, (47 FR 32173–4) OSM announced receipt of proposed amendments to the approved Utah program submitted by the State for the Director's approval. This notice announces the Director's approval of those modifications which amend the State's civil penalty regulations at UMC/SMC 845 and which provide for the use of the "range site" method for measuring revegetation success.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: Arthur Abbs, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, South Building, 1951 Constitution Avenue NW., Washington, D.C. 20240, Telephone (202) 343–5361.

SUPPLEMENTARY INFORMATION:

Background on the Utah Program Submission

SUPPLEMENTARY INFORMATION: On March 3, 1980, the State of Utah submitted to the Department of the Interior its proposed permanent regulatory program under SMCRA.

On October 3, 1980, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary approved in part and disapproved in part the proposed program. Notice of that decision and the Secretary's findings were published in the **Federal Register** on October 24, 1980 (45 FR 70481–70510). The State of Utah resubmitted its program for approval by the Secretary on December 23, 1980. After providing an opportunity for public comment on the program and completing a thorough review of the resubmission, the Secretary of the Interior determined that the Utah program, including the resubmission, did, with minor exceptions, meet the requirements of SMCRA and the Federal permanent program regulations. Accordingly, the Secretary of the Interior conditionally approved the Utah program subject to the correction of twelve minor deficiencies. The approval was effective upon publication of the notice of conditional approval in the January 21, 1981 **Federal Register** (46 FR 5899–5915).

Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Utah program can be found in the January 21, 1981 **Federal Register** (46 FR 5899–5915).

Background on Conditions of Approval

In accepting the Secretary's conditional approval, Utah agreed to satisfy conditions "a"–"e" by December 1, 1981, and conditions "f"–"l" by July 1, 1981.

Subsequently, Utah requested an extension of the deadline to meet conditions "f," "g," and "h" until January 1, 1982. On October 30, 1981 (46 FR 54070), OSM announced the Secretary's decision to approve the extension.

Upon the State's request the deadline for the State to meet condition "f" was further extended to September 1, 1982, and the deadline for the State to meet condition "h" to January 1, 1983, (47 FR 23155–23156, May 27, 1982).

On June 29, 1981, Utah submitted statutory and regulatory revisions intended to satisfy conditions "a"–"e" and "f"–"l."

On June 22, 1982, (47 FR 26827–26831) the Assistant Secretary for Energy and Minerals announced his decision to remove conditions "a"–"e," "j," and "l" and to grant an extension of the deadline for Utah to satisfy conditions "g," "i," and "k." In the June 22, 1982 notice, the Assistant Secretary also announced his decision to impose a new condition "m" requiring the State to correct by January 1, 1983, a deficiency in the State program which had recently come to OSM's attention.

Submission of Amendments

On July 26, 1982, the Director invited comment on the following amendments submitted by the State which do not relate to any of the conditions (47 FR 32173) and scheduled a public comment period and hearing on the proposed modifications.

1. *Modification of civil penalty regulations.* On April 30 and May 1, 1981, Utah adopted modifications to its civil penalty rules at UMC/SMC 845. These revised rules, together with additional changes to UMC/SMC 845 proposed by the Division of Oil Gas and Mining (DOGM) on June 23, 1982, were submitted to OSM for approval as program amendments. On August 26, 1982, Utah adopted the revisions submitted to OSM on June 23, 1982, in the same form as proposed and on which comment was invited, with the exception of item II of the proposed revisions.

2. *Alternative Standard for Measuring Revegetation Success.* Utah also submitted for the Director's approval a proposal to utilize the "range site method" as an alternative to the "reference area" method of measuring revegetation success set forth under 30 CFR 816.116 and 30 CFR 817.116. Utah's proposal to utilize the range site method as an alternative was submitted to OSM on May 21, 1981. Additional supporting documentation was submitted to OSM by DOGM on October 20, 1981, and February 5, 1982.

Secretary's Findings

1. The Director finds Utah's civil penalty regulations at UMC/SMC 845 as modified April 30 and May 1, 1981 and as further modified August 26, 1982, incorporate penalties no less stringent than those set forth in Section 518 of SMCRA and 30 CFR Part 845 and contain the same or similar procedural requirements related thereto. Therefore, the Director grants his approval of those amendments. It should be noted that the regulatory modifications adopted by Utah on August 26, 1982, are, with one exception, identical to the changes proposed by the State June 23, 1982, and on which OSM invited comment in the **Federal Register**, July 26, 1982, 47 FR 32173.

The one exception is Item II of the June 23, 1982, proposed changes which the Board did not adopt in final form on August 26, 1982. Item II of the proposed changes created a new paragraph (b) at UMC/SMC 845.14 to provide that "When the total number of points for any violation contained in a notice of violation does not exceed fifty, the assessment of a civil penalty shall be discretionary with the Board or its authorized assessment officer." Because the Board did not adopt Item II of the proposed modifications, the Director's approval of these amendments does not extend to that provision. Should Utah adopt that provision at some future date and submit it in final form for approval, the director would reconsider that provision under separate rulemaking.

2. The Director further finds that Utah's adoption of the "range site" method for measuring revegetation success is no less effective than the "reference area" method set forth under 30 CFR 816.116 and 30 CFR 817.116. Both the Federal rules at 30 CFR 816.116 and 817.116 and Utah's rules at UMC 817.116(a) and SMC 816.116(a) provide that success of revegetation shall be measured by techniques approved by the regulatory authority after consultation with appropriate State and Federal agencies. Evaluation of ground cover and productivity may be made on the basis of reference areas or through the use of technical guidance procedures published by U.S. Department of Agriculture (USDA) or U.S. Department of Interior (USDI) for assessing ground cover and productivity. Utah's proposal to utilize the range site method was submitted to OSM on May 21, 1981. Additional supporting documentation was submitted on October 20, 1981, and February 5, 1982, including revised guidelines for obtaining vegetation information and the Soil Conservation Service (SCS) National Range Handbook, 1975, which Utah will rely on as the technical guide for determining revegetation success. After reviewing the State's proposal and supporting technical documentation, the Director has determined that the State program does provide for the use of techniques of measuring revegetation success which are no less effective than those prescribed by the Federal regulations.

Public Comment

OSM received six comments in response to the July 26, 1982, **Federal Register** notice announcing the hearing and comment period on the amendments and proposal submitted by Utah.

The Environmental Protection Agency, Region VIII, favored Utah's adoption of the "range site method" for measuring revegetation success. The commenter suggested that "fair condition" range sites, that are determined acceptable for sampling, should be on an improving trend. It was also recommended that "good condition" range sites be used, when available, for sampling, since the reclamation goal should be to arrive at "good condition" in each range site. OSM believes that Utah's vegetation guideline number 8C clearly states that the range sampled is to be representative of the vegetation that existed before mining operations disturbed the area. OSM believes the commenter's concerns are addressed in the State's vegetation guidelines.

EPA also suggested that post-grading soil horizon characteristics should be assessed and the appropriate adjustments made in revegetation specification and success criteria. OSM recognizes that while this approach could result in success standard (baseline data) adjustments that reflect improved site capabilities, it could also result in success standard adjustments that reflect a capability that is less than the premining capability. The reestablished vegetation is one indicator of the operator's ability to restore the land affected to a condition capable of supporting the uses which it was capable of supporting prior to any mining; hence, OSM believes that range site data, as specified in the guidelines, will assure reestablishment of vegetation that is at least equal in extent of cover and as effective as the natural vegetation of the area. Also, a success

standard based on premining site conditions does not preclude the establishment of a plant community or range site condition that is superior to the premining range site condition. OSM finds Utah's guidelines in accordance with the Act and no less effective than OSM's regulations which require a vegetative cover at least equal to the vegetative cover that existed before mining.

The Soil Conservation Service (SCS), Salt Lake City, Utah, supported the use of the range site method to measure revegetation efforts and offered to make available all the data that has been collected and provide direct or consultative assistance needed to establish standards where data is not already available.

The SCS also stated that sampling, required in number 8C of the guidelines, will only be needed when the area is not represented by a currently existing range site because vegetative condition and species composition can be described from the site description on existing range sites. Since range site condition is dynamic, OSM supports the use of a current premining inventory when developing a success standard for a specific range site.

In addition, SCS contended that 8d of the range site guidelines was not a valid procedure because generally there are no long-term precipitation data sites at mine locations; hence, there is no way to predetermine if the precipitation is below average in a sampling year. It was suggested that exact precipitation measurements are probably meaningless since tempreature, soil, exposure, elevation and other variables have compensating mechanisms and the vegetation is a result of long-term adaptation.

OSM agrees that range site vegetation is a result of long-term adaptation and the exact precipitation averages may not be available for all mine sites. However, OSM believes that annual cover and productivity are related to annual precipitation and therefore, OSM approves of the State's use of the precipitation criteria.

The Soil Conservation Service, Forest Service, Ogden, Utah, commented that it was supportive of Utah's adoption of the "range site method". SCS suggested that the definitions of terms used with the range site method conform to those provided in "A Glossary of Terms Used in Range Management" published by the Society of Range Management. OSM will pass this suggestion to the State for its consideration.

The SCS also stated that the term "range condition" is usually arbitrary and is often biased by the intended output of the range while "ecological rating" was considered by the commenter to probably be a better term. The National Range Handbook is to be used by Utah when determining range site and condition class. Utah defines range site as an ecological entity based on climax plant community. Also, in accordance with the National Range Handbook, range condition class is used to express the degree to which the composition of the present plant community reflects that of the climax community. Hence, OSM finds the use of the term "range condition" acceptable.

Another comment made by SCS was that frequency or density measurements are more reliable and less controversial than production measurements or estimates of cover. Utah will use the vegetative parameters of cover, density, productivity, and species composition. OSM believes Utah has developed guidelines to assure that the parameters will be utilized to provide adequate measurements and OSM approves of the use of these parameters when establishing a standard for determining successful revegetation.

OSM also received comments from the Bureau of Mines (BOM), Denver, Colorado, the Minerals Management Service (MMS), Central Region, and the National Park Service (NPS), Rocky Mountain Region. The BOM was supportive of the State ultilizing the "range site method", asserting that adoption of this method would be beneficial to the mine operators as well as the regulatory authority. The MMS and the NPS both indicated they had no objection to the approval of the amendments submitted by Utah.

Approval of Amendments

Accordingly, 30 CFR Part 944 is amended to indicate approval of the program amendments adopted by Utah April 30 and May 1, 1981, as revised August 26, 1982, and of the proposal to utilize the range site method of measuring revegetation success submitted to OSM May 21, 1981, together with supplements submitted October 20, 1981, and February 5, 1982.

Additional Findings

Pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this approval. On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 6, and 8 of Executive Order 12291 for all actions taken to approve or conditionally approve State regulatory programs, actions, or amendments. Therefore, with regard to these program amendments OSM is exempt from the requirements for a Regulatory Impact Analysis and regulatory review by OMB.

Pursuant to Section 702(d) of SMCRA, 30 U.S.C. 129(d), this rule is not a major Federal action. It is hereby designated as a categorical exclusion from the NEPA process. Therefore, for this rule OSM is exempt from the requirements of an Environmental Assessment, EIS or FONSI.

Pursuant to the Regulatory Flexibility Act, Pub. L. 96-354, I certify that this rule will not have a significant economic impact on a substantial number of small entities.

On August 23, 1982, the Environmental Protection Agency transmitted its written concurrence on the Utah program amendments.

Dated: September 21, 1982.

William B. Schmidt,

Acting Director.

PART 944—UTAH

Accordingly, Part 944 of Title 30 is amended as set forth herein.

1. 30 CFR 944.10, Paragraph (a) is revised to read as follows:

§ 944.10 State Regulatory program approval.

(a) The Utah State program as submitted on March 3, 1980, and as amended and clarified on June 16 and July 24, 1980, and resubmitted on December 23, 1980, was conditionally approved effective January 21, 1981.

* * * * *

2. 30 CFR Part 944 is amended by adding a new § 944.15 to read as follows:

§ 944.15 Approval of Amendments to State Regulatory Program.

(a) The following amendments were approved effective June 22, 1982:

(1) Utah House Bill 66 which amends Section 40-10-10, 40-10-11, 40-10-16, 40-10-17, 40-10-18, 40-10-21, 40-10-22, and 40-10-24, Utah Code Annotated 1953.

(2) Utah revised regulations UMC 817.124(b) and UMC 784.20(b)(3)(v) adopted April 30 and May 1, 1981.

(b) The following amendments are approved effective (date of publication).

(1) Regulatory modifications to UMC/SMC 845 adopted April 30 and May 1, 1981, as revised August 26, 1982.

(2) Modification of guidelines to allow use of the range site method of

measuring revegetation success pursuant to SMC 816.116 and UMC 817.116 submitted to OSM May 21, 1981, together with supplements submitted October 20, 1981 and February 5, 1982.

BILLING CODE 4310-05-M

30 CFR Part 950

Removal of Condition of Approval of the Wyoming Permanent Regulatory Program and Extension of the Deadline for Wyoming To Satisfy a Condition of Approval

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: The Secretary is removing a condition of approval of the Wyoming Permanent Regulatory Program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA), and extending the deadline for the State to meet another condition of approval.

The State submitted amendments May 26, 1982, which satisfy condition "b" but do not fully satisfy condition "c" as specified in the Secretary's notice of conditional approval of the Wyoming program published in the **Federal Register**, November 26, 1980 (45 FR 78638–78884). In addition, the State has submitted a petition to OSM which may have a bearing on the State's satisfaction of a part of condition "c". Therefore, the Secretary is removing condition "b" and extending the deadline for the State to meet condition "c". This extension will allow OSM time to act on the State's petition and allow Wyoming time to submit additional program modifications that will fully satisfy condition "c".

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: Bill Thomas, Director, Wyoming Field Office, Freden Building, P.O. Box 1420, Mills, Wyoming 82644, Telephone: (307) 328–5830.

SUPPLEMENTARY INFORMATION: On August 15, 1979, OSM received a proposed regulatory program from the State of Wyoming. On February 15, 1980, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary approved in part and disapproved in part the proposed program. Notice of that decision and the Secretary's findings were published in the **Federal Register** on March 31, 1980 (45 FR 20930–20982). The State of Wyoming resubmitted its proposed regulatory program and after a subsequent review, the Secretary approved the program subject to the correction of seven minor deficiencies. The approval was effective upon publication of the notice of conditional approval in the November 26, 1980 **Federal Register** (45 FR 78638–78884).

In accepting the Secretary's conditional approval, Wyoming agreed to correct the seven deficiencies by March 26, 1981. On October 30, 1981, the Secretary extended the date by which Wyoming is required to satisfy conditions "b" and "c" to May 26, 1982 (46 FR 54070–54071).

Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Wyoming program can be found in the November 26, 1980 **Federal Register** (45 FR 78638–78884).

On March 26, 1981, OSM received from the State of Wyoming revisions to the State regulations intended to satisfy conditions "a", "d", "e", and "f". On March 23, 1981, OSM received from the State of Wyoming an Attorney General's Opinion intended to satisfy condition "g". Following a review of these provisions in accordance with the procedures set forth at 30 CFR 732, the Secretary announced his decision to remove conditions "a", "d", "e", and "f" (47 FR 7218–7220, February 18, 1982). With regard to condition "g" the Secretary found the amendment submitted by the state did not fully satisfy the condition. Hence, the Secretary granted Wyoming an extension to May 20, 1983, to submit additional materials to meet condition "g" (47 FR 7218–7220).

In a notice published May 26, 1982 (47 FR 22975–22976), the Secretary invited comment on the State's request for a second extension that would establish a new deadline for the State to meet condition "c".

The State offered as one reason for requesting a further extension the fact that OSM has not yet finalized amendments to the permanent program rules. Some of these amendments may directly affect Wyoming's satisfaction of this condition. Further, Wyoming referred to the petition submitted by several western States, including Wyoming, to repeal a portion of 30 CFR 840.15 concerning the requirement that each State program provide for public participation consistent with 43 CFR Part 4. Specifically, the petition seeks repeal of 43 CFR 4.1294(b) which relates to the award of costs and expenses against the State as a requirement of State programs (46 FR 54761 and 46 FR 58465–58466).

On May 26, 1982, Wyoming submitted emergency rules pertaining to the definition of "toxic materials" and procedures relating to intervention and the award of costs and expenses in administrative proceedings. These rules were submitted by the State to address condition "b" and the part of condition "c" not affected by the State's petition to OSM discussed above. OSM published notice of opportunity for public comment on these program revisions on July 23, 1982 (46 FR 31898–31899). This notice provides the Secretary's final determinations on the State's request for an extension to satisfy condition "c" and on the amendments submitted by Wyoming May 26, 1982.

Secretary's Findings

1. The Secretary finds that the May 26, 1982 amendment of the rules of the Wyoming Department of Environmental Quality, Land Quality Division, which revises Chapter I, Section 2(99) by substituting "detrimental" for "lethal" makes the State's definition of "toxic materials" consistent with the Federal provision. Accordingly, the Secretary finds that Wyoming has satisfied condition "b" as specified in the Secretary's November 26, 1980, conditional approval of the Wyoming program.

2. The Secretary finds that the May 26, 1982, amendment which revises Chapter II, Section 7 of the Wyoming Rules of Practice and Procedure and creates a new Chapter V does not fully satisfy condition "c". Condition "c" specifies that Wyoming must establish requirements which are consistent with the Federal regulations at 43 CFR Part 4. The State's rules, as amended, do not include provisions comparable to 43 CFR 4.1294, paragraphs (b) and (c). Hence, a person or a permittee could not receive an award from the State for costs and expenses including attorneys' fees reasonably occurred as a result of that person's participation in any administrative proceeding under the Act. As noted above under "Supplementary Information" Wyoming, together with several other western States, submitted a petition to OSM to repeal 43 CFR 4.1294(b) as a requirement of State programs. OSM has not yet acted on this petition. The Secretary also has determined that the amendments submitted by Wyoming are inconsistent with the Federal requirements in the following respect. Under chapter V, Section 2, "Who May Receive an Award", Wyoming's rules

specify that appropriate costs and expenses including attorneys' fees may be awarded to the permittee from any person but only if the Council finds that "the person knew or *should have known* that no violation or imminent hazard occurred or existed to support the enforcement action". The stipulation that the person may be assessed costs and expenses if he/she "should have known" that no violation or imminent hazard occurred places a greater burden on a person than the Federal requirements. 43 CFR 4.1294(d) specifies that a person may be assessed costs and expenses only if it is demonstrated that the person acted in bad faith for the purpose of harassing or embarrassing the permittee. Under Wyoming's rule a person acting in good faith who initiated an administrative proceeding to review an enforcement action could be assessed costs and expenses upon a finding that no violation or imminent hazard had occurred. The Secretary finds that to be consistent with the Federal requirements, Wyoming's program must provide that a person may be assessed reasonable costs or expenses only if he/she initiated a proceeding in bad faith.

Because the material submitted by Wyoming does not fully satisfy condition "c" and because OSM has not yet acted on the petition discussed above which may have a bearing on the State's satisfaction of this condition, the Secretary has decided to extend the deadline for Wyoming to meet condition "c" until May 20, 1983. This extension will allow OSM time to act on the petition and allow Wyoming time to submit additional modifications to correct the deficiencies outlined above.

Public Comment

The public comment period on the State's request for an extension to meet condition "c" ended June 25, 1982, and the comment period on the amendments submitted by the State on May 26, 1982, ended August 13, 1982. No comments were received.

A public hearing scheduled for August 11, 1982, on the proposed program modifications was cancelled as no one expressed an interest in presenting testimony.

Additional Determinations

1. *Compliance with the National Environmental Policy Act.* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Compliance with the Regulatory Flexibility Act.* The Secretary hereby determines that this proposed rule will not have a signficant economic impact on small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

3. *Compliance with Executive Order No. 12291.* On August 28, 1981, the Office of Management and Budget (OMB) granted the Office of Surface Mining exemption from Sections 3, 4, 6, and 8 of Executive Order 12291 for all actions taken to approve or conditionally approve State regulatory programs, actions or amendments. Therefore, a Regulatory Impact Analysis and regulatory review by OMB are not needed for this condition removal and extension.

4. *Concurrence of the Environmental Protection Agency.* On August 23, 1982, the Environmental Protection Agency transmitted its written concurrence on the Secretary's approval of the amendatory provisions addressed in this notice.

List of Subjects in 30 CFR Part 950

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: September 20, 1982.

Daniel N. Miller, Jr.,

Assistant Secretary for Energy and Minerals.

PART 950—WYOMING

Accordingly, Part 950 of Title 30 is amended as set forth herein.

1. 30 CFR 950.10 is amended by revising it to read as follows:

§ 950.10 State program approval.

The Wyoming permanent program, as submitted on August 15, 1970, as amended October 23, 1979, May 30, 1980, and August 5, 1980, was approved effective November 26, 1980. The amendments to the program submitted March 26, 1981 and April 8, 1981, were approved effective February 18, 1982. The amendment to the program submitted May 26, 1982, pertaining to the definition of "toxic materials" is approved effective September 27, 1982. Copies of the approved program, as amended, are available at:

Wyoming Department of Environmental Quality, Land Quality Division, Hathaway Building, Cheyenne, Wyoming 82002.
Office of Surface Mining, Room 5315, 1100 "L" Street, N.W., Washington, D.C. 20240, Telephone: (202) 345-7896.

2. 30 CFR 960.11 is amended by removing the material and reserving paragraph (b), and revising paragraph (c) to read as follows:

§ 950.11 Terms and conditions of State program approval.

* * * * *

(b) [Reserved]

(c) On or before May 20, 1983, Wyoming must establish requirements which are consistent with the Federal attorneys' fees and intervention regulation in 43 CFR Part 4.

* * * * *

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 110

[CGD3-80-3A]

Anchorage Grounds, Delaware Bay and River

AGENCY: Coast Guard, DOT.

ACTION: Interim rule with request for comments.

SUMMARY: The Coast Guard is delegating the authority over operation of the Delaware Bay and River Anchorages from Commander, Third Coast Guard District to the Captain of the Port, Philadelphia; eliminating provisions redundant with authority provided in 33 CFR Part 160; redesignating Anchorage 2 as a general anchorage and permitting the handling of explosives in all general anchorages except Anchorage 2 by permit from the Captain of the Port; and eliminating the requirement for vessels handling explosives and other dangerous cargo to display a red light at night. The present requirements are cumbersome and inefficient and place unnecessary burdens on the users of the anchorages. This change will provide for more efficient management of the vessels in the anchorages without reducing the level of safety.

DATES: Interim rule effective October 27, 1982, comments must be received on or before November 12, 1982.

ADDRESSES: Comments may be mailed to Captain Daniel B. Charter Jr., Captain of the Port, Philadelphia, U.S. Coast Guard Base, Gloucester City, New Jersey, 08030.

FOR FURTHER INFORMATION CONTACT: Captain Daniel B. Charter Jr., Captain of the Port, Philadelphia, U.S. Coast Guard Base, Gloucester City, New Jersey 08030 (Tel: 609-456-1370 or 215-923-4320) between 7:00 AM and 4:30 PM Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: On June 23, 1980, the Coast Guard published a notice of proposed rulemaking, Docket CGD3–80–3A (45 FR 41961). Interested persons were requested to submit comments and two comments were received. No public hearing was held.

Drafting Information: The principal person involved in drafting this rule is Captain Daniel B. Charter Jr., Project Officer, Captain of the Port, Philadelphia.

Discussion of Comments: One of the two comments was from a port affairs spokesman for twenty-one Delaware Valley civic and trade associations. These twenty-one associations represent the vast majority of the public that will be affected by the rule change and their views were considered based on this representation.

Both of the comments agreed with the proposal to transfer authority over the operations of the Delaware River and Bay anchorages from Commander, Third Coast Guard District to the Captain of the Port, Philadelphia. Both also agreed with elimination of the requirement to display the red light at anchor and considered the change a safety enhancement by eliminating the possibility for confusing the red light with a navigation light. No comments were received on the proposal to eliminate the requirements redundant with authority contained in 33 CFR Part 160.

Both comments objected to the redesignation of Anchorage 1 as an explosive anchorage and Anchorage 2 as a general anchorage. They indicated that Anchorage 2 was not an acceptable general anchorage since it could not accommodate deep draft vessels (the primary users of Anchorage 1). Further, they indicated that Anchorage 1 is crucial to and an integral part of the Delaware River navigation system.

The commenter representing the twenty-one civic and trade associations indicated loading or discharging of explosives is a rare circumstance and that the COTP could make the decision with respect to anchorage assignment at the time of application. He also indicated their belief that the provisions of the Ports and Waterways Safety Act provided the necessary authority for the COTP to follow this practice.

The records at the COTP Office in Philadelphia were reviewed and it was found that there were *no* requests for explosive handling by vessels at anchor in the past three years.

The purpose of the amendment as expressed in the NPRM was to reduce the potential hazards caused by the proximity of a nuclear electric generating plant to the explosive anchorage (Anchorage 2). The Coast Guard agrees with the comment that anchorage assignments can be considered at the time an application for explosive handling is received and therefore Anchorage 1 will remain as a general anchorage and Anchorage 2 will be redesignated as a general anchorage. The handling of explosives will be permitted in all general anchorages except Anchorage 2, on a case-by-case basis with a permit from the Captain of the Port as the situation warrants.

One commenter also objected to the proposal to reduce the size of Anchorage 1. The purpose of the reduction in size was to more accurately reflect the area of usable depth. Since the pilots are well aware of the water depths in the area and these are clearly plotted on the charts, it appears there is no practical benefit in reducing the size of the anchorage. Usage will continue to be limited to areas suitable to the draft of the vessels involved; therefore, the present description of the size of Anchorage 1 is retained at this time. However, it is the intent of the Coast Guard to explore better descriptions of the anchorage boundaries in a future rulemaking action.

There were no comments on the proposal to extend to all the general anchorages of the Delaware River the COTP authorization to grant permits for anchoring for periods in excess of 48 hours now limited to Anchorages 15 and 16. This change clarifies the intent of the permit process.

Finally, the citations for Dangerous Cargo regulations have been amended in paragraph 110.157(c). This editorial change reflects the shift of the Dangerous Cargo regulations excluding military explosives from Title 46 Code of Federal Regulations to Title 49 Code of Federal Regulations. Additionally, the term "other dangerous cargo" is being deleted from the regulations for vessels carrying and handling explosives (regulations for explosives anchorage) since the permit required from the Captain of the Port only pertains to explosives.

Summary of Final Evaluation: This amendment has been evaluated under Executive Order 12291 and the Coast Guard has determined that this is not a major rule. This amendment has also been evaluated under the Department of Transportation Order 2100.5, "Policies and Procedures for Simplification, Analysis and Review of Regulations" dated May 22, 1980 and has been determined to be non-significant. This amendment is primarily editorial, updating the regulations to reflect management practices in existence for five years, or merely a redelegation of authority. The impact is considered so minimal that a regulatory evaluation is not required.

Likewise it is hereby certified that this amendment will not have any significant economic impact on a substantial number of small entities, as described in the Regulatory Flexibility Act (Pub. L. 96–354; 5 U.S.C. 601, et seq.). This certification is made in accordance with Section 605 of Title 5 of the United States Code.

List of Subjects in 33 CFR Part 110

Anchorage grounds.

PART 110—ANCHORAGE REGULATIONS

In consideration of the foregoing, Part 110 of Title 33, Code of Federal Regulations is amended as follows:

1. In § 110.157, paragraph (a)(3) is revised to read as follows:

§ 110.157 Delaware Bay and River.

(a) * * *

(3) Anchorage 2 northwest of Artificial Island. On the east side of the channel along Reedy Island Range, bounded as follows: Beginning at a point bearing 105° from the northernmost point of Reedy Island, 167 yards easterly of the east edge of the channel along Reedy Island Range; thence 105°, 800 yards; thence 195°, 4,500 yards; thence 285°, 800 yards, to a point (approximately latitude 39°28′58″, longitude 75°33′37″) opposite the intersection of Reedy Island and Baker Ranges; and thence 15°, 4,500 yards, to the point of beginning.

§ 110.157 [Amended]

2. Section 110.157 is amended by removing the words "District Commander" and inserting, in their place, the words "Captain of the Port" in the following places: 33 CFR 110.157(a)(16), (a)(17), (b)(1), (b)(3), (b)(7).

3. In § 110.157, paragraph (b)(2) is revised to read as follows:

§ 110.157 Delaware Bay and River.

* * * * *

(b) * * *

(2) No vessel shall occupy any prescribed anchorage for a longer period than 48 hours without a permit from the Captain of the Port. Vessels expecting to be at anchor for more than 48 hours shall obtain a permit from the Captain of the Port for that purpose. No vessel in such condition that it is likely to sink or otherwise become a menace or obstruction to navigation or anchorage of other vessels shall occupy an anchorage except in an emergency, and

then only for such period as may be permitted by the Captain of the Port.

§ 110.157 [Amended]

4. By removing and reserving § 110.157(b)(4).

§ 110.157 [Amended]

5. By removing and reserving § 110.157(b)(8).

6. In § 110.157 paragraph (c) is revised to read as follows:

* * * * *

(c) *Regulations for vessels carrying and handling explosives.* (1) All vessels carrying explosives as defined in and subject to, Title 46 Code of Federal Regulations, Part 146, or Title 49 Code of Federal Regulations, Parts 171–177, or on which such explosives are to be loaded, shall obtain a permit from the Captain of the Port, except as provided in paragraph (c)(5) of this section. The maximum amount of explosives for which a permit is required in 46 CFR Part 146, and 49 CFR Parts 171–177, which may be carried or loaded at any time by a vessel shall not exceed 800 tons, except in cases of great emergency or by special permit from the Captain of the Port. This written permit shall be obtained from the Captain of the Port before vessels carrying explosives or on which explosives are to be loaded within the weight limit specified in paragraph (c)(1) of this section, may anchor in any anchorage. Permits will not be issued for Anchorage 2 under any circumstances. Such permit may be revoked at any time. All vessels used in connection with loading, or unloading explosives shall carry written permits from the Captain of the Port, and shall show such permit whenever required by him or his representative.

(2) Vessels handling explosives shall be anchored so as to be at least 2,200 feet from any other vessel, but the number of vessels which may anchor in an anchorage at any one time shall be at the discretion of the Captain of the Port. This provision is not intended to prohibit barges or lighters from tying up alongside the vessels for the transfer of cargo.

(3) Whenever a vessel or barge not mechanically self-propelled anchors while carrying explosives or while awaiting the loading of explosives, the Captain of the Port may require the attendance of a tug upon such vessel or barge when in his judgment such action is necessary.

(4) Fishing and navigation are prohibited within an anchorage whenever occupied by an anchored vessel displaying a red flag.

(5) The District Engineer, U.S. Army Corps of Engineers, may authorize, in writing, a vessel carrying explosives for use on river and harbor works or on other work under Department of the Army permit, to anchor in or near the vicinity of such work. The Captain of the Port will prescribe the conditions under which explosives shall be stored and handled in such cases.

(6) Vessels carrying explosives or on which explosives are to be loaded, within the weight limit specified in subparagraph (c)(1) of this paragraph, shall comply with the general regulations in paragraph (b) of this section when applicable.

(7) Nothing in this section shall be construed as relieving any vessel or the owner or person-in-charge of any vessel, and all others concerned, of the duties and responsibilities imposed upon them to comply with the regulations governing the handling, loading or discharging of explosives entitled "Subchapter C—Hazardous Materials Regulations" (49 CFR Parts 171 to 177) or "Subchapter N—Dangerous Cargoes" (46 CFR Part 146).

(Sec. 7, 38 Stat. 1053, as amended (33 U.S.C. 471); Sec. 6(g)(1), Pub. L. 89–670, 80 Stat. 940 (49 U.S.C. 1655(g)(1); 49 CFR 1.46(c)(1); 33 CFR 1.05–1(g)(2); 33 CFR Part 160))

Dated: August 30, 1982.

W. E. Caldwell,

Commander, Third Coast Guard District.

BILLING CODE 4910–14–M

POSTAL SERVICE

39 CFR Parts 310 and 320

Enforcement and Suspension of the Private Express Statutes

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The sole purpose of this final rule is to revise the Postal Service regulations which implement the Private Express Statutes (statutory restrictions on private carriage of letters) by removing from the regulations every reference to 18 U.S.C. 1724 as one of the Private Express Statutes. Section 1724 of title 18, United States Code, has had no relation to the restrictions on the private carriage of letters since it was amended in 1951.

EFFECTIVE DATE: October 27, 1982.

FOR FURTHER INFORMATION CONTACT: Charles D. Hawley, (202) 245–4584.

SUPPLEMENTARY INFORMATION: Prior to its repeal in 1951, the first paragraph of section 1724 of title 18, United States Code, established penalties for failure to pay postage on, or for unlawful conveyance of, mail carried to or from any part of the United States by any foreign vessel. The Act of Sept. 25, 1951, ch. 413, 65 Stat. 336, repealed this law as obsolete and unnecessary because of the international postal conventions establishing postal rates and the requirement by all countries that postage be prepaid. As currently in effect, section 1724 contains no language relevant to the restrictions on the private carriage of letters. It is, therefore, no longer appropriate to refer to it as a Private Express Statute.

Although 39 U.S.C. 410(a) exempts the Postal Service from the notice and comment requirements of the Administrative Procedure Act regarding proposed rulemaking (5 U.S.C. 553), it is Postal Service policy to adhere to the rulemaking provisions when changes in the Private Express regulations are made. 39 CFR 310.7. Since, however, this rule makes no substantive change in the regulations, notice and an opportunity for the submission of comments in this case are deemed unnecessary. Accordingly, the Postal Service hereby adopts the following revisions of title 39, Code of Federal Regulations.

List of Subjects in 39 CFR Parts 310 and 320

Postal Service, Advertising, Computer technology.

PART 310—ENFORCEMENT OF THE PRIVATE EXPRESS STATUTES

1. The statement of statutory authorities immediately following the table of contents at the head of this Part is revised to read as follows:

Authority: 39 U.S.C. 401, 404, 601–606; 18 U.S.C. 1693–1699.

2. In § 310.1, paragraph (f) is revised to read as follows:

§ 310.1 Definitions.

* * * * *

(f) The "Private Express Statutes" are set forth in 18 U.S.C. 1693–1699 and 39 U.S.C. 601–606 (1970).

PART 320—SUSPENSION OF THE PRIVATE EXPRESS STATUTES

§ 320.2 [Amended]

3. In § 320.2, the parenthetical immediately following paragraph (c) is revised to read as follows:

(39 U.S.C. 401, 404, 601–606; 18 U.S.C. 1693–1699).

§ 320.3 [Amended]

4. In § 320.3, the final parenthetical following paragraph (d) is revised to read as follows:

(39 U.S.C. 401, 404, 601–606; 18 U.S.C. 1693–1699).

§ 320.4 [Amended]

5. In § 320.4, the parenthetical at the end of this section is revised to read as follows:

(39 U.S.C. 401, 404, 601–606; 18 U.S.C. 1693–1699).

§ 320.5 [Amended]

6. In § 320.5, the parenthetical at the end of this section is revised to read as follows:

(39 U.S.C. 401, 404, 601–606; 18 U.S.C. 1693–1699).

§ 320.6 [Amended]

7. In § 320.6, the parenthetical immediately following paragraph (f) is revised to read as follows:

(39 U.S.C. 401, 404, 601–606; 18 U.S.C. 1693–1699).

§ 320.9 [Amended]

8. In § 320.9, the parenthetical at the end of this section is revised to read as follows:

(39 U.S.C. 401, 404, 601–606; 18 U.S.C. 1693–1699).

(39 U.S.C. 401)

W. Allen Sanders,

BILLING CODE 7715–15–M

GENERAL SERVICES ADMINISTRATION

41 CFR Ch. 101

[FPMR Amdt. E–252]

Storage and Distribution; Policy on GSA Self-Service Stores

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This regulation provides policy on GSA self-service stores. The regulation is necessary to clarify the purpose and functions of self-service stores and to provide restrictions on the use of these stores. The regulation will provide for more effective control of purchases in these stores.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: General questions: Mr. Robert A. Renner, Director, Regulations Division (703–557–7990).

Specific technical questions: Mr. James A. Marsden, Acting Director, Distribution Management Division (703–557–7580).

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101–28

Government property management, Warehouses.

PART 101–28—STORAGE AND DISTRIBUTION

1. The table of contents for Part 101–28 is amended by revising Subpart 101–28.3.

Subpart 101–28.3—Self-Service Stores

Sec.
101–28.300 Scope of subpart.
101–28.301 Applicability.
101–28.302 Mission of self-service stores.
101–28.303 Services provided by self-service stores.
101–28.304 Item selection and stockage criteria.
101–28.304–1 Type of items.
101–28.304–2 Determining items to be stocked.
101–28.305 Prices of self-service store items.
101–28.305–1 [Removed]
101–28.305–2 [Removed]
101–28.306 Access to and use of self-service stores.
101–28.306–3 Limitations on use.
101–28.308 The shopping list.
101–28.309–1 Obtaining Standard Form 3146, GSA Self-Service Store Shopping List/Sales Slip.
101–28.309–2 Use of the shopping list form.
101–28.309–3 Approving official.
101–28.309–4 Agency reviewing official.
101–28.310 Sensitive items.
101–28.310–1 General.
101–28.310–2 Identification.
101–28.310–3 Control.

Subpart 101–28.3—Self-Service Stores

2. Section 101–28.300 is revised to read as follows:

§ 101–28.300 Scope of subpart.

This subpart provides policy for the GSA self-service store program, including a definition of the program and policy on item stockage, services provided, and Federal agency participation in the program.

3. Section 101–28.301 is revised to read as follows:

§ 101–28.301 Applicability.

This subpart is applicable to all activities that are eligible to use self-service stores. Eligible activities include executive agencies and elements of the legislative and judicial branches of the Government. Agency redistribution points such as stockrooms, stores, and depots are not eligible to obtain items for stock purposes from self-service stores. Self-service stores are for the primary use of executive agencies located within an area which GSA has determined to be the store market area for retail quantities of those items stocked by the store.

4. Section 101–28.302 is revised to read as follows:

§ 101–28.302 Mission of self-service stores.

(a) Self-service stores are centralized retail supply distribution outlets established and operated by the General Services Administration to satisfy small repetitive requirements for common-use expendable items.

(b) The stores are established in areas with a high concentration of Federal agencies and Federal employees to economically, efficiently, and effectively provide commonly used items needed for accomplishment of customer agency missions.

5. Section 101–28.303 is revised to read as follows:

§ 101–28.303 Services provided by self-service stores.

The self-service stores provide the following services:

(a) Self-service shopping;

(b) Opportunity for personal observation and substitution of items before purchase;

(c) Simplified purchase through the use of a shopping plate rather than a requisitioning system;

(d) Automated billing;

(e) Assistance in FEDSTRIP requisitioning; and

(f) Other services (when approved by the GSA Regional Administrator) such as delivery or mail order service for selected items.

6. Section 101–28.304 is revised and §§101–28.304–1 and 101–28.304–2 are added as follows:

§ 101-28.304 Items selection and stockage criteria.

§ 101-28.304-1 Types of items.

Items stocked in self-service stores are based on customer requirements for common-use expendable items. Most stores stock only administrative-type items commonly used in Government offices. However, selected stores stock janitorial supplies, handtools, and other industrial-type items when needed to support official agency requirements. No store will stock furniture or controlled/accountable forms. Also, no store will stock items that are peculiar to a particular agency unless the items are commonly used by more than one shopping plate account within that agency and an exemption from this restriction has been obtained from the responsible GSA Regional Administrator.

§ 101-28.304-2 Determining items to be stocked.

(a) GSA regional offices will canvass customer agencies periodically to identify items for which there is an official need. Items identified as satisfying an official need will be stocked in self-service stores.

(b) Customers may request that specific Federal Supply Schedule items be stocked. The requests must be written and addressed to the responsible GSA Regional Administrator. The request shall be signed by a customer agency official at a level of responsibility acceptable to the responsible GSA Regional Administrator. The requests shall indicate the estimated monthly usage of the item. Requests will be evaluated and agencies notified of the results of the evaluation.

7. Section 101-28.305 is revised to read as follows:

§ 101-28.305 Prices of self-service store items.

Items stocked in self-service stores that are obtained from GSA wholesale supply distribution facilities (depots) will carry the price in effect at the time of shipment from the facilities. (This price is normally the price shown in the GSA supply catalog. However, because catalog prices are subject to change without notice, due to pricing analyses, price reductions, etc., the price charged by self-service stores for a particular item may not be the same as the price shown in the current catalog or latest price supplement.) Items stocked in self-service stores that are not available from GSA wholesale supply distribution facilities but are obtained from other Government supply sources or commercial sources will be priced at the invoice cost.

8. Sections 101-28.305-1 and 101-28.305-2 are removed as follows:

§ 101-28.305-1 [Removed]

§ 101-28.305-2 [Removed]

9. Section 101-28.306 is revised to read as follows:

§ 101-28.306 Access to and use of self-service stores.

(a) Customer access to and use of self-service stores is restricted to shoppers with a valid shopping plate (see § 101-28.308) and completed shopping list/sales slip (see § 101-28.309). The customer also shall possess personal identification for positive identification by the store staff. Customers known by the store staff to be official representatives of using agencies may be permitted entry to self-service stores without prior examination of these documents, but those customers shall have these documents in their possession while in a store for presentation upon request by the store staff. GSA officials, judges, Members of Congress, heads of Federal agencies, and other high ranking officials who have prior approval from the Assistant Regional Administrator for personal property may be permitted entry to self-service stores by presenting some valid means of personal identification. However, no transactions will be consummated without a valid shopping plate and a properly completed Standard Form 3146, GSA Self-Service Store Shopping List/Sales Slip.

(b) More than one person per shopping list may be permitted access to a self-service store when the store staff determines that additional personnel are needed to assist with shopping.

(c) Vendors, suppliers, and others from the private sector are not authorized access to self-service stores unless by written approval of the appropriate GSA Regional Administrator or his or her designee.

10. Section 101-28.308-3 is revised to read as follows:

§ 101-28.308-3 Limitations on use.

(a) Agencies shall establish internal controls to ensure that the use of shopping plates by the agency or other officially authorized activities are limited to the purchase of items for official Government business. The controls shall include written instructions that contain a statement prohibiting the use of shopping plates in acquiring items for other than Government business.

(b) Members of Congress, except for the Delegate of the District of Columbia, should limit the use of their shopping plates to self-service stores located outside of the District of Columbia. The Delegate of the District of Columbia may use a shopping plate to obtain office supplies for the use of his or her district offices from self-service stores located in the District of Columbia. Office supplies needed by Members of Congress for use in the District of Columbia and supplies needed by the Delegate of the District of Columbia for use in his or her office in the House Office Building should be obtained from the Senate and House of Representatives supply rooms, as appropriate.

11. Sections 101-28.309, 101-28.309-1, 101-28.309-2, 101-28.309-3, and 101-28.309-4 are added as follows:

§ 101-28.309 The shopping list.

§ 101-28.309-1 Obtaining Standard Form 3146, GSA Self-Service Store Shopping List/Sales Slip.

Agencies may obtain copies of Standard Form 3146 by ordering through FEDSTRIP/MILSTRIP or by including the required quantities on a Standard Form 3146 signed by an agency approving official for self-service store purchases. The national stock number of the form is 7540-01-127-4195.

§ 101-28.309-2 Use of the shopping list form.

A completed Standard Form 3146 is required for access to and for making purchases in all self-service stores, except as indicated in § 101-28.306. Standard Form 3146 also serves as evidence of receipt of merchandise purchased. Instructions on the reverse of Standard Form 3146 include requirements for the use of stores, completion and distribution of the form, item substitutions and additions, and handling of sensitive items. Standard Form 3146 must be completed and approved in accordance with the instructions before shopping in the stores. Copies of the form will be distributed to the shopper, the designated agency reviewing official, and, for transactions requiring manual billing, the applicable GSA finance center. The shopper may substitute similar items for items which are out of stock. However, the shopper may add items only if the approving official has not included the words "LAST ITEM" and a diagonal line through unused spaces below the last item listed on the form. Sensitive items (see § 101-28.310) may not be added or acquired as substitutes for out of stock items.

§ 101-28.309-3 Approving official.

Designation of the approving official is the responsibility of the agency or activity using self-service stores. The signature of an approving official on Standard Form 3146 provides authorization for access to a self-service store and purchase of items listed. Self-service store personnel are not required to verify the names of approving officials.

§ 101-28.309-4 Agency reviewing official.

An official, other than the approving official, shall be designated by the purchaser's organization to review the purchases authorized by the approving official. The title of the reviewing official and other identifying information, such as the mailing address and the six-digit number in the upper right corner of each shopping plate assigned the reviewing official, should be submitted to the appropriate Assistant Regional Administrator for personal property. Copy 3 of all consummated Standard Forms 3146 will be furnished to the designated agency reviewing official at least once each month. Agency reviewing officials are responsible for examining purchases as recorded on Standard Form 3146 and for discipline concerning the use of self-service stores.

12. Sections 101-28.310, 101-28.310-1, 101-28.310-2, 101-28.310-3 are added to read as follows:

§ 101-28.310 Sensitive items.

§ 101-28.310-1 General.

Every item stocked in self-service stores may be considered sensitive to some degree, based upon standard criteria factors such as propensity for personal use; the potential for embarrassment to GSA and customer agencies; the level of customer complaints; and control as an accountable item of personal property. Self-service store merchandise having these factors to a high degree will be identified as "sensitive items" to help ensure that they are obtained only to satisfy real needs of agencies and are consumed in official use.

§ 101-28.310-2 Identification.

Sensitive items stocked in self-service stores will be identified by each GSA region and posted in the stores to help ensure that agencies are aware that the items are subject to abuse. Sensitive items include such supplies as:

(a) Photographic supplies;
(b) Styrofoam cups;
(c) Aspirin;
(d) Facial tissues;
(e) Deodorizers; and
(f) Leather goods; e.g., portfolios, briefcases, and navigator cases. Each GSA region may identify items to add to the above list based upon the standard criteria factors listed in § 101-28.310-1.

§ 101-28.310-3 Control.

(a) Sensitive items purchased in self-service stores will be identified on Standard Form 3146, GSA Self-Service Store Shopping List/Sales Slip, with a checkmark by store personnel in the Sensitive Item Block on the front of the form. These checkmarks are made to assist customer agencies with internal review and control of sensitive item purchases.

(b) Additional controls of sensitive items may include the display of sensitive items in single units to be made available to customers only upon request to store personnel and the imprinting of copies of sales slips with a highly visible cautionary statement, such as "This sale contains sensitive items."

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Dated: September 7, 1982.

41 CFR Part 5-10

[APD 2800.2 CHGE 26]

Bonds and Insurance; Revision of Policies and Procedures

Revision of Policies and Procedures

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: The General Services Administration Procurement Regulations, Chapter 5, are amended to revise policies and procedures regarding bonds and insurance. The dollar amount at which contracts are subject to Miller Act bonds is raised from $2,000 to $25,000 in accordance with Pub. L. 95-585, November 2, 1978. Policies and procedures regarding the use of individual sureties are amended to reflect the findings of Comptroller General Decision No. B-203608, June 15, 1982, which stated that matters concerning an individual surety's financial responsibility are matters of responsibility rather than responsiveness. The intended effect of this revision is to improve the procurement system.

EFFECTIVE DATE: October 4, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Philip G. Read, Director, Office of Federal Procurement Regulations, Office of Acquisition Policy, (202-523-4755).

List of Subjects in 41 CFR Part 5-10

Government procurement, Bonds and insurance.

PART 5-10—BONDS AND INSURANCE

1. The table of contents for Subpart 5-10, is revised by adding the following six entries:

Sec.
5-10.103-1 Policy on use.
5-10.103-2 Amount required.
5-10.104-2 Building service contracts.
5-10.105-2 Building service contracts.
5-10.109 Execution and administration of bonds.
5-10.150 Solicitation provisions.

Authority: (Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c))).

2. The contents of Part 5-10, Bonds and Insurance, is revised by removing the following entries:

Sec.
5-10.103-3 Invitation for bids revision.
5-10.150 Bid guarantees and bonds, when unit prices are required.

3. Subpart 5-10-1, Bonds, is revised to read as follows:

Subpart 5-10.1—Bonds

§ 5-10.103 Bid guarantees.

This section authorizes certain actions when determined to be in the best interest of the Government. Each determination shall be supported by an explicit statement of the reasons which constitute the basis for the determination.

§ 5-10.103-1 Policy on use.

(a) *Construction contracts.*—(1) *Bid guarantees.* (i) Bid guarantees shall be required for all construction, alteration and repair contracts, awarded by SBA under Section 8(a) of the Small Business Act, amounting to $25,000 or more when performance and/or payment bonds are required. (See §§ 1-10.104 and 1-10.105.)

(ii) Bid guarantees for all other construction, alteration and repair contracts shall be in accordance with § 1-10.103.

(2) *Waiver of bonding requirements.* Bonding requirements for 8(a) contracts may be waived as provided by the Small Business Act and the regulations of the Small Business Administration (SBA) (13 CFR 124.1-5). However, the use of this authority is tightly circumscribed, and it is the intent of Congress that the waiver authority be used sparingly.

(b) *Building service contracts.* Bid guarantees shall be required for building service contracts in excess of $10,000 when it has been determined that a

performance bond is essential to the best interests of the Government as provided in § 5–10.104–2.

(c) *All other contracts.* Refer to § 1–10.103 for guidance on the use of bid guarantees for all other contracts not covered by (a) and (b) of this section.

§ 5–10.103–2 Amount required.

When a bid guarantee is required, a provision shall be included in the solicitation that clearly sets forth the amount of bid guarantee to be furnished. Solicitation provisions are prescribed in § 5–10.150 for this purpose.

§ 5–10.104 Performance bonds.

§ 5–10.104–1 Construction contracts.

(a) *Performance bonds.* (1) Performance bonds, as required by the Miller Act (40 U.S.C. 270a–270e), shall be provided in connection with all construction contracts (including 8(a) contracts awarded by SBA) which exceed $25,000, in accordance with § 1–10.104–1.

(2) Performance bonds may be required for construction contracts which are less than $25,000 when it is determined in writing at a level above the contracting officer that such a requirement is in the best interest of the Government.

(b) *Clause requirement.* The requirement for furnishing a bid guarantee and performance and payment bonds prescribed in the provision "Bid Guarantee and Bonds" in § 5–10.150(a) shall be set forth in the Special Conditions of the solicitation document.

§ 5–10.104–2 Other than construction contracts—Building service contracts.

(a) Performance bonds shall not be required for other than construction contracts except when it is in the best interests of the Government. (See § 1–10.104–2.)

(b) Performance bonds may be required on a case-by-case basis for building service contracts in excess of $10,000, when it is determined in writing and reviewed at a level above the contracting officer that it is essential to the best interest of the Government. They shall not be used as a substitute for a determination of responsibility.

(c) Performance bonds shall not be required for contracts awarded under Section 8(a) of the Small Business Act, or contracts awarded to workshops for the blind or other severely handicapped under the Wagner-O'Day Act.

(d) The requirement for furnishing a performance bond for building service contracts in excess of $10,000 shall be set forth in the solicitation document as prescribed in § 5–10.150(b)(2).

§ 5–10.105 Payment bonds.

§ 5–10.105–1 Construction contracts.

(a) Payment bonds shall be required, as provided by the Miller Act in connection with any construction contracts (including 8(a) contracts awarded by SBA) exceeding $25,000 in amount, except as provided in § 1–10.105–1. Payment bonds may be required for construction contracts which are less than $25,000 only when it is determined in writing at a level above the contracting officer that such a requirement is in the best interest of the Government.

(b) The payment bond requirement prescribed in § 5–10.150(a) for construction contracts shall be set forth in the Special Conditions of the solicitation document.

§ 5–10.105–2 Other than construction contracts.

Payment bonds shall not be required for building service contracts.

§ 5–10.109 Execution and administration of bonds.

(a) Bid guarantees, other than bid bonds, shall be returned to unsuccessful bidders as soon as an award has been made.

(b) A bid guarantee, other than a bid bond, submitted by a successful bidder, shall be retained until the bidder has executed all contractual documents as may be required and has submitted acceptable payment and performance bonds, if required.

§ 5–10.150 Solicitation provisions.

(a) *Construction contracts.* When bonds are required under §§ 5–10.103, 5–10.104 and 5–10.105, the following provision shall be included in the Special Conditions of the solicitation documents:

Bid Guarantee and Bonds

A bid guarantee is required as provided in Standard Form 20, Invitation for Bids (Construction Contracts).

(a) If the contract price is more than $25,000, the bidder shall furnish a performance bond in a penal amount of 100 percent of the contract price, and payment bond in a penal amount as follows:

(1) Fifty percent of the contract price if the contract price is more than $25,000 but not more than $1,000,000;

(2) Forty percent of the contract price if the contract price is more than $1,000,000, but not more than $5,000,000; if the contract price is over $5,000,000, then forty percent of the contract price or $2,500,000, whichever is less.

(b) If bids on one or more alternate and/or unit price bids were accepted in awarding the contract, the term "contract price" as used above shall mean the aggregate of the lump sum amount plus the product of each unit price accepted multiplied by the applicable number of units specified in the bid form, plus or minus such alternate bids as were accepted.

(c) Performance and payment bonds shall be submitted within the time specified on the reverse side of Standard Form 21, Bid Form, for this contract.

(d) The bidder shall not lose the right to receive any payment due or to become due under the contract unless and until the surety has made payment in settlement of claims by suppliers of labor or material in accordance with the requirements of the surety's undertaking under the payment or performance bond and has notified the Contracting Officer of the claims and amount so paid.

(End of provision)

(b) *Building service contracts.* (1) When it has been determined that a performance bond is required, the bid guarantee statement required by § 1–10.103–3(a)(1) shall, except as otherwise provided in this § 5–10.150, be as follows:

Bid Guarantee

(Applicable to bids in excess of $10,000.) The bid guarantee shall be in the amount of 20 percent of the bid price for the term of the contract or $3,000,000, whichever is less.

(End of Statement)

(i) Whenever one or more unit prices are required for work included in the contract, the bid guarantee requirement set forth in subparagraph (1) of this § 5–10.150(b) shall be modified by adding the following sentence:

For bid guarantee purposes the "amount of the bid" shall be deemed to be the aggregate of each unit price bid multiplied by the applicable number of units shown on the bid form or in the method of award formula.

(ii) In special cases the foregoing shall be modified as necessary to make clear to bidders that the guarantee must cover the maximum amount of the work that might be included in an award.

(iii) The provision in § 1–10.103–3(a)(2) also shall be included.

(2) A provision which requires bidders to furnish performance bonds for building service contracts in excess of $10,000 shall be included in solicitation documents, as follows:

Performance Bond

(a) The offeror to whom the award is made shall furnish a performance bond for the protection of the Government in an amount equal to percent of the contract price for the term of the contract, within 15 calendar days after the prescribed form is presented for signature. The period of time for furnishing the performance bond may be extended for 10 calendar days, if fully justified in the opinion of the contracting officer, and if the request for the extension is received or confirmed in writing within the original 15 calendar day period.

(b) The performance bond shall be a firm commitment, supported by corporate sureties whose names appear on the list contained in Treasury Department Circular 570, individual sureties, or by other acceptable security such as postal money order, certified check, cashiers check, irrevocable letter of credit or, in accordance with Treasury Department regulations, certain bonds or notes of the United States.

(End of Provision)

(3) The percentage amount to be inserted in the blank space in the above clause shall be from 10 percent to 50 percent of the total value of the contract for the term of the contract. The contracting officer shall consider the circumstances and determine the amount of the performance bond on a case-by-case basis.

§ 5–10.151 Acceptability of bonds and sureties.

(a) Upon receipt of a required bond, the contracting officer shall determine whether the bond and the surety are acceptable. (See § 1–10.103–4 regarding failure to submit proper bid guarantee.) If the acceptability of a bond involves a question as to its validity, the contracting officer shall refer the matter to legal counsel. For any question other than validity, the contracting officer shall refer the bond and such questions to the financial management office. The office shall examine the bond and promptly inform the contracting officer regarding its acceptability.

(b) Corporate surety bonds must be manually signed by the Attorney-in-Fact or officer of the surety company. The corporate seal of the surety company must be affixed. Copies of the powers of attorney from the surety company authorizing the Attorney-in-Fact to execute bonds may be requested by the contracting officer.

(c) Questions concerning an individual surety's financial acceptability are matters of responsibility rather than responsiveness (Comptroller General Decision File No. B–203608, June 15, 1982).

(d) When the bond or surety is not acceptable, the bid guarantee, other than a bond, shall be returned to the bidder. The Contracting officer shall provide the offeror with an explanation as to why the bond or surety is not acceptable.

(e) When a contracting officer has verified the acceptability of the surety on a bond, he shall so certify by placing the words "Acceptability of Bond Verified," with his signature immediately thereunder, on the bond or on a properly identified attachment. The bond shall be retained with the original of the contract. The contracting officer shall notify the contractor that the bond(s) have been accepted.

Dated: September 3, 1982.

Philip G. Read,

Acting Assistant Administrator for Acquisition Policy.

BILLING CODE 6820–61–M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

43 CFR Part 20

Employee Responsibilities and Conduct; Corrections and Amendment

AGENCY: Department of the Interior.

ACTION: Final rule, correction and amendment.

SUMMARY: This notice contains corrections to the final rules governing Employee Responsibilities and Conduct published on December 1, 1981 (46 FR 58420).

In addition, this notice incorporates a September 9, 1982, decision by the Under Secretary to apply to employees of the Minerals Management Service restrictions on ownership of interests in Federal Lands. The restrictions being incorporated are similar to restrictions to which Minerals Management Service employees were subject in the bureaus and offices from which they were transferred when the Minerals Management Service was created.

EFFECTIVE DATE: September 30, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Gabriele J. Paone or Mr. Mason Tsai, Department Ethics Office, U.S. Department of the Interior, Washington, D.C. 20240, (202) 343–3932.

SUPPLEMENTARY INFORMATION: This document corrects typographical and grammatical errors, and incorporates format changes in the text. Language is also added to specific provisions to better explain their meaning. Some of the corrections to specific provisions are based on administrative problems discovered while enforcing the current regulations. The corrections being made do not change the effect of the current regulations or of the statutes cited in the current regulations.

On September 9, 1982, the Under Secretary decided to extend the U.S. Geological Survey statutory provisions of 43 U.S.C. 31(a) to the Director and all employees in the Minerals Management Service. This policy decision is implemented in this final rule by additions incorporated into §§ 20.735–22(c)(3), 20.735–24 and 20.735.36. The vast majority of employees in the Minerals Management Service were subject to either this statutory provision or to similar statutory or regulatory provisions in organizations that were transferred to the Minerals Management Service. Therefore, there will be no significant effect resulting from the adoption of this policy.

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

The primary authors of this final rule are Gabriele J. Paone, Deputy Agency Ethics Official and Mason Tsai, Assistant Agency Ethics Official.

The Administrative Procedure Act excepts from its notice-and-comment requirements, rules related to agency management or personnel. While it is the policy of the Department of the Interior to nonetheless consider soliciting public comment on such rules, it has been determined that public comment on this rule is unnecessary because the amendments made are either minor and clarifying or do not impose obligations on Department employees to which they have not previously been subject.

Good cause for making this rule effective on September 30, 1982, rather than 30 days from the date of publication, exists because Title 43 of the Code of Federal Regulations is updated annually as of October 1 and the corrections and additions made in this rule are necessary to assure that the codified version of the Department's Employee Responsibilities and Conduct rules is current and accurate.

List of Subjects in 43 CFR Part 20

Conflicts of interest, Government employees.

Dated: September 21, 1982.

Donald P. Hodel,

Acting Secretary of the Interior.

Accordingly, the Department of the Interior makes the following corrections and additions to 43 CFR Part 20:

PART 20—EMPLOYEE RESPONSIBILITIES AND CONDUCT

§ 20.735–1 [Corrected]

1. Correct § 20.735–1(a)(9) to read: "(9) 'Designated Agency Ethics Official'

means the Principal Deputy Assistant Secretary—Policy, Budget and Administration. In accordance with the rules in 5 CFR 738.202(b), the Deputy Agency Ethics Official shall serve as alternate agency ethics official."

2. Correct § 20.735–1(a)(10) to read "(10) 'Ethics Counselor' means the head of each bureau, as that term is defined in paragraph (3) above, except that the Assistant Secretary—Policy, Budget and Administration is the Ethics Counselor for employees in the Office of the Secretary and other offices for which personnel services are provided by the Division of Personnel Services, Office of Administrative Services."

3. Correct § 20.735–1(a)(11) to read: "(11) 'Deputy Ethics Counselor' means the bureau personnel officer or other qualified headquarters employee who has been delegated responsibility for the operational duties of the Ethics Counselor for that bureau. The Director, Office of Administrative Services is the Deputy Ethics Counselor for employees in the Office of the Secretary and other offices for which personnel services are provided by that Office."

4. Add a new § 20.735–1(a)(16) to read: "(16) 'Office of Personnel' means the Departmental Office of Personnel within the Department of the Interior, as distinguished from the Office of Personnel Management (formerly called the Civil Service Commission) and from personnel offices in each bureau within the Department of the Interior."

§ 20.735–2 [Corrected]

5. Add a new § 20.735–2(h)(4) to read: "(4)(i) Special codes of conduct have been approved in accordance with § 20.735–2(h) for three groups of employees:

"(A) Bureau of Land Management Fire Management Teams—approved January 16, 1981.

"(B) Minerals Management Service Employees—approved January 22, 1982.

"(C) Office of Inspector General Auditors and Investigators—approved July 16, 1982.

"(ii) Special codes are effective when signed by the Designated Agency Ethics Official and a representative of the Office of Personnel and the Office of the Solicitor. The listing of codes adopted will be revised when revisions are made to 43 CFR Part 20. Copies of these codes may be obtained from the Department's Designated Agency Ethics Official or the Bureau Ethics Counselor for the bureau involved."

§ 20.735–7 [Corrected]

6. Correct § 20.735–7(b)(2)(iv) to read: "(iv) Suitable mementos or awards of nominal value for a meritorious public contribution or achievement."

§ 20.735–9 [Corrected]

7. In § 20.735–9(b)(2), replace the words 'Department of" with "Department for".

8. Correct § 20.735–11(b)(4) to read: "(4) An employee is prohibited from accepting any honorarium of more than $2,000 (excluding amounts accepted for actual travel and subsistance expenses for such employee and his or her spouse or an aide to such employee, and excluding amounts paid or incurred for any agent's fees or commissions) for each appearance, speech or article (2 U.S.C. 441(i))."

§ 20.735–12 [Corrected]

9. Correct § 20.735–12(c)(1) to read: "(1) An employee may employ or appoint relatives to meet emergency needs without regard to the restrictions in 5 U.S.C. 3110 and this part. Appointments under these conditions are temporary not to exceed 1 month, but may be extended for a second month if the emergency needs still exist (refer to 5 CFR 310.202). Emergency needs means a national emergency as defined in the Federal Personnel Manual and includes emergencies posing immediate threat to life or property. Exceptions may also be made in situations involving special scientific needs, isolated field stations or locations where there is a shortage of quarters. In regard to summer employees, refer to current Department directives."

§ 20.735–13 [Corrected]

10. In § 20.735–13(b)(1), correct the last phrase ". . . make judgments which may affect those . . ." to read ". . . make judgments which substantially affect those persons or organizations."

§ 20.735–14 [Corrected]

11. In § 20.735–14(a)(2) the first two words, "Permissible activities" should be italicized.

12. In § 20.735–14(a)(3) the first two words, "Prohibited activities" should be italicized.

13. Correct § 20.735–14(a)(3)(ii) to read: "(ii) Serving as an officer of a political party, a member of a National, State or local committee of a political party, an officer or member of a committee of a partisan political club, an officer in a Political Action Committee, or being a candidate for any of these positions. With respect to membership in Political Action Committees employees should obtain guidance from their ethics counselor;"

§ 20.735–17 [Corrected]

14. Correct that last sentence in § 20.735–17(p) to read: "Notwithstanding this paragraph, employees who are not on official duty may carry firearms on Departmental lands under the same conditions and in accordance with procedures and authorizations established for members of the general public."

§ 20.735–20 [Corrected]

15. Correct the list of offices in § 20.735–20(c) by making two changes:

a. Replace "All Assistant Secretary Immediate Offices" with "All Assistant Secretary Immediate Offices including Bureau and Office Directors".

b. Remove "Outer Continental Shelf Program Coordination."

§ 20.735–21 [Corrected]

16. Correct § 20.735–21(b)(3) to read: "(3) 'Direct interest' means any ownership or part ownership by an employee in his or her own name of lands, stocks, bonds, or other holdings. Direct interest also includes: (i) Membership or outside employment in a firm and (ii) Ownership of stock or other securities in a corporation which has, directly or through a subsidiary, business related to the employee's duties."

17. Correct § 20.735–21(b)(4) to read: "(4) 'Indirect interest' means any ownership or part ownership of a financial interest by an employee in the name of another where the employee still reaps the benefits. Indirect interests includes: (i) Partnership agreements, (ii) Sole proprietary or personal relationships where the employee still reaps the benefits, (iii) Substantial holdings of a spouse or dependent child, and (iv) For Executive Order 11222 restrictions, the substantial holdings of other relatives who live in the employee's personal residence."

18. On the first line of § 20.735–21(b)(5), correct the term "Substantially" which is being defined, to read "Substantially or Substantial"

§ 20.735–22 [Corrected]

19. In § 20.735–22(b)(3), remove "proscribed by" and insert "prohibited by the statutes described in".

20. Correct § 20.735–22(c)(3) to read: "(3) The Director and members of the Geological Survey shall have no personal or private interests in the lands or mineral wealth of the region under survey, and shall execute no surveys or examinations for private parties or corporations. Members of the Geological Survey are prohibited from holding any personal or private direct

interest in lands whose title is in the United States. They are also prohibited from holding personal or private direct interests in the mineral wealth of such lands (43 U.S.C. 32(a)). These statutory restrictions are by this sentence, extended to the Director and all members of the Minerals Management Service. Refer to § 20.735–24 for prohibitions on interests in Federal lands and resources by employees of the Department generally."

§ 20.735–23 [Corrected]

21. Correct § 20.735–23(b)(3) to read: "(3) Outside work or other outside activity not compatible with the full and proper discharge of the duties and responsibilities of a regular or special government employee is prohibited. Incompatible activities include but are not limited to: (i) outside work which tends to impair the employee's mental or physical capacity to perform his or her Government duties and responsibilities in an acceptable manner;

"(ii) any work assignment or employment affiliation which might encourage on the part of members of the general public a reasonable belief of a conflict of interest. In this connection, it is not necessary that there be an actual conflict of interest before applying this policy. The fact that the general public could logically perceive a conflict of interest is sufficient for a determination that the work or activity be prohibited."

§ 20.735–23 [Corrected]

22. Clause (ii) of the Note after § 20.735–23(c)(1)(vi) is corrected to read: "(ii) create a substantial appearance of conflict of interest with the employee's official government duties."

23. Correct the first sentence of § 20.735–23(g)(3) to read: "Each report shall be reviewed by the employee's supervisor and a determination shall be made by the supervisor whether there is compliance with the prohibitions of this section and of §§ 20.735–6 and 20.735–22 of this part."

24. Correct § 20.735–23(g)(3)(ii), to read: "(ii) Take remedial action to correct any situations which violate the prohibitions in this section or in §§ 20.735–6 and 20.735–22 of this part."

§ 20.735–24 [Corrected]

25. Correct § 20.735–24(a)(3) to read: "(3) 'Direct interest in federal lands' means any employee ownership or part ownership in federal lands or any participation in the earnings therefrom, or the right to occupy or use the property or to take any benefits therefrom, based upon a contract, grant, lease, permit, easement, rental agreement, or application. Direct interest in federal lands includes:

"(i) Membership or outside employment in a firm which has interests in federal lands, and

"(ii) Ownership of stock or other securities in a corporation which has an interest in federal lands directly or through a subsidiary."

26. Correct § 20.735–24(a)(4) to read: "(4) 'Indirect interest in federal lands' means any ownership or part ownership of an interest in federal lands by an employee in the name of another where the employee still reaps the benefits. Indirect interest in federal lands also includes:

"(i) holdings in land, mineral rights, grazing rights or livestock which in any manner is connected with or involves the substantial use of the resources or facilities of the federal lands, and

"(ii) substantial holdings of a spouse or dependent child."

27. Revise § 20.735–24(b)(1) to read: "(1) The Director and members of the U.S. Geological Survey, Bureau of Land Management and of the Minerals Management Service are prohibited from:

"(i) Voluntarily acquiring a direct or indirect interest in federal lands; or

"(ii) Retaining a direct interest in federal lands acquired voluntarily or by any other method, before or during employment by the Department."

28. Correct § 20.735–24(b)(2)(ii) to read: "(ii) Retaining a direct interest in federal lands acquired voluntarily or by any other method before or during employment by the Department. *Refer to § 20.735–20(c) for the definition of Office of the Secretary and other Departmental offices.*"

29. In § 20.735–24(d)(2), correct the last phrase in the sentence to read, ". . . provided that such an individual shall not acquire any additional interest in federal lands during employment."

30. Add § 20.735–24(d)(5) to read: "(5) Employees in Indian Affairs are not prohibited by the provisions of this section from acquiring or retaining interests in federal lands controlled by the Department for the benefit of Indians and Alaska Natives provided such interests are otherwise legal."

31. Correct § 20.735–24(e)(1) to read: "(1) The Designated Agency Ethics Official may approve the retention of an interest in federal lands for employees identified in § 20.735–24(b) when there is little or no relationship between the employee's functions or duties and the particular interest in federal lands, and: (i) The employee, or the spouse or dependent child of the employee, acquired such an interest by gift, devise, bequest, or operation of law, or

"(ii) The employee or the spouse or dependent child of the employee, acquired such an interest prior to the time the employee entered on duty in the Department, or

"(iii) In the case of stock or securities traded on the open market, divestiture would constitute a financial hardship, or

(iv) The employee, or the spouse or dependent child of the employee acquired such an interest through a pre-existing trust or inherited trust (not established by themselves) provided, the employee has no control over its management or assets."

§ 20.735–27 [Corrected]

32. Correct § 20.735–27(a)(1) to read "(1) 'Direct interest in Mining Activities' means any employee ownership or part ownership in mining activities or any participation in the earnings therefrom, or the right to take any benefits therefrom, based upon a contract, grant, lease, permit, easement, rental agreement, or application. Direct interest in mining activities includes:

"(i) Membership or outside employment in a firm which has interests in mining activities, and

"(ii) Ownership of stock or other securities in a corporation which has an interest in mining activities directly or through a subsidiary."

33. Correct § 20.735–27(a)(2) to read: "(2) 'Indirect interest in mining activities' means any ownership or part ownership of an interest in mining activities by an employee in the name of another where the employee still reaps the benefits. An indirect interest in mining activities also includes:

"(i) holdings in land, mineral rights, or other rights which in any manner are connected with mining activities, and

"(ii) substantial holdings of a spouse or dependent child.

"*Refer to Note* § 20.735–21(b)(4) for examples of the kinds of interests that are not covered."

34. Remove the last sentence from § 20.735–27(b)(4).

35. Correct § 20.735–27(e)(1) to read: "(1) The Designated Agency Ethics Official may approve the retention of an interest in mining activities for employees identified in § 20.735–27(b) when there is little or no relationship between the employee's functions or duties and the particular interest in mining activities, and (i) The employee, or the spouse or dependent child of the employee acquired such an interest by gift, devise, bequest, or operation of law, or (ii) The employee or the spouse or dependent child of the employee, acquired such an interest prior to the time the employee entered on duty in

the Department, or (iii) In the case of stock or securities traded on the open market, divestiture would constitute a financial hardship, or (iv) The employee or the spouse or dependent child of the employee acquired such an interest through a pre-existing trust or inherited trust (not established by themselves) provided, the employee has no control over its management or assets."

§ 20.735–35 [Corrected]

36. In § 20.735–35(c)(2), correct the last phrase, ". . . and such others as the Secretary may designate." to read: . . . the Director, Office of Administrative Services; the Personnel Officer, Division of Personnel Services; and such others as the Secretary may designate."

37. Remove § 20.735–35(c)(5) in its entirety. Redesignate § 20.735–35(c)(6) as § 20.735–35(c)(5). Redesignate § 20.735–35(c)(7) as 20.735–35(c)(6).

§ 20.735–36 [Corrected]

38. Correct § 20.735–36(a) to read: "(a) The following statutory restrictions apply specifically to the heads and members of the bureaus and offices identified and are extended to employees in the Office of the Secretary and in other Departmental offices reporting directly to a Secretarial officer, who are in pay grades equivalent to GS–16 and above or who are in merit-pay positions as described in 5 U.S.C. 5401(b)(1): (1) 43 U.S.C. 31(a)—Geological Survey; (2) 18 U.S.C. 437—Indian Affairs; (3) 43 U.S.C. 11—Bureau of Land Management; (4) 30 U.S.C. 6—Bureau of Mines. In addition, the statutory restrictions of 43 U.S.C. 31(a) are extended to the Director and members of the Minerals Management Service. *Refer to § 20.735–20(c) for the definition of Office of the Secretary and other Departmental Offices.*"

39. Correct the first sentence of § 20.735–36(b) to read: "Each employee covered by one or more of these restrictions shall sign a certificate of disclaimer upon entrance to or upon transfer to these bureaus or offices."

40. Add Appendix A–6 to read:

Appendix A–6

Minerals Management Service Employee Certification

I have been given a copy of Department of the Interior Regulations governing Responsibilities and Conduct of Employees (43 CFR Part 20). I have been advised of the name and location of the Bureau and Deputy Bureau Ethics Counselors. I understand that I may discuss questions or concerns related to my responsibilities, conduct, and financial interests with these individuals.

I certify I have been informed of the regulatory restrictions contained in 43 CFR 20.735–22(c)(3) and 20.735–24 which provide that employees of the Minerals Management Service shall have no direct or indirect interest in federal lands or the mineral wealth of the federal lands, and shall execute no surveys or examinations for private parties or corporations.

The Department has determined that these restrictions prohibit an employee of the Minerals Management Service from having any personal or private interest, direct or indirect, in federal lands. Further, an employee of the Minerals Management Service is prohibited by the Department from having any personal or private interest in the mineral wealth of such lands and from executing surveys or examinations for private parties or corporations with or without remuneration.

I certify that to the best of my knowledge I do not have any personal or private interest, direct or indirect, in Federal lands as defined in § 20.735–24(a).

Note.—The provisions in 43 CFR 20.735–22(c)(3) and 20.735–24 should be read completely before this statement is signed.

(Employee's name (typed or printed))

(Signature of employee)

(Title of position)

(Date)

Instructions

1. All applicable employees of the Minerals Management Service shall complete the certifications on this form.

2. Signed certificates shall be sent to and maintained by the appropriate Personnel Office.

3. If an employee is unable to sign the certificate, he or she must submit a statement of facts to the appropriate Ethics Counselor for review and action.

Authority: 5 U.S.C. 301; 5 CFR 735.104; 5 CFR 734.103; E.O. 11222, 30 FR 6469, 3 CFR 1964–65 (Comp.) as amended (18 U.S.C. note).

Privacy Act Notice

43 CFR 20.735–22(c)(3), 20.735–24 and 5 U.S.C. 301 constitute the authority for requesting this certification. This certification must be signed; failure to do so can be cause for denying appointment or for appropriate disciplinary action.

This certification will be used to record officially the fact that you have knowledge of, and are in compliance with, the restrictions pertinent to your employment. The information certified to will be considered confidential and will form a part of the records of the office where you file; as such, the contents may be routinely disclosed to authorized Interior personnel, the Office of Personnel Management, the Department of Justice and to appropriate law enforcement agencies.

BILLING CODE 4310-10-M

Bureau of Land Management

43 CFR Public Land Order 6338

[A–12830 WR; A–12843 WR]

Arizona; Partial Revocation of Reclamation Withdrawals

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes three Departmental orders affecting 346.34 acres of public lands withdrawn by the Bureau of Reclamation for use in connection with the Colorado River Storage Project. Some 293.06 acres are located within the Lake Mead National Recreation Area and will be administered by the National Park Service. The remaining 53.28 acres are included in a State Selection Application filed by the State of Arizona. All of the lands will remain closed to operation of the general land laws, including the mining laws, but not the mineral leasing laws.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: Mario L. Lopez, Arizona State Office, 602–261–4774.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Departmental Orders of July 2, 1902, January 31, 1903, and October 16, 1931, which withdrew lands for the Bureau of Reclamation in connection with the Colorado River Project are hereby partially revoked insofar as they affect the following described lands:

(A–12830)

Gila and Salt River Meridian, Arizona

T. 9 S., R. 25 W.,
Sec. 24, lots 1, 3, 4, 5, excepting therefrom 120 feet west and 50 feet east of the centerline of old levee.

The area encompasses 53.28 acres in Yuma County.

(A–12843)

Gila and Salt River Meridian, Arizona

T. 21 N., R. 21 W.,
Sec. 30, lots 1, 2, 3, W½NE¼, E½NW¼, NE¼SW¼, NW¼SE¼ excepting therefrom a strip of land 300 feet in width landward from the existing bank of the Colorado River.

The area encompasses 293.06 acres in Mohave County.

The two areas aggregate 346.34 acres.

2. The lands in Section 24, T. 9 S., R. 25 W., paragraph 1, are currently under

State Selection Application (A–17000–K), filed by the State of Arizona. The lands will remain closed to operation of the public land laws including the mining laws.

The lands in Section 30, T. 21 N., R. 21 W., paragraph 1, lie within the Lake Mead National Recreation Area which is administered by the National Park Service and will therefore remain closed to operation of the general land laws, including the mining laws. The lands will continue to be administered by the National Park Service.

All of the lands in paragraph one have been and will remain open to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

September 20, 1982.

BILLING CODE 4310–84–M

Proposed Rules

Federal Register
Vol. 47, No. 187
Monday, September 27, 1982

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Parts 1b and 1c

Revision of National Environmental Policy Act (NEPA) Policies and Procedures

AGENCY: Department of Agriculture.

ACTION: Notice of proposed rulemaking.

SUMMARY: On July 30, 1979, the Department of Agriculture (USDA) published rules setting forth policies and procedures for compliance with the National Environmental Policy Act (NEPA), as amended, and the Council on Environmental Quality's (CEQ) implementing regulations (40 CFR Part 1500–1508).

On September 30, 1981, (46 FR 47747), the USDA published a final rule which revised delegations of authority within the Department. In these revisions, the Office of Environmental Quality was abolished and the Assistant Secretary for Natrual Resources and Environment (NR&E) was delegated the authority to administer NEPA implementation for the Department. It has been determined that effective NEPA implementation can best be achieved by reliance on individual USDA agency NEPA regulations for detailed implementation procedures. It has been further determined that a Departmental statement of policy regarding NEPA is an effective means of assisting agency implementation. This proposed regulation sets forth this policy.

DATES: Comments must be received on or before November 26, 1982.

ADDRESSES: Submit written comments to David E. Ketchum, Co-chairman of the Environmental Issues Working Group, U.S. Department of Agriculture, Forest Service, P.O. Box 2417, Washington, D.C. 20013. All written comments made pursuant to this notice will be available for public inspection at the above address.

FOR FURTHER INFORMATION CONTACT: Peter F. Smith, Executive Secretary of the Environmental Issues Working Group, Room 6154 South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: (202) 447–5166.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under procedures established in Secretary's Memorandum 1512–1 and Executive Order 12291 and has been classified as nonmajor. The proposed rule will not have—

(a) An annual effect on the economy of $100 million or more; or

(b) Any increased costs or prices to consumers; individual industries; Federal, State, or local government agencies; or geogrpahic regions; or

(c) A significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

I have determined that this action will not have a significant economic impact on a substantial number of small entities because it imposes on direct or indirect costs on small entities, it requries no paperwork or recordkeeping, it does not affect the competitive position of small entities in relation to large entities, it does not affect the cash flow or liquidity of small entities, it does not affect the ability of a small entity to stay in the market, and it does not require that small entities obtain professional assistance to meet regulatory requirements.

Alternatives to this proposed rulemaking have been considered. The alternative of not amending the regulation was considered. This was not recommended for several reasons. The exising regulation relies on the now abolished Office of Environmental Quality for implementation. The existing regulation does not incorporate the Department's statement concerning the exclusion of some USDA agencies from the need to prepare implementing procedures. Finally, the existing regulation does not reflect recent agency reorganizations and title changes.

Another alternative considered was the cancellation of the existing regulation. This alternative is not recommended because it was decided to be desirable to maintain a Departmental statement of policy and procedures regarding NEPA and because cancellation would have required amendment of the NEPA regulations of several USDA agencies which refer to the Departmental regulations.

The proposed action will provide a USDA policy statement regarding NEPA and environmental matters, including responsibilities for environmental effects abroad; a list of USDA actions categorically excluded from the preparation of environmental assessments and environmental impact statements and a list of USDA agencies which have been excluded from the requirements to prepare implementing procedures. The latter two provisions represent only minor changes from the USDA's existing NEPA regulations. The proposed action modifies the existing regulation by eliminating certain procedural requirements which were formerly carried out by the Office of Environmental Quality.

List of Subjects in 7 CFR Part 1b

Environmental impact statements, Historic preservation, Foreign relations.

Therefore, it is proposed that Title 7, Subtitle A of the Code of Federal Regulations be amended as follows:

1. A new part 1c is added and reserved to read as follows:

PART 1c—CULTURAL RESOURCES [RESERVED]

2. A new part 1b is added to read as follows:

PART 1b—NATIONAL ENVIRONMENTAL POLICY ACT

Sec.

1b.1 Purpose.
1b.2 Policy.
1b.3 Categorical exclusions.
1b.4 Exclusion of agencies.

Authority: National Environmental Policy Act (NEPA), as amended, 42 U.S.C. 4321 et seq.; E.O. 11514, 34 FR 4247, as amended by E.O. 11991, 42 FR 26927; E.O. 12114, 44 FR 1957; 5 U.S.C. 301; 40 CFR 1507.3.

§ 1b.1 Purpose.

(a) This part supplements the regulations for implementation of the National Environmental Policy Act (NEPA), for which regulations were published by the Council on Environmental Quality (CEQ) in 40 CFR Parts 1500–1508. This part incorporates and adopts those regulations.

(b) This part sets forth Departmental policy concerning NEPA, establishes categorical exclusions of actions carried

out by the Department and its agencies, and sets forth those USDA agencies which are excluded from the requirement to prepare procedures implementing NEPA.

§ 1b.2 Policy.

(a) USDA agencies carry out programs for the purposes of encouraging sufficient and efficient production of food, fiber, and forest products; proper management and conservation of the Nation's natural resources; and the protection of consumers through inspection services. Programs to meet this mission are carried out through research; education; technical and financial assistance to landowners and operators, producers, and consumers; and management of the National Forest System.

(b) All policies and programs of the various USDA agencies shall be planned, developed, and implemented so as to achieve the goals and to follow the procedures declared by NEPA in order to assure responsible stewardship of the environment for present and future generations.

(c) Each USDA agency is responsible for compliance with the provisions of this subpart, the regulations of CEQ, and the provisions of NEPA. Compliance will include the preparation and implementation of specific procedures and processes relating to the programs and activities of the individual agency, as necessary, including those involving environmental effects abroad.

(d) The Assistant Secretary, Natural Resources and Environment (NR&E), is responsible for ensuring that agency implementing procedures are consistent with CEQ's NEPA regulations and for coordinating NEPA compliance for the Department (7 CFR Part 2819(b)). The Assistant Secretary, through the USDA Natural Resources and Environment Committee, will develop the necessary processes to be used by the Office of the Secretary in reviewing, implementing, and planning its NEPA activities, determinations, and policies.

§ 1b.3 Categorical exclusions.

(a) The following are categories of activities which have been determined not to have a significant individual or cumulative adverse effect on the human environment and are excluded from the preparation of environmental assessments (EA's) or environmental impact statements (EIS's), unless individual agency procedures prescribe otherwise.

(1) Policy development, planning, and implementation which relates to routine activities such as personnel, organizational changes, or similar administrative functions;

(2) Activities which deal solely with the funding of programs, such as program budget proposals, disbursements, transfer, or reprogramming of funds;

(3) Inventories, research activities, and studies, such as resource inventories and routine data collection when such actions are clearly limited in context and intensity;

(4) Educational and informational programs and activities;

(5) Civil and criminal law enforcement and investigative activities;

(6) Activities which are advisory and consultative to other agencies and public and private entities such as legal counselling and representation;

(7) Activities related to trade representation and market development activities abroad.

(b) Agencies will identify in their own procedures the activities which normally would not require an environmental assessment or environmental impact statement.

(c) Notwithstanding the exclusions listed above and in § 16.4, or exclusions identified in agency procedures, agency heads may determine that circumstances dictate the need for preparation of an EA or EIS for a particular action. Agencies shall continue to scrutinize their activities to determine continued eligibility for categorical exclusion.

§ 1b.4 Exclusions of agencies.

The USDA agencies listed below carry out programs and activities which have been found to have no individual or cumulative effect on the human environment. These agencies are excluded from the requirements to prepare implementing procedures. Actions of these agencies are categorically excluded from the preparation of an EA or EIS unless the agency head determines that an action may have a significant environmental effect.

7 CFR Part 60

Market News Reports

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Agricultural Marketing Service (AMS) proposes to amend the interim final rule published on July 8, 1982, at 47 FR 29643–29645, which established the collection of fees for the distribution upon request of copies of market news reports to the general public. The proposal would require all media, whether trade publication or general news media, to pay for mailed market news reports, thereby eliminating the exemption for news media presently contained in the interim final rule.

EFFECTIVE DATES: Comments due on or before October 27, 1982.

ADDRESS: Send comments to William T. Manley, Deputy Administrator, Marketing Program Operations, Agricultural Marketing Service, Room 3071, South Building, United States Department of Agriculture, Washington, D.C. 20250. Comments will be available for public inspection at this location during the hours of 8:00 a.m. to 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Dairy reports: Silvio Capponi, Chief, Market Information Branch, Dairy Division, AMS, USDA, Washington, D.C. 20250, (202) 447–7461. Fruit and vegetable reports: Clay J. Ritter, Chief, Market News Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250, (202) 447–2745. Livestock and grain reports: James A. Ray, Chief, Market News Branch, Livestock, Meat, Grain and Seed Division, AMS, USDA, Washington, D.C. 20250, (202) 447–6231. Poultry reports: Raymond S. Wruk, Chief, Market News Branch, Poultry Division, AMS, USDA, Washington, D.C. 20250, (202) 447–6911.

SUPPLEMENTARY INFORMATION: The Department proposes to amend the interim final rule published on July 8, 1982, at 47 FR 29643–29645 to require that all news media, whether trade publication or general news media, to

pay for mailed market news reports, thereby eliminating the exemption for news media presently contained in the interim final rule. The authority for these regulations is contained in the Agriculture and Food Act of 1981 (7 U.S.C. 2242a).

The Agriculture and Food Act of 1981 authorized the collection of fees for the reporting of economic research and statistical data. The Department promulgated the interim final rule to establish and collect fees to cover the cost of printing and mailing AMS market news reports. These fees were, as nearly as practicable, established to cover the Department's costs of the service, including administrative and supervisory costs of the published reports. In the interim final rule, the Department provided that no fee would be charged for the distribution of market reports to wire services, newspapers, news magazines, and broadcast news outlets. The interim final rule did provide for fees for the large number of trade journals and trade association publications aimed at organizational memberships for the reason that the Department had determined that it would not be appropriate to provide market news reports free of charge to these numerous organizations which serviced limited audiences.

Based upon written comments received from trade associations and trade publications, it appears that the commentators were opposed to the classification and differentiation of general versus specialized news media publications. In light of the overall comments received, it is acknowledged that many publications in direct competition with each other for subscribers cannot be easily categorized as news media or trade publications. Therefore, it is proposed that the interim final rule be amended to eliminate the exemption for the news media. The Department will, however, continue to provide all media with current information by wire service and automatic telephone answering devices without charge. Single, free copies of daily, semi-weekly, and weekly reports are available for pick up at the local office which prepared the report. The Administrator has determined that a 30-day public comment period on this amendment to the interim final rule is adequate to provide all interested parties an opportunity to file views and comments. The comments previously submitted by interested parties demonstrate a necessity to promptly reach a determination in this matter.

The proposed rule has been reviewed under USDA procedures established to implement Executive Order 12291 and the Secretary's Memorandum 1512-1 and has been determined to be a "non-major" rule, because it does not meet any of the criteria established for major rules under the executive order. In conformance with the provision of the Regulatory Flexibility Act, Pub. L. 96-354 (5 U.S.C. 601), full consideration has been given to the potential economic impact upon small business. Most producers, dealers, and news media fall within the confines of "small business" as defined in the Regulatory Flexibility Act. A number of firms who are expected to use the market news reports do not meet the definition of small business either because of their individual size or because of their dominant position in one or more marketing areas. It has been determined that the economic impact upon all entities, small and large, will not be adverse and will in no way affect normal competition in the marketplace.

Market news reports, Subscription fees.

PART 60—MARKET NEWS REPORTS

Accordingly, it is proposed that 7 CFR Part 60 as promulgated by the interim final rule published at 47 FR 29645 be amended as follows:

§ 60.1 [Amended]

1. In § 60.1, remove paragraph (f).

2. In § 60.5, paragraph (a) is revised to read as follows:

§ 60.5 Market news reports published by the Dairy Division; Fruit and Vegetable Division; Livestock, Meat, Grain and Seed Division; and Poultry Division

(a) Market news reports shall be available on an annual subscription (or seasonal subscription for reports issued by the Fruit and Vegetable Division) upon written request and upon payment of a subscription fee, except that no fees will be charged to other government agencies which assist in the collection of market news data for the requested report. Establishment of mailing lists, based on the payment of subscription fees, will begin upon publication of this rule and will be updated on a continuing basis.

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 545

[No. 82-640]

Data Processing Activities of Federal Associations

September 17, 1982.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The Federal Home Loan Bank Board is proposing to amend its regulations to authorize federal associations to engage in a wider range of data processing activities. The proposal would allow federal associations to establish or maintain data processing offices through which they could provide certain data processing and transmission services for their own use, the use of a subsidiary, or of another depository institution. The proposal would authorize associations to market by-products generated from such services and to market excess capacity on their equipment as an incident to providing the services. Associations could also provide these services to other institutions if excess capacity is available on the equipment and if they comply with other limitations. The proposed amendments would authorize federal associations to utilize any feasible data processing technology as a means of providing services they currently provide. The proposed amendments are intended to assist associations in engaging in additional data processing activities that will allow them to conduct their

operations as efficiently and productively as possible and to provide such services to other institutions in certain circumstances.

DATE: Comments must be received by November 24, 1982.

ADDRESS: Comments should be sent to the Public Information Office, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Neil R. Crowley, Attorney, Office of General Counsel, at the above address. (202) 377–6417.

SUPPLEMENTARY INFORMATION:

Background

In recent years, financial institutions have made increasing use of new technologies to conduct their business operations. The use of data processing technology and equipment in the financial marketplace is commonplace. As financial markets become more competitive, federal associations will need to utilize new technologies in order to operate efficiently and profitably. Accordingly, the Board believes that associations should be permitted to engage in data processing activities that will allow them to conduct their internal operations as efficiently as possible and to provide data processing services to other institutions in certain circumstances. Therefore, the Board is proposing to amend its regulations pertaining to data processing services in order to clarify that federal associations may utilize any available data processing equipment or technology to conduct their operations, to authorize associations to provide a greater variety of such services, and to remove some of the current limitations on the provision of such services to others.

The proposal would broaden the types of data that associations may process to include any that are financial, economic, or related to thrift, home financing, or the activities of depository institutions. The proposal would also expressly authorize associations to transmit data between the associations' data processing offices and remote customer locations. In conjunction with the provision of data processing and transmission services, associations would now be permitted to provide the necessary facilities as well, including data processing and data transmission hardware and software, documentation, and operating personnel. Associations would be required to provide these services primarily for their own use, for the use of a subsidiary, or for the use of another depository institution, including the parent or a subsidiary of the depository institution. Thus, services could be provided to unaffiliated non-depository financial intermediaries only if such services constitute less than 50% of the services provided. The proposal would give associations new authority to provide services to "others", without restriction on the identity of the customer, to the extent necessary to utilize excess capacity on their equipment. Associations would also be allowed to market by-products of their data processing services and any excess capacity on their equipment, subject to certain limitations. The provisions of the existing regulation allowing associations to participate with others in establishing or maintaining a data processing office would be retained unchanged.

Current Regulations

The Board's present regulations authorize federal associations to maintain a data processing office to provide "data processing services" for their own use and/or primarily for the use of other depository institutions. 12 CFR 545.16–1 (as amended, 47 FR 14468 (1982)). Associations may also provide such services to others on a for-profit basis if done as part of a correspondent relationship authorized by 12 CFR 545.30(a) (added, 47 FR 14468 (1982)). "Data processing services" are defined as the "maintenance of bookkeeping, accounting, or other records primarily by mechanical or electronic methods." 12 CFR 545.16–1(a) (1981).

Use of Technology

As the business of federal associations changes, commensurate with the competitive changes occurring in financial markets, associations will need to be able to employ new technologies. The Board believes that it is imperative for federal associations to be able to benefit from the use of data processing equipment and technology in conducting their day-to-day operations. The Board further recognizes that technology often develops rapidly and that to the extent that associations can incorporate new data processing technology into their authorized operations today, they should be able to do so.

Because the current regulations are silent on this matter, the Board believes that it is desirable to state expressly that associations may make such use of data processing technology. Accordingly, the Board is proposing to amend § 545.16–1, pursuant to its plenary authority to regulate the operations of federal associations granted by section 5(a) of the Home Owners' Loan Act, 12 U.S.C. 1464(a) (Supp. IV 1980) ("HOLA"), by adding a new paragraph (a) that would permit federal associations, when performing activities or services that are expressly or incidentally authorized by statute or by regulation, to utilize any data processing equipment or technology to do so. The authority conferred in new paragraph (a) would not preempt any other regulations dealing with the application of electronic or data processing technology and equipment, such as those pertaining to remote service units. With respect to an association's dealings with its customers, this authority could allow an association to employ data processing equipment and technology in performing such functions as accepting deposits, check cashing, and making withdrawals. The Board believes that such authority would allow an association to use the equipment either at its offices or at the location of its customers. The Board specifically requests comment on the issue of whether an association should be permitted to utilize this authority to provide home banking services to its customers.

Activities Permitted

Under the current regulations, associations may provide "data processing services" to themselves and/or primarily to other depository institutions through a data processing office. These services are, by definition, limited to the maintenance of bookkeeping, accounting, or other records. In proposing to expand the data processing activities of federal associations to include data that are financial, economic, or related to thrift, home financing, or the activities of depository institutions, the Board would limit the permissible data processing activities to those that are incidental to an association's expressly authorized activities.

It is the view of the Board that activities that are necessary, convenient, or useful to the performance of an association's express powers or to the furtherance of its express statutory purposes of promoting thrift and home financing are permissible as incidental activities. Under these criteria, the proposed data processing services would be incidental to both an association's expressly enumerated powers and its express statutory purpose of promoting thrift and providing for home financing. Such services will be useful and convenient to the performance of the expressly authorized functions of accepting deposits, borrowing funds, and making loans. To the extent that an association

can utilize data processing equipment or technology to become more efficient and profitable, it will be better able to fulfill its statutory purposes.

The Board is proposing to amend § 545.16–1(a) to allow associations, through a data processing office, to engage in data processing and data transmission services, provided the data that the association processes or transmits are financial, economic, or related to thrift, home financing or the activities of depository institutions. The first two data categories would include those services currently permitted, maintaining bookkeeping and accounting records, but would also allow associations to collect, process, store, analyze, and transmit other sorts of financial and economic data as well, such as data pertaining to economic trends and statistics, employment, housing starts, interest rates, exchange rates, and prices. Associations are experiencing an increasing need for all types of data in order to compete effectively with other institutions. Consequently, such data has become critical to an association's traditional operations in that it enables it to better manage and analyze its investment portfolio, understand general economic trends, and plan its future operations.

The proposal also would allow an association to process or transmit data that are related to thrift, home financing or the activities of depository institutions. This type of data are clearly integral to an association's own operations and could be provided to other depository institutions pursuant to the authority in 12 CFR 545.30(a) (added, 47 FR 17468 (1982)) regarding correspondent activities. The Board believes that the types of data proposed are all reasonably incident to associations' operations, but specifically solicits comments on the issue of what types of data might be permissible for an association to process or transmit.

The Board is also proposing to amend § 545.16–1 by providing expressly that associations may engage in data processing and data transmission activities. Implicit in this aspect of the proposal is the authority to collect, store, and analyze permissible data and to provide access to its facilities to its customers; the processing and transmission of data necessarily include these activities. The Board believes that in order for associations to provide data processing services in an efficient manner, they must be able to take advantage of developments in technology and facilities.

"Timesharing"—the simultaneous use of a computer by many users—is one such development, and is in widespread use by others engaged in data processing. Through timesharing, the recipients of the data processing services can communicate directly with the association's central processing facility via telephone lines. Integral to timesharing services is the transmission of data to the central facility from the recipient of the services. This necessarily involves the installation of terminal facilities at the location of the recipient. One characteristic of timesharing technology is that the central facility will experience peaks of high usage when many customers use the system simultaneously. As a consequence, there will also be slack periods when the system is used only to a fraction of its capacity.

The Board believes that associations may best provide data processing services for themselves, their subsidiaries, and other depositories (especially in conjunction with providing correspondent services) if they are allowed to use such technologies as timesharing. Accordingly, in addition to being able to process data, associations must be able to provide for their transmission between the remote locations of their offices or those of their customers and the central processing facility. For these reasons, the proposed amendments would authorize associations, as part of providing data processing and transmission services, to provide "data processing facilities" as well. These facilities include data processing and transmission hardware, software, documentation, and, if necessary, operating personnel.

It is not economically desirable to provide data processing services without including some software or hardware as part of the package. Therefore, the proposal would allow the provision of hardware and software to the extent that they are necessary for or integral to the provision of data processing and transmittal services. The Board believes that such limited provision of hardware and software is necessary if associations are to be able to provide comprehensive data processing services to depository institutions.

At this time, although the Board has chosen to propose limiting the activities, services, and equipment that associations may provide to those already described above, it would welcome further comments from the public on this matter. Comments are requested to address the issue of whether it would be appropriate for federal associations to engage in a wider range of data processing activities, such as the marketing of hardware and software independent of its provision of data processing services, electronic funds transfer, electronic home banking, and the provision of data processing services to the general public. The Board also believes that as associations employ timesharing or similar technologies in providing data processing services to others it will be necessary to establish internal and system controls for hardware and software in order that the integrity of its records and those of its customers and depositors be adequately protected. Accordingly, the Board is also requesting comments on what types of controls would best provide this protection.

Customer Base

The proposed § 545.16–1(b)(1) would allow federal associations to provide data processing or transmission services primarily for their own use, the use of a subsidiary, or the use of another depository institution, including the parent or subsidiary of the institution. The recipients of the services would be essentially unchanged from the current regulation, with the exception that subsidiaries and the parent are expressly included. Implicit in the use of the word "primarily" is the condition that the services provided to these recipients in the aggregate constitute at least 50% of the data processing services provided. Thus, as proposed, associations may provide the services to unaffiliated non-depository financial intermediaries only if the services do not constitute more than 50% of the associations' data processing services, as measured by either the number of contracts or the dollar volume of the services provided. As will be explained below, the amendments would also allow associations to provide services to others, i.e., non-depositories and non-intermediaries, to the extent that they have excess time or capacity on their facilities that they are unable to market pursuant to § 545.16–1(b), and subject to certain other restrictions. The Board believes that these limitations on the recipients of the data processing services are adequate to ensure that the equipment and technology are used primarily in aid of an association's express powers and that an association will not engage in any substantial data processing activities that are unrelated to its business.

As previously mentioned, the use of timesharing technology necessarily generates a degree of excess time on the data processing equipment. In order to avoid a financial loss on excess capacity that cannot otherwise be used,

the Board believes that it is necessary to propose allowing associations to market such excess capacity to any other customers. The proposal would require that the data provided or given access to be limited to the types previously described, that the associations not artificially create excess capacity, that the provision of hardware and software be limited, and that associations do no more than furnish the facilities and operating personnel. These safeguards should be adequate to prevent inappropriate use of the system by third parties. The Board specifically solicits comment on whether these restrictions are adequate or whether they may be too burdensome. The Board also believes that associations should be able to market any by-products generated from its data processing services.

The Board is further proposing to allow associations to provide their data processing and transmission services to "others", without restriction on the identity of the customer, provided that it does so only to the extent necessary to utilize any excess capacity on its facilities and further provided that it does so in compliance with additional restrictions that are substantially the same as those pertaining to the marketing of excess capacity. The Board believes this authority is necessary in order for associations to avoid having substantial amounts of costly excess capacity on its equipment. The proposal is not intended to allow associations to enter the data processing business as a substantial part of its business.

Initial Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act, Pub. L. No. 96–354, 94 Stat. 1164 (September 19, 1980), the Board is providing the following regulatory flexibility analysis.

1. *Reasons, objective, and legal basis underlying the proposed rule.* These elements have been incorporated into the supplementary information accompanying the proposal.

2. *Small entities to which the proposed rule will apply.* The proposed rule would apply only to savings and loan associations chartered by the Board.

3. *Impact of the proposed rules on small institutions.* The proposal would grant the same authority to engage in data processing activities to both small and large associations. Any association with adequate resources may be able to conduct data processing activities on its own. Smaller associations would also be able to do so by participating with others pursuant to § 545.16–1(b)(2). If individual small associations choose not to engage in data processing activities, they will still be able to benefit from the proposal by obtaining whatever services they need from another association whose data processing facilities would be tailored to the needs of the thrift industry. The proposal does not require specific recordkeeping or other paperwork that might be disproportionately burdensome on small instititions.

4. *Overlapping or conflicting Federal rules.* There are no known federal rules that may duplicate, overlap, or conflict with the proposal.

5. *Alternatives to the proposed rules.* The proposal would allow all federal associations to engage in data processing activities to the extent they are able or desire to do so. There is no alternative that would better enable smaller entities to engage in data processing activities.

List of Subjects in 12 CFR Part 545

Savings and loan associations.

Accordingly, the Board hereby proposes to amend Part 545, Subchapter C, Chapter V of Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 545—OPERATIONS

Amend § 545.16–1 by revising paragraphs (a) and (b)(1) and by adding new paragraphs (c) and (d) as follows:

§ 545.16–1 Data processing services.

(a) A Federal association may, when performing any activity or service that is expressly or incidentally authorized by statute or by regulation, employ any data processing equipment or technology to do so.

(b)(1) An association may establish or maintain a data processing office through which it may provide data processing and data transmission services primarily for its own use, the use of a subsidiary, or the use of another depository institution (including the parent or a subsidiary of such institution) without observing the application and approval procedures for branch offices set forth in this Part, provided the data to be processed or transmitted are financial, economic, or related to thrift, home financing or the activities of depository institutions. In conjunction with these services, an association may provide data processing facilities, including data processing and data transmission hardware, software, documentation, and operating personnel, to the extent that such facilities are necessary for the provision of data processing and transmitting services.

* * * * *

As an incident to providing data processing and data transmission services pursuant to paragraph (b) of this section, an association may:

(1) Market by-products of such services, and

(2) Market excess capacity on its data processing equipment and facilties if:

(i) The involvement of the association is limited to furnishing the facilities and necessary operating personnel;

(ii) The association has not purchased the equipment or facilities for the purpose of creating excess capacity;

(iii) The data to be processed or transmitted are financial, economic, or related to thrift, home financing or the activities of depository institutions; and

(iv) No hardware is provided to the user of the excess capacity except that which is necessary for processing or transmitting the data, and any software provided is limited to systems software, network communications support, and documentation that is necessary for the use and maintenance of the association's equipment and facilities.

(d) An association may provide data processing and data transmission services, or access to such services, to persons other than those authorized in paragraph (b)(1) of this section on a for-profit basis only if the involvement of the association is limited to furnishing the facilities and the necessary operating personnel, and:

(1) Such services are provided only to the extent necessary to utilize any excess capacity available on the association's data processing equipment or facilities,

(2) The data services so provided, or to which access is given, are financial, economic, or related to thrift, home financing or the activities of depository institutions,

(3) No hardware is provided to the user of the services except that necessary for processing or transmitting the data, and

(4) The services are provided pursuant to a written agreement that describes and incorporates the limitations on such services imposed by this section.

(Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

[Summary Notice No. PR-82-11]

Petitions for Rulemaking; Summary of Petitions Received and Dispositions of Petitions Denied or Withdrawn

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for rulemaking and of dispositions of petitions denied or withdrawn.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for rulemaking (14 CFR Part 11), this notice contains a summary of certain petitions requesting the initiation of rulemaking procedures for the amendment of specified provisions of the Federal Aviation Regulations and of denials or withdrawals of certain petitions previously received. The purpose of this notice is to improve the public's awareness of this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and be received on or before November 26, 1982.

ADDRESS: Send comments on the petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket No. , 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-204), Room 916, FAA Headquarters Building (FOB 10A), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (b) and (f) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on September 20, 1982.

John H. Cassady,

Assistant Chief Counsel, Regulations and Enforcement Division.

Petitions for Rulemaking

Docket No.	Petitioner	Description of the rule requested
23224	Andy F. Mills	*Description of Petition:* To add a new Subpart G to Part 65 to authorize the certification of avionics repairmen, to authorize these avionics repairmen to perform maintenance under § 43.3 and to approve avionics systems for return to service under § 43.7, and to further authorize repair stations certificated under Part 145, Subpart B and Subpart D, to utilize these avionics repairmen. *Regulations Affected:* 14 CFR Portions of Parts 43, 145 and 65. *Petitioner's Reason for Rule:* The specialization of avionics equipment has been ignored by the present system of having an A&P mechanic sign for communication, navigation, and radar system maintenance and having authorized inspectors sign for autopilot, flight director, and remote gyroscopic system maintenance. The sophistication of electronic autopilots and other avionic systems necessitates a detailed knowledge of these systems in order to safely approve these systems. Certificated repairmen at certificated repair stations with radio ratings can now maintain and approve avionics systems. Such employment should not be a requirement in order to perform maintenance and to approve avionics systems for return to service.
23273	Air Transport Assn	*Description of Petition:* To amend §§ 61.31, 61.157, and 121.437 to provide alternative means for issuance of type ratings to pilots employed by Part 121 certificate holders or for service as pilot-in-command without a type rating for the airplane. The petition provides for three options: (1) pilots employed by a FAR 121 operator may be issued a type rating by the FAA after successful completion of an approved aircraft qualification course and a flight check administered by the operator, (2) pilots employed by FAR Part 121 operators who successfully complete an approved aircraft qualification course may serve as P.I.C. of an airplane for that operator without a type rating for that airplane if the pilot holds a type rating on another airplane in the same group, and (3) pilots employed by Part 121 operators may be issued a type rating after successful completion of an approved aircraft qualification course and observed by an FAA inspector on at least one leg of his IOE. *Regulations Affected:* 14 CFR Portions of Parts 61 and 121. *Petitioner's Reason for Rule:* ATA contends that carriers which operate under Part 121 with approved and closely monitored training programs should also be considered competent to determine whether pilots are qualified for additional type ratings. This would apply to pilots who already hold an Airline Transport Pilot Certificate and a jet transport (Group II, per FAR 121.400) type rating and who complete an approved qualification course and flight check in a different type aircraft.

Petitions for Rulemaking: Withdrawn or Denied

Docket No.	Petitioner	Description and disposition of the petition
21756	Mr. Stanley J. Green, General Aviation Manufacturers Assoc. (GAMA).	Change to Section 21.50(b) of FAR issued in Amendment 21-51 effective October 14, 1980, as further modified in Amendment 21-51(A), effective December 29, 1980, to defer the compliance date of January 28, 1981, for general aviation airplanes and transport airplanes up to 75,000 pounds takeoff weight, with respect to compliance with the provisions of Parts 23.1529 and 25.1529, until such time as the objectives and intent of the FAA in accord with the original NPRM, are clarified and made known. *Withdrawn 8/20/82.*

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 82-NM-49-AD]

British Aerospace DH/BH-125 Airplanes All Series; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes an amendment to Airworthiness Directive (AD) 77-13-09 which would require the compliance time for the modification of the front pressure bulkhead on BH/DH-125 airplanes to include an age compliance time of ten years as well as the current 6,600 landings compliance. This action is necessary because corrosion crack propagation is time related.

DATE: Comments must be received on or before October 29, 1982. Compliance schedule as prescribed in the body to the AD, unless already accomplished.

ADDRESSES: The applicable service information and copies may be obtained from British Aerospace, Inc., Box 17414, Dulles International Airport, Washington, D.C. 20041 or may also be examined at the address shown below.

Send comments on this proposal to: FAA Northwest Mountain Region, Office of the Regional Counsel, Attn:

Airworthiness Rules Docket No. 82–NM–49–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

FOR FURTHER INFORMATION CONTACT:
Mr. Harold N. Watier, Foreign Aircraft Certification Branch, ANM–150S, Seattle Area Aircraft Certification Office, FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767–2530. Mailing address: FAA Northwest Mountain Region, 17900 Pacific Highway South, C68966, Seattle, Washington, 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified below. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 82–NM–49–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington, 98168.

Discussion

The British Aerospace Corporation has, in accordance with existing provisions of a bilateral agreement, notified the FAA of a discrepancy in the compliance time for modification in accordance with Mandatory Service Bulletin 53–46R–(2402) which is required by AD 77–13–09. The service bulletin requires compliance with the modification to the front pressure bulkhead and windshield post within 6,600 landings or upon the airplane reaching 10 years of age, whichever occurs first, on BH/DH–125 airplanes. The AD requires compliance within 25 landings after the effective date of the AD or prior to accumulating 6,600 total landings, whichever occurs later. Since the failures are a result of corrosion propagation, the safety achieved by the modification is lost if a calendar time is not also included.

Since these conditions are likely to exist or develop on airplanes of this type design registered in the United States, an AD is proposed that would amend AD 77–13–09 to require compliance within 100 landings for all airplanes that have either accumulated 6,600 total landings or are ten years old.

It is estimated that 300 airplanes may be affected by this amendment, that it will take approximately 180 man-hours per airplane to accomplish the required actions, and that the average labor cost will be $30 per man-hour. Repair parts are estimated at $2,400 per airplane. Based on these figures, the total cost impact of this AD is estimated to be 2.34 million dollars if none of the airplanes have been modified. It is believed that most operators have complied with AD 77–13–09 because most airplanes will have accumulated more than 6,600 landings. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few, if any, small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by amending AD 77–13–09, Amendment 39–2934 (42 FR 31768), by revising the first paragraphs of items (a) and (b) to read as follows:

a. "For the following listed airplanes, prior to the accumulation of 6,600 total landings or upon reaching 10 years after the date of manufacture of the airplane, whichever occurs first, incorporate Hawker Siddeley modification 252402 in accordance with Section 2, Accomplishment Instructions of Hawker Siddeley Aviation, Ltd., Service Bulletin 53–46 (2402), dated June 30, 1975, or an FAA equivalent. Airplanes which have already exceeded 6,600 landings or are over 10 years from date of manufacture must be modified within the next 100 landings or 90 days, whichever occurs first.

b. "For the following listed airplanes, prior to the accumulation of 6,600 total landings or upon reaching 10 years after the date of manufacture of the airplane, whichever occurs first, comply with paragraph (c) or (d) of this AD as applicable. Airplanes which have already exceeded 6,600 landings or are over 10 years from date of manufacture must be modified within the next 100 landings or 90 days, whichever occurs first.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

(Sec. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble: The FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities, because it involves few, if any, small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington, on September 20, 1982.

Leroy A. Keith,
Acting Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 82–NM–68–AD]

Gates Learjet Model 35, 36, 35A, and 36A Series Airplanes; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes a new Airworthiness Directive (AD), applicable to Learjet Models 35, 36, 35A, and 36A airplanes. This AD would require installation of a trim-in-motion warning, redesigned pitch axis master interrupt, improved takeoff out of trim warning system, modified Mach trim

system, modified stick pusher system, and modified overspeed warning system. Additionally, the proposal adds Airplane Flight Manual (AFM) procedures for the above changes. The AD is needed to provide the Learjet Model 30 series with a modified flight control system which will minimize the potential for hazardous flight conditions that may occur in the event of a pitch trim runaway, a mistrimmed takeoff, a stick pusher failure, or an elevator hardover.

DATE: Comments must be received on/or before November 15, 1982.

ADDRESSES: The applicable service information may be obtained from Gates Learjet Corporation, P.O. Box 7707, Wichita, Kansas 67277.

Send comments on this proposal to: FAA Northwest Mountain Region, Office of the Regional Counsel, Attn: Airworthiness Rules Docket No. 82–NM–68–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

FOR FURTHER INFORMATION CONTACT: Ben Sorensen, Aerospace Engineer, Wichita Aircraft Certification Office, Room 238, Terminal Building No. 2299, Mid-Continent Airport, Wichita, Kansas 67209, telephone (316) 269–7012.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the AD Docket Number and be submitted in duplicate to the address specified above. All comments received on or before the closing date for comments will be considered by the Administrator before action is taken on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. All comments received will be available, both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMS

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 82–NM–68–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

Data compiles during an indepth certification review by the Federal Aviation Administration and Gates Learjet Corporation revealed several areas in which certain system failures could cause potentially unsafe flight conditions. The review was instigated as a result of several Learjet accident investigations that indicated that failure of airplane systems may have been a contributing factor. As a result of the review, significant design changes were required for the Learjet Model 25 series airplanes.

The FAA extended their certification review to include the Model 35/36 series airplanes because of the aerodynamic and system similarities to the Model 25 series. During the Model 35/36 series review it was concluded that the malfunction of certain pitch axis control systems in the airplane could cause potentially unsafe flight conditions similar to those conditions noted on the Model 25 series airplane. The Model 35/36 series systems in question are the pitch trim, stick pusher, stick puller/Mach overspeed warning, pitch axis interrupt, Mach trim, and the takeoff out of trim warning.

The requirements presented in this proposed AD are based on an FAA certification review of the Model 35/36 series airplanes and are related to the following unsafe conditions:

A. The secondary pitch trim system may fail in a manner which could cause a trim runaway that is not detected until control forces required to override become unmanageable. Changes are being proposed that will:

1. Increase secondary trim system reliability,

2. Decrease recognition time in case of a runaway, and

3. Assure interruption of trim motion when the interrupt switch is actuated.

B. An undetected or latent failure in the stall prevention system may result in an 80 pound push on the control wheel. A "g" limiter system is being proposed to provide additional protection in the event of a pitch actuator hardover.

C. A single undetectable failure can cause loss of the stick puller and the aural overspeed warning system. The proposed modification will provide a preflight test to detect this failure.

D. Earlier Model 35/36 airplanes are equipped with a takeoff out-of-trim warning system design that results in the takeoff out-of-trim warning cockpit annunciation to be illuminated during a normal takeoff. The system was redesigned and incorporated into production. Learjet Modification Kit "Takeoff-Out-Of-Trim" changes the system to be the same as current production airplanes.

E. A single failure in the Mach trim system can result in an unacceptable hazardous flight maneuver. Learjet Service Bulletin SB 35/36–22–4C, "Mach Trim System," eliminates this failure possibility.

Since these conditions are likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being proposed which requires modification of Learjet Model 35/36 series airplanes to minimize the potential for hazardous flight conditions.

Aproximately 300 airplanes will be affected by this AD. It will take approximately 300 manhours per airplane to accomplish the required actions, and the average labor cost will be $30 per man-hour. Repair parts are estimated at $6,000 per airplane. The loss associated with one week of down time is estimated to be $3,500. Based on these figures, the total cost impact of this AD is estimated to be $5,550,000. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few, if any, small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the FAA proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

Gates Learjet: Applies to Gates Learjet models 35/35A, Serial Numbers 001 thru 506, and models 36/36A, Serial Numbers 001 thru 053, certificated in all categories. Compliance required within 18 months after the effective date of this AD, as indicated, unless previously accomplished.

A. Modify Learjet Models 35, 36, 35A, and 36A airplane flight control systems and control wheels in accordance with the following Gates Learjet Modification Kits (kits are being developed): Pitch Axis Interrupt, Trim-in-Motion, Stall Prevention (Stick Pusher) "g" Limiter, Overspeed Warning System Test, Mach Trim System and Takeoff-Out-Of-Trim Warning.

B. Insert in the appropriate sections of the existing Airplane Flight Manual (AFM) the FAA approved temporary Airplane Flight Manual Changes pertaining to procedures required as a result of the modification of the flight control system in accordance with Airplane Modification Kit. Upon completion of the modifications required by paragraph "A" of this AD and the insertion of the temporary AFM changes or equivalent permanent AFM revision, the identified, more

restrictive paragraphs of AD 80-19-11 set forth inTable II below are no longer applicable and may be removed.

TABLE II

Learjet model	AFM change date	Paragraph of AD 80-19-11 superseded
35, 36	(To be determined)	A/2, A/5, A/6.
35A, 36A	(To be determined)	A/2, A/5, A/6.

C. Prior to accomplishing the modification required by paragraph "A" of this AD, contact the FAA office noted in paragraph "E" of this AD if any other modification or alteration has been performed on the affected airplane for further instruction relative to the compatibility of these modifications and this AD.

D. Airplanes may be flown in accordance with FAR 21.197 to a location where modifications required by this AD can be accomplished.

E. An equivalent method of compliance with this AD must be approved by the Manager, Wichita Aircraft Certification Office, FAA Central Region, Room 238, Terminal Building No. 2299, Mid-Continent Airport, Wichita, Kansas 67209.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421 and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble: the FAA has determined that this document (1) involves a proposed regulation which is not significant under Executive Order 12291, and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington, on September 15, 1982.

Leroy A. Keith,

Acting Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 82-NM-69-AD]

Sundstrand Data Control Cockpit Voice Recorder Models AV-557A, AV-557B, and AV-557C; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: Sundstrand Data Control, Inc., Model AV-557A, AV-557B, and AV-557C Cockpit Voice Recorders (CVR) installed in transport-category airplanes may have intermittent operation, erroneous self-test indications, and/or sensor or tape-off-reel failures. These anomalies have been attributed to the wrong type of connector sockets used in the CVR tape deck housing. The failure of the CVR may result in loss of data necessary to determine the probable cause of an accident, and possibly prevent future accidents.

The proposed rule would require an inspection and replacement of, if necessary, the tape deck housing connector of all Models AV-557A, AV-557B, and AV-557C Cockpit Voice Recorders.

DATE: Comments must be received on or before November 29, 1982.

ADDRESSES: The applicable service information may be obtained from: Sunstrand Data Control, Inc., Overlake Industrial Park, Redmond, Washington 98052. This information may also be examined at the FAA Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168; or 9010 East Marginal Way South, Seattle, Washington. Send comments on this proposal to: FAA Northwest Mountain Region, Office of the Regional Counsel, Attn: Airworthiness Rules Docket No. 82-NM-69-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

FOR FURTHER INFORMATION CONTACT: Mr. Ted T. Ebina, Systems & Equipment Branch, ANM-130S, Seattle Area Aircraft Certification Office, FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767-2500.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and be submitted in duplicate to the address specified below. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. All comments submitted will be available both before and after the closing date for comments in the rules docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the rules docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Directive Rules Docket, Docket No. 82-NM-69-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion: The FAA has been advised by Sundstrand Data Control, Inc., that some CVR's were manufactured with connectors containing split-ring, rather that full-ring sockets. The use of split type socket connectors does not ensure proper engagement of the mating interface to ensure consistent operation of cockpit voice recorders. Sundstrand Data Control, Inc., has issued Service Bulletin No. 012-0296-109, "Communications—Cockpit Voice Recorders/Models AV-557A, AV-557B, and AV-557C/Tape Deck Housing Connector Check," recommending that owners inspect the CVR's to determine the type of connector sockets used and contact the factory for replacement of any split type connectors with full-ring socket connectors. The split type connectors had been inadvertently introduced at the factory in approximately 580 CVR's and cannot be traced by examining equipment serial numbers. Inspection of the affected CVR models is the only method of determining if the correct tape deck housing full ring socket connectors are installed to ensure proper engagement of the mated parts.

Minor misalignment of the ring connector interfaces may occur with the split ring connector which could significantly affect the proper operation of CVR's by giving intermittent operation, erroneous self test indication, and sensor/tape-off-reel failure. An AD is proposed that would require an inspection of the tape deck housing connectors and replacement of split-ring socket connectors to assure that undetected failures of the CVR will not result in loss of data necessary for accident investigation.

It is estimated that 580 cockpit voice recorders will be affected by this AD and that it will take approximately ½ man-hour to identify the type of tape deck housing connector sockets used. Replacement of connectors will be accomplished at the factory at no charge until January 2, 1984. Based on these figures, the maximum cost of this AD to operators is estimated to be $14,500. For

these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few, if any, small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

Sundstrand Data Control, Inc.: Applies to Sundstrand Model AV–557A, AV–557B, and AV–557C Cockpit Voice Recorders (CVR) installed in any model aircraft. Within the next 2,000 hours time-in-service after the effective date of this AD, unless already accomplished, inspect the CVR tape deck housing connector socket and replace, if required, in accordance with Sundstrand Service Bulletin 012–0296–109, dated January 25, 1982.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affecterd by this proposal who have not already received this document may obtain copies upon request to Sundstrand Data Control, Inc., Overlake Industrial Park, Redmond, Washington 98052. This document may also be examined at the FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document: (1) Involves a proposed regulation which is not major under Executive Order 12291, and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington, on September 15, 1982.

Leroy A. Keith,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 270

[IC–12675; File No. S7–943]

Exchange Offers by Certain Registered Separate Accounts or Others the Terms of Which Do Not Require Prior Commission Approval

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule and related technical rule amendments.

SUMMARY: The Commission is publishing for comment a proposed rule under the Investment Company Act of 1940 that would permit any registered insurance company separate account or any principal under-writer therefor, subject to certain conditions, to make an exchange offer to the securityholders of certain registered separate accounts without the terms of that offer having first been submitted to and approved by the Commission. The proposed rule is intended to codify the standards that the Commission has developed with respect to applications seeking Commission approval of the terms of certain exchange offers and, if adopted, will eliminate the need for separate accounts to file individual applications with respect to such exchange offers.

DATE: Comments must be received by November 22, 1982.

ADDRESSES: Send comments, in triplicate, to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Comments should refer to File No. S7–943 and will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT: Thomas P. Lemke, Acting Special Counsel (202–272–2061), or Mary K. Crook, Attorney (202–272–3010), Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission ("Commission") today is publishing for comment proposed rule 11a–2 under the Investment Company Act of 1940 [15 U.S.C. 80a–1 *et seq.*] ("Act"), relating to certain offers of exchange made by registered insurance company separate accounts or principal underwriters therefor (collectively sometimes referred to as "separate accounts") the terms of which are required by section 11 of the Act [15 U.S.C. 80a–11] first to be submitted to and approved by the Commission. The proposed rule would permit any separate account or any principal underwriter for such account (collectively the "offering account") to make an offer to a securityholder of that account or of other separate accounts having the same insurance company depositor or sponsor as the offering account to exchange his security for a security of the offering account without the terms of that offer having first been submitted to or approved by the Commission, subject to certain conditions described below. The Commission is also proposing related technical amendments to rule 0–1(e) [17 CFR 270.0–1(e)] of its General Rules and Regulations under the Act.

Background and Discussion

Section 11(a) of the Act [15 U.S.C. 80a–11(a)] makes it unlawful for any registered open-end investment company or any principal underwriter therefor to make an offer to the holder of a security of that company or any other open-end company to exchange his security for a security of the same or another such company "on any basis other than the relative net asset values of the respective securities to be exchanged * * *," unless the terms of the offer have first been submitted to and approved by the Commission or are in accordance with Commission rules in effect at the time the exchange offer is made. Section 11(c) of the Act [15 U.S.C. 80a–11(c)] provides, as relevant here, that the provisions of subsection 11(a) shall be applicable, irrespective of the basis of the exchange, to exchange offers involving a security of a registered unit investment trust.[1] As a registered investment company, any registered insurance company separate account[2] that makes an offer of

[1] Section 11(c) of the Act provides:

The provisions of subsection (a) shall be applicable, irrespective of the basis of exchange, (1) to any offer of exchange of any security of a registered open-end company for a security of a registered unit investment trust or registered face-amount certificate company; and (2) to any type of offer of exchange of the securities of registered unit investment trusts or registered face-amount certificate companies for the securities of any other investment company.

[2] A "separate account" is defined in section 2(a)(37) of the Act [15 U.S.C. 80a–2(a)(37)] as an account established and maintained by an insurance company pursuant to the laws of any state or governmental entity of the United States or Canada, under which income, gains or losses, whether or not realized, from the assets of such account are charged against such account without regard to other income, gains, or losses of the insurance company. A substantially identical definition of "separate account," as that term is used in various rules under the Act, is contained in

exchange to its securityholders or to securityholders of other registered investment companies must, of course, comply with the requirements of section 11 of the Act and, where necessary, obtain Commission approval of the terms of the exchange offer.

The legislative history of section 11 indicates that the purpose of that provision is to provide the Commission with an opportunity to examine the terms of certain exchange offers, and in particular any fees or charges imposed in connection therewith, to insure that the exchange offer is not being made primarily or solely "for the purpose of exacting additional selling charges" [3] from investors "for which they [receive] nothing but the privilege of making successive investments." [4]

A substantial number of applications for Commission approval of the terms of exchange offers pursuant to section 11 involve offers made by offering accounts to their securityholders or to securityholders of different separate accounts having the same insurance company depositors or sponsors as the offering accounts to exchange their securities for securities of the offering account. This type of exchange offer may take a variety of forms, depending upon the classification under the Act of the separate accounts involved.[5] Irrespective of the form, however, such offers generally raise similar issues of law and fact.

Applicants typically justify their requests for approval on the grounds that the exchange offers are in the best interests of securityholders and are not contrary to the legislative intent of section 11. Applicants assert that Commission approval will benefit securityholders by allowing applicants to offer securityholders the opportunity to change their contracts or the funding medium of their contracts when, in the opinion of securityholders, such a change is warranted by their changing investment objectives or by economic, market, or tax considerations. Applicants further assert that the exchange offers are consistent with section 11 because they are not being made solely or primarily for the purpose of "churning" a securityholder's investment, but rather are intended to, and in fact will, provide a substantial benefit to securityholders.

It has been the Commission's experience that such applications have demonstrated that the terms of the exchange offers generally are consistent with the legislative intent of section 11. Accordingly, Commission approval generally has been granted, provided that the offering account includes certain conditions in the offer which the Commission's judgment and experience have shown to be necessary and appropriate to insure that the abuses that Congress intended to be eliminated by section 11 will not occur.

In recognition of these circumstances, and in light of the Commission's rulemaking authority under section 11(a), the Commission is proposing rule 11a–2, which generally would codify the standards that the Commission has developed with respect to applications seeking Commission approval of the terms of the exchange offers herein described.[6] This rule, if adopted, should benefit securityholders by eliminating the unnecessary expenses and delays incurred by separate accounts in connection with obtaining individual orders of the Commission approving the terms of certain typical exchange offers and should significantly reduce the number of applications presently required to be processed by the Commission, thereby permitting the Commission to allocate its resources to other matters. A discussion of the proposed rule is set forth below.

Proposed Rule and Related Technical Amendments

Paragraph (b) of proposed rule 11a–2 provides that notwithstanding section 11 of the Act, any offering account may make an offer to the holder of a security of that account or of other separate accounts [7] having the same insurance company depositor or sponsor as the offering account [8] to exchange his security (termed the "exchanged security" in the proposed rule) [9] for a security of the offering account (termed the "acquired security" in the proposed rule), without the terms of that offer having first been submitted to and approved by the Commission, provided that two conditions are satisfied.

The first condition is prescribed by paragraph (b)(1), and provides that the exchange offer must be made on the basis of the relative net asset values of the securities to be exchanged, except that the offering account may deduct at the time of the exchange two amounts. Paragraph (b)(1)(i)(A) provides that the offering account may deduct an administrative charge that is reasonable in relation to the actual administrative costs incurred in effecting the exchange. Administrative costs could include, for example, costs incurred by the offering account for bookkeeping services, printing costs other than for the printing of prospectuses, postage, and similar costs incurred by contract salespersons.[10] Administrative costs

---

rule 0–1(e) under the Act [17 CFR 270.0–1(e)]. A separate account may be registered under the Act as an open-end management company ("management account") or as a unit investment trust ("trust account").

[3] S. Rep. No. 1775, 76th Cong., 3d Sess. 7–8 (1940). *See* H.R. Rep. No. 2639, 76th Cong., 3d Sess. 8 (1940); *Hearings on H.R. 10065 Before a Subcomm. of the House Comm. on Interstate and Foreign Commerce*, 76th Cong., 3d Sess. 111 (June 13, 14, 1940). *See generally Investment Trusts and Investment Companies: Hearings on S. 3580 Before a Subcomm. of the Senate Comm. on Banking and Currency*, 76th Cong., 3d Sess. Part 2 951–957 (April 12, 15, 16, 17, 18, 19, 22, 23, 24, 25 and 26, 1940) (hereinafter "Hearings on S. 3580").

[4] Hearings on S. 3580, *supra* note 3, at 957.

[5] For example, an exchange offer may be made to a securityholder of a management account to exchange his security, funded by a particular portfolio of the separate account, for a security funded by a different portfolio of that account, for a different security funded by the same portfolio of that account, or for a security of a different management or trust account having the same insurance company depositor or sponsor as the offering account. Similarly, an offer may be made to a securityholder of a trust account to exchange his security, funded by a particular portfolio company of the trust account, for a security funded by a different portfolio company of that account, for a different security funded by the same portfolio company of that account, or for a security of a different management or trust account having the same insurance company depositor or sponsor as the offering account.

[6] Proposed rule 11a–2 is the first of several rules which the Commission expects to propose codifying existing Commission practices with respect to certain types of applications filed by separate accounts for exemptive and other relief under the Act.

[7] As noted *supra*, rule 0–1(e) of the General Rules and Regulations under the Act defines the term "separate account," as used in those rules, and sets forth conditions to the availability of exemptive relief for a separate account pursuant to those rules. The Commission is proposing to amend paragraphs (e) and (e)(2) of rule 0–1(e) to include rule 11a–2 as one of the rules listed therein.

[8] The Commission specifically requests comments on whether it is necessary or appropriate to expand the availability of the exemptive relief provided by the proposed rule to permit separate accounts having different insurance company sponsors or depositors to make exchange offers without Commission approval of the terms of those offers provided that the insurance companies have a common parent company.

[9] Paragraph (a)(2) of the proposed rule defines the term "exchanged security" to include not only the security or securities acutally exchanged in the exchange offer but also any security or securities previously exchanged for the exchanged security or its predecessors. This definition is intended to make clear that the relief afforded by the proposed rule would be available to exchange offers involving an exchanged security that itself was the result of one or more exchange offers, provided that the requirements of the proposed rule are satisfied, but that in such a situation the provisions of the rule limiting the amount and method of calculation of a sales load would be applied cumulatively.

[10] Of course, if a separate account proposing to make an exchange offer reasonably anticipates that it will incur significant brokerage expenses directly attributable to the exchange, it may consider these costs in determining the level of its administrative charge.

would not include commissions paid to salespersons. In this regard, the Commission wishes to emphasize that in its view the payment of commissions to salespersons as an incentive to solicit security holders to exchange their securities is inconsistent with the legislative intent of section 11. Paragraph (b)(1)(i)(B) requires that the administrative charge must be disclosed in Part I of the offering account's Registration Statement under the Securities Act of 1933 [15 U.S.C. 77a *et seq.*].[11]

Paragraph (b)(1)(ii) provides that the offering account also may deduct at the time of the exchange any front-end sales load [12] permitted by paragraph (c) of the proposed rule. Paragraph (c) prescribes two requirements in this regard. Paragraph (c)(1) provides that this sales load shall be a percentage that is no greater than the difference between the rate of any front-end sales load otherwise applicable to that security and the rate of any front-end sales load previously paid on the exchanged security. This condition reflects the terms of Commission orders in this area and is intended to insure that a securityholder who exchanges his security is credited for any front-end sales load previously paid on the security.[13] Paragraph (c)(2), which also reflects Commission orders in this area, provides that the total sales load paid on both the acquired and exchanged security shall not exceed 9 percent of the sum of the purchase payments made for the acquired security [14] and the exchanged security. This condition, which is analogous to the requirement of section 27(a)(1) of the Act [15 U.S.C. 80a–27(a)(1)] [15] that any sales load imposed on a periodic payment plan certificate not exceed 9 percent of total purchase payments to be made thereon, also reflects the terms of Commission orders in this area.

The second condition imposed by proposed rule 11a–2 is prescribed by paragraph (b)(2), which provides that if the offering account imposes a contingent deferred sales load [16] on the acquired security, then this sales load shall be calculated in the manner prescribed by paragraphs (d) or (e) of the proposed rule, depending upon whether the exchanged security was subject to a contingent deferred sales load [17] or a front-end sales load was paid on that security.

If the exchanged security was subject to a contingent deferred sales load, paragraph (d) imposes two requirements with respect to the method of computation and the amount of any contingent deferred sales load that the offering account may impose on an acquired security. First, paragraph (d)(1) requires the "tacking" of time for the purpose of calculating the amount of any contingent deferred sales load, *i.e.*, the sales load must be calculated both as if the holder of the acquired security had been a holder of that security from the date on which he became the holder of the exchanged security and as if purchase payments made for the exchanged security had been made for the acquired security on the date on which they were made for the exchanged security. These conditions reflect Commission orders in this area and, similar to paragraph (c)(1), are intended to insure that any securityholder who exchanges his security is credited, for purposes of the computation of any contingent deferred sales load, for the length of time that he held the exchanged security. Second, paragraph (d)(2), which is similar in theory to paragraph (c)(2), provides that any contingent deferred sales load imposed on an acquired security shall not exceed 9 percent of the sum of the purchase payments made for the acquired security and the exchanged security.

If a front-end sales load was paid on the exchanged security, then paragraph

---

[11] Paragraph (b)(1) would not provide the offering account with exemptive relief from sections 26(a)(2)(C) [15 U.S.C. 80a–26(a)(2)(C)] and 27(c)(2) [15 U.S.C. 80a–27(c)(2)] of the Act for deduction of an administrative charge. Section 26(a)(2)(C) of the Act provides generally that no principal underwriter or depositor for a trust account shall sell any security of which such trust is the issuer unless the instrument pursuant to which that security is issued provides that no payment to the depositor of or principal underwriter for such trust shall be allowed the trustee as an expense, except that provision may be made for the payment to such person of a fee, not exceeding such reasonable amount as the Commission may prescribe as compensation for performing bookkeeping and other administrative services. This provision is made applicable to management accounts issuing periodic payment plan certificates by section 27(c)(2) of the Act, and it has been the Commission's position that if payment for a security of a separate account is permitted to be made with more than one purchase payment, the security is a periodic payment plan certificate subject to section 27 of the Act. In most cases, however, such exemptive relief would not be necessary because the offering account would have previously obtained an exemptive order permitting the deduction of this charge in connection with exchanges.

[12] Paragraphs (a)(3) and (a)(1) define, respectively, the terms "front-end sales load" and "contingent deferred sales load." For purposes of the proposed rule, a front-end sales load is a sales load that is deducted from a purchase payment before it is invested in a separate account while a contingent deferred sales load is a sales load that is deducted at the time all or a portion of the amount representing a securityholder's interest in a separate account is redeemed or annuitized (see note 16 *infra*).

[13] Thus, for example, if a front-end sales load of 9 percent is to be imposed on the acquired security, and a front-end sales load of 6 percent was paid previously on the exchanged security, then the maximum front-end sales load that could be imposed on the acquired security in reliance on the proposed rule would be 3 percent.

Assuming the facts above except that the exchanged security itself was the result of more than one exchange offer and that a cumulative front-end sales load equal to 7 percent of total purchase payments had been paid on the exchanged security and its predecessors, then the maximum front-end sales load that would be imposed on the acquired security in reliance on the proposed rule would be 2 percent.

On the other hand, if a front-end sales load of 6% is to be imposed on the acquired security, and a front-end sales load of 9% was paid previously on the exchanged security, then no sales load may be imposed on the acquired security.

[14] Paragraph (a)(4) of the proposed rule provides that the phrase "purchase payments made for the acquired security," as used in subparagraphs (c)(2) and (d)(2), shall not include any purchase payments made for the exchanged security or appreciation attributable to those purchase payments transferred to the offering account in connection with the exchange. This provision is intended to insure that purchase payments made for the exchanged security are not, for purposes of the 9 percent limitation of paragraphs (c)(2) and (d)(2) of the proposed rule, considered both as purchase payments made for the exchanged security and as a purchase payment made for the acquired security, and that any appreciation attributable to purchase payments made for the exchanged security is not, for purposes of paragraphs (c)(2) and (d)(2), considered to be a purchase payment made for the acquired security. The phrase "appreciation attributable" to purchase payments made for the exchanged security, as used in paragraph (a)(4), is intended to include any amounts credited to a securityholder's interest in a separate account as a result of the income, gains, or both of that account.

[15] Section 27(a)(1) of the Act provides that:

It shall be unlawful for any registered investment company issuing periodic payment plan certificates, or for any depositor or underwriter for such company, to sell any such certificate, if—

(1) The sales load on such certificate exceeds 9 per centum of the total payments to be made thereon * * *.

As discussed in note 11 *supra*, section 27 of the Act is applicable to separate accounts issuing periodic payment plan certificates.

[16] A "contingent deferred sales load," as that term is commonly used, is generally understood to be a deferred sales load the imposition of which is contingent either upon redemption of all or a portion or the amount representing a securityholder's interest in a separate account or, in certain cases, upon annuitization of that amount prior to a specified period of time such as, for example, within five years of the date of purchase. The definition of "contingent deferred sales load" included in paragraph (a)(1) of the proposed rule is broader than this common understanding, however, in that this definition also includes any "deferred sales load." A deferred sales load is a sales load that is deferred until all or a portion of the amount representing a securityholder's interest in a separate account is redeemed or annuitized, but its imposition is not subject to any contingency.

[17] Consistent with exemptive orders previously issued under section 11, the proposed rule does not permit a contingent deferred sales load to be imposed upon the redemption of the exchanged security in connection with the exchange offer.

(e) provides that any contingent deferred sales load imposed on the acquired security may not be imposed on purchase payments made for the exchanged security or appreciation attributable to purchase payments made for the exchanged security that are transferred in connection with the exchange. This paragraph is intended to insure that purchase payments made for the exchanged security for which a front-end sales load was paid, and appreciation attributable to those purchase payments, will not subsequently be subject to a contingent deferred sales load by the offering account.

Finally, paragraph (f) expressly excludes from reliance on the proposed rule any exchange offer which involves an exchanged or acquired security upon which both front-end sales load and a contingent deferred sales load are imposed or are to be imposed. While this type of security has been registered, the Commission has not yet had sufficient experience through the application procedure to determine, by rule, appropriate standards for exchange offers involving it.[18]

Investment companies, Reporting requirements, Securities.

Text of Proposed Amendments to Rule 0–1(e) and Proposed Rule 11a–2

PART 270–GENERAL RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

Part 270 of Chapter II of Title 17 of the Code of Federal Regulations is proposed to be amended as follows:

1. By revising paragraphs (e) and (e)(2) of § 270.0–1 to read as follows:

§ 270.0–1 Definition of terms used in this part.

* * * * *

(e) Definition of separate account and conditions for availability of exemptions under §§ 270.6c–6, 270.11a–2, 270.14a–2, 270.15a–3, 270.16a–1, 270.22d–3, 270.22c–1, 270.27a–1, 270.27a–2, 270.27a–3, 270.27c–1, and 270.32a–2 of this chapter.

* * * * *

(2) As conditions to the availability of exemptive Rules 6c–6, 11a–2, 14a–2, 15a–3, 16a–1, 22d–3, 22c–1, 27a–1, 27a–2, 27a–3, 27c–1, and 32a–2, the separate account shall be legally segregated, the assets of the separate account shall, at the time during the year that adjustments in the reserves are made, have a value at least equal to the reserves and other contract liabilities with respect to such account, and at all other times, shall have a value approximately equal to or in excess of such reserves and liabilities; and that portion of such assets having a value equal to, or approximately equal to, such reserves and contract liabilities shall not be chargeable with liabilities arising out of any other business which the insurance company may conduct.

2. By adding § 270.11a–2 to read as follows:

§ 270.11a–2 Offers of exchange by certain registered separate accounts or others the terms of which do not require prior Commission approval.

(a) As used in this section:

(1) "Contingent deferred sales load" shall mean any sales load, including a deferred sales load, that is deducted upon redemption or annuitization of amounts representing all or a portion of a securityholder's interest in a separate account;

(2) "Exchanged security" shall include not only the security or securities of a securityholder actually exchanged in an exchange offer but also any security or securities of the securityholder previously exchanged for the exchanged security or its predecessors;

(3) "Front-end sales load" shall mean any sales load that is deducted from one or more purchase payments made by a securityholder before they are invested in a separate account; and

(4) "Purchase payments made for the acquired security," as used in paragraphs (c)(2) and (d)(2) of this section, shall not include any purchase payments made for the exchanged security or any appreciation attributable to those purchase payments that are transferred to the offering account in connection with an exchange.

(b) Notwithstanding section 11 of the Act [15 U.S.C. 80a–11], any registered separate account or any principal underwriter for such an account (collectively the "offering account") may make or cause to be made an offer to the holder of a security of the offering account or of any other registered separate account having the same insurance company depositor or sponsor as the offering account to exchange his security (the "exchanged security") for a security of the offering account (the "acquired security") without the terms of such exchange offer having first been submitted to and approved by the Commission, *Provided*, That

(1) The exchange is made on the basis of the relative net asset values of the securities to be exchanged, except that the offering account may deduct at the time of the exchange

(i) An administrative charge that

(A) Is reasonable in relation to the administrative costs incurred in connection with the exchange and

(B) Is disclosed in Part I of the offering account's Registration Statement under the Securities Act of 1933, and

(ii) Any front-end sales load permitted by paragraph (c) of this section, and

(2) If the offering account imposes a contingent deferred sales load on the acquired security, then this sales load, if imposed, shall be calculated in the manner prescribed by paragraph (d) or (e) of this section.

(c) If the offering account imposes a front-end sales load on the acquired security, then such sales load

(1) Shall be a percentage that is no greater than the difference between the rate of the front-end sales load otherwise applicable to that security and the rate of any front-end sales load previously paid on the exchanged security, and

(2) Shall not exceed 9 percent of the sum of the purchase payments made for the acquired security and the exchanged security.

(d) If the offering account imposes a contingent deferred sales load on the acquired security and the exchanged security also was subject to a contingent deferred sales load, then any contingent deferred sales load imposed on the acquired security

(1) Shall be calculated as if

(i) The holder of the acquired security had been the holder of that security from the date on which he became the holder of the exchanged security and

(ii) Purchase payments made for the exchanged security had been made for the acquired security on the date on which they were made for the exchanged security, and

(2) Shall not exceed 9 percent of the sum of the purchase payments made for the acquired security and the exchanged security.

(e) If the offering account imposes a contingent deferred sales load on the acquired security and a front-end sales load was paid on the exchanged security, then any contingent deferred sales load imposed on the acquired security may not be imposed on purchase payments made for the exchanged security or any appreciation attributable to purchase payments made for the exchanged security that are transferred in connection with the exchange.

[18] The Commission specifically requests comments on whether it is necessary or appropriate to include within the proposed rule securities that are subject to a front-end and a contingent deferred sales load, and, if so, what limitations on the amount and method of calculation of sales loads should be applied to exchange offers involving such securities.

(f) Notwithstanding the foregoing, no offer of exchange shall be made in reliance on this section if both a front-end sales load and a contingent deferred sales load are to be imposed on the acquired security or if both such sales loads are imposed on the exchanged security.

Paperwork Reduction Act

The information collection required by the rule has been submitted to the Office of Management and Budget for clearance.

Statutory Authority

The Commission proposes rule 11a–2 pursuant to the provisions of sections 11(a) [15 U.S.C. 80a–11(a)] and 38(a) [15 U.S.C. 80a–37(a)] of the Act. The Commission proposes related technical amendments to rule 0–1(e) [17 CFR 270.0–1(e)] pursuant to the provisions of section 38(a) [15 U.S.C. 80a–37(a)] of the Act.

Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Chairman of the Commission has certified that rule 11a–2, if adopted, will not have a significant economic impact on a substantial number of small entities. This certification, including the reasons therefor, is attached to this release.

Dated: September 20, 1982.

By the Commission.

George A. Fitzsimmons,

Secretary.

Regulatory Flexibility Act Certification

I, John S. R. Shad, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that proposed rule 11a–2 under the Investment Company Act of 1940 ("Act"), if adopted, will not have a significant economic impact on a substantial number of small entities. The reason for this certification is that there are few, if any, registered insurance company separate accounts that qualify as "small entities," as that term has been defined in the Commission's rules. Moreover, the reduction in costs to such separate accounts, if any, resulting from the proposed rule's elimination of their need to file exemptive applications seeking Commission approval of the terms of certain routine exchange offers will not have a significant economic impact on any such separate accounts.

Dated: September 20, 1982.

John S. R. Shad,

Chairman.

BILLING CODE 8010–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 886 and 901

Abandoned Mine Land Reclamation Program; Alabama

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Receipt of the Abandoned Mine Land Reclamation (AMLR) Grant Amendment from the State of Alabama.

SUMMARY: On July 27, 1982, the State of Alabama submitted to OSM its proposed Abandoned Mine Land Reclamation (AMLR) grant amendment to add six projects under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). OSM is seeking public comment on the adequacy of the State grant amendment.

DATE: Written comments on the amendment must be received on or before 5:00 p.m., October 27, 1982.

ADDRESS: Copies of the full text of the proposed Alabama grant amendment are available for review during regular business hours at the following locations:

Office of Surface Mining Reclamation and Enforcement, Alabama Field Office, 228 West Valley Avenue, Room 302, Birmingham, Alabama 35209;
and
State of Alabama, Department of Industrial Relations, 649 Monroe Street, Montgomery, Alabama 36130.

Written comments should be sent to: Field Office Director, John T. Davis, Office of Surface Mining Reclamation and Enforcement, 228 West Valley Avenue, Room 302, Birmingham, Alabama, 35209.

FOR FURTHER INFORMATION CONTACT: Roger Wiedeburg, Program Specialist, Alabama Field Office, Telephone (205) 254–0953 or 4.

SUPPLEMENTARY INFORMATION: On July 27, 1982, OSM received an AMLR grant amendment from the State of Alabama. The purpose of this submission is to implement the State reclamation program as codified in 30 CFR, Chapter VII, Subchapter T, Part 901 as published in the **Federal Register** 47 FR 22060 on May 20, 1982.

Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*, establishes and AMLR program for the purposes of reclaiming and restoring land and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and water eligible for reclamation under the program are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1977, and for which there is no continuing reclamation responsibility under State and Federal law.

Each State having within its borders coal mined lands eligible for reclamation under Title IV of SMCRA may submit to the Secretary a State reclamation grant application to implement the provisions of the approved State Reclamation Plan.

However, grants for mine reclamation may be issued only to States with an approved Title V Regulatory Program and an approved State Reclamation Plan.

A State Reclamation Plan for Alabama was submitted to the Secretary on May 29, 1981 and approved on May 20, 1982 which demonstrated the capability of the State to administer an AMLR program in accordance with Title IV of SMCRA. In approving the State Plan, the Secretary determined that the State had the necessary State legislation to implement the provisions of the Plan.

This notice describes the nature of the proposed additional projects and sets forth information concerning public participation in the Director's determination of whether or not the submitted amendment should be approved.

Approval of the amendment would result in the implementation of the approved additional projects for the reclamation of abandoned mine lands in Alabama.

All written comments must be mailed or hand carried to the Field Office above.

The comment period will close at 5:00 p.m. on October 27, 1982. Comments received after that time may not necessarily be considered. During the comment period representatitives of the Field Office will be available to meet between 8:00 a.m. and 4:00 p.m. at the request of members of the public to receive their advice and recommendations concerning the proposed State AMLR amendment.

Persons wishing to meet with representatives of the Field Office during this time period may place such requests with John T. Davis, Field Office Director, telephone (205) 229–0953 at the Field Office above.

Meetings may be scheduled at the Field Office between 9 a.m. and noon

and 1 p.m. and 4 p.m. Monday through Friday excluding holidays.

OSM intends to continue to discuss the State's amendment with representatives of the State throughout the review process.

In order to comply with the requirements of the National Environmental Policy Act, OSM will assess the environmental effects of all State reclamation projects. The primary basis for this assessment will be the environmental information provided in the project grant amendment.

The Alabama AMLR grant amendment can be approved if:

1. The Director finds that the public has given adequate notice and opportunity to comment, and the record does not reflect major unresolved controversies.
2. Views of other Federal agencies have been solicited and considered.
3. The amendment meets all the requirements of the OSM, AMLR program provisions and the required Federal circulars.
4. The State has an approved regulatory program and an approved State reclamation plan.

The following constitutes a summary of the contents of the amendment:

1. Designation of authorized State Agency to administer the program,
2. Objectives and need for the assistance,
3. Project ranking and selection,
4. Coordination with other reclamation programs,
5. Results and benefits expected,
6. Plan of action pertaining to the scope,
7. Monthly or quarterly projections of accomplishments to be achieved,
8. Kinds of data to be collected and maintained,
9. Criteria used to evaluate the results and success of the projects,
10. Key individuals to be employed,
11. Precise location of the project and area to be served,
12. Budgetary calculations for each project,
13. Description of the public's participation in planning and preparation of the grant application, and
14. A complete environmental assessment for each project.

Reclamation projects included in amendment, location, and description:

1. Title: Mineral Spring Project, Location: Jefferson County, Description: Abandoned mine portals, airshafts, subsidence-prone areas, dangerous highwall, hazardous mine related structures and associated problems;
2. Title: Sumter, South Project, Location: Jefferson County, Description: Dangerous highwalls, mine portals, abandoned coal loading facility and associated problems;
3. Title: Gurnee Project, Location: Shelby County, Description: Abandoned mine portals, airshaft, dangerous embankment and associated problems;
4. Title: Upper Bear Creek (Phase II) Project, Location: Franklin, Marion and Winston Counties, Description: Restoration of abandoned mine sites which are located in close proximity to the reservoir of potable water supply for the residents of the area;
5. Title: Texas Project, Location: Marion County, Description: Abandoned mine portals, airshafts, abandoned support facilities and other associated problems;
6. Title: Big Bridge Project, Location: Cullman County, Description: Highwalls and inadequately reclaimed surface-mined areas.

30 CFR Part 934

Cancellation of Public Hearing on Modified Portions of the North Dakota Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Cancellation of public hearing.

SUMMARY: Because no one expressed an interest, OSM is announcing the cancellation of a public hearing on the adequacy of amendments to the North Dakota permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 submitted to OSM by the State for the Director's approval.

This notice cancels the public hearing but does not alter the time and location at which the North Dakota program and proposed amendments are available for public inspection, or the comment period during which interested persons may submit written comments on the proposed program elements.

DATE: The following hearing is cancelled: The public hearing on the proposed modifications to the North Dakota program, September 20, 1982.

ADDRESSES: Written comments should be mailed or hand-delivered to: Office of Surface Mining Reclamation and Enforcement, Wyoming Field Office, P.O. Box 1420, Mills, Wyoming 82644.

FOR FURTHER INFORMATION CONTACT: Mr. William Thomas, Director, Wyoming Field Office, Office of Surface Mining, P.O. Box 1420, Mills, Wyoming 82644. Telephone (307) 328-5830.

SUPPLEMENTARY INFORMATION: On September 10, 1982, notice of oppportunity for a public hearing on the proposed modifications to the North Dakota program was published in the **Federal Register** (47 FR 39868). The proposed modifications were submitted to OSM by North Dakota for the Secretary's approval. Some of the proposed changes are intended to satisfy conditions of the Secretary's approval of the North Dakota program.

The notice stated that any person interested in making an oral or written presentation should contact Mr. William Thomas by September 21, 1982, and that if no person contacted Mr. Thomas to express an interest in participating in the hearing by the above date, the hearing would be cancelled. Because no one expressed an interest in attending the hearing by September 21, 1982, the hearing has been cancelled.

While there is not public hearing, interested persons may still submit written comments on the proposed program elements. Written comments must be received on or before 4:00 p.m. on October 12, 1982, to be considered in the Secretary's decision on whether the proposed modifications satisfy the Secretary's conditions of approval and/or meet the standards for approval of State program amendments at 30 CFR Part 732.

Written comments should be mailed or hand-delivered to: Mr. William Thomas, Director, Wyoming Field Office, Office of Surface Mining Reclamation and Enforcement at the address listed above.

Dated: September 22, 1982.

Wm. B. Schmidt,

Assistant Director, Program Operations and Inspection.

[FR Doc. 82-26509 Filed 9-24-82; 8:45 am]

BILLING CODE 4310-05-M

30 CFR Part 950

Abandoned Mine Land Reclamation Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: On April 15, 1982, the State of Wyoming submitted to OSM its proposed Abandoned Mine Land Reclamation Plan (Plan) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). On August 16, 1982, the State of Wyoming submitted revisions to its Plan. OSM is seeking public comment on the adequacy of the revised State Plan submission.

DATES: Written comments on the Plan must be received on or before 5:00 p.m., November 12, 1982. Written comments on whether OSM should hold a public hearing on the Plan must be received by 5:00 p.m., October 12, 1982. If requested, a public hearing will be held on October 15, 1982 at 1:30 p.m. and will continue until all discussions have been completed. The hearing may be cancelled, as discussed under Supplementary Information below.

ADDRESSES: The public hearing, if held, will be at Ramada Inn, at Interstate 25 and Center, Casper, Wyoming. The hearing may be cancelled, as discussed under Supplementary Information below. Copies of the full text of the proposed Wyoming Plan are available for review during regular business hours at the following locations:.

State of Wyoming, Land Quality Division, 401 West 19th Street, Cheyenne, Wyoming 80202

Office of Surface Mining Reclamation and Enforcement, Northwest Field Office, P.O. Box 1420, 935 Pendell Blvd., Mills, Wyoming 82644

Office of Surface Mining Reclamation and Enforcement, Administrative Record-Room 5315, 1100 "L" Street, N.W., Washington, D.C. 20240.

Written comments must be mailed or hand carried to: Office of Surface Mining Reclamation and Enforcement, Northwest Field Office, P.O. Box 1420, 935 Pendell Blvd., Mills, Wyoming 82644.

Comments received after 5:00 p.m., November 12, 1982 will not necessarily be considered or included in the administrative record for this rulemaking.

The administrative record will be available for public review at OSM's Northwest Field Office in Mills, Wyoming, on Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays.

FOR FURTHER INFORMATION CONTACT: Ronald Bertram, Abandoned Mine Land Reclamation, Office of Surface Mining Reclamation and Enforcement, P.O. Box 1420, 935 Pendell Blvd., Mills, Wyoming 82644, Telephone: (307) 261–5776.

SUPPLEMENTARY INFORMATION: Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), Pub. L. 95–87, 30 U.S.C. 1201 *et. seq.*, establishes an abandoned mine land reclamation program for the purposes of reclaiming and restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and water eligible for reclamation are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1977 and for which there in no continuing reclamation responsibility under State or Federal law.

Title IV provides that if the Secretary determines that a State has developed and submitted a program for reclamation of abandoned mines and has the ability and necessary State legislation to implement the provisions of Title IV, the Secretary may approve the State program and grant to the State exclusive responsibility and authority to implement the approved program.

On April 15, 1982, OSM received a proposed Abandoned Mine Land Reclamation Plan from the State of Wyoming. On August 16, 1982 the State submitted revisions to its Plan. The purpose of this submission is to demonstrate both the intent and capability to assume responsibility for administering and conducting the provisions of SMCRA and OSM's Abandoned Mine Land Reclamation (AMLR) Program (30 CFR Chapter VII, Subchapter R) as amended in the **Federal Register** (FR) on June 30, 1982, 47 FR 28574–28604.

This notice describes the proposed program and sets forth information concerning public participation in the Assistant Secretary's determination of whether or not the submitted Plan may be approved. The public participation requirements for the consideration of a State Plan are found in 30 CFR 884.13 and 884.14 (47 FR 28600–28601 (1982)). Additional information may be found under corresponding sections of the preamble to OSM's AMLR Rules (47 FR 28587–28588 (1982)).

The receipt of the Wyoming Plan submission is the first step in the process which will result in the establishment of a comprehensive program for the reclamation of abandoned mine lands in Wyoming.

By submitting a proposed Plan, Wyoming has indicated that it wishes to be primarily responsible for this program. If the submission is approved by the Assistant Secretary for Energy and Minerals of the Department of the Interior, the State will have primary responsibility for the reclamation of abandoned mine lands in Wyoming.

All written comments must be mailed or hand carried to OSM's Northwest Field Office at the Mills, Wyoming address listed above under "Addresses." Written comments may be hand carried to the public hearing, if a public hearing is found to be necessary, and submitted as exhibits to the proceedings.

If OSM's Field Office Director finds that the State has given the public adequate notice and opportunity to comment in public hearings, and that the record of such hearings do not reflect major unresolved controversies and that there are not a significant number of requests during the 15-day period to comment on the need for a hearing, the hearing will be cancelled.

Written comments on the issue of waiver of the public hearing must be received by 5:00 p.m., October 12, 1982.

Representatives of OSM's Field Office Director will be available to meet Monday through Friday, excluding holidays, between 8:00 a.m. and 4:00 p.m. at OSM's office in Mills, Wyoming, indicated above under "Addresses", at the request of members of the public to receive their advice and recommendations concerning the proposed Wyoming Reclamation Plan and Program.

Persons wishing to meet with representatives of the Field Director's Office during this time period may place such request with Ronald Bertram, telephone (307) 261–5776.

The Department intends to continue to discuss the State's Plan with representatives of the State throughout the review process. All contacts between Departmental personnel and representatives of the State will be conducted in accordance with OSM's guidelines on contacts with States published September 19, 1979 at 44 FR 54444.

The Office of Surface Mining has examined this proposed rulemaking under Section 1(b) of Executive Order No. 12291 (February 17, 1981) and has determined that, based on available quantitative data, it does not constitute a major rule. The reasons underlying this determination are as follows:

1. Approval will not have an effect on costs or prices for consumers, individual industries, Federal, State, or local

government agencies or geographic regions; and

2. Approval will not have adverse effects on competition, employment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This proposed rulemaking has been examined pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, and the Office of Surface Mining has determined that the rule will not have significant economic effects on a substantial number of small entities. The reason for this determination is that approval will not have demographic effects, direct costs, information collection and recordkeeping requirements, indirect costs, nonquantifiable costs, competitive effects, enforcement costs or aggregate effects on small entities.

Further, the Office of Surface Mining has determined that the Wyoming Plan will not have a significant effect on the quality of the human environment because the decision relates only to the policies, procedures and organization of the State's Abandoned Mine Land Reclamation Program. Therefore, under the Department of the Interior Manual DM 5162.3(A)(1), the Assistant Secretary's decision on the Wyoming Plan is categorically excluded from the National Environmental Policy Act requirements. As a result, no environmental assessment (EA) or environmental impact statement (EIS) has been prepared on this action. It should be noted that a programmatic EIS was prepared by OSM in conjunction with the implementation of Title IV. Moreover, an EA or an EIS will be prepared for the approval of grants for the abandoned mine land reclamation projects under 30 CFR Part 886.

The Wyoming Abandoned Mine Land Reclamation Plan can be approved if:

1. The Assistant Secretary finds that the public has been given adequate notice and opportunity to comment, and the record does not reflect major unresolved controversies.

2. Views of other Federal agencies have been solicited and considered.

3. The State has the legal authority, policies and administrative structure to carry out the Plan.

4. The Plan meets all requirements of the OSM, AMLR Program Provisions.

5. The State has an approved Surface Mining Regulatory Program.

6. It is determined that the Plan is in compliance with all applicable State and Federal laws and regulations.

The Wyoming Division of Land Quality has been designated by the Governor of the State of Wyoming to implement and enforce the Abandoned Mine Land Reclamation Program in accordance with SMCRA. The Department has developed State regulations to carry out the State mandate. Contents of the State Plan submission include:

(a) A designation by the Governor of the State of the agency authorized to administer the State reclamation program and to receive and administer grants under 30 CFR Part 886.

(b) A legal opinion from the State Attorney General or the chief legal officer of the State agency that the designated agency has the authority under State law to conduct the program in accordance with the requirements of Title IV of the Act.

(c) A description of the policies and procedures to be followed by the designated agency in conducting the reclamation program, including—

(1) The purposes of the State reclamation program;

(2) The specific criteria, consistent with Section 403 of the Act for ranking and identifying projects to be funded;

(3) The coordination of reclamation work among the State reclamation program, the Rural Abandoned Mine Program administered by the Soil Conservation Service, the reclamation programs of any Indian tribes located within the States, and OSM's reclamation programs; and

(4) Policies and procedures regarding land acquisition, management and disposal under 30 CFR Part 879;

(5) Policies and procedures regarding reclamation on private land under 30 CFR Part 882;

(6) Policies and procedures regarding rights of entry under 30 CFR Part 877;

(7) Public participation and involvement in the preparation of the State reclamation plan and in the State reclamation program.

(d) A description of the administrative and management structure to be used in conducting the reclamation program, including—

(1) The organization of the designated agency and its relationship to other State organizations or officials that will participate in or augment the agency's reclamation capacity;

(2) The personnel staffing policies which will govern the assignment of personnel to the State reclamation program;

(3) The purchasing and procurement systems to be used by the agency. Such systems shall meet the requirements of Office of Management and Budget Circular A–102, Attachment O; and

(4) The accounting system to be used by the agency, including specific procedures for the operation of the State Abandoned Mine Reclamation Fund.

(e) A general description, derived from available data, of the reclamation activities to be conducted under the State reclamation plan, including the known or suspected eligible lands and waters within the State which require reclamation, including—

(1) A map showing the general location of known or suspected eligible lands and waters;

(2) A description of the problems occurring on these lands and waters; and

(3) How the plan proposes to address each of the problems occurring on these lands and waters.

(f) A general description, derived from available data, of the conditions prevailing in the different geographic areas of the State where reclamation is planned, including—

(1) The economic base;

(2) Significant esthetic, historic or cultural, and recreational values; and

(3) Endangered and threatened plant, fish, and wildlife and their habitat.

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 110

[CGD-7-82-02]

Establishment of Special Anchorage Area in Biscayne Bay, Miami, FL

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the City of Miami, FL, the Coast Guard is proposing to establish a Special Anchorage Area in Biscayne Bay offshore from Dinner Key. This Special Anchorage Area would demarcate the location of an area where the City intends to place permanent moorings, and it would relieve the operators of vessels moored in there of the requirement to display

appropriate lights and shapes while at anchor.

DATE: Comments must be submitted on or before October 27, 1982.

ADDRESSES: Comments should be mailed to Commander (m), Seventh Coast Guard District, 51 SW. First Avenue, Miami, FL 33130. The comments and other materials referenced in this notice will be available for inspection or copying at Room 1231, 51 SW. First Avenue, Miami, FL 33130. Normal office hours are between 7:30 a.m. and 4:00 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Lieutenant Robert Buford, Commander (m), Seventh Coast Guard District, 51 SW. First Avenue, Miami, FL 33130, (305) 350–5651.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD–7–82–02), and the specific section of the proposal to which their comments apply, and give the reasons for each comment. Receipt of comments will be acknowledged if a stamped self-addressed postcard or envelop is enclosed.

This rule may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The principal persons involved in drafting this notice are Lieutenant Robert Buford, Project Officer, Marine Safety Division, Seventh Coast Guard District and Lieutenant Michael T. Harris, Project Attorney, Legal Officer, Seventh Coast Guard District.

Discussion of Proposed Rule

This Special Anchorage Area is being proposed by the Coast Guard in the interests of navigational safety to demarcate this anchorage area on navigational charts. Any vessel of not more than 65 feet in length may anchor within this area without displaying the light and shape for a vessel at anchor. This area will have permanent moorings placed in it by the City of Miami which, with or without any moored vessels, would be an obstruction to navigation. This area is part of a traditional anchoring ground offshore from the marina complex at Dinner Key. There is a channel marked by lights and daybeacons which passes adjacent to the proposed Special Anchorage Area which leads into Dinner Key from Biscayne Bay.

These proposed regulations are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplication, Analysis and Review of Regulations (DOT Order 2100.5 of May 22, 1980). An economic evaluation of the proposals has not been conducted since their impact is expected to be minimal. In accordance with Section 605(d) of the Regulatory Flexibility Act (94 Stat. 1164), it is also certified that this rule will not have a significant economic impact on a substantial number of small entities.

This Special Anchorage Area is a portion of an area now being used by owners/operators who either live on board their vessels at anchor or leave their anchored vessels unoccupied. This regulation will not place any special restriction on the use of this or adjacent areas for anchoring/mooring except for the area specified by this Rule. The City may restrict use of the Special Anchorage Area to only those vessels using the permanent moorings, to avoid dangerous overcrowding within the anchorage. Reasonable fees for the upkeep of the moorings may be charged by the City, which is responsible for maintaining good order within the anchorage.

List of Subjects in 33 CFR Part 110

Anchorages.

PART 110—ANCHORAGE REGULATIONS

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 110 of Title 33, Code of Federal Regulations, by adding § 110.73b to read as follows:

§ 110.73b Dinner Key, FL.

Beginning at a point approximately 112 feet southwesterly from Dinner Key Channel Light 15 (LLNR 860) at latitude 25°43'28" N., longitude 80°13'52" W.; thence southwesterly to latitude 25°43'22" N., longitude 80°13'50" W.; thence southeasterly to latitude 25°43'20" N., longitude 80°13'56" W.; thence northwesterly to latitude 25°43'24" N., longitude 80°14'02" W.; thence northeasterly to the beginning.

Note.—Vessels desiring to use this anchorage must first obtain a permit from the Harbormaster, Dinner Key Marina.

(Sec. 1, 30 Stat. 98 as amended (33 U.S.C. 180); Sec. 6(g)(1)(B), 80 Stat. 937; (49 U.S.C. 1655(g)(1)(B); 49 CFR 1.46(c)(2)))

Dated: August 30, 1982.

D. C. Thompson,

Rear Admiral, USCG Commander, Seventh Coast Guard District.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA Docket No. AW010WV; A–3–FRL 2215–1]

West Virginia State Implementation Plan; Extension of Time

AGENCY: Environmental Protection Agency.

ACTION: Notice of time extension to correct deficiencies in the West Virginia State Implementation Plan.

SUMMARY: On May 17, 1982, the United States Supreme Court denied West Virginia's writ of certiorari thus upholding the Third Circuit Court of Appeals decision and the EPA Order to submit a sulfur dioxide (SO_2) control strategy demonstration for the Harrison and Mitchell power plants. Because submittal of the required control strategy demonstration prior to resolution of the litigation would have been inappropriate, the State is now requesting eight months from the date of the Supreme Court decision to complete and submit this information. EPA is approving this request and the SO_2 control strategy demonstration must now be submitted on or before January 17, 1983.

FOR FURTHER INFORMATION CONTACT: Eileen M. Glen, Environmental Protection Specialist, U.S. Environmental Protection Agency, Region III, 3AW13, Curtis Building, 6th and Walnut Streets, Philadelphia, Pennsylvania, 19106, (215–597–8187).

SUPPLEMENTARY INFORMATION: On November 9, 1978 [43 FR 52239] EPA approved amendments to the West Virginia Air Pollution Control Commission's Regulation X as a revision to the State Implementation Plan (SIP) for control of SO_2 emissions from electric power generating plants. Those amendments, as they applied to the Mitchell and Harrison power stations were challenged in the United States Court of Appeals for the Third Circuit, Pennsylvania v. EPA, Nos. 79–1025, 1026. As a result of this litigation, EPA again reviewed West Virginia's Regulation X

as it applied to the two power plants and determined that the SIP revision was adequate to ensure attainment and maintenance of the primary SO_2 standard [45 FR 74478]. However, EPA determined that West Virginia's SO_2 control strategy was not adequate to ensure attainment and maintenance of the secondary NAAQS for SO_2. On November 10, 1980, EPA published a Notice of Deficiency in West Virginia's SIP [45 FR 74520] and required the State to submit a control strategy and demonstration of attainment of the secondary SO_2 standard within nine months from the date of Notice unless additional time was requested by the State.

On May 28, 1981 West Virginia requested an extension of time for developing a secondary SO_2 control strategy for the Mitchell and Harrison power stations. The State noted that the Third Circuit Court of Appeals would be adjudicating issues raised by EPA's Notice of Deficiency, and that an extension pending resolution of the litigation, was appropriate.

EPA agreed, and, on September 25, 1981, published a Notice in the **Federal Register** (46 FR 47241) granting West Virginia nine months from the date of the Third Circuit Court of Appeals decision to file the required information.

However, when the Third Circuit handed down its decision upholding the EPA Order, the State filed a writ of certiorari with the United States Supreme Court. On May 17, 1982, the Supreme Court denied cert. thus upholding the Third Circuit decision and the EPA Order. Because of the lengthy litigation process, the State of West Virginia, on June 11, 1982, requested an additional eight months in which to complete its modeling demonstrations and any regulations or schedules which may be necessary to ensure that the Harrison and Mitchell power plants will not impede the attainment and maintenance of the secondary SO_2 National Ambient Air Quality Standard.

Based on the lengthy judicial review of this matter, EPA believes the extension is justified and hereby approves January 17, 1983 as the date by which the control strategy must be submitted.

(42 U.S.C. 7401–7642)

Dated: September 10, 1982.

Stanley Laskowski,

Acting Regional Administrator.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[BC Docket No. 80–520; RM–3358; RM–3795; RM–3796]

FM Broadcast Stations in Aguada, Arecibo, Cidra, Puerto Rico, et al.; Order Extending Time For Filing Responses To Petition For Reconsideration

AGENCY: Federal Communication Commission.

ACTION: Petition for reconsideration; extension of time filing responses.

SUMMARY: Action taken herein extends the time for filing responses to a petition for reconsideration involving the assignment of FM Channel 279 to Lajas, Puerto Rico, as the community's first FM assignment. Petitioner, Radio Americas Corporation, states that the additional time is needed to prepare a response to the petition for reconsideration.

DATE: Responses to the petition for reconsideration must be received on or before September 27, 1982, and replies are to be filed on or before October 7, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: D. David Weston, Broadcast Bureau, (202) 632–20554.

SUPPLEMENTARY INFORMATION:

Order Extending Time For Filing Responses to a Petition For Reconsideration

Adopted: September 9, 1982.

Released: September 15, 1982.

In the matter of amendment of § 73.202(b), Table of assignments, FM Broadcast Stations (Aguada, Arecibo, Cidra, Lajas, Manati, Mayaquez, Quebradillas, Utuado and Cabo Rojo, Puerto Rico); BC Docket No. 80–520, RM–3358, RM–3795, RM–3796, (8–31–82; 47 FR 38400).

1. On August 16, 1982, a petition for reconsideration was filed by Jose J. Arzuaga, concerning the above-captioned matter. The date for filing responses to this petition is presently September 15, 1982.[1]

2. We now have before us for consideration a request for extension of time, filed on September 7, 1982, by counsel for Radio Americas corporation, a party to the captioned proceeding. Counsel has requested an extension to and including September 27, 1982, to file a response to the petition for reconsideration. In support of his request, counsel states that although the petition was served on August 16, 1982, it was not received by counsel until August 23, 1982, due to delay in mails between Puerto Rico and Washington. Further, Radio Americas states that it has not had its personnel available to analyze the extensive petition for reconsideration filed by Jose J. Arzuaga, due to travel and the intervenig holiday period. Counsel states that the additional time is needed to prepare and file its response.

3. We are of the view that, under the circumstances recited, and extension of time is warranted. It appears that no other party to the proceeding would be prejudiced by a grant of the instant request and such extension will assure development of a sound and comprehensive record on which to base a decision herein. It will also be necessary to extend the time for filing replies.

4. Accordingly, it is ordered, that the request for extension of time, filed on behalf of Radio Americas Corporation, is granted, and the time for filing responses to the petition for reconsideration and replies thereto in Docket 80–520 (RM–3358, RM–3795, RM–3796) is extended to and including September 27, 1982 and October 7, 1982, respectively.

5. This action is taken pursuant to authority contained in sections 4(i), 5(d)(1) and 303(r) of the Communications Act of 1934, as amended, and sections 0.204(b) and 0.281 of the Commission's rules.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Broadcast Bureau.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Part 391

[BMCS Docket No. MC–104; Notice No. 82–8]

Qualifications of Drivers

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: Public comment is requested on certain modifications recommended

by the National Transportation Safety Board (NTSB) to the Federal Motor Carrier Safety Regulations (FMCSR) which are being evaluated by the FHWA. The modifications under consideration include the revision of the commercial driver disqualification provisions and the development of specific information that a motor carrier must request from a driver applicant's former employer(s). This notice presents a number of questions with respect to the modifications being considered. Public comments and any available data submitted in response to these questions will greatly assist the FHWA in determining the costs and benefits which are associated with the modifications, and whether further rulemaking action in these areas is warranted.

DATE: Comments must be submitted on or before January 27, 1983.

ADDRESS: All comments should refer to the docket number and notice number that appears at the top of this document and should be submitted, perferably in triplicate, to room 3404, Bureau of Motor Carrier Safety (BMCS), 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT: Mr. Neill L. Thomas, Bureau of Motor Carrier Safety, (202) 426–9767; or Mr. Thomas P. Holian, Office of the Chief Counsel, (202) 426–0346, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: Public comment is requested on modifications to the driver qualification requirements (49 CFR 391) of the Federal Motor Carrier Safety Regulations (FMCSR) which are being considered by the FHWA. The modifications under consideration include (1) the revision of the commercial driver disqualification provisions of the FMCSR to provide that certain specified driving offenses shall be disqualifying, without regard to the type of vehicle being driven at the time of the offense or whether the driver was on or off duty; (2) the development of a maximum allowable index or cumulation of traffic convictions, based on the total number and relative seriousness of the violations, above which a driver would be disqualified to operate a commercial motor vehicle; and (3) the development of specific information that a motor carrier must request from a driver applicant's former employer(s) when making the investigation and inquiries required by Part 391. This ANPRM presents a number of questions with respect to the modifications being considered. Public comments and any available data submitted in response to these questions will greatly assist the FHWA in determining the costs and benefits which are associated with the modifications, and whether further rulemaking action in these areas is warranted.

Background

In February 1980, the NTSB completed a report entitled "Safety Effectiveness Evaluation of Detection and Control of Unsafe Interstate Commercial Drivers Through the National Driver Register, State Driver Licensing Policies, and the Federal Motor Carrier Safety Regulations." During this evaluation, the the Board determined that many problem commercial drivers, in spite of their records of unsafe driving, continued to be licensed by the various States and employed by motor carriers to operate large commercial motor vehicles on the nation's highways.

The NTSB, in its evaluation, stated its belief that improvements in the FMCSR and in other elements of the system for detecting and controlling problem drivers, could enhance the level of safety on the nation's highways. The NTSB specifically recommended that the FHWA initiate rulemaking action in the three areas described above. This ANPRM discusses the three NTSB recommendations and requests substantive data and opinions from the public with respect to each recommendation.

History

Prior to 1971, Federal driver qualification requirements required motor carriers to review driver records and give due consideration to the violations and vehicle accident records of its drivers. Motor carriers were required to take into consideration any violation of law which demonstrated a driver's unfitness to be a driver of a motor vehicle operated in interstate or foreign commerce.

On June 7, 1969 (34 FR 9060) the Federal Highway Administrator announced in a Notice of Proposed Rulemaking (NPRM) that consideration was being given to a substantive revision of the driver qualification requirements contained in the FMCSR. With respect to the disqualification of drivers from commercial motor vehicle operations, the FHWA proposed to disqualify those drivers convicted of offenses that would ordinarily lead to a loss of driving privileges under State law, regardless of the type of vehicle being driven or whether the driver was on or off duty. In addition, it was proposed that drivers would be disqualified when they were convicted of three or more moving traffic violations within 3 years.

Based upon the data provided by the approximately 10,000 comments filed during the rulemaking action, the final rule which was published in the Federal Register on April 22, 1970, (35 FR 6458) reflected certain modifications to the NPRM driver disqualification proposals described above. The major modification was the deletion of the proposal that drivers be disqualified upon the conviction of, or the forfeiture of bond under the charge of, three or more moving traffic violations within 3 years. The rationale for this deletion was the uneven motor vehicle law enforcement practices from State to State, the lack of a uniform rule as to what constitutes a moving violation, and the hardships it would cause many drivers.

With respect to the issue of serious motor vehicle offenses committed in personal vehicles or while in an off duty status, however, it was concluded that the commission of a serious offense while operating a vehicle indicates that the perpetrator is unfit to drive a commercial motor vehicle, whether or not the offense was committed while on duty. For this reason, the grounds for disqualification in the final rule were not limited to offenses committed while driving a commercial motor vehicle in an on duty status.

The final rule also provided, among other things, that motor carriers subject to the regulations perform driving record and employment background investigations on newly hired drivers. Also required was an annual review of the driving record for each regularly employed driver in its employ, to determine whether the driver meets minimum requirements for safe driving, requires remedial driver training, or should be disqualified because of conviction of specific offenses or because of the loss of driving privileges. These provisions mandated that the motor carrier give serious consideration in its deliberations, to violations such as speeding, reckless driving, or operating a motor vehicle while under the influence of alcohol or drugs.

On November 23, 1972 (37 FR 24902) the FHWA issued a revision of §391.15 of the FMCSR, pertaining to the disqualification of persons to serve as drivers of commercial motor vehicles operated in interstate or foreign commerce. Based on new trends toward driver rehabilitation rather than punishment and the absence of data which would either prove or disprove a

statistical correlation between the conviction of a disqualifying offense while operating a non-commercial vehicle and bad driving performance in a commercial motor vehicle, the FHWA amended §391.15 to only provide for the disqualification of a driver when the driver was convicted of a disqualifying offense while operating a commercial motor vehicle in an on duty status.

Current Regulations

Section 391.15, paragraph (b) of the FMCSR provides that a driver is disqualified from operating a commercial vehicle for the duration of a license revocation, suspension, withdrawal, or denial of a license, permit, or privilege, by a State driver licensing agency or other appropriate authority. The driver is disqualified until the driving privilege has been restored.

Paragraph (c) of § 391.15 provides that a driver is disqualified for 1 year (3 years for subsequent offenses) from driving a commercial motor vehicle in interstate or foreign commerce upon conviction, while driving in an on duty status, of certain disqualifying offenses. The disqualifying offenses are:

1. Operating a motor vehicle while under the influence of alcohol, an amphetamine, a narcotic drug, a formulation of an amphetamine, or a narcotic derivative;
2. Conviction of a crime involving the knowing transportation, possession, or unlawful use of amphetamines or narcotic derivatives;
3. Leaving the scene of an accident which resulted in a personal injury or death; or
4. A felony involving the use of a motor vehicle.

Motor carriers are required by § 391.23 to perform background investigations and inquiries on newly employed drivers. The background checks must be accomplished within 30 days from the date of the drivers employment and must include: (1) obtaining a copy of the driver's driving record for the preceding 3 years from the appropriate State agency(ies); and (2) investigating, by means of letter, telephone, etc. a driver's employment record for the preceding 3 years.

Finally, according to §§ 391.25 and 391.27 of the FMCSR, the motor carrier must (1) obtain annually from every driver in its employ, a list of all traffic violation convictions (other than parking) during the preceding 12 months; and (2) review each 12 months the driver's driving record, with special attention being given to actions such as speeding, reckless driving, and other violations which indicate that the driver has exhibited a disregard for the safety of the public. The annual review of the driver's driving record permits the motor carrier to determine if the driver continues to meet minimum requirements for safe driving, requires remedial driver training, should be disqualified under the FMCSR provisions, or should be terminated.

Current Data

During 1973–76, the BMCS conducted in-depth investigations of 496 selected heavy duty vehicle traffic accidents. According to a BMCS report [1] which analyzed the data resulting from the investigations, nearly 10 percent of the accidents involved drivers with poor driving records.[2]

In 1979, 6,696 persons died in crashes involving heavy duty trucks. This figure represents a 34 percent increase in fatalities involving heavy duty trucks since 1976 and 13.1 percent of all the Nation's highway deaths occurring during 1079.[3]

In 1978, heavy duty trucks were involved in 5,399 fatal traffic accidents that killed 6,350 persons—12.6 percent of all highway deaths.[3] The National Transportation Safety Board (NTSB) has stated that the driving background of many of the commercial drivers involved in accidents during 1978 included records of traffic convictions, driver license suspensions, and accidents, indicating a flagrant and repeated disregard for the safety of other highway users.

The NTSB investigated and evaluated 41 accidents in 1978 involving suspected problem commercial vehicle drivers and also reviewed the results of three previous major investigations of heavy truck accidents.[4] The driving histories of the 44 commercial drivers involved in the accidents investigated by the NTSB were compiled by making inquiries to the various States. The individual driving records obtained from the States for the 44 commercial drivers listed a total of 63 driver licenses held, 98 driver license suspensions, 104 traffic accidents, and 456 traffic convictions.

The NTSB has determined that, in spite of commercial driver screening provided by the National Driver Register, State driver licensing agencies, and the individual motor carriers, problem commercial drivers continue to be licensed by the States and employed by motor carriers to operate heavy trucks and other commercial vehicles.

Based on the foregoing information, the FHWA invites comments and any available research data in response to the questions set forth below.

On Duty and Off Duty Citations

There is concern that drivers convicted frequently of moving traffic violations while driving during off duty hours will carry over the same driving habits to the operation of a commercial motor vehicle while in an on duty status.

Question 1. (a) Is there a rational basis for believing that moving traffic offenses committed while performing off duty driving are likely to recur while a driver operates a commercial motor vehicle in an on duty status?

(b) If so, should the present disqualifying offenses in the FMCSR be expanded to cover off duty driving periods, regardless of the type of vehicle operated?

(c) Should the present list of disqualifying offenses be expanded to include other offenses?

(d) If so, what new offenses should be included?

(e) If the present list of disqualifying offenses for on duty driving is expanded to include other offenses, should the additional offenses also be applied to off duty driving activities?

Point System or Maximum Number of Citations

The NTSB, in its recommendations to the FHWA, suggested that the FMCSR be modified to establish specific, minimum driver disqualification criteria, such as those specified in State point systems.

A majority of the States have laws or regulations or both, regarding the establishment and administration of a point system. Under this system, demerits are normally assessed against drivers based on the seriousness of moving traffic violations. When a driver accumulates a specified point total, that individual's driving privilege may be suspended.

In addition to the point system just described, two other systems appear to merit some consideration through the

[1] "Analysis and Summary of Accident Investigations 1973–76", 1977. Available for inspection at the Bureau of Motor Carrier Safety, 400 Seventh Street, SW., Washington, D.C. 20590 (copy available in docket.)

[2] For the purposes of these investigations, the term "poor driving record" means a record of multiple traffic violations occurring with regularity over a period of several years.

[3] Fatal Accident Reporting System (FARS), National Center for Statistics and Analysis, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590.

[4] "Safety Effectiveness Evaluation of Detection and Control of Unsafe Interstate Commercial Drivers Through: The National Driver Register; State Driver Licensing Policies; and the Federal Motor Carrier Safety Regulations" February 15, 1980. Available to the public through the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161, Accession No. PB 80162969, paper copy price, $8.00 (copy available in docket.)

rulemaking process. These systems are: (1) A disqualification system based on a maximum number of moving traffic violations, and (2) a disqualification system encompassing both a point system and a maximum number of moving traffic violations. The latter system would allow some flexibility based on the seriousness of moving traffic violations.

Whether the FHWA determines that disqualifying offenses are to continue to include only those offenses committed while a driver is on duty, or should also include off duty violations, the FHWA desires comments and information with respect to the following questions:

Question 2. Would it be feasible to strengthen driver disqualification requirements by integrating into those requirements a point system or a maximum citation system, or a combination or both?

Question 3. (a) If a point system is adopted, should convictions for all moving traffic violations be included?

(b) If no, for which violations should points be assessed?

(c) What would be the appropriate demerit value for each violation?

Question 4. (a) If a maximum citation system is adopted, should convictions for all moving traffic violations be included?

(b) If so, what should be the maximum number of citations allowed prior to disqualification?

Question 5. Should convictions from States other than the driver's State of residence be included in the driver disqualification process?

Question 6. (a) Some States have driver improvement programs, whereby demerits are subtracted (citations are not withdrawn, however) from a driver's record upon the driver's successful completion of an approved traffic safety course, alcohol rehabilitation course, or some other form of a driver improvement program. Should the FHWA consider a similar deletion process if additional disqualification requirements are adopted?

(b) If the disqualification program were to include credit for attendance at a driver improvement program, how should this procedure be administered?

Question 7. (a) In instances where a driver's disqualification period has not elapsed and the driver successfully completes an approved driver training program, should the driver be reinstated?

(b) If the driver is reinstated, how should this part of the program be administered?

Work Permit Licenses

Provided that a driver meets certain conditions, many States issue some type of hardship (restricted) license in accordance with point system driver license suspensions.

Question 8. If additional disqualification requirements are adopted, should disqualification action be negated for those drivers who have been issued a work permit license by the State, or by the State at the direction of a court?

Question 9. A number of States have "professional" driver laws. A "professional" driver is usually designated as such by: mileage driven annually, type of employment, and type of vehicle driven. These drivers usually are entitled to retain their drivers license when the license would otherwise be subject to suspension under the point system. If additional disqualification requirements are adopted by the FHWA, would the difference in State laws and Federal regulations in this regard cause undue administrative burden with respect to driver license suspensions, for State law enforcement and State driver licensing agencies?

Driving While Disqualified

A concern of many highway safety officials is the number of drivers who continue to drive while their licenses are suspended or revoked.

Question 10. (a) If additional disqualification requirements are adopted by the FHWA, should the current penalties (i.e., up to $500.00 per offense) for continuing to drive during the disqualification period be applied to all of the new disqualification requirements?

(b) If no, to which additional disqualification requirements should the current penalties apply?

(c) Should additional penalties be developed and applied against drivers who continue to drive during their disqualification period?

(d) If so, what additional penalties should be developed and applied against drivers who continue to drive during their disqualification period?

Record of Violations and Annual Review of Driving Record

Question 11. Drivers are presently required by the FMCSR to provide the employing motor carrier with a list of all violations of motor vehicle laws (other than parking), once every 12 months (49 CFR 391.27).

(a) In order to ensure that motor carriers obtain the driver's true driving record, should the present procedure be amended to require the motor carrier or driver to obtain a copy of the driver's record from the appropriate State motor vehicle agency(ies), rather than permit the driver to prepare the list? Privacy restrictions in some States would have to be considered if motor carriers are to obtain the copy of the driving record.

(b) If the motor carrier is required to obtain a copy of the record of each driver from the appropriate State motor vehicle agency(ies), what financial impact would this have on the motor carrier?

(c) If drivers continue to provide the record, whether in the form of a list compiled by the driver or by obtaining a copy of their driving record(s) from the State(s), what safeguards should be included to ensure that the document the driver provides is true and accurate?

(d) If safeguards are added and if motor carriers obtain copies of driving records directly from State motor vehicle agencies, would this procedure create a workload problem for State motor vehicle agencies and thus delay the forwarding of reports to motor carriers within a reasonable time period?

Question 12. The present FMCSR require that a driver's record be checked every 12 months (49 CFR 391.25). If additional disqualification requirements are adopted, should more frequent record checks be made?

Question 13. At the present time, there is no requirement that BMCS and the appropriate State agency(ies) be notified when a driver is disqualified.

(a) If additional disqualification requirements are adopted, is there a need for the motor carrier to notify the BMCS and the appropriate State motor vehicle agency(ies) when a driver is disqualified?

(b) If so, what procedure should be followed?

Investigation of Driver's Employment Record

Question 14. The FMCSR do not specify the information a motor carrier is required to request from a driver applicant's former employer(s). The NTSB has expressed its belief that absent a full definition of the information which must be requested by the employing motor carrier, there is no way to determine if the motor carrier is in full compliance with the requirement.

The FMCSR presently requires the motor carrier to investigate a driver's employment record for the past 3 years, during the initial employment process. The FMCSR however, do not specifically set forth items of information which the motor carrier

must attempt to obtain during contacts with the driver's previous employers.

(a) Should the FMCSR be amended to specify the information an employing motor carrier must attempt to obtain from a driver's previous employer(s)?

(b) If so, what required information should a motor carrier request from an applicant driver's former employer(s)?

The FHWA has determined that this document contains neither a major rule under Executive Order 12291 nor a significant regulation under the regulatory policies and procedures of the Department of Transportation. A draft regulatory evaluation will be prepared based upon the data received from this notice.

Based on the information available to the FHWA at this time, the action taken in this rulemaking would not have a significant economic impact on a substantial number of small entities.

BILLING CODE 4910-22-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Review for Wildlife Classified as Endangered or Threatened in 1977

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of review.

SUMMARY: The Endangered Species Act of 1973, as amended, requires the Service to conduct a review of all listed species at least once every 5 years. The purpose of this section is to insure that the listing accurately reflects the most current status of the listed species. In order to aid the Service in discharging this responsibility, the Director is requesting from any party comments and appropriate data which might document the need to delist or reclassify any of the selected speices of Endangered or Threatened wildlife listed below. If as a result of this review, the present classification of Endangered or Threatened is not consistent with current evidence, the Director will propose changes in such classification accordingly.

DATE: Comments must be received no later than January 25, 1983.

ADDRESSES: Submit comments to Regional Director (FA), Fish and Wildlife Service, Suite 1692, Lloyd 500 Building, 500 N.E. Multnomah Street, Portland, Oregon 97232 (species 1, 2, 3, 4, 6, 17, 18, 19, 20) or Regional Director (FA), Fish and Wildlife Service, Richard B. Russell Federal Building, 75 Spring Street, S.W., Atlanta, Georgia 30303 (species 5, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16). Comments and materials received will be available for public inspection by appointment during normal business hours (7:45 a.m. to 4:15 p.m.) at the Service's appropriate Regional Office.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, Fish and Wildlife Service, U.S. Department of Interior, Washington, D.C. 20240 (703/235-2771).

SUPPLEMENTARY INFORMATION:

Background

The lists of Endangered and Threatened Wildlife and Plants are found in 50 CFR 17.11 (wildlife) and 50 CFR 17.12 (plants). The most recent such lists were published in the October 1, 1981, revision of 50 CFR. The Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*), as amended, and 50 CFR 424.20 require the Service to conduct a review of each listed species at least once every 5 years. Species which are to be considered under the present review are listed below. Species listed during 1977 which subsequently have been affected by rules reclassifying all or significant parts of their populations are not included in this notice.

Definitions

The following definitions are provided to assist those persons who contemplate submitting information regarding the status of the species listed below:

(1) "Critical Habitat" means (a) the specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (1) essential to the conservation of the species and (2) which may require special management considerations or protection, and (b) specific areas outside the geographical area occupied by a species at the time it is listed upon a determination by the Director that such areas are essential for the conservation of the species.

(2) "Endangered" means any species which is in danger of extinction throughout all or a significant portion of its range.

(3) "Species" includes any species or subspecies of fish or wildlife or plant, and any distinct population segment of any species or subspecies of a vertebrate which is capable of interbreeding when mature. A species is determined to be Endangered or Threatened because of any of the following factors:

(a) The present or threatened destruction, modification or curtailment of its habitat or range;

(b) Overutilization for commercial, sporting, scientific, or educational purposes;

(c) Disease or predation;

(d) The inadequacy of existing regulatory mechanisms, or

(e) Other natural or man-made factors affecting its continued existence.

(4) "Threatened" means any species which is likely to become an Endangered species within the foreseeable future throughout all or a significant portion or its range.

Effects of Review

If substantial evidence is available to the Service or is presented by any party for one or more species listed below, the Director intends to propose new rules that would do any of the following: (a) Reclassify a species from Endangered to Threatened, (b) Reclassify a species from Threatened to Endangered, or (c) Remove a species from the List of Endangered or Threatened Wildlife. Distinct geographic populations of vertebrate species as well as subspecies of all wildlife species may be proposed for either separate reclassification to a different status than the presently listed species or removal from the list. If no substantial data are available or presented to suggest a status change for a particular species, then the next formal status review for that species will be announced no later than 5-years hence.

Once a species has been determined to be Threatened or Endangered, the Act imposes certain restrictions on activities involving the species. Generally, it is unlawful for a person subject to the jurisdiction of the United States to take an Endangered species of fish or wildlife or to engage in foreign and domestic commerce involving an Endangered species or its parts or products, 16 U.S.C. 1538(a)(1); 50 CFR 17.21. The Director has discretion in determining whether the taking and commercial restrictions will be made applicable to Threatened species of fish or wildlife by 50 CFR 17.31. As a general rule, the taking and commerce restrictions applicable to

Endangered species of fish or wildife are made applicable to Threatened species by 50 CFR 17.13. However, the Director does promulgate special rules for some species, varying the taking and commerce prohibitions. See, for example, 50 CFR 17.40(b), Special Rule for Grizzly Bears.

Public Comments Solicited

The Director requests that any comments concerning the status of the species listed below be submitted. Comments from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party are hereby solicited. Such comments must be in writing and should contain the name, signature, address, telephone number, and the association, institution, or business, if any, of the party.

Receipt of all comments will be acknowledged in writing by the Service. If significant data are available warranting a change in a species' classification under the Act, the Director will propose a rule to modify the present status of the listed species. In order to determine if the comments contain significant data, the Director will consider whether the document:

(1) Clearly indicates the scientific and any common name of the species involved;

(2) Contains a detailed narrative describing, as appropriate, the past and present numbers and distribution of the involved species, subspecies, or distinct vertebrate geographic population; the particular threatening factors affecting the species; and, if appropriate, the features and importance of any Critical Habitat;

(3) Is accompanied, as appropriate, by supporting documentation, such as maps, a list of bibliographic references, reprints of pertinent publications, or copies of written reports or letters from authorities; and

(5) Does not essentially repeat scientific, commercial, or other relevant information already cited by the Director in an earlier rulemaking process or notice of review.

The procedural rules for reclassifying or removing a species from the list were published in the February 27, 1980, **Federal Register** (45 FR 13010–13026) and are codified at 50 CFR 424.11.

The primary author of this notice is George E. Drewry, Office of Endangered Species, U.S. Fish and Wildlife Service (703/235–1975).

List of Subjects in 50 CFR Part 17

Endangered and threatened wildlife, Fish, Marine mammals, Plants (agriculture).

The list of species that are subject to this review is as follows:

Animal species		Historic range	Vertebrate population where endangered or threatened	Status	When listed
Common name	Scientific name				
Mammals:					
1. Otter, southern sea	*Enhydra lutris nereis*	West coast U.S.A. (WA) south to Mexico (Baja, California.	Entire	T	21
Birds:					
2. Mallard, Marianas	*Anas oustaleti*	West Pacific Ocean: (Guam, Marianas Islands)	Entire	E	23
3. Shrike, San Clemente loggerhead	*Lanius ludovicianus mearnsi*	U.S.A. (CA)	Entire	E	26
4. Sparrow, San Clemente sage	*Amphispiza belli clementeae*	U.S.A. (CA)	Entire	T	26
Reptiles:					
5. Anole, Culebra giant	*Anolis roosevelti*	U.S.A. (PR: Culebra Island)	Entire	E	25
6. Lizard, island night	*Klauberina riversiana*	U.S.A. (CA)	Entire	T	26
7. Lizard, St. Croix Ground	*Ameiva Polops*	U.S.A. (VI: Green Cay, Protestant Cay)	Entire	T	24
8. Snake, Atlantic salt marsh	*Nerodia fasciata taeniata*	U.S.A. (FL)	Entire	T	30
Amphibians:					
9. Coqui, golden	*Eleutherodactylus jasperi*	U.S.A. (PR)	Entire	T	29
10. Treefrog, pine barrens	*Hyla andersoni*	U.S.A. (FL, AL, NC, SC, NJ)	Florida	E	29
Fishes:					
11. Cavefish, Alabama	*Speoplatyrhinus poulsoni*	U.S.A. (AL)	Entire	T	26
12. Chub, slender	*Hybopsis cahni*	U.S.A. (TN, VA)	Entire	T	28
13. Chub, spotfin	*Hybopsis monacha*	U.S.A. (AL, GA, NC, TN, VA)	Entire	T	28
14. Darter, slackwater	*Etheostoma boschungi*	U.S.A. (AL, IN)	Entire	T	26
15. Madtom, yellowfin	*Noturus flavipinnis*	U.S.A. (GA, IN, VA)	Entire	T	28
Clams:

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. 80-083N]

SLD Policy Memoranda

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document lists memoranda, issued by the Standards and Labeling Division (SLD), Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service (FSIS), and available to the public which contain significant new applications or interpretations of the Federal Meat Inspection Act, the Poultry Products Inspection Act, the regulations promulgated thereunder, or departmental policy in the labeling area.

This action stems from a 1980 notice announcing new procedures established by SLD for advising the public more fully of FSIS's prior approval program for labels and other labeling for federally inspected meat and poultry products.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Hibbert, Director, Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-6042.

SUPPLEMENTARY INFORMATION: FSIS conducts a prior approval program for labels or other labeling (specified in 9 CFR 317.4, 317.5, 381.132, and 381.134) to be used on federally inspected meat and poultry products. Pursuant to the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*,) and the regulations promulgated thereunder, meat and poultry products which do not bear approved labels may not be distributed in commerce.

FSIS's prior label approval program is conducted by label review experts within SLD. A variety of factors, such as continuing technological innovations in food processing and expanded public concern regarding the presence of various substances in foods, has generated a series of increasingly complex issues which SLD must resolve as part of the prior label approval process. In interpreting the Acts or regulations to resolve these issues, SLD may modify its policies on labeling or develop new ones.

A November 28, 1980, notice (45 FR 79130) announced, in part, that any such significant or novel interpretations or determinations made by SLD would be issued in writing in memorandum form. It further stated that FSIS would periodically publish a notice in the **Federal Register** listing all memoranda issued since the previously published notice and advising of the availability of those memoranda.

This document is the first of such notices and lists those SLD policy memoranda issued from May 1, 1980, through August 31, 1982.

Persons interested in obtaining copies of any of the following SLD policy memoranda, or in being included on a list for automatic distribution of future SLD policy memoranda, may write to: Printing and Distribution Section, Paperwork Management Branch, Administrative Services Division, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250.

Memo No.	Title and date	Issue	Reference
001	Pizzas containing cheese substitutes, May 6, 1980	Appropriate labeling for pizza products containing both cheese and cheese substitutes.	9 CFR 319.600.
002	Butifarra sausage, May 30, 1980	Appropriate labeling for sausage product featuring the term "Butifarra"	9 CFR 319.140-319.141.

031	"Cooked Salami" Labeling, Sept. 4, 1981	What is the appropriate labeling for the product "Cooked Salami"?	N/A.
032	Raw Poultry Meat (381.117(b)), Sept. 4, 1981	Appropriate labeling requirements for poultry meat obtained from other than young poultry.	9 CFR 381.117(b).
033	Labeling of Cured Meat Products, Sept. 4, 1981	Can the traditional names of cured meat products be used even though mechanical reduction has taken place before the product has acquired the characteristics expected?	N/A.
034	Fresh Chorizos, Oct. 1, 1981	Limitations on water and other liquids in fresh chorizos	9 CFR 319.140 and 9 CFR 318.7(c)(1).
035	High Fructose Corn Syrup (HFCS) in Meat or Poultry Products, Oct. 27, 1981.	Appropriate use limitations and labeling of HFCS in meat or poultry products	9 CFR 318.7(c).
036	Plastic Cans, Nov. 3, 1981	Whether plastic packaging for meat food products may be considered to be a "can" under 319.104(e).	9 CFR 319.104(e).
037	Alternate Principal Display Panels, Nov. 4, 1981	When is a panel bearing a number of mandatory labeling features considered an alternate principal display panel?	9 CFR 317.2(d) and 9 CFR 381.116(b).
038	Labeling Cured Products as "Honey Cured" "Sugar Cured", or "Honey and Sugar Cured" (Sugar and Honey Cured), Dec. 16, 1981.	What are the guidelines for the use of "Honey Cured", "Sugar Cured", or "Honey and Sugar Cured" (Sugar and Honey Cured) on labeling.	N/A.
039	Label Claims or Features Representing a Product's Caloric Content or Usefulness in the Reduction or Maintenance of Body Weight, Jan. 18, 1982.	Guidelines for approval of subject claims and features	9 CFR 317.2(j)(2) and 9 CFR 381.124.
040	Smoked Products, Jan. 18, 1982	Can products be labeled as "smoked" if they have been exposed to natural liquid smoke which has been transformed into a vapor by mechanical means?	N/A.
041	Labeling of Boneless Ham Products, Feb. 1, 1982	Under What circumstances are the product names for ham products acceptable without qualifications and when must the product names be qualified?	9 CFR 317.2(b)(13).
042	Raw Bone-In Poultry Products Containing Solutions, Feb. 3, 1982.	Labeling of raw bone-in poultry and poultry parts to which solutions are added	9 CFR 381.169.
043	Labeling Ground Poultry, Feb. 8, 1982	How should raw ground poultry be labeled that is to be sold at retail in packages similar to hamburger and ground beef.	9 CFR 381.117—381.118.
044	Raw Boneless Poultry Containing Solutions, Apr. 7 1982	Labeling of raw boneless poultry and poultry parts to which solutions are added	9 CFR 381.169.
045	Product Names of Margarine Substitutes, Apr. 7, 1982	What guidelines should be followed when approving labels for products that are substitutes for margarine?	9 CFR 301.2(ll)(3) and 9 CFR 317.2(e).
046	Percent Fat Free Label Declarations, Apr. 8, 1982	Requirements for the approval of percent fat free declarations	N/A.
047	Net Weight Statements on Packages with Header Labels, May 3, 1982.	What are the size and location requirements for the net weight statements on packages with header labels?	9 CFR 317.2(h)(6) and 9 CFR 381.121.
048	Level of Beef in Berliner, May 18, 1982	What is the maximum amount of beef allowed in a sausage product called "Berliner"?	N/A.
049	Interim Sodium Labeling Guidelines (rescinded), May 20, 1982.	What guidelines should be followed at the present time in the review and approval of labeling which includes quantitative sodium information and/or non-quantitative claims?	MPI Bulletin 82-28.
049	Rescindment of Policy Memo 049, July 27, 1982		MPI Bulletin 82-28
049B	Interim Sodium Labeling Guidelines, Aug. 19, 1982	What guidelines should be followed at the present time in the review and approval of labeling which includes quantitative sodium information and/or nonquantitative claims?	MPI Bulletin 82-28.
050	Canadian Style Bacon, Aug. 25, 1982	What cut of pork must be used in a product that is labeled "Canadian Style Bacon"?	N/A.

The SLD policies specified in these memoranda will be uniformly applied to all revelant labeling applications unless modified by future memoranda or more formal Agency action. As specified in the 1980 notice, applicants retain all rights of appeal regarding decisions based upon these memoranda.

Done at Washington, DC, on September 22, 1982.

Robert G. Hibbert,

Director, Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service.

Forest Service

Revised Notice of Intent To Prepare an Environmental Impact Statement for Amendments 2, 3, and 4 to 1980–1983 Plan of Operations for Exploration Activities at Quartz Hill; Tongass National Forest, Ketchikan, Alaska

This notice revises the Notice of Intent published in the **Federal Register** Vol. 47, No. 120, on June 22, 1982. The U.S. Department of Agriculture, Forest Service, is in the process of preparing an Environmental Impact Statement for the 1980–83 Plan of Operations, Amendments 2, 3 and 4, for U.S. Borax and Chemical Corporation exploration activities in the Quartz Hill area. The project is located near Wilson Arm and Boca de Quadra in the Misty Fiords National Monument. Alternatives will include the no action alternative and the proposed plan of operation.

The scoping process has involved participation by Federal, State and local agencies, organizations, and individuals interested in or affected by the decision. This process includes: (a) Identification of those issues to be addressed; (b) identification of issues to be analyzed in depth; (c) elimination of insignificant issues or issues not related to the amendment. This participation is being conducted through written solicitation, small group meetings, or notices sent to news media and interested groups and individuals.

The U.S. Department of the Interior, U.S. Department of Commerce, and the State of Alaska have been consulted during the analysis per the requirements of the Alaska National Interest Lands Conservation Act, Section 505(a).

The Draft Environmental Impact Statement will be issued by November 15, 1982, and the Final Statement is expected to be released about February 15, 1983.

The responsible official is R. Max Peterson, Chief, Forest Service. Comments on this revised Notice of Intent or the proposed activity should be sent to David J. Barber, Interdisciplinary Team Leader, Ketchikan Area, Tongass National Forest, Federal Building, Ketchikan, Alaska 99901, telephone (907) 225–3101.

Dated: September 21, 1982.

R. M. Housley,

Acting Chief, Forest Service.

[Docket 40580]

Samoa, Inc., d.b.a. Samoa Airlines, Inc., Fitness Investigation; Postponement of Hearing

By letter dated September 16, 1982, the applicant requests that the hearing in this proceeding, currently scheduled for September 24, 1982, be postponed. The applicant states that it needs one last extension to prepare certain revised exhibits which were due on September 15, 1982. It requests that it be permitted to submit these exhibits on October 6, 1982, and that the hearing be scheduled soon thereafter. None of the parties object to this request, and it will therefore be granted.

Accordingly, notice is hereby given that a hearing in the above-entitled matter scheduled to be held on September 24, 1982 (47 FR 37942, August 27, 1982) is hereby postponed until October 15, 1982, at 10:00 a.m. (local time), in Room 1027, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, before the undersigned administrative law judge.

Dated at Washington, D.C., September 21, 1982.

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Advisory Committee on Agriculture Statistics; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463 as amended by Pub. L. 94–409), notice is hereby given that the Census Advisory Committee on Agriculture Statistics will convene on October 19, 1982, at 9:15 a.m. The Committee will meet in Room 2424, Federal Building 3, at the Bureau of the Census in Suitland, Maryland.

This Committee was established in 1962 to advise the Director, Bureau of the Census, concerning the kind of information that should be obtained from respondents associated with agricultural production; to prepare recommendations regarding the contents of agricultural reports; and to present the views and needs for data of major agricultural organizations and their members, and other suppliers of agricultural statistics.

The Committee is composed of 20 members appointed by the presidents of the nonprofit organizations having representatives on the Committee, and a representative from the U.S. Department of Agriculture.

The agenda for the meeting, which is scheduled to adjourn at 4 p.m. is: (1) Introductory remarks by the Director, Bureau of the Census; (2) current Census Bureau activities and legislative situation; (3) update on the 1982 Census of Agriculture, including the publicity program, the results of the Farm and Ranch Survey, and status of the mail list; (4) coverage evaluation for the 1982 Census of Agriculture; (5) 1978/1982 agriculture census comparability; (6) publication program; (7) report on data linkage seminar; (8) handling data user requests; (9) Committee recommendations; and (10) election of chairperson-elect.

The meeting will be open to the public, and a brief period will be set aside for public comment and questions. Extensive questions or statements must be submitted in writing to the Committee Control Officer at least 3 days prior to the meeting.

Persons planning to attend and wishing additional information concerning this meeting or who wish to submit written statements may contact the Committee Control Officer, Mr. George Pierce, Agriculture Division, Bureau of the Census, Room 3009, Federal Building 4, Suitland, Maryland. (Mailing address: Washington, D.C. 20233). Telephone (301) 763-7731.

Dated: September 21, 1982.

Bruce Chapman,

Director Bureau of the Census.

BILLING CODE 3510-07-M

International Trade Administration

[Case No. 633]

Creusot-Loire S.A.; Order Modifying Temporary Denial of Export Privileges

In the matter of: Creusot-Loire S.A., 42 Rue d'Anjou, 75008 Paris, France.

By Order of August 26, 1982, 47 FR 38160 (August 30, 1982), the respondent, Creusot-Loire S.A., was temporarily denied, pursuant to § 388.19 of the Export Administration Regulations (15 CFR Part 388, *et seq.* (1981)) (the "Regulations"), all privileges of participating in any manner or capacity in the export of U.S.-origin commodities or technical data.

The Department of Commerce (the "Department") has now filed a motion to modify the Order of August 26, 1982 to restrict the scope of the denial to U.S.-origin commodities and technical data for or relating to oil and gas exploration, production, transmission, or refinement, on the grounds that a denial order which is restricted in scope will (1) continue to facilitate the Department's investigation, (2) remain consistent with the foreign policy objectives of the Regulations relating to the export to the Soviet Union of commodities or technical data for or relating to oil and gas exploration, production, transmission, or refinement, and (3) reflect conscientious efforts by the Department to adjust its measured approach to possible violations of the Regulations, both in light of information developed during the investigation and in a way that imposes a uniform and not overly broad burden on all respondents.

Based upon the showing made by the Department and having considered the views of the respondent, I find that the motion to modify the order temporarily denying all export privileges to Creusot-Loire is in the public interest to facilitate enforcement of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2401, *et seq.*) (Supp. III (1979)), and the Regulations, and to permit completion of the Department's investigation.

Anyone who is now or may in the future be dealing with the above-named respondent in transactions that in any way involve U.S.-origin commodities or technical data for or relating to oil and gas exploration, production, transmission, or refinement is specifically alerted to the provisions set forth in Paragraph IV below.

Accordingly, it is hereby ordered that the Order of August 26, 1982 is modified as follows.

I. All outstanding validated export licenses concerning U.S.-origin commodities or technical data for or relating to oil and gas exploration, production, transmission, or refinement in which respondent appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Administration for cancellation. All validated export licenses revoked by the Order of August 26, 1982, that are not for or related to oil and gas exploration, production, transmission, or refinement are hereby reinstated, and all such licenses received by the Department pursuant to the Order of August 26, 1982, shall be returned forthwith to the licensee by the Office of Export Administration.

II. The respondent, its successors or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of paticipating, directly or indirectly, in any manner or capacity, in any transaction involving U.S.-origin commodities of technical data for or relating to oil and gas exploration, production, transmission, or refinement exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity, (a) as a party or as a representative of a party to a validated export license application, (b) in the preparation or filing of any export license application or reexport authorization, or of any document to be submitted therewith, (c) in the obtaining or using of any validated or general export license or other export control document, (d) in the carrying on of negotiations with respect to, or in the receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any such commodities or technical data exported from the United States in whole or in part, or to be exported, and (e) in the financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. Such denial of export privileges shall exend not only to the respondent, but also to its agents and employees and to any successor.

IV. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Administration, shall, with respect to U.S.-origin commodities and technical data for or relating to oil and gas exploration, production, transmission, or refinement, do any of the following acts, directly or indirectly, or carry out negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with the respondent or whereby the respondent may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any such commodity or technical data exported from the United States in whole or in part, or to be exported, by, to, or for the respondent denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any such commodity or technical data exported or to be exported from the United States.

V. In accordance with the provisions of § 388.19(b) of the Regulations, the respondent may move at any time to vacate or modify this modified temporary denial order by filing with the Hearing Commissioner, International Trade Administration, U.S. Department of Commerce, Room 6716, 14th and Constitution Avenue, NW., Washington, D.C. 20230, an appropriate motion for relief, supported by substantial evidence, and may also request an oral hearing thereon, which, if requested, shall be held before the Hearing Commissioner at the earliest convenient date. In accordance with the provisions of § 388.22 of the Regulations, the respondent may appeal to the Assistant Secretary for Trade Administration, U.S. Department of Commerce, Room 3898-B, 14th and Constitution Avenue, N.W., Washington, D.C. 20230, an order temporarily denying export privileges.

VI. This modification of the Order of August 26, 1982, is effective immediately. It remains in effect until the final disposition of any administrative or judicial proceeding or proceedings initiated against the named respondent as a result of the ongoing investigation. A copy of this modification of the Order of August 26, 1982, shall be served upon the respondent.

Dated: September 23, 1982.

Thomas W. Hoya,

Hearing Commissioner.

BILLING CODE 3510-25-M

Carbon Steel Wire Rod From Argentina; Suspension of Investigation

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of suspension of investigation.

SUMMARY: The Department of Commerce has decided to suspend the countervailing duty investigation involving carbon steel wire rod from Argentina. The basis for the suspension is an agreement by the government of Argentina to eliminate all benefits which we found to be bounties or grants on exports of the subject product to the United States.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: Paul J. McGarr, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone : (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Case History

On February 8, 1982, the Department of Commerce (the Department) received a petition from Atlantic Steel Corporation, Georgetown Steel Corporation, Georgetown Texas Steel Corporation, Keystone Consolidated Incorporated, Korf Industries Incorporated, Penn-Dixie Steel Corporation and Raritan River Steel Corporation, filed on behalf of the U.S. industry producing carbon steel wire rod. The petition alleged that certain benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided, directly or indirectly, to the manufacturers, producers, or exporters in Argentina of carbon steel wire rod.

We found the petition to contain sufficient grounds upon which to initiate a countervailing duty investigation, and on March 1, 1982, we initiated a countervailing duty investigation (47 FR 9280). We stated that we expected to issue a preliminary determination by May 4, 1982. We subsequently determined that the investigation is "extraordinarily complicated," as defined in section 703(c) of the Act, and postponed our preliminary determination for 65 days until July 8, 1982 (47 FR 17319).

We presented a questionnaire concerning the allegations to the government of Argentina in Washington, D.C. on May 7, 1982, we received the response to the questionnaire. During August 9–13, 1982, we verified this information by a review of government documents and company books and records of Industria Argentina de Aceros, S.A. (ACINDAR), the only known exporter in Argentina of carbon steel wire rod to the United States.

On July 8, 1982, we preliminarily determined that the government of Argentina is providing bounties or grants to manufacturers, producers, or exporters of carbon steel wire rod under two programs. The programs preliminarily found to confer bounties or grants were an overrebate of indirect taxes on exports—the reembolso, and prefinancing of exports through dollar-indexed pesos.

Notice of the preliminary affirmative countervailing duty determination was published in the **Federal Register** on July 14, 1982 (47 FR 30539). We directed the U.S. Customs Service to suspend liquidation of all entries of the subject merchandise, entered or withdrawn from warehouse, for consumption on or after July 14, 1982, and to require a cash deposit or bond in the amount of 13.80 percent of the f.o.b. value of the merchandise.

On August 20, 1982, the Department initiated a proposed agreement to suspend the countervailing duty investigation involving carbon steel wire rod from Argentina. The basis for the proposed agreement to suspend was that the government of Argentina would eliminate the entire amount of benefits we found to confer bounties or grants on exports of carbon steel wire rod to the United States.

On the same date, in compliance with the procedural requirements of section 704(e) of the Act, we called counsel for the petitioners informing them of the proposed agreement. At that time, we discussed the essential points of the proposed agreement and offered to answer any questions. These parties also received a copy of the proposed agreement on that date.

Scope of the Investigation

The product covered by this investigation is carbon steel wire rod manufactured in Argentina and exported, directly or indirectly, from Argentina to the United States. The term "carbon steel wire rod" covers a coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.02 inch nor over 0.74 inch in diameter, not tempered, not treated, and not partly manufactured, and valued over 4 cents per pound, as currently provided for in item 607.17 of the *Tariff Schedules of the United States*.

The period for which we are measuring the receipt of bounties or grants is calendar year 1981.

Changes Since the Preliminary Determination

(1) *The Reembolso.* In our preliminary determination, we stated that the documentation of taxes rebated by the reembolso on various raw materials and imported inputs was inadequate. Therefore, we preliminarily determined that rebating such taxes was countervailable. We allowed certain final stage taxes totalling 3.66 percent.

At verification, we received and verified a detailed breakout of the various taxes rebated by the reembolso, documentation of those taxes and the rates of taxation. Further, we received a listing of physically-incorporated inputs, the rate of tax incidence on each of these inputs, and the specific incidence of each tax on the input. As a result, we have determined that an additional 3.94 percent of the tax incidence on wire rod meets our requirements and is nof countervailable.

Certain raw material inputs are physically incorporated in carbon steel wire rod. Embedded in each of these inputs are the following indirect taxes which are levied at each stage of production:

	Percent
Control of destination tax	8.0
Foreign exchange tax (on materials imported by suppliers)	0.6
Gross sales tax	1.5
Electricity taxes:	
—National Energy Fund	5.0
—Grand Projects Fund	5.0
—El Chocon Fund	5.0
—Local electricity taxes	(1)
Municipal tax	1.5

[1] Vary by consumption.

As computed by the government of Argentina, the total estimated *ad valorem* incidence of these combined cascading taxes and the total estimated amount of tax per ton of wire rod include a social welfare tax. This is a direct tax, the remission of which is not allowable. We have therefore adjusted the Argentine government's estimate downward by an appropriate amount to account for the inclusion of this tax.

Of the remaining domestic inputs, only a portion of natural gas meets the physical incorporation test. ACINDAR uses the Midrex process for the reduction of iron. This process uses natural gas (methane, CH_4) for combustion, and carburization and reduction. Carburization and reduction occur in a closed system and, therefore, the methane used for this purpose is discrete from that used for combustion. Methane used for combustion is not physically incorporated. Carbon used for carburization, which is 75 percent of methane by atomic weight, is physically

incorporated, while the hydrogen is consumed in the reduction process and is not physically incorporated. Thus, for natural gas used in the production process, we have allowed the remission of the taxes attributable only to the carbon portion of the methane which is used for carburization and is physically incorporated. Because this is a closed system, no allowance need be made for necessary waste with respect to this carbon.

The tax incidence on methane is composed of two elements: the 1.5 percent gross sales tax, and a 10 percent excise tax on gas consumption. This results in an allowable figure that is equal to 0.68 percent of the value of the finished product, carbon steel wire rod.

Finally, there are three imported inputs that are physically incorporated: pellets, sponge iron and electrodes. The indirect taxes borne by these products are:

	Percent
Control of destination tax	2.0
Stamp tax	1.0
Foreign exchange tax	0.6

Although the primary purpose of electrodes is not to introduce carbon into the steel, they gradually wear away while being used in the electric-arc process, and the carbon that is consumed in this process becomes part of the carbon steel produced. The total tax incidence on these imported inputs which we have allowed is 1.16 percent.

On July 5, 1982, Resolution No. 8 of the Ministry of Economy reduced the reembolso for many export products including carbon steel wire rod to 10 percent of the f.o.b. value. Consequently, with the adjustments made to our preliminary determination referred to in this notice, the portion of the reembolso that constitutes an allowable rebate is 7.60 percent and the overrebate, to be eliminated as a condition of the suspension agreement, is currently 2.40 percent.

(2) *Long-Term Loan.* We stated in our preliminary determination that we required additional information concerning a long-term loan granted to ACINDAR in 1976 by the National Development Bank (BND) before making a determination on the allegation that such a loan confers a bounty or grant. At verification, we learned that the loan was in pesos with the principal fully indexed to the inflation rate and a real interest rate of 7 percent. Normally, the BND is the only source of long-term loans denominated in pesos. The BND has two basic types of long-term peso loans: for the purchase of machinery in expansion projects and for working capital, and loans of both types are made to a wide variety of sectors. The interest rates differ by the type of loan, but the interest rate on each type of loan is the same for all borrowers. Because these loans are generally available on the same terms, we have determined that they do not confer a bounty or grant.

Petitioners' Comments

The Department has consulted with counsel for the petitioners and received the following comments from them objecting to the proposed suspension agreement. Our responses are shown for each comment.

Issues Related to the Suspension Agreement

Comment 1: The petitioners request that paragraph B.1.b be modified to state "that it (the goverment of Argentina) shall not through its Central Bank or otherwise, provide directly or indirectly preferential dollar-indexed pre-export financing on any exports of the subject product."

DOC Position: We have incorporated the suggested amendment into paragraph B.1.b.

Comment 2: The petitioners contend that the representative period chosen as a reference period for the section 704(d)(2) requirement—that exports not increase in the interim period between suspension and imposition of the export tax—perpetuates the recent surge of imports of Argentine carbon steel wire rod into the United States.

DOC Position: We are required to select "the most recent representative period." Accordingly, we chose the period February 1981–January 1982—the most recent 12-month period prior to the filing of the petition. The petitioners have contended that we should use a two-year period, 1980–1981, to reflect more accurately the long-term level of Argentine wire rod exports to the United States. The suggested period has 20 months of non-shipment prior to entry into the market and the increase of imports; the period we have chosen begins with 7 months of non-shipment. We note that the period covered by this quantitative restraint is very short—until October 30, 1982, when the agreement will go into effect.

Comment 3: The petitioners state that for effective monitoring the agreement should include a specific provision requiring the government of Argentina to report on a quarterly basis the monthly volume of exports of the subject product.

DOC Position: Pursuant to section 704(b)(1) of the Act, the government of Argentina has agreed to the complete elimination of the net subsidy. No quantitative restrictions are required with such a suspension agreement once the subsidy has been completely eliminated, and thus the proposed amendment has no relevance.

Comment 4: The petitioners state that the agreement should include a provision whereby the government of Argentina consents to access to verification reports by counsel for the petitioners under an administrative protective order, so that counsel may monitor independently the efficacy of the agreement.

DOC Position: Non-confidential versions of verification reports are normally available to the public. A determination concerning the request by counsel for release of the confidential version of a verification report under protective order will be made at the time such requests are submitted.

Comment 5: The petitioners state that the suspension agreement fails to fulfill the explicit statutory conditions of section 704(d)(1) of the Act that any suspension agreement be in the public interest.

DOC Position: By its terms, the suspension agreement will eliminate completely the net subsidy, and *a fortiori* eliminates any injury caused by the net subsidy, without the added expense to the U.S. taxpayers, petitioners, and respondents of completing the investigation.

Subsidy Issues

Comment 6: The petitioners contend that the Department should not determine the net subsidy portion of the reembolso by simply subtracting the amount of indirect taxes considered allowable from the amount of the reembolso payment. Instead, they argue that we should determine the ratio of the reembolso payment to the total tax incidence on wire rod and consider only that percentage of the allowable indirect taxes as rebatable, without given rise to a subsidy.

DOC Position: Through long-standing case precedent and by the dictates of the Act, the Department has determined that only that portion of the reembolso that exceeds the amount of indirect taxes allowable under the Act confers a bounty or grant. The petitioners, in effect, are arguing that in order for the Department to make such a determination, the government of Argentina has the obligation to rebate fully all indirect taxes on wire rod that it has calculated. The government of Argentina has no obligation to rebate any indirect taxes incident on wire rod; the only obligation that exists under the

act is that if it chooses to rebate any of these indirect taxes, they must be reasonably calculated and directly related to wire rod. Having made that determination, the Department cannot consider any portion of those allowable indirect taxes to confer a bounty or grant.

Comment 7: The petitioners argue that the exemption of reembolso payments from the income tax constitutes an additional bounty or grant that is countervailable.

DOC Position: By its nature, the rebate of indirect taxes is not considered income. To determine whether the reembolso is a *bona fide* rebate of indirect taxes, the Department has followed its long-established practice of considering a rebate of indirect taxes to be non-countervailable if it is reasonably calculated, is specifically intended to compensate for the prior payments of indirect taxes, and is directly related to the merchandise exported. These conditions are enumerated in the Senate Report to the Act (S. Rep. 96–29 at 84f/1979) and have been upheld by the Court of International Trade in the case, *Industrial Fasteners Group, American Importers Association* v. *United States*, 2 C.I.T. ——, Slip Op. 81–99 (October 29, 1981). Having met these criteria, we consider the non-excessive portion of the reembolso to be a *bona fide* rebate of indirect taxes and non-countervailable.

The legislative history, however, is silent on the issue of the countervailability of the secondary tax effects of non-countervailable rebates of indirect taxes. We interpret Congressional intent to be that the *whole* of a non-excessive rebate of indirect taxes—including any secondary tax effects—is non-countervailable, provided it meets the above-mentioned criteria.

With respect to that portion of the reembolso determined to confer a bounty or grant and which could be considered income, we conclude that there is no additional benefit attributable to the income tax exemption. Since we have separately determined the full benefit from this overrebate, we would be double-counting if we were to consider that a countervailable benefit is conferred by its exemption from the income tax. Further, the Department consistently has taken the position that it will not examine the income tax consequences of non-income tax subsidy programs. Whether and to what extent each producer's or exporter's benefits from a program unrelated to income taxes would be increased or diminished as a consequence of application of its country's income tax laws is a difficult and complex matter which is neither feasible nor necessary to explore.

Comment 8: The petitioner states that the Department should not use additional information regarding the reembolso received after the preliminary determination because the respondent refused to provide such information at the appropriate time in the investigation.

DOC Position: The respondent never refused to supply any information requested by the Department. Information used with respect to changes in the preliminary determination in calculating the permissible level of reembolso was received at verification, an integral part of the investigation. This material supplemented information provided prior to the preliminary determination in sufficient detail to permit revision of our calculations.

Comment 9: The petitioners state that the Department should not accept *ex post facto* rationalizations of rebates of indirect taxes, in accordance with its past practice.

DOC Response: The Department has relied only on studies of the indirect tax incidence prepared by the government of Argentina prior to the initiation of the investigation. At verification we examined in detail the back-up documents prepared as the basis for the studies submitted by ACINDAR to the government of Argentina before this investigation was initiated. These documents supported the figures we have used in our calculations.

Suspension of the Investigation

The Department has determined that the agreement will eliminate completely the bounties or grants conferred on the subject merchandise exported directly or indirectly to the United States, that the agreement can be monitored effectively, and that the agreement is in the public interest. We find, therefore, that the criteria for suspension of an investigation pursuant to section 704 of the Act have been met. The terms and conditions of the agreement, signed September 21, 1982, are set forth in Annex 1 to this notice.

Pursuant to section 704(f)(2)(A) of the Act, the suspension of liquidation of all entries, entered or withdrawn from warehouse, for consumption of carbon steel wire rod from Argentina effective July 14, 1982, as directed in our notice of "Preliminary Affirmative Countervailing Duty Determination, Carbon Steel Wire Rod from Argentina" is hereby terminated. Any cash deposits on entries of carbon steel wire rod from Argentina pursuant to that suspension of liquidation shall be refunded and any bonds shall be released.

The Department intends to conduct an administrative review within twelve months of the anniversary date of publication of this suspension as provided in section 751 of the Act.

Notwithstanding the suspension agreement, the Department will continue the investigation if we receive such a request in accordance with section 704(g) of the Act within 20 days after the date of publication of this notice.

This notice is published pursuant to section 704(f)(1)(A) of the Act.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

September 21, 1982.

Annex 1—Suspension Agreement—Carbon Steel Wire Rod From Argentina

Pursuant to section 704 of the Traiff Act of 1930, as amended ("the Act"), and section 355.31 of the Commerce Regulations, the government of the United States through its Department of Commerce ("the Department") and the government of Argentina through its Ministry of Economy ("the Ministry") enter into the following suspension agreement ("the agreement") on the basis of which the Department shall suspend its countervailing duty investigation initiated on March 1, 1982 (47 Fed. Reg. 9260) with respect to carbon steel wire rod from Argentina. The agreement shall be in accordance with the terms and provisions set forth below.

A. Scope of the Agreement

The agreement applies to all carbon steel wire rod manufactured in Argentina and exported, directly or indirectly, from Argentina to the United States (hereinafter referred to as the "subject product"). The term "carbon steel wire rod" covers a coiled simi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.02 inch nor over 0.74 inch in diameter, not tempered, not treated, and not partly manufactured, and valued over 4 cents per pound, as currently provided for in item 607.17 of the *Tariff Schedules of the United States*.

B. Basis of the Agreement

1. The Ministry hereby agrees to eliminate completely the amount of the net bounty or grant determined by the Department to exist with respect to the subject product. The elimination of the net bounty or grant shall be accomplished for all exports of the subject product made on or after October 30, 1982. The Ministry agrees that:

(a) it will not provide to manufacturers, producers, or exporters of the subject product, either directly or indirectly, any reembolso payment constituting a bounty or grant, as determined by the Department, and

(b) the Central Bank shall not provide, either directly or indirectly, preferential dollar-indexed pre-export financing and that the Ministry shall submit documentation that

the Central Bank prohibits such financing on any exports of the subject product.

2. The Ministry certifies that no new or equivalent benefits shall be granted on the subject product as a substitute for any benefits eliminated by the agreement.

3. The elimination of these benefits does not constitute an admission by the Ministry that such benefits are bounties or grants within the meaning of the U.S. countervailing duty law.

4. The Ministry agrees that from the effective date of the suspension of the investigation and until the complete elimination of the net bounty or grant no later than October 30, 1982, the rate of exports of the subject product will not exceed the average monthly rate of exports to the U.S. in the period February 1981-January 1982. The Department will monitor the exports of the subject product to the United States from the effective date of the suspension of the investigation until the elimination of the net bounty or grant and will issue instructions to the Customs Service to deny entry, or withdrawal from warehouse, for consumption of the subject product exported in excess of the average monthly rate in the period February 1981-January 1982.

5. The Department agrees to suspend its countervailing duty investigation with respect to carbon steel wire rod from Argentina.

C. Monitoring of the Agreement

1. The Ministry agrees to supply to the Department such information as the Department deems necessary to demonstrate that it is in full compliance with the agreement.

2. The Ministry shall immediately provide copies of any resolutions, decrees or legislation governing the changes in the level of reembolso payments or of the indirect taxes rebated by these payments on any exports of the subject product as soon as such changes occur.

3. The Ministry shall notify the Department if any exporters of the subject product transship the subject product through third countries or apply for or receive, directly or indirectly, the benefits of the programs described in paragraph B(1) regarding the manufacture, production or export of the subject product.

4. The Ministry shall certify to the Department within 15 days after the first day of each three-month period beginning on January 1, 1983 whether it continues to be in compliance with the agreement by eliminating the net bounty or grant referred to in paragraph B(1) and whether it has substituted any new or equivalent benefits for the benefits eliminated by the agreement. Failure to supply such information or certification in a timely fashion may result in the immediate resumption of the investigation or issuance of a countervailing duty order.

5. The Ministry shall permit such verification and data collection as is requested by the Department in order to monitor the agreement. The Department will request such information and perform such verification periodically pursuant to administrative reviews conducted under section 751 of the Act.

6. The Ministry shall notify the Department if it decides to alter or terminate its obligations with respect to any of the terms of the agreement.

7. The Department shall notify the Ministry of any subsequent determination in this proceeding as a result of information provided by the Ministry with respect to the monitoring of the agreement.

8. The agreement shall remain in effect until the conditions of section 751(c) of the Act are met, unless the Department determines that paragraph D of the agreement applies.

D. Violation of the Agreement

If the Department determines that the agreement is being or has been violated or no longer meets the requirements of section 704(b) or (d) of the Act, then section 704(i) shall apply.

E. Effective Date

The effective date of the agreement is the date of publication.

Signed in Washington, D.C., on this 21st day of September, 1982.

For the Argentine Ministry of Economy.

Santiago Murray,

Minister-Counselor, Embassy of the Argentine Republic.

I have determined that the provisions of paragraph B completely eliminate the bounties or grants that the government of Argentina is providing with respect to carbon steel wire rod exported directly or indirectly from Argentina to the United States and that the provisions of paragraph C ensure that this agreement can be monitored effectively pursuant to section 704(d) of the Act. Furthermore, I have determined that the agreement meets the requirements of section 704(b) of the Act and suspension of the investigation is in the public interest.

Department of Commerce.

Judith Hippler Bello,

Acting Deputy Assistant Secretary for Import Administration.

[FR Doc. 82-26461 Filed 9-24-82; 8:45 am]

BILLING CODE 3510-25-M

Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Carbon Steel Wire Rod From South Africa

AGENCY: International Trade Administration, Commerce

ACTION: Final affirmative countervailing duty determination and countervailing duty order.

SUMMARY: We determine that certain benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in South Africa of carbon steel wire rod, as described in the "Scope of Investigation" section of this notice. The estimated bounty or grant is indicated under the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: Paul J. Thran, Office of Investigations, Import Administration, International Trade Administration, U.S.. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone: (202) 377-1766.

SUPPLEMENTARY INFORMATION:

Final Determination

Based upon our investigation, we determine that certain benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended ("the Act"), are being provided to manufacturers, producers, or exporters in South Africa of carbon steel wire rod, as described in the "Scope of Investigation" section of this notice. The following programs are found to be bounties or grants.

- Export incentive program—category C
- Assumption of financing charges
- Railroad rate differential
- Central government rail rebate

We determine the net bounties or grants to be the amount indicated in the "Suspension of Liquidation" section of this notice.

Case History

On February 8, 1982, we received a petition from counsel for Atlantic Steel Corporation, Georgetown Steel Corporation, Georgetown-Texas Steel Corporation, Keystone Consolidated Incorporated, Korf Industries Incorporated, Penn-Dixie Steel Corporation and Raritan River Steel Corporation, on behalf of the U.S. industry producing carbon steel wire rod. The petition alleged that certain benefits which constitute bounties or grants within the meaning of section 303 of the Act are being provided, directly or indirectly, to the manufacturers, producers, or exporters in South Africa of carbon steel wire rod.

We found the petition sufficient and, on March 1, 1982, we initiated a countervailing duty investigation (47 FR 5751). We stated that we expected to issue a preliminary determination by May 4, 1982. We subsequently determined that the investigation is "extraordinarily complicated", as defined in section 703(c) of the Act, and postponed our preliminary determination for 65 days until July 8, 1982 (47 FR 17319).

On July 8, 1982, we preliminarily determined there was reason to believe or suspect certain benefits which constitute bounties or grants within the meaning of the countervailing duty law, were being provided to manufacturers,

producers, or exporters in South Africa of carbon steel wire rod (47 FR 30559). Written views and rebuttals were received from all the parties in lieu of a hearing.

Since South Africa is not a "country under the Agreement" within the meaning of section 701(b) the Act, and the carbon steel wire rod at issue here is dutiable, the domestic industry is not required to allege that, and the U.S. International Trade Commission (ITC) is not required to determine whether, imports of this product cause or threaten material injury to the U.S. industry in question.

Scope of Investigation

For the purpose of this investigation, the term "carbon steel wire rod" covers a coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.02 inch nor over 0.74 inch in diameter, not tempered, not treated, and not partly manufactured, and valued over 4 cents per pound, as currently provided for in item 607.17 of the *Tariff Schedules of the United States.*

The South African Iron and Steel Industrial Corporation (ISCOR) is the only known producer in South Africa of the subject product exported to the United States.

The period for which we are measuring subsidization is the corporate fiscal year 1981, which runs from July 1, 1980 through June 30, 1981.

Analysis of Programs

In it response, the government of South Africa provided data for the applicable period. Additionally, we received information from ISCOR, which produced and exported carbon steel wire rod to the United States during 1981. Throughout this notice, the general principles applied by the Department of Commerce to the facts of this investigation are described in detail in Appendices 2 and 4 which accompany the notice of "Final Affirmative Countervailing Duty Determination, Carbon Steel Wire Rod from Belgium," in this issue of the **Federal Register.** Based upon our analysis of the petition and response to our questionnaire, we determine the following.

I. Programs Determined To Be Bounties or Grants to Manufacturers, Producers, or Exporters of Carbon Steel Wire Rod

We determine bounties or grants are being provided to manufacturers, producers, or exporters in South Africa of carbon steel wire rod under the programs listed below.

A. Assumption of Finance Charges

In 1978 The government of South Africa assumed R70 million of ISCOR's finance charges. Under the grants methodology described in Appendix 2, we treated this payment as a grant, and allocated the amount over 15 years, the average life of capital assets in integrated steel mills. Using this methodology, we calculated a benefit of 0.35 percent *ad valorem.*

In our preliminary determination, we calculated the benefit of this program as though the grant were given in 1977, using the discount rate for that year, following our then existing methodology. Since the grant was actually given in 1978, we are now using the appropriate discount rate for 1978, which is lower. This results in a benefit of 0.35 percent instead of 0.5 percent.

B. Railroad Rate Differential

The South African Transport Services (SATS), a government-owned corporation, maintains a rate schedule that generally provides railroad rates for shipments destined for export that are lower than domestic rates.

ISCOR used rail transport for its exports of carbon steel wire rod. The export rate is approximately 50 percent of the domestic rate. In our preliminary determination, we found this program to be a bounty or grant, and we calculated its benefit by dividing the differential per ton by the per ton value of the appropriate product.

As stated in our preliminary notice, SATS maintains that its export rates are "cost justified," and that the difference between the domestic and export rates reflects the difference in the cost of handling the two types of traffic.

SATS has demonstrated that rate differentials between domestic and export steel shipments are generally cost justified. It has shown that the ratio of revenues to costs in export shipments of steel is greater than the similar ratio for most domestic shipments. The exception was certain domestic steel shipments railed under the same conditions as exports. Prior to April 1, these were charged higher rates than exports. Necessarily, the revenue-to-cost ratio for these shipments exceeded the normal ratio for domestic shipments.

During our verification we found that steel for export is shipped in "full-truck loads" (full cars) and 39-car trains. The mill is charged for a fully loaded car whether or not it is able to fill the car completely. These trains are moved to the harbors as complete units. The only handling required is the changing of locomotives on various parts of the lines. At the ports the harbor administration unloads the train and loads the ships; for this service a separate fee is charged.

In contrast, domestic shipments are charged rates on a per ton basis. The railroad moves the cars from the mill to a marshalling yard where they are transferred to other trains for hauling to their destination. (Marshalling may occur more than once during any shipment.) At the destination the railroad is responsible for unloading the train.

SATS has made available to domestic steel shippers, effective April 1, 1982, the same rates export shipments enjoy if the domestic shipments meet the same loading and point-to-point conditions imposed on export shipments.

Based on the availability of the lower rate to all domestic steel shippers meeting the conditions imposed on export shipments of steel, we determine that the rate afforded by SATS to exporters of carbon steel wire rod is not provided on terms more favorable than those for domestic shippers and that it does not constitute a bounty or grant in this case for shipments exported after April 1, 1982. For shipments prior to April 1, 1982, we find the bounty or grant to be 5 percent *ad valorem* based on the difference in the full truckload rate available to exporters and the per ton rate available to domestic shippers.

C. Export Incentive Program—Category C (Finance Charges Aid Scheme)

The South African government provided for a tax-free rebate to certain firms increasing the value of their exports of manufactured goods. The rebate was equal to 25 percent of the interest costs for financing exports. ISCOR benefited from this program in 1981. However, as this program was terminated on April 1, 1982, we are not including this benefit in our calculation of the bounties or grants on shipments after that date. For shipments prior to April 1, 1982, we calculated a benefit of 1.2 percent *ad valorem.*

D. Central Government Rebate

The government of South Africa offered a "Central Government Rebate" of up to 25 percent of the railroad charges on products shipped in open railway cars for export. ISCOR benefited from this program in 1981. However, as this program was terminated on April 1, 1982, we are not including this benefit in our calculation of the bounties or grants on shipments after that date. For shipments prior to April 1, 1982, we find the benefit under this program is 1.25 percent *ad valorem.*

II. Programs Determined Not To Be Bounties or Grants to Manufacturers, Producers, or Exporters of Carbon Steel Wire Rod

Based upon our verification, we determine that bounties or grants are not being provided to manufacturers, producers, or exporters in South Africa of carbon steel wire rod under the following programs:

Government Equity Participation in ISCOR

The government of South Africa owns over 99 percent of the outstanding shares of ISCOR. The remaining shares are not publicly traded. The petitioners alleged that the purchase of equity by the government represents a bounty or grant. In our preliminary determination, we made the tentative judgment, based on ISCOR's financial statements, that the purchase of share capital in ISCOR by the government was inconsistent with commercial considerations, and therefore potentially a bounty or grant.

We then measured the value of the bounty or grant by comparing the government's rate of return in 1981 on its equity investment in ISCOR with the national average rate of return in 1981 on equity investments in South Africa as evidenced by the report of the South African Reserve Bank. We then multiplied this difference by the amount of the government equity infusions since 1974. We preliminarily found the value of the benefit, allocated over total ISCOR sales, to be 3.7 percent *ad valorem*.

ISCOR has provided additional information to suggest that the government's equity infusions were consistent with commercial considerations, and therefore not a bounty or grant. ISCOR's income statements in its annual reports are based on an inflation-based accounting system which charges to production costs the increased replacement costs of fixed assets. This expense item is in addition to normal depreciation. While approved and recommended, this practice is not followed by most South African companies. However, ISCOR has been using it since 1952.

The effect of this practice on ISCOR is to understate its profit performance *vis-a-vis* companies not using the inflation-based system. When the provisions for increased replacement costs are added back to profits, ISCOR's performance changes dramatically. Instead of two profitable years in the last eight, ISCOR showed profits in six of those years.

Moreover, we have found that ISCOR's non-payment of taxes in those years is not related to a poor profit performance, but instead to significant write-offs for major capital expenditures made during earlier periods. These write-offs are not preferential under South African tax law.

For these reasons we determine that the South African government's purchase of ISCOR's share capital was not inconsistent with commercial considerations, and therefore is not potentially a bounty or grant under the Act.

ISCOR Loan Guarantees

The petitioners alleged that the South African government's ownership of ISCOR allows the company to receive loans at interest rates lower than if the company were privately held. In our preliminary determination, we estimated the benefit from loan guarantees based on the best information available. ISCOR has since presented information on all its loans outstanding during the period for which subsidization is being measured.

Government ownership of a firm does not implicitly guarantee the debt of the firm, and thus does not confer *per se* a bounty or grant. An explicit loan guarantee by the state, on the other hand, bestows a benefit to the extent that the recipient of the guaranteed loan pays less for the debt than it would have absent the guarantee. In ISCOR's case we found that only certain of the company's loans obtained in foreign countries were guaranteed by the government. Those loans of ISCOR's which were guaranteed carried rates generally higher than the rates for long-term corporate bonds in the countries in which they were received. The long-term corporate bond rate is the rate we selected as our measure of debt incurred solely on the basis of commercial considerations. Therefore, we determine that the guarantee of ISCOR's loans by the government did not provide a benefit which is a bounty or grant in this case.

Export Credit Insurance

The Credit Guarantee Insurance Company ("CGIC") offers export credit insurance to qualifying export companies. No other insurance company is known to provide similar coverage. According to its annual reports, CGIC's insurance premium rates appear to cover the longterm operating costs and losses of the program. Therefore, we find that the program does not constitute a bounty or grant.

Employee Training Programs

The South African Department of Manpower certifies training programs to the taxing authority which allows businesses to deduct 200 percent of qualified training expenses. The Department of Manpower has demonstrated that all qualified training programs are available to all companies and industries and that they are neither restricted to certain sectors of the economy nor preferential to exporters. Therefore, we find the tax benefits from the training programs not to be bounties or grants.

Reduced Ocean Freight Rates

The petitions alleged that South African shippers benefited from reduced ocean freight rates. We could find no evidence of such a program. We did find evidence of rate negotiation between shippers and carriers; however, this did not constitute a bounty or grant under the Act.

III. Programs Determined Not To Be Used by Manufacturers, Producers, or Exporters of Carbon Steel Wire Rod

We determine that the following programs, which were alleged by the petitioners to confer bounties or grants, are not used by the manufacturers, producers, or exporters in South Africa of carbon steel wire rod.

- Pre- and post-shipment financing,
- Export incentive program—category A, B and D,
- Beneficiation allowances for base mineral processing,
- Homeland development, and
- Iron/steel export promotion scheme

Comment 1: The petitioner argues that the magnitude of the railway rate differential cannot be explained by difference in cost experience, and therefore, exports of steel wire rod are railed at rates more favorable than domestic shipments. This constitutes a bounty or grant.

DOC Position: During our verification we were presented with data that demonstrates that export shipments of all of the subject product return a higher percentage of revenues relative to cost than do domestic shipments of the same products. The data which we examined were the railroad's standard costs applied against its work performance factors. These latter numbers reflected the railroad's actual experience in moving steel from the mills to the ports. The ratio of revenues to cost generated from that traffic results in a larger number than the similar ratio for traffic moved under domestic conditions. As explained above, generally the conditions under which domestic and export traffic move are significantly different. Additionally, the railroad has provided us with information that indicates it now offers the lower rates to domestic shippers who meet the same

conditions that export shippers must meet to obtain the lower rates. This provision is effective April 1, 1982. With this change, there is no further question that export shipments of steel in open cars receive rates more favorable than similar domestic shipments.

Comment 2: The petitioner argues that adjustments to ISCOR's financial statments to reflect its use of a replacement cost inflation factor is improper. They also provide quotes from ISCOR's annual reports which suggest that investments in steel in general, and in ISCOR in particular, were not prudent in the period 1974 to 1980.

DOC Position: ISCOR's use of the replacement cost inflation factor in its accounts is a conservative accounting procedure. It understates the firm's profits relative to other firms not using the system. Therefore, in order to place ISCOR's performance in its proper perspective, an adjustment must be made. When that adjustment is made, ISCOR's profits, while not high, are in a range that could be expected to attract certain investors.

The quotations supplied are not sufficient to demonstrate that investment in ISCOR by the government was unreasonable. We do not find the government's purchases of equity in ISCOR to be based on terms inconsistent with commercial considerations.

Comment 3: The petitioner cites the eight years in which ISCOR did not pay taxes as proof of its unprofitable condition.

DOC Position: We have found that ISCOR's non-payment of taxes in those years was not related to poor profit performance, but instead to significant write-offs for major capital expenditures made during the early and mid-seventies. These write-offs can be carried forward until exhausted. They are not preferential under South African tax law.

Comment 4: The petitioner argues that the government's ownership of ISCOR provides an implied guarantee of all the company's loans.

DOC Position: Government ownership of a firm does not implicitly guarantee the debt of the firm, and thus does not confer *per se* a bounty or grant. Where ISCOR's loans *were* guaranteed by the South African government, we found that those guarantees did not allow the company to obtain loans at interest rates lower than if the loans had not been guaranteed.

Comment 5: The petitioner argues that the benefit received in a homelands region by one of ISCOR's subsidiaries is a bounty or grant affecting ISCOR's steel production.

DOC Position: The subsidiary located in the homeland does not manufacture these steel products or produce any inputs for them. The steel that it handles is not exported to the United States. Therefore, the benefits received by the subsidiary do not constitute a bounty or grant on steel exports to the United States.

Comment 6: The petitioner alleges that employee training allowances are provided only to specific groups of industries and not to all; therefore, training benefits are countervailable. Further, the petitioners argue that even if the benefits of this program are available to all, they are still bounties or grants.

DOC Position: The Department finds that the training benefits are available to any industry or group of industries on an equal basis and that the present participation in the program demonstrates this general availability. Eligibility requirements do not limit the benefits of the program to particular companies or industries. Any corporation which sets up a qualified training program is eligible for the 200 percent tax deduction. These training programs are generally available on equal terms to all companies. As explained in Appendix 2, our interpretation of the Act and past practice is that generally available benefits are not bounties or grants. Since we determine that this program is generally available, we find it does not confer counter vailable benefits under the Act.

Comment 7: The petitioner suggests that because ISCOR did not supply us with sufficient information regarding their loans prior to verification that we should not have accepted that information subsequently and presumably, although he does not explicitly state, our decision should be based on the best information otherwise available.

DOC Position: While ISCOR did not provide us with all of the required information prior to our verification, it did give us that information at verification. While in general we strongly prefer to have complete information prior to verification, we view this action in this instance as not significantly impeding our investigation, and as such, we have no reason not to use this verified information.

Comment 8: The petitioner argues that the government's waiver of dividend payments is a demonstration that its participation in ISCOR is for objectives other than commercial considerations.

DOC Position: Our principal consideration in judging whether a government's participation in a firm is consistent with commercial consideration is the level of returns on equity. After restating ISCOR's performance in historical cost terms we find the returns on equity to be sufficient to warrant making that judgement affirmatively. The fact that the government chose not to take capital out of the firm in the form of dividends is not enough, in and of itself, to make us change our position.

Verification

In accordance with section 776(a) of the Act, we verified the data relied upon in our final determinations. During this verification, we followed standard procedures, including inspection of documents, discussions with government officials and on-site inspection of manufacturer's operations and records.

Suspension of Liquidation

The suspension of liquidation ordered in our preliminary determination shall remain in effect until further notice. The total net bounty or grant for carbon steel wire rod exported before April 1, 1982 and entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice is 7.8 percent *ad valorem*. For shipments exported on or after April 1, 1982 and entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice the total bounty or grant is 0.35 percent, a rate we consider *de minimis*. (For duty deposit purposes: 0.0 percent.)

As required by section 706(a)(3) of the Act, cash deposits of estimated countervailing duties in the amounts specified above of th f.o.b. invoice prices shall be required on shipments of the subject products entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

The Department intends to complete an administrative review of these determinations and orders under section 751 of the Act.

This determination and order are published in accordance with sections 705(d) and 706(a) of the Act.

Dated: September 21, 1982.

Lawrence Brady,

Assistant Secretary for Trade Administration.

[FR Doc. 82-25417 Filed 9-24-82; 8:45 am]
BILLING CODE 3510-25-M

Carbon Steel Wire Rod From Brazil; Suspension of Investigation

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of suspension of investigation.

SUMMARY: The Department of Commerce has decided to suspend the countervailing duty investigation involving carbon steel wire rod from Brazil. The basis for the suspension is an agreement by the government of Brazil to offset with an export tax all benefits which we find to be subsidies on exports of the subject product to the United States.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: Paul J. McGarr, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Case History

On February 8, 1982, the Department of Commerce (the Department) received a petition from Atlantic Steel Corporation, Georgetown Steel Corporation, Georgetown Texas Steel Corporation, Keystone Consolidated Incorporated, Korf Industries Incorporated, Penn-Dixie Steel Corporation and Raritan River Steel Corporation, filed on behalf of the U.S. industry producing carbon steel wire rod. The petition alleged that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided, directly or indirectly, to the manufacturers, producers, or exporters in Brazil of carbon steel wire rod.

We found the petition to contain sufficient grounds upon which to initiate a countervailing duty investigation, and on March 1, 1982, we initiated a countervailing duty investigation (47 FR 9261). We stated that we expected to issue a preliminary determination by May 4, 1982. We subsequently determined that the investigation is "extraordinarily complicated," as defined in section 703(c) of the Act, and postponed our preliminary determination for 65 days until July 8, 1982 (47 FR 17319).

We presented a questionnaire concerning the allegations to the government of Brazil in Washington, D.C. on May 25, 1982, we received the response to the questionnaire. During August 2–6, 1982, we verified this information by a review of government documents and company books and records of Companhia Siderurgica Belgo-Mineira (Belgo-Mineira) and Companhia Siderurgica Da Guanabara (COSIGUA), the only known exporters in Brazil of carbon steel wire rod to the United States.

On July 8, 1982, we preliminarily determined that the government of Brazil is providing subsidies to manufacturers, producers, or exporters of carbon steel wire rod under six programs. The programs preliminarily found to confer subsidies were IPI rebates for capital investment, the IPI export credit premium, preferential working capital financing for exports, an income tax exemption for export earnings, benefits on machinery imported under the Industrial Development Council program, and accelerated depreciation for Brazilian-made capital goods. Based upon verification, we also found benefits constituting subsidies were received on export credits provided through Resolution 68. This program is countervailable because it gives export credits to importers at preferential interest rates.

Notice of the preliminary affirmative countervailing duty determination was published in the **Federal Register** on July 14, 1982 (47 FR 30550). We directed the U.S. Customs Service to suspend liquidation of all entries of the subject merchandise, entered or withdrawn from warehouse, for consumption on or after July 14, 1982, and to require a cash deposit or bond in the amount of 14.31 percent of the f.o.b. value of the merchandise.

On August 20, 1982, the Department initialed a proposed agreement to suspend the countervailing duty investigation involving carbon steel wire rod from Brazil. The basis for the proposed agreement to suspend was that the government of Brazil would offset by an export tax the entire amount of benefits we found to confer subsidies on exports of carbon steel wire rod to the United States.

On the same date, in compliance with the procedural requirements of section 704(e) of the Act, we called counsel for the petitioners informing them of the proposed agreement. At that time, we discussed the essential points of the proposed agreement and offered to answer any questions. These parties also received a copy of the proposed agreement on that date.

Scope of the Investigation

The product covered by this investigation is carbon steel wire rod manufactured in Brazil and exported, directly or indirectly, from Brazil to the United States. The term "carbon steel wire rod" covers a coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.02 inch nor over 0.74 inch in diameter, not tempered, not treated, and not partly manufactured, and valued over 4 cents per pound, as currently provided for in item 607.17 of the *Tariff Schedules of the United States*.

The period for which we are measuring subsidization is calendar year 1981.

Changes Since the Preliminary Determination

(1) *IPI Export Credit Premium.* Our preliminary determination on this program was based on IPI credits received from July 1, 1981 to March 31, 1982, divided by the value of exports for the same period. We noted at the time our concern that the subsidy may have been understated.

At verification, this concern proved correct. The companies record IPI credits when received, which are based on shipments that may have taken place two to three months before. The export figures we used as the denominator bear little relation to the IPI credits received during the same period.

To calculate the value of the IPI credits, we sampled Belgo-Mineira's and COSIGUA's receipts of IPI credits and traced each to the appropriate shipment. We established that the only deduction made from the value of the shipment before the IPI credit is calculated is an agent fee and that not all shipments have this deduction. For each shipment, we calculated the value of the IPI credits as a percentage of the gross value of the shipment. We made this calculation as of the date of the shipment rather than the date of receipt of the IPI credits, not taking into account the devaluation of the cruzeiro in accordance with section 771(6)(B) of the Act.

Instead of the 10.63 percent *ad valorem* subsidy reported in our preliminary determination, we calculated a benefit of 14.89 percent. This rate was based on the 1981 export credit premium of 15 percent. To determine the appropriate export tax, we are prorating the IPI credit found on all carbon steel wire rod shipments by the appropriate rates in the phase-out schedule of the IPI set out below:

September 30, 1982—December 30, 1982=11.0 percent
December 31, 1982—February 15, 1983=9.0 percent
February 16, 1983—April 1, 1983=4.5 percent
April 2, 1983 onward=0 percent

(2) *Export Credits Under Resolution 68.* During verification we discovered that loans at preferential rates had been contracted under this program in 1981.

Normally, we do not consider that benefits are received from loans at preferential rates until payment is due. In this case, the first of four semi-annual payments by importers on all of the loans taken out under this program was not due until after the end of the review period. Consequently, there was no benefit to exports of wire rod to the United States under this program in 1981. However, the suspension agreement obligates the government of Brazil to offset, by an export tax, all current benefits on wire rod exports to the United States. Without a value as yet for 1982 exports, we must estimate the current level of subidy. Based on 1981 exports to the United States we estimate that the benefit from the loans learned about at verification is about 0.5–0.75 percent. Any new loans since that time would, of course, increase this benefit.

(3) *Long-Term Loans.* We stated in our preliminary determination that we required additional information on long-term loans to Belgo-Mineira and COSIGUA before making a determination on the allegation that such loans confer subsidies. At verification, we examined several foreign currency loans and found that such loans are granted with interest rates of LIBOR plus a spread that approximates the average spread available on such LIBOR loans in Brazil. We further verified that loans from FINAME, a program of the National Bank for Economic Development (BNDE) for the purchase of capital equipment manufactured in Brazil, are fully indexed and are made at fixed real interest rates ranging from 7 to 11 percent, depending on the time the loan was granted

FINAME loans are available to a wide variety of sectors in Brazil. While the steel industry is one of the chief recipients, this appears to be warranted in view of the capital requirements of a large capital-intensive industry. Other large capital-intensive industries have received loans in similar proportions. In addition, numerous other sectors also received loans from FINAME during this period. We do not have a benchmark in Brazil for comparing the interest rates on these loans, because of a lack of alternate sources of such financing. However, the real interest rates of 7 to 11 percent are quite high by international standards. Based on the general availability of these loans, we have determined that they do not confer a subsidy.

Petitioners' Comments

The Department has consulted with counsel for the petitioners, and received the following comments from them objecting to the proposed suspension agreement. Our responses are shown for each comment.

Issues Related to the Suspension Agreement

Comment 1: The petitioners suggest that paragraph B.1.(h) be modified by inserting "including any annual review" after the phrase "in this proceeding."

DOC Position: The suggested addition is redundant. The phrase "in this proceeding" encompasses annual reviews and any action taken by the Department with respect to this case until the case is terminated or revoked.

Comment 2: The petitioners contend that the representative period chosen as a reference period for the section 704(d)(2) requirement—that exports not increase in the interim period between suspension and imposition of the export tax—perpetuates the recent surge of imports of Brazilian carbon steel wire rod into the United States.

DOC Position: We are required to select "the most recent representative period." Accordingly, we chose the period February 1982—the most recent 12-month period prior to the filing of the petition. The petitioners have contended that we should use a two-year period, 1980–1981, to reflect more accurately the long-term level of Brazilian wire rod exports to the United States. The suggested period has 19 months of non-shipment prior to entry into the market and the increase of imports. The period we have chosen begins with 6 months of non-shipment, and the time period—the 12-month period before the petition was filed—correlates with the reference period in the suspension agreement on carbon steel plate from Brazil. We note that the periods covered by this quantitative restraint is very short—until October 20, 1982, when the offsetting export tax will go into effect.

Comment 3: The petitioners request that paragraph C.2 be modified by adding the words "production, or export" after the word "manufacture," to comport with the language of the Act.

DOC Position: We have inserted the proposed amendment.

Comment 4: The petitioners state that for effective monitoring to be practicable, the agreement should require that payment of the export tax be reflected on export documents presented to the Customs Service. They claim that this would provide verification that the export tax has been paid on shipments subject to the agreement and that the Customs Service would have appropriate documentation of that fact.

DOC Position: Such a requirement would not enhance the monitoring of the agreement. The U.S. Customs Service is not the administering authority; export documents made available to the Customs Service are not normally available to the Department; and, if such information were lacking on export documents, the Customs Service would not have the authority under a suspension agreement to suspend liquidation, impose countervailing duties, or deny entry. Provided the government of Brazil can present upon request appropriate documentation that the export tax has been timely paid, the agreement can be effectively monitored.

Comment 5: The petitioners state that for effective monitoring the agreement should specify the minimum amount of information to be supplied pursuant to paragraph C.1, and that this information should include on a quarterly basis the monthly volume and value of exports of the subject product to the United States, the total amount of export tax collected and documentation of payment of the tax.

DOC Position: The suggested amendment is unnecessary because paragraph C.1 is not limiting. The Department may request, at any time, any information it deems necessary for effective monitoring of the agreement.

Comment 6: The petitioners state that the agreement should include a provision whereby the government of Brazil consents to access to verification reports by counsel for the petitioners under an administrative protective order, so that counsel may monitor independently the efficacy of the agreement.

DOC Position: Non-confidential versions of verification reports are normally available to the public. A determination concerning the request by counsel for release of the confidential version of a verification report under protective order will be made at the time such requests are submitted.

Comment 7: The petitioners state that the suspension agreement fails to fulfill the explicit statutory conditions of section 704(d)(1) of the Act that any suspension agreement be in the public interest.

DOC Position: By its terms, the suspension agreement will offset completely the net subsidy, and *a fortiori* eliminates any injury caused by the net subsidy, without the added expense to the U.S. taxpayers, petitioners, and respondents of completing the investigation.

Subsidy Issues

Comment 8: The petitioners assert that in calculating the net subsidy under Resolution 674 financing, the Department used an incorrect benchmark. They state that the Banco do Brasil rate for discounting accounts receivable is not a proper benchmark because the discounting of accounts receivable is no longer the most common method of raising working capital. Further, they state that the Department must factor in compensating balances (although illegal in Brazil) to determine an effective interest rate; that the Department has not used its own standard of a national average commercial rate as a benchmark; and that in determining that benchmark the Department should use as one basis of comparison the rate for borrowing in international financial markets.

DOC Position: The Department believes from evidence available to it that there is no meaningful commercial market for short-term working capital loans in Brazil. Instead, most firms meet their needs for working capital through the sale of accounts receivable. Therefore, the Department has determined that the discounting of accounts receivable provides the most appropriate basis for comparison.

In determining a national benchmark, the Department chose the Banco do Brasil rate because prior case precedent and statements of the government of Brazil suggested that this was the appropriate standard. As the largest single banking entity in Brazil (representing 35–40% of all banking assets), the Banco do Brasil acts as a price leader from which the rates of other banks vary. Documents received at verification support our preliminary determination in several respects. First, the Banco do Brasil discount rate is 59.6 percent, as claimed; numerous banks, both state-owned and private, discount receivables at rates near (both above and below) the rate set by the Banco do Brasil. Second, as it applies to Belgo-Mineira and COSIGUA, the market for discounting accounts receivable is still quite active. During the period of review both companies discounted a significant percentage of their domestic accounts receivable with a wide variety of banks, and used this facility as the chief method of raising working capital. During verification, we found no evidence of compensating balances in company records; the amount received by the company after discounting a receivable was the value of a receivable minus the discount rate, the Tax on Financial Transaction (IOF) and a small commission. Lastly, in the memorandum to our preliminary determination we addressed the issue of comparability between cruzeiro and foreign currency sources for working capital. Our analysis has not changed since that time.

Comment 9: The petitioners state that the Department erred in its calculation of the interest equivalent of the discount rate for accounts receivable. They assert that it is normal procedure for a bank to have recourse to the seller of a receivable in the event of non-payment and thus the sale of a receivable has characteristics similar to a loan that must be repaid by the borrower. Consequently, they assert that we must determine the interest equivalent of the discount rate in the event of repayment by the seller and then compound this rate to determine a yearly effective rate for discounting accounts receivable. This procedure would yield a rate substantially higher than the 59.6 percent rate used by the Department to determine the interest subsidy of loans under Resolution 674.

DOC Position: The Department calculated the rate of 59.6 percent based on the following: (1) That the sale of an account receivable constitutes the purchase of an asset by a bank, in which the bank absorbs the risk of non-payment; (2) that once the sale is completed, the seller has no further obligation (such as repayment with interest) to the bank; and (3) that a series of sales of accounts receivable is not equivalent to rolling over a loan where interest on the original loan is compounded. As a result, the discount rate we have used is a simple rate and additive.

If the sale of an account receivable does in fact have more the character of a loan than the sale of an asset, we may have to reassess our position. We will investigate this matter further and make any necessary adjustments in the calculation of the interest differential and the net subsidy.

Comment 10: The petitioners state that FINAME loans are preferential when compared to long-term foreign currency loans granted at LIBOR-plus-spread, and thus FINAME loans confer a subsidy.

DOC Position: Long-term financing in cruzeiros is available in Brazil only through government-controlled financial institutions. We do not have a benchmark in Brazil for fixed interest rate long-term loans to compare with the interest rates on FINAME loans. However, since these loans are indexed, the interest rates are real interest rates. This allows us to construct a benchmark based on the real interest rates of the only private long-term loans commercially available in Brazil—the foreign currency loans referred to by the petitioners. The comparison of that constructed benchmark and the interest rates on these loans, as described below, suggests that they are not made at preferential rates.

Since LIBOR loans are continually readjusted at the prevailing interest rates we constructed the benchmark by calculating the average real interest component of LIBOR-plus-spread on long-term loans to Brazil for the period 1977–81 during which these FINAME loans were made. We than compared that average real interest rate-plus-spread to the rates at which the long-term FINAME loans were made. Our comparison showed that all the FINAME loans to Belgo-Mineira and COSIGUA were made at rates above the benchmark, which indicates that they were not made at preferential rates. We will monitor loans made by FINAME to Belgo-Mineira and COSIGUA in future section 751 administrative reviews in order to evaluate whether such loans were made at preferential rates.

Suspension of the Investigation

The Department has determined that the agreement will offset the subsidies completely with respect to the subject merchandise exported directly or indirectly to the United States, that the agreement can be monitored effectively, and that the agreement is in the public interest. We find, therefore, that the criteria for suspension of an investigation pursuant to section 704 of the Act have been met. The terms and conditions of the agreement, signed September 21, 1982, are set forth in Annex 1 to this notice.

Pursuant to section 704(f)(2)(A) of the Act, the suspension of liquidation of all entries, entered or withdrawn from warehouse, for consumption of carbon steel wire rod from Brazil effective July 14, 1982, as directed in our notice of "Preliminary Affirmative Countervailing Duty Determination, Carbon Steel Wire Rod from Brazil" is hereby terminated. Any cash deposits on entries of carbon steel wire rod from Brazil pursuant to that suspension of liquidation shall be refunded and any bonds shall be released.

The Department intends to conduct an administrative review within twelve months of the anniversary date of publication of this suspension as provided in section 751 of the Act.

Notwithstanding the suspension agreement, the Department will continue the investigation if we receive such a request in accordance with section

704(g) of the Act within 20 days after the date of publication of this notice.

This notice is published pursuant to section 704(f)(1)(A) of the Act.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

September 21, 1982.

Annex 1—Suspension Agreement—Carbon Steel Wire Rod From Brazil

Pursuant to section 704 of the Tariff Act of 1930, as amended ("the Act"), and section 355.31 of the Commerce Regulations, the United States Department of Commerce ("the Department") and the government of Brazil enter into the following suspension agreement ("the agreement") on the basis of which the Department shall suspend its countervailing duty investigation initiated on March 1, 1982 (47 FR 9261) with respect to carbon steel wire rod from Brazil. The agreement shall be in accordance with the terms and provisions set forth below.

A. Scope of the Agreement

The agreement applies to all carbon steel wire rod manufactured in Brazil and exported, directly or indirectly, from Brazil to the United States (hereinafter referred to as the "subject product"). The term "carbon steel wire rod" covers a coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.02 inch nor over 0.74 inch in diameter, not tempered, not treated, and not partly manufactured, and valued over 4 cents per pound, as currently provided for in item 607.17 of the *Tariff Schedules of the United States*.

B. Basis of the Agreement

1. The government of Brazil hereby agrees to offset completely the amount of the net subsidy determined by the Department to exist with respect to the subject product. The offset shall be accomplished by an export tax applicable to the subject product exported on or after October 20, 1982. The export tax shall be utilized to offset completely any benefits found to exist with respect to the following programs:

(a) The IPI export credit premium,
(b) Resolution 674 financing,
(c) Decree Law 1547 rebates for investment,
(d) Benefits on imported machinery received under the CDI program,
(e) The income tax exemption for export earnings,
(f) Export credits provided through Resolution 68,
(g) Accelerated depreciation for Brazilian-made capital goods, and
(h) Any other program subsequently determined by the Department in this proceeding to constitute a subsidy under the Act to the subject product.

The Department shall officially notify the government of Brazil of any determination made under item (h) above.

2. The government of Brazil certifies that no new or equivalent benefits shall be granted on the subject product as a substitute for any benefits offset by the agreement.

3. The offset of these benefits does not constitute an admission by the government of Brazil that such benefits are subsidies within the meaning of the U.S. countervailing duty law.

4. The government of Brazil agrees that from the effective date of the suspension of the investigation and until the imposition of an export tax no later than October 20, 1982 that completely offsets the net subsidy determined by the Department to exist, the rate of exports of the subject product will not exceed the average monthly rate of exports to the U.S. in the period February 1981–January 1982. The Department will monitor the exports of the subject product to the United States from the effective date of the suspension of the investigation until the imposition of the export tax and will issue instructions to the Customs Service to deny entry, or withdrawal from warehouse, for consumption of the subject product exported in excess of the average monthly rate in the period February 1981–January 1982.

C. Monitoring of the Agreement

1. The government of Brazil agrees to supply to the Department such information as the Department deems necessary to demonstrate that it is in full compliance with the agreement.

2. The government of Brazil shall notify the Department if any exporters of the subject product transship the subject product through third countries or apply for or receive, directly or indirectly, the benefits of the programs described in paragraph B(1) regarding the manufacture, production or export of the subject product.

3. The government of Brazil shall certify to the Department within 15 days after the first day of each three-month period beginning on January 1, 1983 whether it continues to be in compliance with the agreement by offsetting the net subsidy referred to in paragraph B(1) and whether it has substituted any new or equivalent benefits for the benefits offset by the agreement. Failure to supply such information or certification in a timely fashion may result in the immediate resumption of the investigation or issuance of a countervailing duty order.

4. The government of Brazil shall permit such verification and data collection as is requested by the Department in order to monitor the agreement. The Department will request such information and perform such verification periodically pursuant to administrative reviews conducted under section 751 of the Act.

5. The government of Brazil shall promptly notify the Department, with appropriate documentation, of any change in the amount of benefits to the subject product, of any change in the rate of the export tax, or if it decides to alter or terminate its obligations with respect to any of the terms of the agreement.

D. Violation of the Agreement

If the Department determines that the agreement is being or has been violated or no longer meets the requirements of section 704(b) or (d) of the Act, then section 704(i) shall apply.

E. Effective Date

The effective date of the agreement is the date of publication.

Signed on this 21st day of September, 1982.

For the Government of Brazil:

Luiz Felipe P. Lampreia,

Minister-Counselor, Brazilian Embassy.

I have determined that the provisions of paragraph B completely offset the subsidies that the government of Brazil is providing with respect to carbon steel wire rod exported directly or indirectly from Brazil to the United States and that the provisions of paragraph C ensure that this agreement can be monitored effectively pursuant to section 704(d) of the Act. Furthermore, I have determined that the agreement meets the requirements of section 704(b) of the Act and suspension of the investigation is in the public interest.

Department of Commerce.

By: Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Final Affirmative Countervailing Duty Determination: Carbon Steel Wire Rod From Belgium

AGENCY: International Trade Administration, Commerce.

ACTION: Final Affirmative Countervailing Duty Determination.

SUMMARY: We have determined that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Belgium of carbon steel wire rod, as described in the "Scope of the Investigation" section of this notice. The estimated net subsidy is indicated under the "Suspension of Liquidation" section of this notice. The U.S. International Trade Commission (ITC) will determine within 45 days of the publication of this notice whether these imports are materially injuring, or threatening to materially injure, a U.S. industry.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, telephone: (202) 377–3003.

SUPPLEMENTARY INFORMATION:

Final Determination

Based upon our investigation, we have determined that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers,

or exporters in Belgium of carbon steel wire rod, as described in the "Scope of the Investigation" section of this notice. The following programs are found to confer subsidies.

- capital grants
- exemptions from real property tax
- exemptions from capital registration tax
- loans to uncreditworthy companies
- equity participation by the government of Belgium (GOB)
- assumption of financing costs
- preferential loans
- industrial investment loans from the European Coal and Steel Community (ECSC)
- reimbursement of worker training costs
- readaptation and retraining assistance
- funds for loss coverage

We determine the estimated net subsidy to be the amount indicated in the "Suspension of Liquidation" section of this notice.

Case History

On February 8, 1982, we received a petition from counsel for Atlantic Steel Corp., Georgetown Steel Corp., Georgetown Texas Steel Corp., Keystone Consolidated, Inc., Korf Industries, Inc., Penn-Dixie Steel Corp., and Raritan River Steel Co., filed on behalf of the U.S. industry producing carbon steel wire rod. The petitioners alleged that certain benefits which constitute subsidies within the meaning of section 701 of the Act are being provided, directly or indirectly, to the manufacturers, producers, or exporters in Belgium of carbon steel wire rod. Counsel for petitioners alleged that "critical circumstances" exist, as defined in section 703(e) of the Act. We found the petitions to contain sufficient grounds upon which to initiate a countervailing duty investigation, and on March 1, 1982 we initiated a countervailing duty investigation (47 FR 9261).

Since Belgium is a "country under the Agreement" within the meaning of section 701(b) of the Act, an injury determination is required for this investigation. Therefore, we notified the ITC of our initiation. On March 25, 1982 the ITC preliminarily determined that there is a reasonable indication that imports of carbon steel wire rod from Belgium are materially injuring, or threatening to materially injure, a U.S. industry.

We presented questionnaires concerning the allegations to the Delegation of the Commission of the European Communities and to the Government of Belgium in Washington, D.C. On May 7, 1982 we received the responses to the questionnaires. A supplemental response was received on May 25, 1982. On July 8, 1982 we issued our preliminary determination in this investigation (47 FR 30541). This stated that the government of Belgium was providing its manufacturers, producers, or exporters of carbon steel wire rod with benefits which constitute subsidies. The programs preliminarily determined to bestow countervailable benefits were:

- "interest rebates"
- capital grants
- loan guarantees
- exemptions from real property tax
- exemptions from capital registration tax
- loans to uncreditworthy companies
- equity participation by the GOB
- assumption of financing costs
- labor assistance
- preferential loans
- industrial investment loans from the ECSC (Article 54)
- research and development aid

Scope of the Investigation

The product covered by this investigation is carbon steel wire rod. It is fully described in Appendix 1, which follows this notice.

Cockerill Sambre (Cockerill), is the only known Belgian producer and exporter of the subject product to the United States.

Cockerill Sambre is a company which resulted from the merger in June 1981 of Cockerill, which itself is a merger of several steel mills, and Hainaut-Sambre. Hainaut-Sambre was composed of three major components: Carlam, a recently constructed flat products mill which was mostly owned by Hainaut-Sambre; Thy-Marcinelle et Providence (TMP), which resulted from a merger of a Providence mill of the former Cockerill company with Thy-Marcinelle et Monceau in 1979; and the old Hainaut-Sambre Company. TMP merged with Hainaut-Sambre in 1980.

The period for which we are measuring subsidization is the calendar year 1981.

Analysis of Programs

In their responses, the GOB and the Delegation of the Commission of the European Communities provided data for the applicable periods. Additionally, we received information from Cockerill.

Throughout this notice, general principles applied by the Department of Commerce to the facts of the current investigation concerning carbon steel wire rod are described in detail in Appendices 2–4, which follow this notice. Where benefits were provided to the specific product, they were allocated over the value of sales of only that product in calculating the subsidy rate. Based upon our analysis of the petitions, responses to our questionnaires, our verification and oral and written comments by interested parties, we determine the following:

I. Programs Determined To Confer Subsidies

We have determined subsidies are being provided under the programs listed below to manufacturers, producers, or exporters in Belgium of carbon steel wire rod.

A. Programs Administered Under the Laws of July 14, 1966 and December 30, 1970 on Economic Expansion

The laws of July 18, 1959 and July 14, 1966 (the 1966 law) were economic development laws providing regional assistance. They predated the Law of December 30, 1970 (the 1970 law), which applies to the same regions covered by the earlier laws. The 1970 law provided for regional assistance to companies located in certain development areas to promote activities which contribute to the establishment, expansion, conversion or modernization of industrial enterprises. The 1966 law provided for assistance for economic reconversion and development of coal-producing regions and certain other regions experiencing grave and urgent problems. We have determined that benefits were provided under both the 1966 and 1970 laws (items 1–3 below) and that these benefits are countervailable because they are targeted to companies in specific areas.

1. *Capital Grants.* This program provides assistance in financing capital investments made by companies. A grant may be given which totally or partially replaces an "interest rebate" for which the investment is otherwise eligible under both laws. The methodology for calculating the subsidy value of grants is described in Appendix 2. The benefits are allocated over the average useful life of steel assets, 15 years, and are applied to the value of sales of the appropriate products of the company. Cockerill received several grants for less than $50 million. Where grants were not tied to any particular mill or product, but benefited carbon steel production, we allocated the benefits over the total sales value of carbon steel products produced by Cockerill.

The grants received by Cockerill amounted to a subsidy rate of .112 percent *ad valorem.*

2. *Exemptions from Real Property Tax.* Under the 1970 law, qualifying

investments may be granted an exemption from the real property tax levied by the state, province, or local community on the estimated rental income from fixed assets. The exemption may be granted for a period of up to five years, depending on the degree to which the investment program achieves the objectives of the 1970 law. Exemptions received by companies were treated as grants that are normally expensed in the year received and applied to the total sales value of carbon steel products of the company.

The subsidy rate for Cockerill under this program is 0.073 percent *ad valorem.*

3. *Exemptions from Capital Registration Tax.* Assets transferred to a company which makes investments pursuant to the 1970 law may be exempted from the one percent capital registration tax. We treated exemptions under this program as grants that are normally expensed in the year received. The entire amount of the benefit was allocated over the total sales value of all products of the company.

Cockerill received exemptions amounting to a subsidy rate of 0.404 percent *ad valorem.*

B. Restructuring Plan Programs

The GOB has mandated a reorganization of the steel industry in Belgium under the following enactments and agreements:

- The Reorganization Plan of 1978 (Hanzinelle Agreement)
- Council of Ministers decision of November 23, 1978
- Royal Decree of December 15, 1978
- Council of Ministers decision of May 15, 1981
- Related and additional agreements between the government and the individual steel companies

These are intended to assist the modernization of the steel industry. Specific programs include loans to uncreditworthy companies, equity participation by the GOB and assumption of financing costs. We find these programs to provide countervailable benefits.

1. *Loans to Uncreditworthy Companies.* Petitioners allege that Cockerill, Hainaut-Sambre and TMP (now merged with Cockerill) were uncreditworthy at the time that loans from government institutions were made to them. We determine Cockerill to be uncreditworthy from 1978 through 1981. The company received a large, unguaranteed private loan (for which there is no evidence of government direction) during 1977 which establishes its creditworthiness despite negative indicators. Cockerill has been uncreditworthy since 1977 for several reasons. First, the company sustained losses ranging from 2.4 to 7.3 billion Belgian francs (BF) in each of the last four years prior to its merger with Hainaut-Sambre in 1981. Second, certain significant financial ratios for this company indicate an uncreditworthy situation, including successive years (1975 through 1981) of negative cash flow and low current ratios. Third, Cockerill apparently lost access to loans from independent commercial sources after 1977. Fourth, the government-directed moratorium on Cockerill's debt service is a further indication of uncreditworthiness, as is the amount, timing and nature of some of the government equity participation.

We determine Hainaut-Sambre to be uncreditworthy from 1977 through 1981. First, Hainaut-Sambre sustained losses ranging from 0.7 to 5.4 billion BF during the five years preceding its merger with Cockerill in 1981. Second, certain significant financial indicators for this company indicate an uncreditworthy situation, including successive years (1976 through 1978 and 1980) of negative cash flow, and very low current ratios. Third, the government-directed Moratorium on this company's debt service is a further indication of uncreditworthiness, as is the amount, timing and nature of some of the government equity participation.

In our preliminary determinations, we made no decision concerning the uncreditworthiness of TMP because we lacked sufficient information to identify loans to the company. On the basis of information subsequently received we have identified separate loans made to TMP. It was therefore necessary to evaluate TMP's creditworthiness.

We determine TMP to be uncreditworthy from 1977 through 1979. First, the company sustained losses ranging from 0.5 to 1.8 billion BF in the 4 years prior to its merger with Hainaut-Sambre. Second, certain significant financial indicators for this company indicate an uncreditworthy situation, including successive years (1976 through 1978) of negative cash flow and very low current ratios. Third, the government-directed moratorium on this company's debt service is a further indication of uncreditworthiness, as is the amount, timing and nature of some of the government equity participation.

Because we consider Cockerill (and before their acquisition, TMP and Hainaut-Sambre) to have been uncreditworthy, loans and loan guarantees issued by the GOB during the period of uncreditworthiness are treated essentially as equity investments. Under the equity methodology for loans to uncreditworthy companies as discussed in Appendix 2, we compared the national rate of return on equity in Belgium to the rate realized by Cockerill. To prevent countervailing a higher subsidy amount than if the loan had been an outright grant to the company, we limited the 1981 benefit under this methodology to the result that would be found if the loans were treated as grants under the grant methodology discussed in Appendix 2. The countervailable benefit from each loan was allocated over the total sales value of all steel production of the company. Loans actually converted to equity of convertible debentures are treated separately under the section entitled "Equity Participation by the GOB," which follows.

The benefits to Cockerill under this program amounted to a subsidy rate of 1.075 percent *ad valorem.*

2. *Equity Participation by the GOB.* The GOB has purchased equity in certain steel companies and has converted "medium-" and long-term debt to equity. Equity infusions by the GOB took place as follows:

- Cockerill

1979—Converison of debt to equity and convertible debentures

1981—Conversion of debt to equity and convertible debentures; purchases of equity to cover "cash drains"

- Hainaut-Sambre

1979—Conversion of debt to equity and convertible debentures

- TMP

1979—Conversion of debt to equity and convertible debentures

Equity participation by the government is not a subsidy *per se.* Petitioners allege, however, that government infusions of equity in Belgian steel companies were made at a time when these infusions did not represent sound commercial investments. Under the methodology described in Appendix 2, the treatment of government equity in a company hinges essentialy on an analysis of the soundness of the investment. If such an investment was not reasonably sound at the time it was made, we will consider it as giving rise to a potential subsidy.

As described *supra,* all the companies listed above recorded substantial and persistent losses over the last several years. Cockerill sustained losses from 1975 through 1981. Hainaut-Sambre sustained losses from 1975 through 1980, and TMP incurred losses from 1975 through 1979.

Under normal business or financial criteria, companies exhibiting a pattern of deep or significant continuing losses and unfavorable financial ratios would not be regarded as sound commercial investments. In view of these histories of losses and other factors already discussed in the preceding section entitled "Loans to Uncreditworthy Companies," we do not regard these Belgian steel companies as representing sound commercial investments at the time the GOB acquired equity positons in them. Therefore, we determine that the equity infusions were inconsistent with commercial considerations.

Since the stocks of Cockerill, Hainaut-Sambre and TMP were traded on Belgian markets during the time span covering the government's equity infusions, we looked to the market and determined the value of the benefit by comparing the market value of these stocks at the beginning of the month in which the equity infusions were made to the actual price paid by the government. If the value paid by the GOB was greater than the market value, we treated the difference as a grant and allocated it over the average useful life of steel assets, 15 years, and over the total value of the company's sales.

In 1979 and 1981 the GOB entered into arrangements with Cockerill whereby it converted the company's debt into convertible debentures. Because these debentures will be repayable only at such time as the company makes sufficient profits to overcome its present heavy debt burden, we treated these conversions as tantamount to purchases of equity in amounts equal to the value of the debentures.

The benefit to Cockerill under this program amounted to a subsidy rate of 4.981 percent *ad valorem.*

3. *Assumption of Financing Costs.* The GOB, in addition to converting debt to debentures, has assumed all financing costs on "medium-" and long-term borrowing for Cockerill for the years 1979–83 and postponed the repayment of principal until 1984. We treated the assumption of interest charges as grants to Cockerill and followed the methodology described in Appendix 2. Because the grants under this program were not tied to specific capital equipment, we allocated the benefits over the average useful life of steel assets, 15 years, and over the total sales value of steel products produced by Cockerill.

The benefit to Cockerill under this program amounted to a subsidy rate of 2.619 percent *ad valorem.*

C. Preferential Loans

The Societe Nationale de Credit a l'Industrie (SNCI) is a lending institution created by the GOB which sets the long-term interest rates generally adhered to by private banks in Belgium. Loans were provided to Cockerill (prior to the years in which we find it to be uncreditworthy) by SNCI at interest rates lower than those provided by the lender to other customers. We treated these loans as preferential loans to the recipient companies. To calculate the benefit from these preferential loans, we followed the methodology outlined in Appendix 2.

Cockerill also received a short-term loan from the GOB in 1981 that we have determined to be preferential. For short-term benchmark rates we used the representative money-market rates for Belgium for the month the loan was received. We found the difference between the interest rate provided by the GOB and our benchmark to represent an interest subsidy to Cockerill. We calculated the interest saved by Cockerill on that loan during the applicable period of 1981 and treated it as a grant expensed in the year received.

The subsidy rate to Cockerill for this program is 0.025 percent *ad valorem.*

D. Industrial Investment Loans From the ECSC (Article 54)

For the reasons described in Appendix 3, we have determined that ECSC industrial investment loans (pursuant to Article 54 of the Treaty of Paris) provide countervailable benefits. Cockerill received such loans between 1962 and 1976. We calculated the benefits from these loans made to Cockerill by using the methodology for loans to companies not considered uncreditworthy described in Appendix 2. We allocated the benefits of these loans over the total sales value of carbon steel products of the company.

The benefits for Cockerill amounted to a subsidy rate of 0.036 percent *ad valorem.*

E. Reimbursement of Worker Training Costs

The National Employment Office in Belgium reimburses firms for various in-plant and outside professional training costs. Increased benefits are provided to enterprises located in development areas or in areas in which coal mine closings have adversely affected the economic or social situation in the area. We have determined that this program is countervailable because of its regional nature.

The benefit of Cockerill amounted to a subsidy rate of 0.014 percent *ad valorem.*

F. Readaptation and Retraining Assistance

The GOB finances a portion of readaptation and retraining assistance for laid-off employees under Article 56 of the ECSC Treaty (described in Appendix 3). The program provides for the assumption by the government of a portion of the training costs of the steel companies for the re-employment of laid-off workers. We have determined that laid-off workers are being retrained to assume jobs in the steel industry and that the assistance is, therefore, a subsidy to a participating steel company.

The benefits to Cockerill amounted to a subsidy rate of 0.045 percent *ad valorem.*

G. Funds for Loss Coverage

The GOB has provided equity infusions to Cockerill for "cash drains." These funds have been treated as grants used to cover operating deficits. Since these funds were for loss coverage, the benefits were used fully in the year received (see Appendix 2).

The benefits to Cockerill amounted to a subsidy rate of 3.841 percent *ad valorem.*

II. Programs Determined Not To Confer Subsidies

We have determined that subsidies are not being provided under the following programs to manufacturers, producers, or exporters in Belgium of carbon steel wire rod.

A. Environmental Incentives

The GOB provides funding for certain environmental projects. Cockerill received small grants under this program. We have reviewed the applicable laws and have found no provisions which limit aid for environmental projects to specific industries or regions. Since the grants are generally available and we have no evidence that the steel industry in Belgium is a major beneficiary, we have determined that this program does not provide subsidies to the steel industry.

B. Assistance to the Coal Industry

In our preliminary determination, we found that subsidies to Belgian coal producers did not bestow a countervailable benefit upon the production, manufacture or export of Belgian steel.

Between the preliminary determination and this final

determination, we have analyzed and verified aspects of the Belgian coal subsidy program as it applies to steel. Based upon the verified information in the records of these investigations, we find that this program does not confer a countervailable benefit on Belgian steel producers for the following reasons.

Benefits bestowed upon the manufacturer of an input do not necessarily flow down to the purchaser of that input, if the sale is transacted at arm's length. In an arm's-length transaction the seller generally attempts to maximize its total revenue by charging as high a price and selling as large a volume as the market will bear.

These principles apply to Belgian coal sales as follows. With respect to sales of Belgian coal outside Belgium, the price charged for subsidized Belgian coal certainly does not undercut the freely available market price. Therefore, non-Belgian purchasers of subsidized Belgian coal do not benefit from Belgian coal subsidies.

In support of this conclusion, we note that if non-Belgian steel producers did benefit from Belgian coal subsidies, they would attempt to purchase more Belgian coal rather than unsubsidized coal from other sources, including the U.S. The fact that they purchase significant amounts of unsubsidized coal from other sources indicates that the subsidies on Belgian coal do not flow to non-Belgian coal consumers.

Moreover, it is extremely unlikely that the Belgian government would subsidize non-Belgian coal consumers unless compelled to do so by obligations to the European Communities.
Since there is no evidence of such obligation, we conclude that the Belgian government is not in fact subsidizing non-Belgian coal consumers.

With respect to sales of Belgian coal within Belgium—which account for the vast majority of all sales of Belgian coal—we likewise find that the price of Belgian coal does not undercut the market price. Absent special circumstances warranting a contrary conclusion, Belgian steel producers apparently do not benefit from Belgian coal subsidies at least as long as the price for Belgian coal does not undercut the market price.

Further consideration is warranted for two reasons. First, the major Belgian coal producer and Cockerill are both largely government-owned. The issue arises whether transactions between them are conducted on an arm's-length basis. We do not believe that government ownership *per se* confers a subsidy, or that common government ownership of separate companies necessarily precludes arm's-length transactions between them. To determine whether coal sales between Belgian government-owned coal and steel producers appear to have been consummated on arm's-length terms, we considered two factors: (1) Whether the government-owned coal producer sold to the government-owned steel producer at the prevailing market price, and/or (2) whether the government-owned coal producer sold coal at the same prices to steel producers not owned by the government (*e.g.*, Clabecq). We found that Belgian coal producers did charge the prevailing market prices, and that the same coal prices were charged regardless of whether the purchaser was or was not Belgian government-owned. On this basis, we conclude that coal subsidies were not conferred on steel producers as a result of government ownership.

Second, we were told by one Belgian government official that Belgian steel companies are pressured to purchase all coking coal produced by Belgian coal companies at the price established by the government, based upon market prices. This indicates that there are *de facto*, although not *de jure*, restrictions on the importation of coal into Belgium. However, the Belgian coal companies collectively produce only enough coking coal to satisfy less than 50% of the Belgian steel companies' requirements. Therefore, the market prices outside Belgium remain relevant, both directly for the coking coal purchased outside Belgium, and indirectly for the Belgian coking coal since the Belgian price is based on market prices outside Belgium.

Moreover, there is no evidence that the Belgian government would pressure Belgian steel producers to buy Belgian coal if the price for such coal were to rise significantly above the market price—a factor over which the Belgian government has control since it establishes prices.

Based upon the above considerations, we determine that Belgian coal subsidies do not confer upon Belgian steel producers a subsidy within the meaning of the Act.

Regarding the allegation that the Belgian steel industry benefits from German government assistance provided to the coal industry in the FRG, we do not consider such assistance to confer a countervailable benefit on the Belgian steel industry for the reasons outlined in Appendix 2.

The ECSC provides various production and marketing grants to ECSC coal and coke producers. However, we do not consider this assistance to confer a countervailable benefit on the Belgian steel industry for the reasons described in Appendix 3.

C. Programs Contained in the Law of July 17, 1959 for Economic Expansion

The Law of July 17, 1959 for economic expansion (the 1959 law) contains programs which are designed to promote economic expansion and modernization. The 1959 law provides for interest rebates, grants for capital investments, government loan guarantees, exemptions from property taxes on investments approved under the law and grants for research and development (R.&D.). Cockerill received benefits under this law, but these benefits are generally available to all industries in Belgium on equal terms, and we have no evidence that the steel industry in Belgium is a major beneficiary. Thus, absent other evidence of preferentiality, the benefits under this law are not countervailable.

D. GOB Advances for R&D Under the Economic Expansion Laws

Interest-free advances can be provided under the 1959 law and the 1970 law up to a maximum of 80 percent of the expense incurred for the R&D of prototypes. The GOB responded that it has provided this type of aid to the steel industry under the 1959 law, which we have concluded does not confer countervailable benefits, as discussed above.

E. Supplier Credit

Subsequent to the preliminary determination in this investigation, it was alleged in the case of Certain Steel Products from Belgium that, but for government assistance, Cockerill would not have been able to obtain supplier credit. We have no information that would cause us to believe that the supplier credits are provided on terms inconsistent with commercial considerations. Since these credits have been provided by independent, private sources and we have no evidence that the GOB has influenced financial institutions in this regard, we have determined that this program does not provide subsidies to the steel industry. For further discussion of this program, see Appendix 2.

F. Maribel Program

Subsequent to the preliminary determination in this investigation, it was alleged in the case of Certain Steel Products from Belgium that Belgian steel producers benefited from a change in the social security system instituted on July 1, 1981. Under the "Maribel Program," contributions to social security programs by employers of manual workers were reduced by 6.17 percent. Counsel for Bethlehem

maintains that since the program is restricted to manual workers, it provides benefits to a specific industry or group of industries and is, therefore, countervailable. We have decided that assistance to virtually all manual workers does not create a program targeted to steel or to a specific enterprise or industry or group of enterprises or industries. Therefore, we determine that the program does not confer countervailable subsidies to the steel industry.

G. Labor Assistance (Prepension Program)

The government-mandated restructuring of the steel industry included provisions for the early retirement of certain workers. The government assumed responsibility for funding costs for which the company would not normally be obliged. We have determined that this government assistance does not confer countervailable benefits to the companies because it is really extra assistance to the workers passed through the companies.

H. Research and Development (R&D) From the GOB

The GOB provides R&D funds to a wide range of disciplines through the Institute for Scientific Research in Industry and Agriculture (IRSIA). Funding is provided for projects which "ensure the progress" of industry and agriculture. IRSIA is administered by a board of directors which has representation from various sectors of industry and agriculture, trade unions and educational institutions.

In the preliminary determination the Department considered that this program conferred countervailable benefits to Cockerill because of direct grants to it by IRSIA. Because of the broad scope and administration of the IRSIA program, we have determined that the program is not countervailable since there is no evidence of targeting funds for an industry under investigation. In the 1980–81 research cycle, approximately 11 percent of IRSIA's budget went to the entire metallurgical sector for research involving steel and non-ferrous metals.

III. Programs Determined Not To Be Used

We have determined that the following programs which were listed in the notice of "Initiation of Countervailing Duty Investigations" were not used by the manufacturers, producers, or exporters in Belgium of carbon steel wire rod.

A. Accelerated Depreciation

Companies that receive investment benefits provided for by the 1970 law may take twice the normal annual straight-line depreciation for assets acquired as the result of the investment. The benefit from the program is reduced taxable income. Cockerill had losses during the period for which we are measuring subsidization greater than the amounts that would have been saved by use of accelerated depreciation.

B. Employment Premiums

Article 14 of the 1970 law provides for employment premiums for investments that create new jobs. The assistance may be given for new enterprises or for the expansion of existing enterprises. Nonrepayable premiums may be paid for as long as five years depending on the rate at which new jobs are created and filled. We have found no evidence that Cockerill participated in this program. Employment has dropped approximately 30 percent in the steel industry as the result of actions taken under the steel industry restructuring plan.

C. Contractual Aid

The 1970 law provides for aid in realizing specific objectives related to certain long-term, large scale investments. The government and an enterprise negotiate the specific terms of the program and enter into a "progress contract." The GOB has stated that this provision of the 1970 law has not been applied. Companies may also receive aid for reorganizations. Under "management contracts," the government may grant interest-free aid, to be repaid within three years, for up to 75 percent of management advisory fees. The GOB stated that of the twelve management contracts it has entered into, none were with steel companies.

D. Export Assistance

Certain export assistance programs, such as export financing and commercial risk guarantees, are provided by the Office National du Ducroire. We have found no evidence that Cockerill has received assistance under this program.

E. The European Regional Development Fund (ERDF)

On the basis of our investigations we have concluded that Cockerill has not received ERDF funds (see Appendix 3).

F. European Investment Bank (EIB)

We have determined that Cockerill did not carry loans from the EIB in 1981 (see Appendix 3).

G. Loan Guarantees From the ECSC

We have determined that Cockerill did not receive loan guarantees from the ECSC. For further discussion of this issue, see Appendix 3.

H. "Interest Rebates"

"Interest rebate" programs are administered by the Ministry of Economic Affairs. The rebates may be given on investment loans for tangible and intangible assets. The law also provides for "interest rebates" on interest payable by the companies to holders of bonds and convertible debentures. Rebates are variable depending upon the degree to which the investment projects meet the objectives of the 1970 law.

Upon verification we discovered that Cockerill did not receive "interest rebates" during the period for which we are measuring subsidization.

I. ECSC Interest Rebates and R&D Grants

We have determined that Cockerill did not participate in this program. For our treatment of these programs in general, see Appendix 3.

J. Reduction of Capital Gains Tax

Capital gains on the sales of tangible property may be exempt from corporate taxes if receipts are reinvested in Belgium in the development areas of the 1970 law within one year of the end of the tax period. We have determined that Cockerill did not receive any benefits under this program.

K. Employment Premiums for New Workers and Trainees

The "De Wulf Plan" (Royal Decree of October 15, 1979) grants employment premiums of 62,500 BF per quarter to companies that reduce their work week and increase their labor force. Under another plan, 30,000 BF may be paid for each trainee in excess of a number equaling one percent of the workforce of a company in 1980 and 1981. We have no evidence that Cockerill participated in this program.

Petitioners' Comments

Comment 1: Counsel for petitioners argue that programs contained in the Law of July 17, 1959 for economic expansion are countervailable and that the Department's interpretation of specificity under the Act is incorrect.

DOC Position: Two laws were passed in July 1959. Programs under the Law of July 18, 1959 are countervailable on the basis of regional preferentiality. Programs under the Law of July 17, 1959 are not countervailable because they are

available to companies in all regions and are not directed to a specific enterprise or industry or group of enterprises or industries. See Appendix 4 for a discussion of the Department's interpretation of preferentiality under section 771(5) of the Act.

Comment 2: Counsel for petitioners argue that the availability of unsubsidized substitutes for Belgian coal at comparable prices does not obviate the conclusion that Belgian coal subsidies provide a countervailable benefit to the steel industry. Petitioners state that Belgian coal subsidies are targeted to the steel industry. They argue further that transactions between Belgian coal and steel producers are unlikely to be conducted at arm's length since both buyer and seller are government-owned.

DOC Position: In our preliminary determination, one reason cited for concluding that Belgian subsidization of its coal industry does not indirectly subsidize its steel industry is that Belgian governmental assistance is provided to producers of all types of coal, not just coking coal. On this basis, we preliminarily determined that assistance does not subsidize "* * * a specific enterprise or industry or group of enterprises or industries" under investigation.

Upon verification, we determined that the great majority of subsidized Belgian coal is coking coal, which is used primarily by the steel industry (although the Belgian steel industry acquires 55–60 percent of its coking coal from foreign sources, including the U.S.). In this final determination, therefore, we are basing our determination on a different basis, as indicated *supra*. Also as explained *supra*, we do not believe that govrnment ownership of separate companies necessarily precludes them from conducting some transactions on an arm's-length basis. Since the major Belgian coal producer and Cockerill are both largely government-owned, we consider whether (1) the coal prices charged to Cockerill were at the prevailing market rates; and (2) whether the same prices were charged to Cockerill and to othe steel producers not owned by the Belgian government. Since we reached affirmative determinations in both cases, we concluded that it is reasonable to assume that coal transactions between the Belgian government's coal producer and Cockerill were conducted on an arm's-length basis.

Comment 3: Petitioners claim that there are implicit restrictions on the amount of coal Belgian steel companies can buy from abroad.

DOC Position: As indicated *supra*, and in the Department's verification report concerning the GOB, there is some evidence that Belgian steel companies are pressured by the Belgian government to purchase the entire output of Belgian coal companies. (There is no evidence that there are any *de jure* restrictions on the importation of coal). However, Belgian coal producers at best can satisfy less than 50 percent of the requirements of Belgian steel producers. Therefore, market prices outside Belgium remain relevant in determining whether Belgian steel producers benefit from assistance to Belgian coal producers for the following reasons. First, the price for Belgian coal established by the Belgian government is based upon that market price, which is thus indirectly relevant. Second, over 50 percent of the Belgian steel companies' requirements for coking coal are satisfied through coking coal imports. Their prices are therefore directly relevant. Moreover, there is no evidence that the Belgian government would continue to pressure its steel producers to buy Belgian coal if the price for Belgian coal rose significantly above market price. We, therefore, determine that even if there are *de facto* restrictions on the importation of coking coal into Belgium, the Belgian steel producers nonetheless received no countervailable benefits from subsidization by the GOB of its coal industry.

Comment 4: Counsel for petitioners argue that the portion of ECSC assistance funded by producer levies is countervailable.

DOC Position: For reasons set forth in Appendix 3, we determine that the portion of ECSC assistance funded by producer levies is not countervailable.

Comment 5: Counsel for petitioners argue that the discount rate for grant calculations for uncreditworthy companies should be increased to reflect the more limited access of these companies to private funding.

DOC Position: For a discussion of this issue, refer to Appendix 2.

Respondent's Comments

Comment 1: Counsel for Cockerill argues that the Department adopted new methodologies for the calculation of subsidy rates without the normal regulatory notice and comment procedures. They stated that the concept of "creditworthiness" and the methodologies described in Appendix B of the preliminary determinations have no basis in law.

DOC Position: For a discussion of this issue, refer to Appendix 4.

Comment 2: Counsel for Cockerill argues that the stock market price used by the Department does not represent an adequate basis for comparison with the price paid by the GOB because it does not include the added value of a premium for gaining control of the company. In addition, they state the prices paid by the GOB were below book value and were comparable to those paid by purchasers of stock in other European steel mills.

DOC Position: The Department believes that the price set by the market for Cockerill's stock is the most appropriate measure of the true value of its equity. For further discussion of this issue, see Appendix 2.

Comment 3: Counsel for Cockerill argues that the Department's creditworthiness decision concerning Cockerill is incorrect. They assert that Cockerill and Hainaut-Sambre have received substantial private lending in the form of short-term loans. They further argue that the GOB does not implicitly stand behind Cockerill to help it get private credit because the GOB has let several companies it owns go bankrupt. Thus, they argue, Cockerill is creditworthy independent of the backing of the GOB.

DOC Position: Respondent argues that Cockerill is creditworthy because it has received short-term credit from private sources. We determine, however, that such lending, which is largely backed by receivables, does not imply a judgment of creditworthiness.

We determine Cockerill to be uncreditworthy from 1978 through 1981. For each of those years, various financial indicators pointed to the uncreditworthiness of the company. For further discussion of this issue, see the section titled "Loans to Uncreditworthy Companies" *supra*.

Comment 4: Counsel for Cockerill argues that programs under the law of December 30, 1970 are not countervailable for the following reasons:

- The law is regional but not targeted to specific industries.
- The 1970 law is similar to the general law of July 17, 1959.

DOC Position: The 1970 law provides benefits only to companies in certain regions. Consequently, these benefits are provided to a specific group of enterprises or industries and are countervailable under section 771(5) of the Tariff Act of 1930. Further, past administrative practice, judicial decisions, and the legislative history of the Trade Agreements Act of 1979 make

it clear that regional benefits are countervailable.

Comment 5: Respondent argues that since the 1970 law, which provides benefits only to certain regions, provides only marginally higher benefits than would be available under the July 17, 1959 law, only the incremental benefit should be countervailed.

DOC Position: The benefits to which respondents refer were provided under the 1970 law. The Department would have to ignore the facts in the record to treat benefits provided under the 1970 law as if they were provided under the July 17, 1959 law.

Comment 6: Counsel for Cockerill argues that the benefits from the capital registration tax resulted from a corporate reorganization and that similar tax exemptions exist in the United States. They state that there would have been no such benefit if the funds received from the GOB were grants rather than equity.

DOC Position: Regardless of the circumstances of the increase in capital, this exemption from a statutory obligation, provided under the regional incentive law of December 30, 1970, confers a countervailable benefit on cockerill.

Comment 7: Counsel for cockerill argues that the GOB "prepension" benefits are not countervailable subsidies. They argue that , but for these provisions, the company would have had to pay 3–6 months of severance pay to retiring workers, which is less than the obligations under the "prepension" program. They state that under the restructuring plan the government mandated these extraordinary benefits to retirees and at the same time helped the companies to pay for them.

DOC Position: The Department has determined that since the government mandated these payments to the workers as part of the steel restructuring plan, the company is merely a conduit for the flow of funds from the government to the workers, and the government's contribution is not countervailable. See additional discussions of this issue at petitioner's comment on the "prepension program" and the section of this notice titled "Labor Assistance (Prepension Program)."

Comment 8: Counsel for Cockerill argues that the largest instance of research and development funding to Cockerill was made available under the general incentive law of July 17, 1959.

DOC Position: The Department verified that this benefit was granted specifically under the law of July 17, 1959 and determined that it is not a countervailable benefit to Cockerill.

Negative Determination of Critical Circumstances

The petition alleged that imports of carbon steel wire rod under investigation present "critical circumstances." Under §§ 355.29 and 355.33(b) of the Department's regulations, critical circumstances exist when the alleged subsidies include an export subsidy inconsistent with the Agreement and there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period. We have not found any export subsidy in this investigation. Therefore, "critical circumstances" do not exist in this investigation for a carbon steel wire rod from Belgium.

Verification

In accordance with section 776(a) of the Act, we verified the data used in making our final determinations. During this verification, we followed normal procedures, including inspection of documents, discussions with government officials on-site inspection of manufacturers' operations and records.

Administrative Procedures

The Department has afforded interested parties an opportunity to present oral views in accordance with its regulations (19 CFR 355.35). A public hearing was held on August 11, 1982. In accordance with the Department's regulations (19 CFR 355.34 (a)), written views have been received and considered.

Suspension of Liquidation

The suspension of liquidation ordered in our preliminary affirmative countervailing duty determination shall remain in effect until further notice. The estimated net subsidy is as follows:

Manufacturer/producer/exporter	Ad valorem rate (percent)
Nacw	
Cockerill Sambre	13.225
All other manufacturers/producers/exporters	13.225

We are directing the U.S. Customs Service to require a cash deposit or bond in the amount indicated above for each entry of the subject merchandise entered on or after the date of the publication of this notice in the **Federal Register.** If the manufacturer is unknown, the rate for all other manufacturers/producers/exporters shall be used.

ITC Notifications

In accordance with section 705(d) of the Act, we will notify the ITC of our determinations. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to these investigations. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine within 45 days of the publication of this notice whether imports of carbon steel wire rod are materially injuring, or threatening to materially injure, a U.S. industry. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. If, however, the ITC determines that such injury does exist, within 7 days of notification by the ITC of that determination, we will issue a countervailing duty order, directing Customs officers to assess a countervailing duty on carbon steel wire rod from Belgium entered or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the net subsidy determined or estimated to exist as a result of the annual review prescribed by section 751 of the Act. The provisions of section 707 of the Act will apply to the first directive for assessment.

This notice is published pursuant to section 705(d) of the Act and § 355.33 of the Department of Commerce Regulations (19 CFR 355.33).

Dated: September 21, 1982.

Lawrence Brady,

Assistant Secretary for Trade Administration.

Appendix 1.—

Description of Product

For the purpose of this investigation the term *"carbon steel wire rod"* covers a coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.20 inch nor over 0.74 inch in diameter, not tempered, not treated, not partly manufactured; and valued over 4 cents per pound, as currently provided for in item 607.17 of the *Tariff Schedules of the United States.*

Appendix 2.—Methodology

Several basic issues are common to the countervailing duty investigations of

carbon steel wire rod initiated by the Department of Commerce (the Department) on March 1, 1982; *e.g.*, government assistance through grants, loans, equity infusions, loss coverage, research and development projects and labor programs. This appendix describes in some detail the general principles applied by the Department when dealing with these issues as they arise within the factual contexts of these cases. This appendix, although substantially the same as Appendix B to the preliminary determinations (see "Preliminary Affirmative Countervailing Duty Determinations, Carbon Steel Wire Rod from Belgium (47 FR 30541)), does describe some changes in methodology. These changes are principally in the areas of the discount rate value, funds for loss coverage, and preferential loans with deferred principal payment.

Grants

Petitioners alleged that respondent foreign steel companies have received numerous grants for various purposes. Under section 771(5)(B) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1677(5)(B)), domestic subsidies are countervailable where they are "provided or required by government action to a *specific* enterprise or industry, or group of enterprises or industries" (emphasis added).

The legislative history of Title VII of the Act states that where a grant is "tied" to—that is, bestowed specifically to purchase—costly pieces of capital equipment, the benefit flowing from the grant should be allocated in relation to the useful life of that equipment. A subsidy for capital equipment should also be "front-loaded" in these circumstances; that is, it should be allocated more heavily to the earlier years of the equipment's useful life, reflecting its greater commercial impact and benefit in those years.

Prior to these cases on carbon steel wire rod, the Department allocated the face value of the grant, in equal increments, over the appropriate time period. For large capital equipment, we used a period of half the useful life of the equipment purchased with the grant. In each year we countervailed only that year's allocated portion of the total grant. For example, a hypothetical grant of $100 million used to purchase a machine with a 20-year life would have been countervailed at a rate of $10 million per year (allocated over the appropriate product group) for 10 years, beginning in the year of receipt.

This allocation technique has been criticized for not capturing the entire subsidy because it ignores the fact that money has a changing value as it moves through time. It has been argued that $100 million today is much more valuable to a grant recipient than $10 million per year for the next 10 years, since the present value (the value in the initial year of receipt) of the series of payments is considerably less than the amount if initially given as a lump sum. We agree with this position and, as indicated in the preliminary determinations, have now changed our methodology of grant subsidy calculation to reflect this agreement. As long as the present value (in the year of grant receipt) of the amounts allocated over time does not exceed the face value of the grants, we are consistent with both our domestic law and international obligations in that the amount countervailed will not exceed the total net subsidy.

The present value of any series of payments is calculated using a discount rate. As indicated in the preliminary determinations, we considered using each company's weighted cost of capital at the time of the grant receipt as the appropriate measure of the time value of its funds. However, we lacked sufficient information to do so for the preliminary determinations, and instead used the national cost of long-term corporate debt as a substitute measure of a company's discount rate.

Between the preliminary and final determinations we reviewed the comments and suggestions of various interested parties, principally contained in the pre- and post-hearing briefs. In addition, we sought the advice of an outside consultant with experience in the field of international investment banking.

On the bais of those discussions and the advice, we determine that the most appropriate discount rate for our purposes is the "risk-free" rate as indicated by the secondary market rate for long-term government debt (in the home country of the company under investigation). The basic function of the "present value" exercise is to allocate money received in one year to other years. Domestic interest rates perform this function within the context of an economy. The foundation of a country's interest rate structure is usually its government debt interest rate (the risk-free rate). All other borrowings incorporate this risk-free rate and add interest overlays reflecting the riskiness of the funded investment.

When we allocate a subsidy over a number of years it is not the intention of the Department to comment on or judge the riskiness of the project undertaken with the subsidized funds, nor to evaluate the riskiness of the company as a whole. We do not intend either to speculate how a project would have been financed absent government involvement in the provision of funds. Rather, we simply need a financial mechanism to move money through time so as to accurately reflect the benefit the company receives. We believe that the best discount rate for our purposes is one which is risk free and applicable to all commercial actors in the country. Therefore we have used in these final determinations long-term government debt rates (as reflected in the secondary market) as our discount rates.

For a costly piece of capital equipment, we believe that the appropriate time period over which to allocate the subsidy is its entire useful life. In the past, we allocated the subsidy over only half the useful life in order to "front-load" the countervailing duties, thereby complying with the legislative intent of the Act. However, so long as we allocate the subsidy in equal nominal increments over the entire useful life, it will still be effectively front loaded in real terms (as long as a positive discount rate is used) since money tomorrow is less valuable than money today.

For these steel investigations we have allocated a grant over the useful life of equipment purchased with it when the value of that grant was large (in these investigations, greater than $50 million) and specifically tied to pieces of capital equipment. Where the grant was small (generally less than one percent of the company's gross revenues and tied to items generally expensed in the year purchased, such as wages or purchases of materials), we have allocated the subsidy solely to the year of the grant receipt. We construe that a grant is "tied" when the intended use is known to the subsidy giver and so acknowledged prior to or concurrent with the bestowal of the subsidy. All other grants—the vast majority of those involved in these investigations—are allocated over 15 years, a period of time reflecting the average life of capital assets in integrated steel mills. The 15-year figure is based on Internal Revenue Service studies of actual experience in integrated mills in the U.S. Furthermore, we understand that a 15-year period is a common useful life adopted in some of the countries involved in these investigations for steel capital equipment. We are using this time period because we sought a uniform period of time for these allocations and this was the best available estimate of the average steel asset life worldwide. We could not calculate the average life of capital assets on a company-by-company basis, since different

accounting principles, extraordinary write-offs, and corporate reorganizations yielded extremely inconsistent results.

Funds to Cover Losses

In the preliminary determinations we did not distinguish funds (either in the form of untied grants or equity infusions) which were available for loss coverage from other grants or equity infusions. We stated that since grants used for loss coverage often have the effect of helping keep the firm in business, we allocated the benefit over 15 years when the funds were in the form of a grant or used the appropriate equity methodology when the loss coverage funds were in the form of equity.

Between the preliminary and final determinations we received the comments and suggestions of various interested parties principally contained in the pre- and post-hearing briefs. In addition, we sought the advice of the Department's accountants and outside consultants on the issue of the appropriate treatment of funds for loss coverage. Based on the above, we have decided not to allocate the subsidy benefit of these funds over time but rather to allocate them to the year of receipt.

We have done so on the advice of these accounting experts in order to reflect the nature of the liabilities giving rise to the loss. These liabilities are generally the basic costs of operations (*e.g.*, wages, materials, certain overhead expenses)—items generally expensed in the year incurred.

We calculated the magnitude of the loss from a company's financial statements beginning with net earnings and working back to a cash-based measure of loss. We allocated to loss coverage only those grants and equity infusions which were truly cash inflows into the company and were actually available to cover losses.

In any instances in which infusions were specifically tied to loss coverage, we allocated such infusions accordingly. If infusions were not so tied, we concluded that general, untied grants were a more logical source of loss coverage assistance than general infusions of equity. Accordingly, in making these allocations we treated funds available from grants as the primary source of monies available for loss coverage. We allocated funds available from equity infusions to loss coverage only in the absence of grants or after available grant funds had been exhausted.

We generally treated such cash inflows as covering the losses incurred in the previous fiscal year and allocated the subsidy benefit flowing from such funds to the year of their receipt. An exception was made where losses were continually covered by a special arrangement with the government (as through the use of a special reserve account). In these cases, since the funds for loss coverage were accessible as the losses arose, we allocated the benefit flowing from these funds to the period in which the losses occurred.

Loans and Loan Guarantees for Companies Considered Creditworthy

In these investigations, various loan activities give rise to subsidies. The most common practices are the extension of a loan at a preferential interest rate where the government is either the actual lender or directs a private lender to make funds available at a preferential rate, or where the government guarantees the repayment of the loan made by a private lender. The subsidy is computed by comparing what a company would pay a normal commercial lender in principal and interest in any given year with what the company actually pays on the preferential loan in that year. We determine what a company would pay a normal commercial lender by constructing a comparable commercial loan at the appropriate market rate (the benchmark) reflecting standard commercial terms. If the preferential loan is part of a broad, national lending program, we used a national average commercial interest rate as our benchmark. If the loan program is not generally available—like most large loans to respondent steel companies—the benchmark used instead, where available, is the company's actual commercial credit experience (*e.g.*, a contemporaneous loan to the company from a private commercial lender). If there were no similar loans, the national commercial loan rate is used as a substitute rate. Finally, where a national loan-based interest rate was not available, an average industrial bond rate was used as best evidence.

For loans denominated in a currency other than the currency of the country concerned in an investigation, the benchmark is selected from interest rates (either national or company-specific, as appropriate) applicable to loans denominated in the same currency as the loan under consideration (where possible, rates on loans in that currency in the country where the loan was obtained; otherwise, loans in that currency in other countries, as best evidence). The appropriate discount rate remains the risk-free rate as indicated by the secondary market rate for long-term debt obligations of the company's home country government. The subsidy for each year is calculated in the foreign currency and converted at an exchange rate applicable for each year.

After calculating the payment differential in each year of the loan, we then calculated the present value of this stream of benefits in the year the loan was made, using the risk-free rate (as described in the grants section of this appendix) as the discount rate. In other words, we determined the subsidy value of a preferential loan as if the benefits had been bestowed as a lump-sum grant in the year the loan was given. This amount was then allocated evenly over the life of the loan to yield the annual subsidy amounts. We did so with one exception: where the loan was given expressly for the purchase of a costly piece of capital equipment, the present value of the payment differential was allocated over the useful life of the capital equipment concerned.

For loans not tied to capital equipment with mortgage-type repayment schedules, this methodology results in annual subsidies equivalent to those calculated under the methodology previously employed by the Department whereby we considered the difference in total repayments in each year of a loan's lifetime to be the subsidy *in that year*. For loans with constant principal repayments (*i.e.*, declining total repayments), loans with deferral of repayments, and loans for costly capital equipment, the value method results in even allocations of the subsidy over the relevant period. This effectively front loads countervailing duties on these loan benefits in the same manner as grants are front loaded.

A loan guarantee by the government constitutes a subsidy to the extent the guarantee assures more favorable loan terms than for an unguaranteed loan. The subsidy amount is quantified in the same manner as for a preferential loan.

If a borrowing company preferentially received a payment holiday from a government lending institution or from a private lender at government direction, an additional subsidy arises that is separate from and in addition to the preferential interest rate benefit. The subsidy value of the payment holiday is measured in the same manner as for preferential loans, by comparing what the company pays versus what it would pay on a normal commercial loan in any given year. A payment holiday early in the life of a loan can result in such large loan payments near the end of its term that, during the final years, the loan recipient's annual payments on the subsidized loan may be greater than

they would have been on an unsubsidized loan. By reallocating the benefit over the entire life of the loan through the present value methodology described above, we avoid imposing countervailing duties in excess of the net subsidy. Where we have sufficient evidence that deferment of principal is a normal and/or customary lending practice in the country under consideration, then such deferral has not been considered as conferring an additional subsidy.

Loans and Loan Guarantees for Companies Considered Uncreditworthy

In a number of cases petitioners have alleged that certain respondent steel companies were uncreditworthy for purposes of these investigations at the time they received preferential loans for guarantees, and that they could not have obtained any commercial loan without government intervention.

Where the company under investigation has a history of deep or significant continuing losses, and diminishing (if any) access to private lenders, we generally agree with petitioners. This does not mean that such a company is totally uncreditworthy for all purposes. Virtually all companies can obtain limited credit, such as short-term supplier credits, no matter how precarious their financial situation. Our use of the term uncreditworthy means simply that the company in question would not, in our view, have been able to obtain comparable loans in the absence of government intervention. Accordingly, in these situations neither national nor company-specific market interest rates provide an appropriate benchmark since, by definition, an uncreditworthy company could not receive loans on these or any terms without government intervention. Nor have we been able to find any reasonable and practical basis for selecting a risk premium to be added to a national interest rate in order to establish an appropriate interest benchmark for companies considered uncreditworthy. Therefore, we continue to treat loans to an uncreditworthy company as an equity infusion by or at the direction of the government. We believe this treatment is justified by the great risk, very junior status, and low probability of repayment of these loans absent government intervention or direction. To the extent that principal and/or interest is actually paid on these loans, we have adjusted our subsidy calculation (which is performed using our equity methodology, *infra*) to reflect this. We have applied the rate of return shortfall (the amount by which the corporate rate of return on equity was lower than the national average rate of return on equity) only to the outstanding principal in the year which we are measuring subsidization. From this amount, we additionally substract any interest and fees paid in that year. Moreover, in no case do we countervail a loan subsidy to a creditworthy or uncreditworthy company more than if the government gave the principal as an outright grant.

Short-Term Credits

In all our cases, even the most financially troubled companies regularly receive short-term supplier credits. We find this type of debt different and easily distinguishable from the loans previously discussed. Where a company receives private-sourced supplier credits we have found this countervailable only where they were at preferential rates because of explicit government direction.

Where supplier credits were not given at a preferential rate directed by the government, we found no subsidy. Furthermore, since the risk involved and basis for giving supplier credits is qualitatively different than for long-term loans, we did not interpret the presence of supplier credits as an indication of creditworthiness.

Equity

Petitioners allege that government purchases of equity in respondent steel companies confer a subsidy equal to the entire amount of the equity purchased. Many respondents claim that such equity purchases are investments on commercial terms, and thus do not confer subsidies on these companies.

It is well settled that neither government equity ownership *per se*, nor any secondary benefit to the company reflecting the private market's reaction to government ownership, confers a subsidy. Government ownership confers a subsidy only when it is on terms inconsistent with commercial considerations. An equity subsidy potentially arises when the government makes equity infusions into a company which is sustaining deep or significant continuing losses and for which there does not appear to be any reasonable indication of a rapid recovery. If such losses have been incurred, then we consider from whom the equity was purchased and at what price, or, absent a market value for the equity, we examine the rate of return on the company's equity and compare it to the national average rate of return on equity.

If the government buys previously issued shares on a market or directly from shareholders rather than from the company, there is no subsidy to the company. This is true no matter what price the government pays, since any overpayment benefits only the prior shareholders and not the company.

If the government buys shares directly from the company (either a new issue or corporate treasury stock) and similar shares are traded in a market, a subsidy arises if the government pays more than the prevailing market price. The Department has a strong preference for measuring the subsidy by reference to a market price. This price, we believe, rightly incorporates private investors' perceptions of the company's future earning potential and worth. To avoid any effect on the market price resulting from the government's purchase or speculation in anticipation of such purchase, we used for comparison a market price on a date sufficiently preceding the government's action. Any amount of overpayment is treated as a grant to the company.

It is more difficult to judge the possible subsidy effects of direct government infusions of equity where there is no market price for the shares (as where, for example, the government is already sole owner of the company). Government equity participation can be a legitimate commercial venture. Often, however, as in many of these steel cases, equity infusions follow massive or continuing losses and are part of national government programs to sustain or rationalize an industry which otherwise would not be competitive. We respect the government's characterization of its infusion as equity in a commercial venture. However, to the extent in any year that the government realizes a rate of return on its equity investment in a particular company which is less than the average rate of return on equity investment for the country as a whole (thus including returns on both successful and unsuccessful investments), its equity infusion is considered to confer a subsidy. This "rate of return shortfall" (the difference between the company's rate of return on equity and the national average rate of return on equity) is multiplied by the original equity infusion (less any loss coverage to which the equity funds were applied) to yield the annual subsidy amount. Under no circumstances do we countervail in any year an amount greater than that which is calculated treating the government's equity infusion as an outright grant.

Forgiveness of Debt

Where we have found that the government has forgiven an outstanding

debt obligation, we have treated this as a grant to the company equal to the outstanding principal at the time of foregiveness. Where outstanding debt has been converted into equity (*i.e.*, the government receives shares in the company in return of eliminating debt obligations of the company), a subsidy may result. The existence and extent of such subsidies are determined by treating the conversions as an equity infusion in the amount of the remaining principal of the debt. We then calculate the value of the subsidy by using our equity methodology, *supra*.

Coal Assistance

As explained in detail in our notice of "Final Affirmative Countervailing Duty Determinations: Certain Steel Products from the Federal Republic of Germany" (47 FR 39345), we have analyzed and verified aspects of the German coal subsidy program as it applied to steel. Based upon the verified information in the records of these investigations, we have determined that this particular program does not confer a countervailable benefit on either non-German or German steel producers.

As we stated in some of the preliminary determinations reached on June 10 (47 FR 26309), benefits bestowed upon the manufacturer of an input do not flow down to the purchaser of that input if the sale is transacted at arm's length. In an arm's length transaction, the seller generally attempts to maximize its total revenue by charging as high a price and selling as large a volume as the market will bear.

The application of these principles to sales of German coal outside Germany is as follows. The records of these transactions show that the prices charged for subsidized German coal outside Germany certainly do not undercut the freely available merit prices. Therefore, non-German purchasers of subsidized German coal do not benefit from Germany coal subsidies.

In support of this conclusion, we note that if non-German steel procedures did benefit from German coal subsidies, they would attempt to purchase German coal rather than unsubsidized coal from other sources including the U.S., since there are no restrictions on their ability to do so. The fact that they purchase significant amounts of unsubsidized U.S. coal indicates that the subsidies on German coal do not flow to non-German coal consumers.

Moreover, it is extremely unlikely that the German government would significantly subsidize non-German coal consumers unless compelled to do so by obligations with respect to the European Communities.

Since there is no evidence of such obligation, we conclude that the German government is not in fact subsidizing non-German coal consumers.

For these reasons, we determine that non-German steel procedures do not benefit from subsidization of German coal.

Research and Development Grants and Loans

Grants and preferential loans awarded by a government to finance research that has broad application and yields results which are made publicly available do not confer subsidies. Programs of organizations or institutions established to finance research on problems affecting only a particular industry or group of industries (*e.g.*, metallurgical testing to find ways to make cold-rolled sheet easier to galvanize) and which yield results that are available only to producers in that country (or in a limited number of countries) confer a subsidy on the products which benefits from the results of the research and development (R&D). On the other hand, programs which provide funds for R&D in a wide range of industries are not countervailable even when a portion of the funds is provided to the steel sector.

Once we determine that a particular program is countervailable, we calculate the value of the subsidy by reference to the form in which the R&D was funded. An R&D grant is treated as an "untied" grant; a loan for R&D is treated as any other preferential loan.

Labor Subsidies

To be countervailable, a benefit program for workers must give preferential benefits to workers in a particular industry or in a particular targeted region. Whether the program preferentially benefits some workers as opposed to others is determined by looking at both program eligibility and participation. Even where provided to workers in specific industries, social welfare programs are countervailable only to the extent that they relieve the firm of costs it would ordinarily incur for example, a government's assumption of a firm's normal obligation partially to fund worker pensions.

Labor-related subsidies are generally conferred in the form of grants and are treated as untied grants for purposes of subsidy calculation. Where they are small and expensed by the company in the year received, we likewise allocated them only to the year of receipt. However, where they were more than one percent of gross revenues we allocated them over a longer period of time generally reflecting the program duration.

Comments by Parties to the Proceeding

• Grants

Comment 1: Respondents claim that the present value methodology used in these investigations does not provide a "real" value and that it is based on assumptions which do not reflect the realities of the manufacture of the products under investigation.

DOC Position: The present value concept is a widely recognized tool of financial and economic analysis. Its utility and necessity derive from the fact that money has a time value. For example, as stated above, $100 million today is considerably more valuable to a grant recipient than $10 million per year for the next ten years. To move a sum of money through time without adjusting the nominal amount would seriously understate the value of the money. So long as the present value (in the year of grant receipt) of the amounts allocated over time does not exceed the face value of the of the grant, the amount countervailed will not exceed the total net subsidy.

Comment 2: Petitioners argue that grants and preferential loans awarded expressly for the benefit of products not under investigation should also be considered countervailable benefits for the product(s) under investigation. They base their argument on the contention that aid thus received is fungible.

DOC Position: We have not viewed all aid received for any purpose by companies under investigation as fungible, and thus equally beneficial to all products made by the company in question. While the law clearly envisions reaching subsidies which benefit the product under investigation indirectly, as well as directly, it would distort and be inconsistent with the clear intent of the statute, as reflected in its legislative history, to allocate to products under investigation any portion of benefits clearly tied to products not under investigation. This is particularly true since we are compelled to allocate fully to the products actually being investigated any subsidies directly tied to them. To allocate tied subsidies fully to the products to which they are tied and simultaneously to allocate any part of the same subsidies to other products would result in double-counting, which would be inconsistent with both the Act and the Subsidies Code.

• Loans and Loan Guarantees for Companies Considered Uncreditworthy

Comment 3: Respondents argue that the Department's method of determining uncreditworthiness was unfair in that it was based on hindsight which was not available to a lender at the time it made a decision whether or not to provide funds to a company.

DOC Position: As outlined in each of these notices in which uncreditworthiness was found, all determinations as to the Creditworthiness of firms were based upon information reasonably available to a potential lender *at the time a loan was given.* For instance, although British Steel Corporation's financial results for the fiscal year 1976/77 were a major factor pointing to uncreditworthiness, in our final determinations were found uncreditworthy beginning in fiscal year 1977/78, when the lending community could reasonably have known of the weakness of the firm's financial position in the preceding year. This approach allows the potential lender time to evaluate its behavior in light of the changed circumstances of the firm.

Comment 4: Petitioners state that to the extent that the Department calculates the benefit from a loan to an uncreditworthy company as if it were a grant, failure to use a discount rate to reflect the greater risk of providing credit to uncreditworthy firms which could not borrow at any average or national rate leads to an understatement of the true value of the subsidy received.

DOC Position: We disagree. Although we used the average national debt rate as the discount rate in the preliminary determinations, we did not intend this to imply that the choice of the discount rate reflected our speculation as to the riskiness of the company or the cost of alternative financing. As discussed in the *Grants* section of this appendix, we view the discount rate as simply a financial tool to move money through time. It is not our intention to embed in this rate any project-specific risk or company risk. For this reason we are changing the discount rate used in these final determinations to the risk-free rate, a rate equally accessible to all companies (including very risky ones) country-wide.

• *Equity*

Comment 5: Respondents argue that premiums paid over market value of stock are common in takeovers where the objective is to gain control of a firm, and that therefore such a payment should not be considered a subsidy.

DOC Position: Payment of a premium over market value for stock (including where the objective is to gain control) is a special commercial circumstance which occurs under fairly unique conditions. Payment of such a premium for stock in a firm in weak or distressed financial condition is unlikely, for as a firm approaches near-bankruptcy, its market price of equity falls to the liquidation value range. Furthermore, it is highly unlikely for a control premium to be warranted when the government is the sole bidder for the troubled firm. Therefore in the absence of compelling evidence that a premium payment by a government was warranted and motivated by commercial conditions (as evidenced, for example, by similar competing private bids), the Department has a strong preference for measuring a subsidy by the difference between the market price of the stock and the stock price paid by the government. We believe that this market price correctly incorporates private investor's perceptions of the worth of the stock.

• *Coal Assistance*

Comment 6: Petitioners reject the Department's view that a party receiving a benefit on the production of its merchandise is not assumed to share that benefit with an unrelated purchaser. They maintain that a party may market its products at a lower price than it would be able to charge absent the subsidy in order to secure or hold on to a larger share of the market, and thus to increase its profitability by realizing lower unit costs and increased unit sales.

DOC Position: We agree that there is more than one way to seek to achieve maximum profitability. In these investigations, in fact, assistance to coal has been provided to enable some coal companies to sell below their cost of production. However, the German coal companies do not sell below the prices of coal as sold in Europe and elsewhere. In fact, German steel producers are required to pay a slight but significant premium for German coal. Under these circumstances, we disagree with petitioners' argument that German steel companies are indirectly subsidized through German coal subsidies.

Comment 7: Petitioners argue that the Department should have considered German coal subsidies to subsidize all steel companies purchasing that coal, both German and non-German, because the intent of the coal subsidies is to stabilize coal supplies to the ECSC steel industry and to insure that industry against the risk of adverse price developments on the world market. Petitioners claim that without this subsidized coal, the ECSC steel companies would have had to pay higher world market prices.

DOC Position: For the reasons indicated *supra,* we believe that it is too speculative to consider possible effects on world prices for coal in the hypothetical absence of German subsidization of its coal industry. However, if coal prices would rise in that event, we believe that they would rise throughout the world. We do not believe that prices would rise for European purchasers of coal rather than non-Europeans.

As also indicated in detail *supra,* we believe that the real economic effect of German subsidies is to penalize, not to assist, German steel companies. As a result of the German coal policy, German steel companies are required to pay a slight premium above the world market price for their coal purchases. Non-German purchasers of subsidized German coal similarly receive no demonstrable price advantage.

Comment 8: Petitioners argue that the ECSC and the FRG government, through an "intense program of coordinated subsidy financing," have assisted the German coal and steel industries in order to sustain production at cost efficient levels, in significant part by producing for export.

DOC Position: Although the arguments seem ambiguous, we believe that petitioners mean to imply that the German and ECSC coal assistance programs constitute an export subsidy for steel. If so, then we disagree, since in both cases coal assistance is provided without the establishment of any condition concerning the exportation of steel produced using that coal.

Comment 9: Petitioners object to the Department's alleged requirement that a subsidy on an imput be demonstrated to confer an unfair competitive advantage. Petitioners imply that in so doing, the Department is usurping the jurisdiction of the International Trade Commission which is authorized to determine injury.

DOC Position: Under the Act, the Department is required to determine whether respondents have received subsidies within the meaning of the Act. To do so, the Department seeks to determine whether or not respondents have received directly or indirectly an economic benefit. Whereas this is relatively easy in the case of the direct bestowal of a grant, it is quite difficult with regard to indirect subsidies allegedly conferred through the subsidization of imputs used in a final product. In this more complex area, we believe it is required for the Department to consider whether there is an economic benefit to foreign manufacturers of an individual imput. This is quite distinct from the ITC's determination whether imports of the final product into the United States

injure a U.S. industry. The Department therefore disagrees with petitioners on this issue.

Appendix 3.—Programs Administered by Organizations of the European Communities

I. The ECSC

On April 8, 1965, the three separate European communities—the European Coal and Steel Community (ECSC), the European Economic Community (EEC), and the European Atomic Energy Community—signed a treaty to merge into the European Communities (EC). Article 9 of the merger treaty established the Commission of the European Communities to take the place of the High Authority of each of the formerly independent institutions. The merger became effective in 1967.

The ECSC itself was established by the Treaty of Paris in 1951 to modernize production, improve quality, and assure a supply of coal and steel to the member countries. The Treaty of Paris governs all programs intended directly to affect the steel industry. Funds for these programs flow from two sources: (1) ECSC borrowings on international capital markets, and (2) the ECSC budget.

A. *ECSC Programs Determined To Be Subsidies.*—1. *ECSC Loan Guarantees.* Under Article 54 of the Treaty of Paris, the ECSC is authorized to guarantee loans from commercial lenders to coal and steel companies. Since these guarantees are intended specifically for the steel industry, we find the resulting benefits to be countervailable. The countervailable benefit is the difference between the interest rate charged by private lenders to commercial customers in the ordinary course of business and the rates available with an ECSC loan guarantee.

2. *Programs Funded Through ECSC Borrowings.* Because of its quasi-governmental nature, the ECSC is able to raise funds at interest rates lower than those which would be available on commercial terms to European steel companies. When the ECSC relends these borrowed funds to a company without increasing the interest rate, any difference between the lower rate passed on and the rate otherwise available to the steel company in the commercial financial market (the "benchmark") is a benefit to the company. For this reason, we determine that ECSC loans raised through capital market funding are countervailable insofar as they offer preferential interest rates (i.e., rates which would not be available on commercial terms) to steel companies. Consequently, any loan to a steel company involving ECSC funds borrowed on international capital markets, provided under an ECSC assistance program, confers countervailable benefits to the extent that the loan is made at a preferential interest rate.

a. *ECSC Industrial Investment Loans.* Article 54 of the Treaty of Paris authorizes the ECSC to provide loans to steel companies in member countries for reducing production costs, increasing production, or facilitating product marketing. Loans provided under this program are funded exclusively from ECSC borrowings on world capital markets. For the reasons discussed above, we reaffirm our preliminary determination that this program confers countervailable benefits to loan recipients to the extent that the interest rates are preferential.

b. *ECSC Industrial Reconversion Loans.* Under Article 56 of the Treaty of Paris, the ECSC provides loans to companies or public authorities for investments in new non-steel ventures in regions of declining steel industry activity. The goal of the loan program is to provide employment for former steel workers in new industries. In our preliminary determinations, we concluded that this program did not appear to benefit steel companies. Therefore, we preliminarily determined that it does not confer subsidies on steel. However, since our preliminary determinations, we verified that some industrial reconversion loans have been made for use in the iron and steel industry. Therefore, to the extent that such loans were made for steel production, they confer benefits on steel production generally or possibly on particular types of steel products if the loans were tied. Since this program is funded exclusively from ECSC borrowing on world capital markets, we determine, for the reasons discussed above, that these loans to steel producers confer subsidies on steel to the extent that the interest rates are preferential.

3. *Programs Funded Through the ECEC Budget.* With respect to programs funded by the ECSC budget, we preliminarily determined that they do not confer countervailable benefits because for 1971–1980 (the last year for which complete data were available) their total amount did not exceed total levies collected from coal and steel producers within the ECSC member states. Since our preliminary determinations were made we have verified the following facts about the composition of the ECSC budget:

- From 1952 through 1956, the ECSC budget was financed exclusively through producer-generated levies.
- From 1971 through 1977, the ECSC budget was financed exclusively through producer-generated levies, funds generated from unexpected levies, and other relatively small amounts obtained from steel companies (*e.g.*, fines and late payment fees).
- Beginning in 1982, the member state contribution is to be used exclusively to fund one particular program, rehabilitation aid provided under Article 56 of the Treaty of Paris.

We continue to believe that programs funded by the ECSC budget through 1977 do not confer countervailable benefits.

However, since 1978 member state contributions have constituted a portion of the ECSC budget. Upon consideration of this newly available information, for the years 1978–1981 we believe it is more reasonable to assume that programs funded by the ECSC budget are subsidized to the extent that the budget derives from member state contributions. To assume to the contrary (i.e., that *all* program assistance derives from levies and levy-generated funds, and that member state contributions are used *exclusively* for expenses other than program assistance) is inappropriate unless member state contributions are expressly earmarked for particular programs. Accordingly, we have treated as a subsidy in 1981 a proportion of the benefits received under programs funded by the ECSC budget.

Although not relevant to the subsidies being determined and measured in these investigations, we note that for 1982, member state contributions have been so earmarked for one particular program, rehabilitation aid provided under Article 56 of the Treaty of Paris. If all member state contributions are expended in funding that program, other programs would then be funded by levies and levy-generated funds, not from member state contributions.

a. *ECSC Labor Assistance Rehabilitation Aids.* Under Article 56 of the Treaty of Paris, the ECSC provides matching grants to member states for programs that assist former steel workers currently unemployed or in training for a new trade. In our preliminary determinations, we implied that this assistance may confer a subsidy on the industries for which workers are newly trained, but decided that it does not confer a subsidy on steel. However, upon verification we learned that some, though not all of this assistance has been provided to retrain

workers for other jobs *within* the *same* industry; and to cover worker unemployment and early retirement expenses, for some of which the employing companies may have been legally responsible. If such assistance has been provided to retrain steel workers for new steel jobs, and/or to cover unemployment and early retirement expenses which steel companies would normally be required to pay, then it benefits the steel industry. To that extent, it is considered a subsidy in these investigations.

This program is funded from the ECSC budget. In view of the relatively small amounts concerned, we are expensing this assistance in the year it was received. Therefore, for purposes of these investigations, we are capturing only assistance provided in the period for which we are measuring subsidies (generally 1981). In 1982, member state contributions accounted for 20.05 percent of the ECSC budget. Therefore, for the reasons discussed above, 20.05 percent of the assistance under Article 56 provided to steel companies for programs benefitting steel production in 1981 constitutes a subsidy on the manufacture or production of steel.

b. *ECSC Interest Rebates.* i. Certain Article 54 industrial investment loans qualify for further interest reduction depending on whether they are for environmental projects, removal of industrial bottlenecks, promotion of steel industry competitiveness, or stabilization of coal production. The rebates generally reduce the interest expense for the first five years of the loan repayment schedule by three percentage points. The interest rebates are paid out of the ECSC budget. Therefore, we preliminarily determined that this program does not confer countervailable benefits.

ii. Certain Article 56 industrial reconversion loans qualify for further interest reductions. Like the interest rebates on Article 54 industrial investment loans, these rebates are paid out of the ECSC budget. In a few instances the underlying loans made under Article 56 benefit the products under investigation (most Article 56 loans were given to non-steel ventures).

For the reasons discussed above, we have now determined that both these programs described under (i) and (ii) above confer countervailable benefits to the extent that the ECSC budget in the year concerned is financed by member state contributions. In view of the relatively small amounts concerned, we are expensing this assistance in the year it was received. Therefore, for purposes of these investigations, we are capturing only assistance provided in the period for which we are measuring subsidies (generally 1981). In 1981, member state contributions accounted for 20.05 percent of the ECSC budget. Therefore, for the reasons discussed above, 20.05 percent of the assistance provided in 1981 consititues a subsidy on the manufacture or production of steel.

c. *ECSC coal and Coke Aids.* Petitioners have alleged that ECSC assistance to coal producers in EC countries constitutes an indirect benefit to steel producers purchasing that coal. In our preliminary determinations, we did not consider this program to confer counteravailable benefits on steel. The basis for this conclusion was our understanding at that time that the ECSC coal aids are bestowed on all types of coal, used widely throughout many industries.

Therefore, we reasoned, the ECSC aids on coal cannot be intended to benefit, and do not benefit, the steel industry in paritcular; consequently, under section 1771(5)(B) of the Act, there is no subsidy to steel in these circumstances, even though steel producers in ECSC countries purchase some ECSC coal.

However, we have verified that, in fact, certain ECSC coal aids are bestowed exclusively on coking coal, which is used primarily by the iron and steel industry. Nonetheless, we continue to believe, for other reasons, that the ECSC coking coal aids do not confer a countervailable benefit on the manufacture or production of steel. We have no evidence that ECSC-assisted coking coal is sold to ECSC steel companies at prices less than the prices for other freely available coking coal produced in ECSC member countries but not assisted by the ECSC, or for freely available coking coal produced outside ECSC member countries. To the contrary, we have verified information that some coking coal is sold in Europe at prices below the prices of ECSC-assisted coking coal. This indicates that the coking coal subsidies to coal producers are not being passed along, in whole or in part, to steel producers purchasing that coal in arm's length transactions.

Where a subsidized coal producer and a steel producer are related companies, it is reasonable to question whether, in fact, the transfer price for coking coal is established on an arm's length basis. In general, our tests for whether the prices for coking coal charged to a related company were established on an arm's length basis include: (1) Whether the coal producer sold to its related steel producer at the prevailing price, and/or (2) whether the coal producers sold to its related steel producers and all other purchasers of coking coal at the same price.

B. *ECSC Programs Determined Not to Confer Subsidies.*—1. *ECSC Housing Loans for Workers.* Article 54(2) of the Treaty fo Paris authorized the ECSC to provide loans for residential housing for steel workers. In some cases these loan funds are provided directly to steel companies which relend them to their workers. In other cases, they are administered through financial institutions or housing authorities. These loans for the construction or purchase of homes are at highly concessionary one percent interest rates.

The preferential ECSC housing loans provide substantial benefits directly to steel workers. In our preliminary determinations, we assumed that they also indirectly benefit the employer steel companies by relieving them of certain labor wage costs. However, we have been unable to substantiate and verify this assumption. To the contrary, in many of the countries concerned there is a high rate of unemployment, which reduces upward pressure on wages. Moreover, we found no instance in which wage rates varied—depending upon the presence or absence of these mortgage loans to steel workers—either within a steel company or between steel companies. Since we have no firm basis for determining that the wage demands of steel workers would be responsive to the (non)availability of this mortgage subsidy, we conclude that the hypothetical benefits to their employer steel companies are too remote to be considered subsidies to these companies.

2. *ECSC R&D Grants and Loans.* a. Article 55 of the Treaty of Paris provides funding in the form of grants for up to 60 percent of an R&D project's cost. The projects must be for improvements in the production and use of coal and steel. On the ground that these grants are funded exclusively from the ECSC budget, we preliminarily determined that this program does not confer countervailable benefits.

For the reasons discussed above, we have decided to consider ECSC budget-funded programs as countervailable to the extent that the ECSC budget for the year concerned is financed by member state contributions. Nevertheless, because we have evidence that the results of the R&D are made publicly available, we have determined that this program does not confer countervailable benefits.

b. With respect to ECSE R&D loans—also made under Article 55 of the Treaty of Paris—we preliminarily determined that additional information was

necessary: i.e., information as to how widely available the results of research are, and from which source the funds derive. Upon verification, we learned that the results of the research are made publicly available. Therefore, we determne that ECSC R&D loans do not confer countervailable benefits.

II. The European Investment Bank

The European Investment Bank (EIB) was created by the Treaty of Rome establishing the EEC to fund projects that serve regional needs in Europe. Article 130 of the Treaty of Rome authorized the EIB to make loans and guarantee financial projects in all sectors of the economy. These projects include the provision of funds to further the development of low income regions. Funds are drawn from debt instruments floated on world capital markets and from investment earnings. Because EIB loans are designed by charter to serve regional needs, we find them to be countervailable where the interest rate is less than the rate which would have been available commercially from a private lender without government intervention.

The EIB also provides loan guarantees to companies in EC member countries. Again, because this guarantee was available in some but not all regions, it is regarded as a countervailable benefit. These determinations remain unchanged from our treatment of this issue in our preliminary determinations.

III. The European Regional Development Fund

The European Regional Development Fund was established by the EEC to provide funding in the form of low-interest loans for industrial projects designed to correct regional imbalances within the EEC. The fund also awards interest subsidies on EIB loans.

We preliminarily determined that this program is not used by any of the manufacturers, producers or exporters for any of the products from countries under investigation. We confirmed this determination through our verification, so it remains unchanged.

Comments Received from Parties to the Proceeding.—Comment 1: Petitioners argue that the Department did not correctly interpret the term "subsidy" and did not countervail ECSC assistance programs to the extent that funds for these programs were derived from the ECSC budget.

DOC Position: As explained in detail *supra,* the Department has determined that ECSC budget-funded assistance is potentially countervailable to the extent that the ECSC budget for the year concerned is financed by Member State contributions.

Whether or not we found particular ECSC budget-funded assistance to confer a subsidy on the products subject to these investigations depended on other factors as well. For example, we found that the results of ECSC funded research and development projects were made publicly available, and therefore did not consider subsidies.

Comment 2: Petitioners argue that ECSC budget-funded assistance programs confer subsidies on ECSC steel producers despite levy financing of the budget, because the ECSC must borrow massively to supplement the levies.

DOC Position: As indicated in detail *supra,* to the extent that the ECSC budget in a given year is funded by Member State contributions, we consider any assistance funded generally from the budget in that year to be partially countervailable. Also as explained *supra,* to the extent that ECSC loans financed by ECSC borrowings on world capital markets are made to steel companies at preferential interest rates, we believe that they are countervailable.

Comment 3: Petitioners maintain that ECSC budget-funded programs confer subsidies even when financed through levy funding; that the ECSC borrows to finance its programs, and there is no delineation between the programs funded by the levy and the programs funded by debt.

DOC Position: As explained in detail *supra,* we agree that many (though not all ECSC) budget-funded programs confer some countervailable benefit if the assistance was provided in a year in which the ECSC budget was derived partially from Member State contributions. Where it can be shown that ECSC budget-funded assistance derives exclusively from levies and levy-generated funds ultimately derived from steel producers, no countervailable benefit is conferred upon steel producers by the return to them of their own funds. However, for the period of investigation we did not find that any program's funding derived could be shown to derive exclusively from levy financing.

Comment 4: Some petitioners have claimed that ECSC assistance funded by producer levies confers subsidies wherever an individual producer receives assistance in excess of levies paid by that producer.

DOC Position: As explained elsewhere in this Appendix and in Appendix 4, we do not consider ECSC budget-funded programs to confer subsidies on steel producers to the extent such programs are funded by producer levies. Our view is not affected by the degree to which individual producers which have contributed levies do not participate in or receive benefits from these programs. The producers probably should be viewed as pooling their resources, for their mutual benefit, to create and maintain certain programs which are available to all the producers. Over the relatively short period for which we are measuring subsidies, certain producers have more frequent occasion to use certain programs than other producers. In principle, this is not different from other types of cooperative behavior, such as jointly funded risk insurance, under which not all participants will have identical claims although all contribute equal premiums. Accordingly, insofar as producer levies are directly funding the programs, no subsidies can be said to arise from any apparent short-term disparity of benefits received.

Comment 5: Petitioners have challenged our preliminary determinations that benefits received under certain ECSC programs funded by ECSC coal and steel producer levies were not subsidies. They assert that, in reaching such a determination, we have allowed offsets from subsidies in a manner contrary to law.

DOC Position: We disagree with petitioners' characterization of the determination on this issue. To the extent that we have viewed benefits received under ECSC programs as attributable or allocable to producer levies, we find that no gross subsidy exits. No "offset" or reduction in subsidy amount is made, because the recipients of the program benefits are directly funding those benefits themselves and thus the ECSC is not creating a subsidy. This is not analogous to governmental benefits funded by general tax revenues, for the levies in question are—and since the inception of the levy system have been—strictly earmarked for the ECSC budget-funded programs for which they are, in fact, used. In reality, the ECSC acts as no more than the administrator and distributor of levies collected, and does so under such tight restrictions as to preclude the conclusion that the return of levy funds to the producers gives rise to a gross subsidy.

Appendix 4.—General and GATT-Related Issues

- *General Issues*

Comment 1: Petitioners contend that many of the conclusions in our preliminary determinations were erroneous insofar as they found that

particular programs of general applicability and availability within a country do not give rise to domestic subsidies. They assert that subsidies must be found to exist from any governmental programs providing benefits, regardless whether those programs are generally available.

DOC Position: Section 771(5) of the Act, in describing governmental benefits which should be viewed as domestic subsidies under the law, clearly limits such subsidies to those provided "to a specific enterprise of industry, or group of enterprises or industries." We have followed this statutory standard consistently, finding countervailable only the benefits from those programs which are applicable and available only to one company or industry, a limited group of companies or industries, or companies or industries located within a limited region or regions within a country. This standard for domestic subsidies is clearly distinguishable from that for export subsidies, which are countervailable regardless of their availability within the country of exportation. We view the word "specific" in the statutory definition as necessarily modifying both "enterprise or industry" and "group of enterprises or industries". If Congress had intended programs of general applicability to be countervailable, this language would be superfluous and different language easily could and would have been used. All governments operate programs of benefit to all industries, such as internal transportation facilities or generally applicable tax rules. We do not believe that the Congress intended us to countervail such programs. Further, our conclusion is supported by the clear Congressional intent that "subsidy" be given the same meaning as "bounty or grant" under section 303 of the Act. Never in the history of the administration of this law or section 303 of the Act has a generally available program providing benefits to all production of a product, regardless of whether it is exported, been considered to give rise to a subsidy or a bounty or grant. In enacting the Trade Agreements Act of 1979, Congress specifically endorsed that interpretation of section 303. Finally, the fact that the list of subsidies in section 771(5) is not an exclusive one in no way compels the conclusion that domestic benefits of general availability must or can be considered subsidies. Indeed, in view of the statute and its legislative and administrative history, we doubt that we are free to treat such generally available benefits of domestic programs as subsidies; certainly we are not compelled to do so.

Comment 2: Petitioners contend that our preliminary negative determinations regarding critical circumstances were erroneous. They allege that, in determining whether imports were "massive" within the meaning of section 703(e) of the Act, we acted inconsistently with the law and past practice by examining imports in the period subsequent, rather than prior, to initiation of these cases, thereby denying petitioners the ability to provide adequate documentation to support their allegations. They also disagree with our characterization of the import levels as not being massive.

DOC Position: This issue is moot. Under section 703(e) of the Act, in order to determine that critical circumstances exist, we must determine that "(A) the alleged subsidy is inconsistent with the Agreement, and (B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period." Section 355.29(e) of the Commerce Regulations (19 CFR 355.29(e)) on critical circumstances provides, *inter alia*, that we will determine "whether the alleged subsidy is an *export* subsidy inconsistent with the Agreement" (emphasis added). For purposes of this law, then, under existing regulations, a subsidy may be viewed as inconsistent with the Agreement only if it is an export subsidy. Since all of the subsidies determined to exist in the cases in which we are issuing final determinations in these notices are domestic, rather than export, subsidies, we are precluded from determining that critical circumstances exist in any of these cases.

Comment 3: Some respondents claim that our adoption in the preliminary determinations of a number of new methodologies for the ascertainment and calculation of subsidies was procedurally deficient as a matter of law. They assert that these new methodologies conflict with past practice and, therefore, cannot be implemented in any case before rulemaking procedures have been completed, which procedures would have to provide published notice of proposed changes and opportunity to comment.

DOC Position: We do not agree that the methodologies employed in these cases have to be the subject of rulemaking procedures or that such methodologies could not be employed until such procedures have been completed. The adoption of these methodologies is neither rulemaking nor adjudication within the meaning of the Administrative Procedures Act. Some of the methodologies employed cannot be said to be in conflict with any past practice under sections 701 or 303 of the Act, for they address issues and factual situations which, to the best of our knowledge, have not previously been encountered. Others, such as the present value methodology of valuing money over time, do represent a departure from past methods for determining the existence or size of subsidies. However, the prior practice, with which the methodology used in these cases has been alleged to be inconsistent has never been prescribed in the Commerce Regulations or, before that, the Customs Regulations.

Decisions as to the use of such methodologies are not matters requiring rulemaking procedures, but are questions of policy left to the judgment and discretion of the Department and decided on a case-by-case basis, applying the law, as we understand its requirements and intent, to the facts of each case. While the Department could prescribe such methodologies in its regulations, we have not chosen to do so. Unless and until that occurs, no rulemaking procedures can be considered necessary before changing prior methodologies. At the outset of these investigations, respondents may have anticipated that certain prior methodologies would be employed in place of ones actually used, but they have no legal right to the maintenance of such prior practices.

Further, our preliminary determinations and subsequent disclosures to all interested parties fully explained these methodologies and each respondent took advantage of its opportunity to comment upon them, both orally and in writing. We took all of these comments fully into account in reaching our final determinations. As such, each respondent fully participated in the decision-making process to the extent of its legal rights, and cannot properly be viewed as having been denied any such rights. Moreover, there is no substantial evidence in the record in any of these cases which would support a conclusion that the respondent governments, when establishing or administering the programs investigated, relied to their detriment on prior methodologies. Indeed, it would be difficult to conclude that these governments in any way considered the possible consequence under the U.S. countervailing duty law before taking the actions which resulted in

countervailable benefits to the products under investigation.

Comment 4: Some respondents contend that many of the benefits received by the steel companies investigated, such as aids for restructuring, are directly analogous to procedures and benefits common to bankruptcy proceedings. As such, they are consistent with normal commercial considerations and should not be considered subsidies.

DOC Position: No respondent has furnished us any evidence that it has been subject to formal bankruptcy proceedings, or that its restructuring or other procedures actually employed remotely resemble normal bankruptcy procedure in its country. In the absence of any such evidence the contention of respondents is entirely too speculative a basis upon which to base a determination in these cases.

• *Gatt-Related Issues*

Comment 5: The European Communities (EC) assert that in order for a countervailable subsidy to exist under the GATT, there must be a charge on the public account. In support of this contention, the EC cites in particular item (1) of the Illustrative List of Export Subsidies (the List), included as an annex to the Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade (the Code). Item (1) of the List defines as an export subsidy, "Any other charge on the public account constituting an export subsidy in the sense of Article XVI of the General Agreement."

DOC Position: Item (1) does not limit the definition of subsidy to a charge on the public account, but rather makes clear that such a charge is included in the universe of subsidies which constitute on their face prohibited export subsidies. Items (c) and (d) of the List show that preferential treatment for exports, without regard to a charge on the public account, can also constitute a subsidy on its face. These items define as subsidies:

(c) Internal transport and freight charges on export shipments, provided or mandated by governments, on terms more favorable than for domestic shipments.

(d) The delivery by governments or their agencies of imported or domestic products or services for use in the production of exported goods, on terms or conditions more favorable than for delivery of like or directly competitive products or services for use in the production of goods for domestic consumption, if (in the case of products) such terms or conditions are more favorable than those commercially available on world markets to their exporters.

Item (1), cited by the EC, derives from the original illustrative list of subsidies of 1960, which represented an agreed interpretation of Article XVI:4 of the GATT. However, the department notes that this list also includes items (c) and (d) of the current List. Since the negotiation of Article XVI:4 in the 1950s, there has never been a consensus a on an interpretation such as that advanced by the EC. Rather, it has been generally accepted that the range of activities covered by the term subsidy as used in the GATT is quite broad, including charges on the public account as well as certain activities which do not necessarily involve such a charge.

Comment 6: The EC argues that subsidies other than export subsidies cannot be considered countervailable under the Code unless such subsidies "(a)dversely affect the conditions of normal competition. In the absence of any such distortion, subsidies, other than export subsidies, are recognized as important instruments for the promotion of social and economic policy objectives against which no action is envisaged by the Code." The EC further argues that the Department considered regional aids countervailable "(w)ithout taking into consideration any disadvantages incurred by companies having to operate in economically retarded and remote areas. * * * This approach does not take into account, that under GATT and the Code countervailable subsidies are only those, which adversely affect the conditions of normal competition." In support of this contention, the EC cites Article 11 of the Code, "Subsidies Other Than Export Subsidies."

DOC Position: The language of Article 11 does not prejudice the right of any signatory to the Code to countervail against non-export subsidies. The language of the Article is the result of compromise between the United States and the EC at the time of the negotiation of the Code; the United States proposed to include an illustrative list of domestic subsidies, while the EC position was that such subsidies should not be considered countervailable. The Department notes that, while no list of domestic subsidies was incorporated *per se* in the Code, examples of such subsidies are included in Article 11. In contrast, the position of the EC was not adopted, as no such prohibition regarding the countervailability of domestic subsidies appears in the Code. The fact that certain subsidies are not prohibited by the Code is not relevant to a determination as to whether such subsidies confer a countervailable benefit in a specific case.

In addition, the Department notes that Article 11:3 of the Code states, "(t)he above form of (non-export) subsidies are normally granted either regionally or by sector." Article 11:2 states:

"Signatories recognize, however, that subsidies other than export subsidies * * * may cause or threaten to cause injury to a domestic industry of another signatory or serious prejudice to the interests of another signatory or may nullify or impair benefits accruing to another signatory under the General Agreement, in particular where such subsidies would adversely affect the conditions of normal competition. Signatories shall therefore seek to avoid causing such effects through the use of subsidies. In particular, signatories when drawing up their policies and practices in this field, in addition to evaluating the essential internal objectives to be achieved, shall also weigh, as far as practicable, possible adverse effects on trade. They shall also consider the conditions of world trade the production (e.g. price, capacity utilization, and supply of the product concerned).

While there is no agreed definition of the term "normal competition" in the context of the GATT, the term can reasonably be construed to include comparative advantage, a concept about which little, if any, serious dispute exists among economists. The argument of the EC flows against the logic of comparative advantage. Subsidies used to alter the comparative advantage of certain regions with respect to the production of a certain product or products are by definition distortive of trade and the allocation of resources, and, therefore, must affect normal competition, including competition with producers in the market of the importing country. There is no evidence that the governments of the countries in question, with regard to most of the programs and benefits under consideration, specifically sought to avoid causing injury to the domestic industries of other Code signatories, or even considered possible adverse effects on trade, as required by Article 11:2.

Finally the Department notes that Article 4 of the Code, "Imposition of countervailing duties", makes no distinction between domestic and export subsidies.

Comment 7: In objecting to the methodology used by the Department to calculate the subsidies found to exist by virtue of grants, preferential loans and loan guarantees (*See* Appendix 2,

Methodology), the EC argues that "Article VI of the GATT provides that a countervailing duty may not exceed the amount of subsidy 'determined to have been *granted*'. The use of the word 'granted' rather than 'received' and the absence of any reference to 'value' or 'benefit' indicates clearly that the countervailable amount is the financial contribution of the government rather than the much more nebulous benefit to the recelpient." (Emphasis in the EC brief).

DOC Position: The position of the Department with respect to the need for a specific financial contribution of the government is discussed above. With respect to the calculation of the amount of the subsidy, the Department believes that the use of the word "granted" in Article VI:3 does not control the question of calculation of the amount of a subsidy, but merely refers to the existence of the subsidy. In fact, as the EC itself notes, Footnote 15 to the Code states, "An understanding among signatories should be developed setting out the criteria for the calculation of the amount of subsidy." Were the amount of subsidy always equal to a charge on the public account, such an understanding would be unnecessary.

Article 4:2 of the Code states that "(n)o countervailing duty shall be levied on any imported product in excess of the amount of the subsidy found to exist * * *." The position of the Department is that the subsidy is the benefit received by the producer or exporter. In no way does the language of Article 4 of the Code or Article VI of the GATT mandate a methodology to be used by signatories in the calculation of a subsidy as long as no consensus to the contrary exists (as referred to in Footnote 15). As a matter of general interpretation of the Code and the GATT, the omission of language dealing with a specific issue must be seen as a purposeful decision on the part of the signatories to leave the question open (see Comment 8 and DOC Position, below).

Comment 8: The EC has criticized the Department for making unilateral interpretations of various provisions of the Code, in particular with respect to determinations as to whether certain specific practices are subsidies and with respect to the methodologies employed in calculating the value of a subsidy.

DOC Position: The Department will follow, as far as U.S. law permits, the mandatory provisions of the Code, as well as any interpretations on which a consensus exists among all Code signatories including the United States. However, the Code does *not* require inaction by signatories with regard to areas not clearly covered by the Code or by agreed interpretations of the Code. Such a requirement would be inconsistent with practice under the GATT as it has developed since its inception in 1947. The fact that the Code is silent with respect to whether a specific practice constitutes a subsidy does not mean that no signatory may make a determination with respect to that practice in the course of a proceeding. The fact that the signatories have not agreed on a methodology for the calculation of the amount of a subsidy does not mean that no signatory may adopt a methodology in the absence of such agreement, since the inability to calculate the amount of the subsidy found to exist would clearly frustrate the intent of the Code and the GATT.

Comment 9: The EC objects to the Department's use of average return on investment as a measure of the commercial rasonableness of a government infusion of equity in the absence of a market price for shares. The EC argues that "(i)t follows from the GATT that the decisive criterion is the cost to the Government and therefore the investment should be treated as a long-term loan by the Government and the long-term return should be measured against the rate at which the Government borrowed money to make the investment."

DOC Position: The Code notes in Article 11:3 that possible forms of non-export subsidies include "(g)overnment subscription to, or provision of, equity capital." However, the Code and the GATT are silent on the question of precisely when such activity does constitute a subsidy and, where found, how such a subsidy should be calculated. The position of the EC with respect to this issue turns on defining a subsidy as the cost to the government. As discussed above in the response to Comment 6, the Department rejects this position. In any event, the equity infusions in question were not long-term and had no provisions for repayment. Accordingly, it is not possible to conclude that the decision of the Department is inconsistent with the GATT or the Code (see Appendix 2 for a discussion of the methodology employed by the Department with respect to equity infusions).

Comment 10: The EC avers that "(t)his distinction (between creditworthy and uncreditworthy companies) is a complete innovation and is not provided for anywhere in the GATT. Since that GATT criterion for the determination of a subsidy is the financial contribution of the government, the creditworthiness of the companies is irrelevant."

DOC Position: The fact that the GATT does not address this issue specifically does not preclude consideration of the issue where it arises in the course of a proceeding. As discussed above, the Department does not agree that the only criterion for the determination of the existence of a subsidy under the GATT is the financial contribution of the government. Therefore, the question of the creditworthiness of a borrower is relevant because a loan to a company unable otherwise to obtain credit is a greater benefit to that company than a comparable loan to a company which is able to obtain financing on its own.

Comment 11: The EC argues that the Code must be interpreted in its entirety, and that the various provisions must be considered in relation to each other. In particular, the EC emphasizes that the List prescribes by implication the manner in which subsidies must be determined to exist and must be calculated.

DOC Position: The Department agrees that the Code must be interpreted as a whole. This includes the Code's distinction between subsidies which are prohibited *per se* and subsidies which are prohibited only under certain circumstances. The subsidies which are enumerated in the List are prohibited *per se* under Article 9, and, hence, actionable under "Track II", as provided for under Articles 12, 13, 17 and 18. As its title implies, the List is *illustrative* of the types of practices which constitute grounds for the invocation of Track II dispute settlement procedures.

The list is thus descriptive of *prohibited* practices, not dispositive of the calculation of the value of any subsidy conferred under any particular practice. Thus there is no inconsistency between the Department's calculation of benefits conferred by export subsidies compared with benefits conferred under domestic programs, since the Department employs uniform methodologies without regard to any distinction between the two types of subsidies.

Comment 12: The EC states that "Appendix B (of the Preliminary Determinations) contains a disturbing assertion: 'In the absence of special circumstances, a party receiving a benefit on the production of its merchandise *is not assumed to share a benefit with an unrelated purchaser.*' (47 FR 26307, 26309 (1982) emphasis supplied.) The implication is that the existence of a countervailable subsidy, i.e., 'benefit' can be assumed in certain circumstances * * *." The EC asserts that the Code requires that the elements necessary for the imposition of

countervailing duties be established by positive factual evidence. Further, the EC adds that "(t)he only instance in which Title VII permits a presumption is under section 771(7)(E)(i) * * *."

DOC Position: The Department agrees that determinations as to the existence of a subsidy should be based on verified facts. However, this is possible only insofar as the facts are made available to the Department during the course of a proceeding. As a matter of normal procedure, the Department requests information from all interested parties, including the foreign government involved, in order to establish the facts upon which its determinations may be based. The Department followed this procedure in the instant cases. In those instances where the Department has been forced to make a determination on the basis of incomplete information, the responsibility rests with the interested parties who, despite the requests of the Department, failed to provide such information to the Department in a timely manner.

Where incomplete information has formed the basis of decisions of the Department in particular cases, there is no contravention of the obligations of the Department with respect to the Code or the statute. Article 2 9 of the Code provides:

In cases in which any interested party or signatory refuses access to, or otherwise does not provide, necessary information within a reasonable period or significantly impedes the investigation, preliminary and final findings, affirmative or negative, may be made on the basis of the facts available." Furthermore, Section 776(b) of the Act provides:

"In making their determinations under this title, the administering authority and the Commission shall, whenever a party or any other person refuses or is unable to produce information requested in a timely manner and in the form required, or otherwise significantly impedes an investigation, use the best information otherwise available."

BILLING CODE 3510-25-M

Final Affirmative Countervailing Duty Determination: Carbon Steel Wire Rod From France

AGENCY: International Trade Administration, Commerce.

ACTION: Final Affirmative Countervailing Duty Determination: Carbon Steel Wire Rod from France.

SUMMARY: We have determined that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in France of carbon steel wire rod, as described in the "Scope of the Investigation" section of this notice. However, the estimated net subsidy for Normandie on wire rod is *de minimis*. Therefore, the suspension of liquidation ordered in our preliminary affirmative countervailing duty determination concerning wire rod from Normandie shall be terminated. All estimated countervailing duties shall be refunded and all appropriate bonds shall be released. The estimated net subsidy for Sacilor is indicated under the "Suspension of Liquidation" section of this notice. The U.S. International Trade Commission (ITC) will determine within 45 days of the publication of this notice whether these imports are materially injuring, or threatening to materially injure, a U.S. industry.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: Nicholas C. Tolerico, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone: (202) 377–4036.

SUPPLEMENTARY INFORMATION:

Final Determination

Based upon our investigation, we have determined that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in France of carbon steel wire rod, as described in the "Scope of Investigation" section of this notice. The following programs are found to confer subsidies:

- Preferential financing including equity infusions
- Grants
- Certain labor-related aid
- Research and development

We determine the net subsidy to be the amount indicated for each firm in the "Suspension of Liquidation" section of this notice.

Case History

On February 8, 1982, we received a petition from counsel for Atlantic Steel Corp., Georgetown Steel Corp., Georgetown Texas Steel Corp., Keystone Consolidated, Inc., Korf Industries, Inc., Penn-Dixie Steel Corp., and Raritan River Steel Co., filed on behalf of the U.S. industry producing carbon steel wire rod. The petitioners alleged that certain benefits which constitute subsidies within the meaning of section 701 of the Act are being provided, directly or indirectly, to the manufacturers, producers, or exporters in France of carbon steel wire rod. Counsel for petitioners alleged that "critical circumstances" exist, as defined in section 703(e) of the Act. We found the petitions to contain sufficient grounds upon which to initiate a countervailing duty investigation, and on March 1, 1982, we initiated a countervailing duty investigation (47 FR 5739).

Since France is a "country under the Agreement" within the meaning of section 701(b) of the Act, an injury determination is required for this investigation. Therefore, we notified the ITC of our initiation. On March 26, 1982, the ITC preliminarily determined that there is a reasonable indication that imports of carbon steel wire rod from France are materially injuring, or threatening to materially injure, a U.S. industry (47 FR 13927). We presented questionnaires concerning the allegations to the Delegation of the Commission of the European Communities and to the government of France in Washington, D.C. On May 7, 1982, we received the responses to the questionnaires. A supplemental response was received on may 25, 1982. On July 8, 1982, we issued our preliminary determination in this investigation (47 FR 30553). This stated that the government of France was providing its manufacturers, producers, or exporters of carbon steel wire rod with benefits which constitute subsidies. The programs preliminarily determined to bestow countervailable benefits were:

- Export credit insurance
- Preferential financing including equity infusions
- Grants
- Regional development incentives
- Certain labor-related aid
- ECSC worker housing loans
- Research and development

Scope of the Investigation

For the purpose of this investigation, the term "carbon steel wire rod" covers a coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.02 inch nor over 0.74 inch in diameter, not tempered, not treated, and not partly manufactured, and valued over 4 cents per pound, as currently provided for in item 607.17 of the *Tariff Schedules of the United States*.

Société des Acieries et Laminoirs de Lorraine ("Sacilor"), Société Métallurgique de Normandie ("Normandie"), and Union Siderurgique du Nord et de l'Est de la France

("Usinor") are the only known producers in France of the subject product exported to the United States.

The period for which we are measuring subsidization is the 1981 calendar year. Sacilor and Normandie, which produced and exported carbon steel wire rod to the United States in 1981, operate by calendar year. Usinor did not export carbon steel wire rod to the United States in 1981, and therefore was not sent a questionnaire.

Analysis of Programs

In their responses, the government of France and the Delegation of the Commission of the European Communities provided data for the applicable periods. Additionally, we received information from Sacilor and Normandie.

Sacilor owns a substantial number of shares in Société Lorraine de Laminage Continu (Sollac), which produces steel products, but does not produce wire rod. Sacilor's capital ownership of Sollac is 64.29 percent.

Sollac, in turn, owns 50 percent of Société Lorraine et Méridionale de Laminage Continu (Solmer), which also produces various steel products but not wire rod.

Benefits to Sacilor as a corporate entity except for loss coverage and debt cancellation are allocated over the value of Sacilor's total steel sales, which include its share of Sollac's and Solmer's production. Benefits to Sacilor for loss coverage and debt cancellation are allocated over total corporate sales.

Mines de Soumont (Soumont) is Normandie's wholly-owned iron-mining facility. Soumont sells its entire iron ore production to Normandie at cost. Soumont, therefore, does not function as an independent, profit-seeking company, but instead exists only to provide an essential raw material to Normandie. Therefore, preferential loans and grants to Soumont constitute countervailable benefits to Normandie, and such benefits are allocated over the total value of Normandie's steel production.

Throughout this notice, general principles and conclusions of law applied by the Department of Commerce to the facts of the current investigation concerning carbon steel wire rod are described in detail in Appendices 2–4, which appear with the notice of "Final Affirmative Countervailing Duty Determination: Carbon Steel Wire Rod from Belgium," in this issue of the **Federal Register.**

Based upon our analysis of the petition, responses to our questionnaires, and our verification and oral and written comments by interested parties, we determine the following:

I. Programs Determined To Confer Subsidies

We have determined that subsidies are being provided under the programs listed below to manufacturers, producers, or exporters in France of carbon steel wire rod.

A. Preferential Financing Including Equity Infusions

Petitioners alleged preferential financing in the form of low-interest loans and loan guarantees, and the conversion of accumulated debt into Loans of Special Characteristics.

A number of organizations of the French government and of the European Communities (EC) have issued loans and/or loan guarantees to the French steel industry. The majority of these loans were provided by the following institutions:

• *Fonds de Développement Economique et Social (FDES)*

Created by the French Parliament in 1955, FDES is a fund which provides loans to businesses and corporations in order to further the French government's economic, social, industrial, and regional development objectives. The fund, which is actually a line item in the French government budget, is approved every year by Parliament.

As FDES is not an organization but rather a budgetary item, it is administered by the Ministry of Finance. Loan applications are filed with the Ministry of Finance, but the decision to issue a loan rests with the FDES Board, which is composed of government ministers and career civil servants whose agencies are involved in economic policy.

A semi-public financial institution, Crédit National, disburses FDES funds to recipients approved by the Ministry of Finance (see discussion on Crédit National below).

FDES loans are always part of a global financial package, as other lenders, such as government credit institutions and public and private banks, participate in the funding of a project (an FDES loan never covers the entire cost of a project). Usually, loans are secured by a mortgage or a pledge. We were advised by the government of France that FDES lending rates were consistently lower than commercial rates.

There is some evidence which suggests that FDES loans are available to all industries and regions. At verification, we requested French government authorities to provide sample FDES loan applications and agreements, and to specify the criteria on which these loans were actually granted. The French government was unwilling to provide this information. In light of this refusal, we cannot conclude that these loans were generally available. Therefore, we consider these loans to confer subsidies within the meaning of the countervailing duty law to the extent that they were provided at preferential, below-market rates.

• *Crédit National (CN)*

Crédit National is a semi-public credit institution with special legal status, which issues medium- and long-term loans to French industry, including the steel industry. Loans funds are raised by offering bonds in the public marketplace. These bonds are guaranteed by the government of France.

Crédit National acted as the conduit through which FDES loans were granted to the steel industry. The French government, either directly or through Crédit National, also guarantees some loans to the steel companies. In addition, Crédit National has participated in bank loans to the steel industry through means such as the provision of rediscount privileges to the banks, which in effect constitute a guarantee.

In most cases, Crédit National acts only as part of a loan syndicate. The terms of any loans Crédit National makes on behalf of the French government are set by the French government. We verified that CN loans to the French steel industry were made with government backing and that Crédit National's operating budget is financed by the French government.

There is some evidence suggesting that CN loans are available to all industries and regions. At verification, we requested French government authorities to arrange a meeting with CN officials, to provide sample loan applications, and to specify the criteria on which these loans were actually granted. Since these requests were refused, we were unable to establish that these loans were not given at the direction of the government of France or that CN loans are generally available. Therefore, we consider these loans to confer subsidies within the meaning of the countervailing duty law, to the extent that they are provided at preferential, below-market rates. Similarly, we find the bank loans in which Crédit National participated to confer subsidies within the meaning of the countervailing duty law to the extent that they were provided at preferential, below-market rates.

• *Caisse des Dépôts et Consignations (CDC)*

CDC is a government institution that invests funds deposited in the Caisses d'Epargne (the French savings banks), pension funds, and insurance company deposits. CDC makes both short- and long-term loans to various industries, including steel. During verification, we requested an interview with CDC from French government officials, in order to determine whether CDC loans were generally available. This request was refused. Therefore, we were unable to establish that CDC loans were not given to the steel industry in particular at the specific direction of the government. In light of the above, we cannot conclude that CDC loans were generally available. Therefore, we consider these loans to confer subsidies within the meaning of the countervailing duty law to the extent that they were provided at preferential, below-market rates.

• *European Coal and Steel Community (ECSC) and European Investment Bank (EIB) Loans and Loan Guarantees*

For the reasons discussed in Appendix 3, ECSC industrial investment loans and guarantees and EIB loans and loan guarantees confer countervailable benefits to the extent that the loan was made at a preferential interest rate, or that the guarantee enabled the loan recipient to obtain a preferential interest rate.

• *Groupement de l'Industrie Sidérurgique (GIS)*

GIS was founded in 1946 as a corporation whose sole shareholders were 45 steel companies. The purpose of GIS was to raise money for capital projects of the steel companies. By floating debt instruments in the public marketplace, GIS raised monies to lend to the companies at a rate equal to the rate being paid on bonds issued to the public, plus operating expenses. Five percent of the funds received were left on deposit with GIS to cover individual steel company defaults. Funds were raised in France, other EC countries, and abroad. GIS bonds are backed by unconditional guarantees of the companies, with each company being liable to the bondholders for the sums loaned to it by GIS. No loans have been issued by GIS since 1978, and no principal from previous loans remained outstanding on the steel companies' books in 1981.

• *Specialized Financial Institutions*

A number of private, cooperative financial institutions emerged after World War II to raise capital for various sectors of French industry. By floating bond issues, these cooperative institutions raised capital and made loans to their member companies, including steel companies. Since 1978, none of these institutions has floated bonds or loaned funds to the steel industry. These institutions include:

—Groupement Interprofessionnel Financier Antipollution (GIFIAP): environmental protection;
—Groupement pour le Financement de la Région de Fos (GIFOS): development of the Fos area near Marseille;
—Groupement des Industries de Matériaux de Construction (GIMAT): construction materials;
—Groupement pour le Financement des Economies d'Energie (GENERCO): energy conservation;
—Groupement d'Equipement pour le Traitement des Minerais de Fer (GETRAFER): processing of iron ore.

Because these are private, cooperative institutions that issued loans at non-preferential rates, we find that those loans issued prior to 1978 with principal still outstanding in 1981 do not confer any countervailable benefits.

Our treatment of loans and loan guarantees provided at preferential rates by FDES, Crédit National, bank syndicates in which Crédit National participated, CDC, the ECSC and the EIB is outlined in sections d (i) and (ii) below. Because loans from the GIS and the other specialized financial institutions were not issued after 1978, we did not find them countervailable except when they were converted into Loans of Special Characteristics ("Prêts à Caractéristiques Spéciales" or PACS), as outlined in section d (iii).

We have discussed preferential financing conferred upon Normandie and Sacilor separately as follows:

1. *Sacilor.* a. *The 1978 Rescue Plan.* By 1978, the French steel industry had been experiencing severe financial difficulties for a number of years. Sacilor was unable to pay its debts. In September 1978, the government of France instituted a major recapitalization and restructuring program for the steel industry, hereinafter referred to as the "Rescue Plan."

A primary financial goal of the restructuring was the reduction of the company's debt service burden. This was accomplished in three ways.

First, the banks refunded a certain amount of interest to Sacilor over a five-year period beginning in 1978. Because these refunds were provided under the government-directed Rescue Plan, and were grants to a specific enterprise, we determine that they confer countervailable benefits. For our treatment of these refunds, refer to section d(iv).

Second, the private holding company Marine-Wendel cancelled a portion of Sacilor's debt. Because this forgiveness of debt was provided at the direction of the government, we determine that it confers a countervailable benefit. For our treatment of this debt, see section d (v).

Third, the loans from Crédit National, FDES, the Caisse des Dépôts et Consignations, the GIS, and the other specialized financial institutions, were also converted into PACS. Marine-Wendel converted a portion of its loans to Sacilor into PACS. The PACS bear an interest rate of 0.1 percent until 1983, when they are scheduled to be renegotiated. Principal repayments are suspended until 1983 or whenever the company returns to profitability, whichever is sooner. In addition to the initial 1978 conversions, PACS were also issued between 1979 and 1981. Under the Rescue Plan, Sacilor services both the PACS and other debt owed to Marine-Wendel, CDC, and the FDES. The French government created two institutions to service the debt, including PACS, owed to the remaining lenders. These Institutions are the Caisse d'Amortissement pour l'Acier (CAPA), and the Groupement des Emprunts Collectifs de la Sidérurgie (GECS).

CAPA was created to service the debt owed to Crédit National, the GIS, and the other specialized financial institutions. CAPA was initially funded by the French government, state-owned institutional investors, and the Caisse Des Dépôts et Consignations. CAPA services the debt through interest payments on PACS, loans from the French Treasury, and borrowings on the financial markets, which are guaranteed by the French government.

The GECS was created because the French government determined that the holders of bonds issued by the GIS and the other specialized financial institutions should be protected from losses. CAPA reimburses the GECS with the funds it has raised as described above. The GECS then makes principal and interest payments to the bondholders.

Because the PACS were created under the government-directed Rescue Plan and are specific to the steel companies, we find that they confer countervailable benefits. Our treatment of these PACS is outlined in section d(iii).

b. *Equity Infusions.* Two equity infusions were made in Sacilor through which the French government became a shareholder in the company. The first

infusion was made in 1979 under the Rescue Plan, when funds were provided in exchange for stock by CDC, the banks, GIS, FDES, and Crédit National. The second infusion was made in 1981, when PACS held by FDES were cancelled in exchange for stock.

Equity participation by the government is not a subsidy *per se*. Petitioners alleged, however, that government infusions of equity into Sacilor were made at a time when these infusions were not consistent with commercial considerations. We conclude that this, in fact, was the case because of the critical financial condition of the company at the time the infusions occurred (as described in the "Creditworthiness Issue" section below). Therefore, a subsidy potentially exists.

Because the providers of the infusions received stock in exchange for cash, we calculated average stock prices for the period preceding the infusions. We then compared the market value of the new stock issued with the actual value to the company of the equity infusion. Since the actual value was greater than the market value, we determine that the equity infusions conferred a countervailable benefit. The difference is considered to be a grant and is allocated over 15 years, the average useful life of capital assets (see grants section in Appendix 2). For our treatment of equity infusions, refer to section d (iv) and (v) below.

c. *Creditworthiness.* Petitioners alleged that Sacilor is uncreditworthy. In our preliminary determination, we found that, for purposes of this investigation, Sacilor became uncreditworthy by the end of 1975. Upon further examination of the relevant data, we determine that, although Sacilor had a deteriorating financial situation through 1977, it was still in a position to obtain credit from private lenders on terms consistent with commercial considerations without government involvement.

By 1978, Sacilor's financial situation had become so critical that the government of France intervened with the Rescue Plan described above, under which most of Sacilor's debt was converted into PACS. Our analysis of Sacilor's financial statements revealed a pattern of significant operating losses each year from 1975 through 1981 (from a low of FF 1.1 billion in 1979 to a high of FF 2.6 billion in 1981). Sacilor has had increasingly high debt/equity ratios in every one of those years. In light of Sacilor's inability by 1978 to raise funds without the French government's heavy involvement in the company, and the continuing deterioration of the company's financial position, we consider Sacilor to have been uncreditworthy since 1978 for the purposes of this investigation.

d. *Calculation of Countervailable Benefits.* Preferential loans and loan guarantees, PACS, and equity infusions have been treated in the following five ways:

i. *Preferential Loans and Loan Guarantees Issued Prior to 1978.* The subsidy rate for any loan and loan guarantee from CDC, FDES, Crédit National, bank syndicates in which Crédit National participated, the ECSC, and the EIB that was made prior to 1978 for which principal was still outstanding in 1981, and which was made at a rate below the commercial benchmark for a comparable loan in the year of issue, is calculated according to the general methodology for loans and loan guarantees outlined in Appendix 2. For France, we used as the commercial benchmark the monthly financial statistics on secondary market yields of private bonds published by the Organization for Economic Cooperation and Development (OECD). For the discount rate, we used the average annual yield of public and semi-public sector bonds on the secondary market as published by the OECD. Using the method outlined in Appendix 2, we computed a subsidy of 0.000 percent ad valorem for Sacilor.

ii. *Preferential Loans and Loan Guarantees Issued Since 1978.* Because we consider Sacilor to have been uncreditworthy since 1978, loans and loan guarantees issued since then by CDC, FDES, Crédit National, bank syndicates in which Crédit National participated, the ECSC, and the EIB, with principal still outstanding during 1981, are treated as loans to a company considered to be uncreditworthy. Using the equity methodology for loans to uncreditworthy companies (see Appendix 2), we compared the national average rate of return on equity in France with the rate realized in 1981 by Sacilor on its investments. To prevent countervailing a higher amount than if the loan had been an outright grant to the company, we compared the 1981 benefit of these loans under the equity methodology used for loans to uncreditworthy companies, with the result under the grant methodology described in Appendix 2. We computed a subsidy of 1.791 percent *ad valorem*.

iii. *Loans and Loan Guarantees Converted into PACS.* The benefits of Sacilor's PACS were calculated using the equity methodology for loans to uncreditworthy companies as described in part (b) above and as outlined in Appendix 2. In calculating the benefit of loans that were converted into PACS, we did not include those PACS that were subsequently cancelled in exchange for stock. These are discussed in section d (v) below. We calculated a subsidy rate of 6.450 percent *ad valorem*.

iv. *Loss Coverage.* Since the cash infusions in exchange for stock and the interest refunds are not tied to capital assets or explicitly earmarked, we consider these funds available to cover cash-based losses.

We assume that when a company running large cash-based losses receives funds, these funds will be used to meet immediate obligations such as wages, materials, and interest expenses, which are items normally expensed in one year. Based on the above, we are expensing the funds in the year in which they were received to cover the losses of the previous year.

We calculated the annual cash losses as explained in Appendix 2, and compared the funds received to the previous year's losses. In making this comparison, we considered interest refunds before the cash infusions in exchange for equity.

For those years in which the amounts received exceeded losses, except 1981, we treated the excess as follows:

- In the case of interest refunds, we treated the excess as a grant and allocated it over 15 years, the average useful life of capital assets;
- In the case of cash infusions made in 1979 in exchange for stock, we calculated average stock prices for the period preceding the infusions (because the providers of the infusions received stock in exchange for cash). We then compared the market value of the new stock issued with the actual value to the company of the equity infusion. As the actual value was greater than the market value, we treated the difference as a grant and allocated it over 15 years, the average useful life of capital assets (see grants section in Appendix 2).

For 1981, the period for which we are measuring subsidization, we treated the entire amount as a grant for loss coverage, and expensed it in the year received.

We calculated the 1981 countervailable benefits, and allocated them over the total value of Sacilor's sales to calculate an *ad valorem* subsidy rate of 0.183 percent.

v. *Cancellation of Debt.* In 1978, pursuant to the government-directed Rescue Plan, Marine-Wendel cancelled part of Sacilor's debt. Because it did not receive anything in return for this

cancellation, we treated the amount cancelled as a grant, and allocated it over 15 years, the average useful life of capital assets (see grants section in Appendix 2).

At the end of 1981, the government of France cancelled PACS owed to it by Sacilor in exchange for additional shares in Sacilor. At that time, the government's share of ownership reached approximately 90 percent. As stated above, Sacilor has been uncreditworthy since 1978. Therefore, it is doubtful that the government's action was consistent with commercial considerations.

Since Sacilor's stock was traded on the Paris Bourse at the time the French government announced its intention to cancel its PACS for equity (see equity section in Appendix 2), we calculated average stock prices for the period immediately preceding the government's action. We then compared the average stock price with the actual value to the company of the government's equity infusion. As the actual value was greater than the market value, we treated the difference as a grant and allocated it over 15 years, the average useful life of capital assets (see grants section in Appendix 2). We then applied the 1981 net benefit over the value of all sales, and computed an *ad valorem* subsidy of 4.845 percent.

2. *Normandie.* The subsidy amounts for loans made by FDES, Crédit National and the ECSC to Normandie, at rates below the commerical benchmark for a comparable loan in the year of issuance and still outstanding in 1981, are calculated according to the methodology outlined in Appendix 2 in the section dealing with preferential loans and loan guarantees for creditworthy companies. We compared what Normandie would have paid in 1981 on a comparable commercial loan with what the company actually paid on preferential loans in that year. To determine what Normandie would have paid on a comparable commercial loan, we used as the commercial benchmark the monthly financial statistics on secondary market yields of private bonds published by the Organization for Economic Cooperation and Development (OECD). For the discount rate we used the average annual yield on the secondary market of public and semi-public sector bonds as published by the OECD. Accordingly, we found a subsidy of 0.283 percent *ad valorem.*

B. Grants

In 1980, the French government authorized a grant to Normandie which was apparently tied to the industrial use of the LBE process converter. Funds were received by Normandie in 1981. Because the amount authorized and received was less than $50 million, we allocated the grant over the average useful life of capital assets as explained in Appendix 2 and allocated the 1981 amount over Normandie's total steel production to calculate an *ad valorem* subsidy of .001 percent.

C. Certain Labor-Related Aid: Sacilor

French corporations have certain statutory and contractual obligations to pay severance to their employees in case of interruption or cessation of empolyment. There are several French government early retirement plans designed to compensate for the effects of large-scale layoffs. The plan designed to cover all industries is the Fonds National de 1'Emploi (FNE). Because of the significant problems faced by the steel industry with respect to restructuring, early retirement and layoff agreements were negotiated between certain steel companies and the labor unions.

These are the Convention de Protection Sociale of June 1977 (CPS), which applies to engineers and executives of the steel industry, and the Convention Générale de Protection Sociale of July 1979 (CGPS), which applies to all other steel industry workers.

Under these special steel agreements, workers laid off between the ages of 55 and 60 must retire. This is the "anticipated cessation of activity" plan which is financed in the same manner as the FNE; that is, by government, employer, and employee contributions to the unemployment fund, and government contributions financed by company payments.

Workers between the ages of 50 and 55 who are laid off fall under the "dispensation of activity" plan. Under this plan, the workers are still under contract to the company but their salaries are paid by the government. While the companies are under no contractual or statutory obligation to pay wages to laid-off workers, they do have contractual and statutory obligations to pay severance to laid-off workers. Since the workers who are laid off at age 50 continue to receive wages, the companies' requiremrnt to pay severance is deferred until the worker reach age 55. The benefit to the steel companies is the difference between the liability accrued in each year for severance pay and the actual expense incurred in each year for severance pay.

We considered this benefit to be a grant to Sacilor. Because the benefit is less than one percent of the total value of 1981 steel production, and is tied to an item normally expensed in one year, we allocated the 1981 benefit over the total value of Sacilor's 1981 steel sales, and calculated a subsidy rate of 0.947 percent *ad valorem.*

D. Research and Development (R&D)

Research and development for the French steel industry is conducted by the Institut de Recherches de la Sidérurgie Française (IRSID). IRSID was established by the French steel companies, which underwrite the major portion of IRSID's budget. However, according to IRSID's 1980 annual report, the French government contributed at least three percent of IRSID's yearly budget, and the ECSC contributed ten percent.

At verification, w were not allowed to meet with IRSID officials and were not provided with a 1981 annual report or any IRSID official documents. For this reason, and because we were told that the results of IRSID research were not released to the public, and that the research is industry specific, we consider that portion of IRSID's budget funded by the government of France to be countervailable. However, we find that R&D funding provided to IRSID by the ECSC is not countervailable, as the results of the ECSC-funded research are made publicly available by the ECSC. To calculate the 1981 countervailable benefit, we are using IRSID's 1980 annual report as the best information available. The French government's share of IRSID's budget is 3 percent. We applied this amount to the total value of 1980 French steel sales, because the benefits of the research were available to all steel companies that are members of IRSID. We calculated a net subsidy for all products and all companies of 0.007 percent *ad valorem.*

II. Programs Determined Not To Be Subsidies

We have determined that subsidies are not being provided under the following programs to manufacturers, producers, or exporters in France of carbon steel wire rod.

A. Export Credit Insurance

The Compagnie Française d'Assurance pour le Commerce Extérieur (COFACE) is a government corporation that provides export insurance to cover commercial, political, exchange rate fluctuation and inflation risks. For our preliminary determination, we reviewed COFACE's 1980 annual report (the most recent report available) and found that, while the company showed an overall profit, its insurance activities operated at a deficit. Revenues

from financial and real estate investments allowed COFACE to offset the operating deficit on insurance. Our preliminary review of the annual reports for 1976–1980 revealed a pattern of yearly operating deficits on insurance activities that were offset by revenues from investments. However, we reviewed the 1981 data and verified that only the political risk program sufffered losses, not the commercial risk program. We also verified that premiums for COFACE's commercial risk insurance program exceeded losses incurred by that program. Consequently, we have determined that COFACE export insurance does not confer a subsidy with respect to exports to the United States.

B. Vocational Training Assistance

We verified that the only vocational training assistance programs utilized by the respondents during 1981 were provided through the European Social Fund (ESF), the Fonds National de l'Emploi (FNE) and the Association de Formation de l'Est (AFOREST), a regional training organization operating under the auspices of the regional Chamber of Commerce and financed by dues from members.

In our preliminary determination, we assumed that these programs were aimed at retraining steelworkers for jobs within the steel industry. However, we verified that the vocational training programs are aimed at retraining workers for jobs other than steel production. For those workers subsequently reemployed in the steel industry, we found that they were reemployed in jobs not related to steel production. Therefore, we have determined that these programs do not confer subsidies under the countervailing duty law.

C. ECSC Worker Housing Loans

For the reasons described in Appendix 3, we reverse our preliminary determination that these loans confer a subsidy on steel companies whose workers receive them, and determine instead that they do not.

D. Certain Labor-Related Aid: Normandie

Normandie received labor assistance in the form of reimbursements from FNE for payments to laid-off workers. Because assistance from FNE is generally available we determine that it does not constitute a countervailable benefit.

E. Research and Development Assistance

Three government organizations provided a small amount of R&D funding to French steel companies included in this investigation:

- Agence Nationale de Valorisation de la Recherche (ANVAR): a public corporation which is designed to support innovation and enhance research;
- Direction Générale de la Recherche Scientifique et Technique (DGRST): a subdivision of the Ministry of Research and Technology; and
- Agence de l'Informatique (ADI): a public corporation which promotes the use of computer technology.

We verified that R&D funding was not awarded on a regional or industry-specific basis, and that research results were made publicly available. Therefore, we have determined that the amounts received through these programs do not confer subsidies within the meaning of the Act.

F. Energy Assistance

The French steel companies involved in this investigation received a few small grants from the Agence pour les Economies d'Energie (AEE). The AEE is a government agency, created in 1974, that provides grants to foster energy efficiency. Grants received from the agency may have to be repaid if target efficiency levels are not met. Early in 1982, the AEE was merged with several other agencies to form the Agence Française pour la Maîtrise de l'Energie (AFME). We verified that these grants were not provided on a regional or industry-specific basis. Therefore, we have determined that the amounts received from AEE by the steel companies included in this investigation do not confer subsidies.

G. Regional Anti-Pollution Agencies

Created by Law No. 64–1245 of 1964, these regional agencies, known generally as "Agences Financières de Bassin," provide incentives for the installation of anti-pollution devices. We believe that these programs are generally available, and do not benefit a specific group of industries. The agencies' operations are funded by dues from industrial users. In return, they award bonuses and loans to combat pollution.

In addition, the dues paid to these agencies by the steel companies involved in this investigation exceeded the amounts that they received. For these reasons, we find that the funds received do not confer subsidies.

H. Assistance to Improve Working Conditions

One of the steel companies involved in this investigation indicated that it had received a small grant from the Agence Nationale pour l'Améloiration des Conditions de Travail (ANACT). ANACT is a public corporation, established in 1973, to promote better working conditions. Because ANACT funds are not granted on a regional or industry-specific basis, we find that the amounts provided do not confer subsidies.

I. Assistance to Coal Suppliers

In our preliminary determination, we found that subsidies to French coal producers did not bestow a countervailable benefit upon the production, manufacture or exportation of French steel.

Between the preliminary determination and this final determination, we analyzed and verified aspects of the French coal subsidy program as it applies to steel. Based upon the verified information in the records of this investigation, we find that this program does not confer a countervailable benefit on French steel producers for the following reasons.

Benefits bestowed upon the manufacturer of an input do not necessarily flow down to the purchaser of that input if the sale is transacted at arm's length. In an arm's length transaction, the sellers generally attempt to maximize their revenue by charging as high a price as the market will bear. Where the price charged in an arm's length transaction for a subsidized input exceeds the market price for that input, we do not believe that any portion of the subsidy flows to the purchasers of the subsidized input. On the other hand, where the price of a subsidized input is lower than the market price, part or all of the subsidy may well be used to allow the subsidized manufacturer to undercut the market price. If so, then part or all of the subsidy does flow to the purchaser of the subsidized input; without at least part of that subsidy the subsidized manufacturer could not undercut the market price, and the purchaser would consequently pay the higher market price to the unsubsidized manufacturers.

These principles apply to French coal sales as follows. We find that the price charged for French coal does not undercut the market price. Absent special circumstances warranting a contrary conclusion, French steel producers apparently do not benefit from French coal subsidies as long as

the price for French coal does not undercut the market price.

Further consideration is warranted, however, for one special circumstance. The government of France directly or indirectly owns all French coal producers and partially owns Sacilor. The issue arises whether transactions between them are conducted on an arm's-length basis. We do not believe that government ownership *per se* confers a subsidy, or that common government ownership of separate companies necessarily precludes arm's-length transactions between them. To determine whether coal sales between government-owned coal and steel producers appear to have been consummated on arm's-length terms, we considered whether the government-owned coal producers sold to the government-owned steel producers at the prevailing market price. We found that French coal producers did charge the prevailing market prices. On this basis, we conclude that coal subsidies were not conferred on steel producers as a result of government ownership.

Regarding the allegation that the French steel industry indirectly benefits from German government assistance provided to the coal industry in the Federal Republic of Germany, we do not consider such assistance to confer a countervailable benefit on the French steel industry for the reasons outlined in Appendix 2.

The ECSC provides various production and marketing grants to ECSC coal and coke producers. However, we do not consider this assistance to confer a countervailable benefit on the French steel industry for the reasons described in Appendix 3.

J. Relocation and Moving Benefits

A number of employees have been relocated from Sacilor, to Solmer's plant at Fos-sur-Mer near Marseilles. The workers' relocation and moving expenses were initially financed by advances from Sacilor to Solmer. The workers were reimbursed with ECSC funds channeled through the Fonds National de l'Emploi (FNE), which were forwarded to Solmer by the workers. Solmer in turn repaid Sacilor.

We have determined that because Solmer does not make the product under investigation this transaction did not benefit the production of wire rod, and is therefore not countervailable with respect to wire rod.

III. Programs Determined Not To Be Used

We have determined that the following programs which were listed in the notice of "Initiation of Countervailing Duty Investigation" are not used by the manufacturers, producers, or exporters in France of carbon steel wire rod.

A. Regional Development Incentives

The government of France provides a series of tax and non-tax regional incentives to French and foreign businesses to establish new, or to expand existing, businesses in certain French regions.

The Délégation à l'Aménagement du Territoire et à l'Action Régionale (DATAR) coordinates the programs of various government agencies and ministries. For incentive purposes, France is divided into four zones. Each zone, or part of a zone, is eligible for different types or levels of assistance. The assistance includes development grants, non-industrial grants, research and development grants, decentralization indemnities, and job training subsidies.

We have no evidence that DATAR provided any benefits to the steel companies involved in this investigation.

B. Special Fund for Industrial Adaption

Petitioners alleged that French steel companies received grants and preferential loans through the Fonds Spécial d'Adaptation Industrielle (FSAI). FSAI was established in 1978 to promote job creation and industrial diversification in the steel, textile, shipbuilding and coal regions of France. We have no evidence that the steel companies included in this investigation received benefits from FSAI.

C. Export Financing

In France, exports may be financed or guaranteed through the Commission Interministérielle des Garanties et du Crédit au Commerce Extérieur and the Banque Française due Commerce Extérieur (BFCE). We have no evidence that the steel companies involved in this investigation availed themselves of any of these programs.

D. European Regional Development Funds (ERDF)

This program is described in Appendix 3. We found no evidence that any company under investigation received ERDF funds.

IV. Petitioners' Comments

Comment 1: Counsel for petitioners argue that a more thorough investigation should be done with respect to Marine-Wendel's forgiveness of debt to Sacilor.

DOC Position: During verification, we requested additional information concerning Marine-Wendel's actions in relation to the debt owed to it by Sacilor. We also reviewed Marine-Wendel's participation in the Rescue Plan. Our determination in regard to Marine-Wendel's actions is included in the "Preferential Financing" section of this notice.

Comment 2: Counsel for petitioners argue that all domestic subsidies in a country should be countervailed, even if they are available to all industries.

DOC Position: See Appendix 4.

Comment 3: Counsel for petitioners argue that the time period to use in determining if critical circumstances exist is the period before the petitions are filed.

DOC Position: See Appendix 4.

Comment 4: Counsel for petitioners argue that for purposes of critical circumstances domestic subsidies should be considered in determining whether there is a subsidy inconsistent with the Agreement.

DOC Position: See Appendix 4.

Comment 5: Counsel for petitioners allege that imports from France were "massive" in the sense of section 703(e) of the Act.

DOC Position: See Appendix 4.

Comment 6: Counsel for petitioners argue that, in our preliminary determination, the use of the same discount rate for creditworthy and uncreditworthy companies understates the present value of the subsidy.

DOC Position: See Appendix 2.

Comment 7: Counsel for petitioners argue that ECSC subsidies to coal benefit French steel companies and are therefore countervailable.

DOC Position: See Appendix 3.

Comment 8: Counsel argues that French government subsidization of coal producers confers subsidies on French steel producers.

DOC Position: For the reasons indicated above in the "Assistance to Coal Suppliers" section, we have determined that subsidies conferred by the French government on coal producers do not pass through to steel producers.

Comment 9: Counsel for petitioners contends that the Department overestimated the value of Sacilor shares received by the Government of France. Lacking the ability to determine a realistic value of this stock, the Department should attribute no value whatsoever to it.

DOC Position: We used Sacilor's stock market value as the best information available to make a reasonable valuation of company shares, as discussed in Appendix 2.

Comment 10: Counsel for petitioners disagrees with our addition of Sollac's

and Solmer's values of production in the calculation of *ad valorem* subsidies.

DOC Position: In our final determination we have used the total value of Sacilor's steel sales, which includes Sacilor's share of Sollac's and Solmer's steel production, for subsidy programs attributable to Sacilor's entire steel production. See Appendix 2.

Comment 11: Counsel for petitioners contends that any control which Sacilor has exercised over Normandie since the initiation of the case should be reflected in this determination.

DOC Position: At the moment, our best information is that Normandie has not yet concluded an arrangement with Sacilor. If a merger does take place between Sacilor and Normandie, however, Normandie will be assessed any wire rod deposit rate applicable to Sacilor. A merger between Normandie and any other company would result in the application of the "All Others" deposit rate to Normandie, which is equal to Sacilor's rate.

Comment 12: Counsel for petitioners asserts that benefits attributable to Sollac and Solmer should be included in the rate for Sacilor because Sollac and Solmer produce billets.

DOC Position: Our best information indicates that Sollac and Solmer do not produce billets.

V. Respondents' Comments

Comment 1: Counsel contend that Crédit National is not a government credit institution, but a private bank subject to normal commercial practices, and that CN loans and loan guarantees are not industry-specific.

DOC Position: We agree, as indicated in the section on preferential financing above, that there is some evidence to suggest that Crédit National loans are available to all industries. However, the government of France would not provide us with the criteria on which the loans were based. We were not allowed to meet with Crédit National officials or to view sample Crédit National,loan applications. Therefore, we were not satisfied that CN loans were not industry-specific, and that they were not subsidies.

With regard to Crédit National's legal status, France's foremost authority in administrative law, Professor André de Laubadère, states in his "Traité Elémentaire de Droit Administratif" (Librairie Générale de Droit et de Jurisprudence, Paris, 1966, vol. 3):

(pp. 439–440)

"Un troisième groupe d'organismes est constitué par les *Instituts spécialisés* que l'on dénomme fréquemment 'auxiliaires' ou encore 'alliés' . . . du Trésor et dont l'intervention est née du fait qu'elle porte sur des secteurs dont la rentabilité n'est pas suffisante pour attirer les crédits bancaires. Mais ces instituts sont eux-mêmes trés divers:

(* * *)

"D'autres sont des *sociétés de droit privé*, mais dotées d'un statut particulier qui les soumet à un contrôle étroit de l'Etat et qui conduit à les appeler généralement *organismes para- ou semi-publics* (Crédit National, etc.)."

(pp. 448–449)

"A côté des établissments publics (* * *), on recontre des institutions financières spécialisées qui jouent un rôle anologue et qui, quoique privées, occupent encore une place dans les institutions de l'Etat-banquier parce qu'elles servant également d'intermédiaires ou relais pour le Trésor; elles reçoivent du reste, en raison de ce rôles, des dotations de l'Etat et comportent, de sa part, des contrôles très particuliers qui les font qualifier d'organismes 'para-publics' ou 'semi-publics'.

"Ce sont notamment le *Crédit National* (* * *).

"Le cas du Crédit National est particulièrement intéressant car il * * * illustre la montée du rôle bancaire de l'Etat.

"(* * *) le *Crédit National* est devenu un instrument de financement de l'industrie par des prêts à long et moyen terme mais il est, à cet égard, un moyen de réaliser une politique de prêts des pouvoirs publics, un relais de l'Etat.

"Il en résulte un caractère complexe de cette institution aussi bien en ce qui concerne sa structure que son rôle:

"En ce qui concerne sa *structure*, le Créit National est une société anonyme de droit privé dont le capital a été souscrit par les principaux établissements de crédit et par les plus importantes entreprises industrielles françaises. Mais l'Etat possède des prérogatives exorbitantes sur son organisation et son fonctionnement: le président du conseil d'administration et les deux directeurs sont nommés par décret; deux des censeurs, chargés des fonctions de surveillance, sont nommés par le ministre des Finances et sont, en fait, le directeur du Trésor et les directeur de la Caisse des Dépôts.

"Quant à son *rôle*, le Crédit National, s'il est une banque, est une banque chargée d'une mission d'intérêt général. Ce trait est accentué par l'importance actuelle du rôle du Créit National comme distributeur de fonds du F.D.E.S. et comme auxiliaire de l'éxécution du Plan. Sans doute, certains prêts sont consentis par le Crédit National sur sa seule décision, lorsqu'ils proviennent de fonds propres; mais d'autres prêts sont consentis soit après avis spontanément demandé au Commissariat du Plan, soit sur décision préalable du Conseil de direction du F.D.E.S.; ces derniers sont ceux qui sont effectués à l'aide des fonds du F.D.E.S. transitant par le Crédit National; ils constitutent la partie la plus importante des opérations de celui-ci."

(Translation)

(pp. 439–440)

"A third group of organizations comprises the *Specialized Institutions*, which are frequently labelled as 'auxiliaries' or 'allies' * * * of the Treasury, and whose intervention was brought about by the fact that it bears on areas the profitability of which is inadequate to attract bank loans. These institutions, however, are themselves very diverse in nature:

(* * *)

"Others are *private corporations* under a special legal status that submits them to tight state control and causes them to be generally referred to as *par- or semi-public organizations* (Crédit National, etc.)."

(pp. 448–449)

"In addition to public entities (* * *), one also encounters specialized financial institutions which play a similar part and which, although they are private, also fit within the framework of the Banker-State because they also serve as intermediaries or relays for the Treasury; besides, they receive, because of this role, funds from the State which entail very particular controls by the State, which causes them to be called 'para-public' or 'semi-public' organizations.

"Among these are Crédit National (* * *).

"The case of Crédit National is particularly interesting as it * * * illustrates the ever-growing role of the State as a banker.

"(* * *) Crédit National has become a financing instrument for industry through medium- and long-term loans, but it is, in this regard, a means for the implementation of the government's lending policy, a relay of the State.

"As a consequence, this institution presents complex characteristics as regards its structure as well as its role: "With respect to its *structure*, Créit National is a private corporation whose capital stock was subscribed by the principal credit institutions and the largest French industrial corporations. The State, however, possesses exorbitant rights of oversight with regard to its organization and activities: its president and both executive directors are appointed by government decree; two of its four censors, which supervise the organization's activities, are appointed by the Minister of Finance and are actually the Director of the Treasury and the Director of the Caisse des Dépôts (et Consignations).

With respect to its *role*, Crédit National * * * is a bank entrusted with a mission of general interest. This is emphasized by Crédit National's role as a conduit for F.D.E.S. funds and as an auxiliary to the implementation of the (Five-Year) Plan. It is true that certain loans are granted by Crédit National on its own, when they are backed by Crédit National's own funds; other loans, however, are granted either after seeking the National Planning Board's opinion, either by a prior decision of the F.D.E.S. executive board; the latter loans are those made with F.D.E.S. money transiting through Crédit National; they constitute the larger part of its operations."

These excerpts demonstrate that although Crédit National is legally a private corporation, it was created by a special law, the majority of its stockholders are state-owned banks and financial institutions, and the

government of France exercises tight control over Crédit National's operations. Further, Crédit National does not make loans under purely commercial considerations and acts as an agent of the government of France.

Comment 2: Counsel argue that FDES loans are not made on a regional basis, and therefore are not countervailable.

DOC Position: As indicated above in the section on preferential financing, there is some evidence to suggest that FDES loans are available to all regions. However, FDES is a government fund administered by the French Treasury. The government of France would not provide us with the criteria on which the loans were based. Therefore, we are not satisfied that FDES loans were not regional and that they did not confer subsidies.

Comment 3: Counsel for Sacilor argues that the Rescue Plan was not instituted by the government of France, but rather was the product of negotiations between Sacilor and its creditors, and that because the Rescue Plan was consistent with rational commercial policies, there were no countervailable benefits from either the PACS or other elements of the Plan.

Counsel contend that the creditors acted reasonably, based on their conclusion that Sacilor would return to profitability as a result of the Rescue Plan.

Counsel for Sacilor further contends that "Sacilor's borrowing capacity, and thence its creditworthiness, was restored" as a result of the Rescue Plan.

DOC Position: We concur that the negotiations that led to the Rescue Plan included Sacilor's creditors. However, this point is immaterial because the result of the negotiations was substantial government intervention in the steel companies' financing, which was the intent of the creditors. Further, normal commercial considerations do not usually involve government intervention to the extent of the Rescue Plan.

With respect to the second argument, the creditors' forecast of return to profitability hinged on the guarantees given by the government of France that the steel companies would be relieved of the responsibility of servicing their debt. Those circumstances are not consistent with commercial considerations.

With regard to the Rescue Plan, we are not in a position to determine its success or failure; however, we do note that Sacilor continued to sustain persistent, heavy losses and show unfavorable financial ratios in succeeding years when loans were made, up to the present time. Therefore, for purposes of this investigation, Sacilor remains uncreditworthy.

Comment 4: Counsel contends that Sacilor is creditworthy because it received loans from both nationalized and private banks through 1980.

Counsel for Sacilor argues that the Department should not have used hindsight in deciding whether the lenders acted in accordance with commercial considerations.

DOC Position: In our preliminary determination, we found Sacilor to have been uncreditworthy since the end of 1975. Upon further examination of the relevant data, we determined that, although Sacilor had a deteriorating financial situation through 1977, it was still in a position to obtain credit from private lenders on terms consistent with commercial considerations without government involvement.

Even though Sacilor received loans from private banks after 1978, most of these loans were given with express government guarantees, and thus are not evidence of the ability of the firm to raise funds on its own, and several were made at the express request of the government to the banks.

Beginning with the 1978 Rescue Plan, there has been an obvious pattern of French government direction of funds into the steel industry. We judge that the funds poured into Sacilor have been the result of French government targeting, and absent that targeting, Sacilor could not have obtained the funds on an arm's length, commercial basis, in view of the heavy persisting losses and the unfavorable financial ratios. Consequently, we determine that Sacilor remained uncreditworthy from 1978 into the period for which subsidies are being measured.

With regard to the hindsight argument, we reiterate that our assessment of the creditworthiness of the companies for any given year is based on conditions *at that time,* and not hindsight (see Appendix 2).

Comment 5: Counsel for Sacilor argues that, when PACS are properly viewed as equity, the debt/equity ratio decreases to an acceptable level, and that PACS are at least as valuable to the creditors as the loans that they replaced.

DOC Position: We consider the PACS to be debt, because they are actually called loans ("*Prêts à* Caractéristiques Spéciales"), bear interest, albeit at a very special rate, and must be repaid when the recipients return to profitability. Accordingly, they should not be included in the equity side of the debt/equity ratio. As discussed earlier, we calculated the benefit of PACS using the equity methodology for loans to uncreditworthy companies outlined in Appendix 2.

Comment 6: Counsel for Sacilor argues that premiums paid over market value of stock are common in takeovers where the objective is to gain control over the company. Counsel also asserts that the French securities market is notoriously inefficient because it is a thin market, and cites four examples of premiums for stock in companies with losses.

DOC Position: We agree that in a commercial takeover by private investors, premiums may be paid over the stock market price. However, in this instance we are not dealing with a commercial undertaking, but rather with a French government nationalization of the steel companies, which were not in a financial condition where a "control premium" would be expected in a commercial context (see Appendix 2).

As described in Petitioner's Comment 9, we used Sacilor's stock market prices as best information available to make a fair valuation of the company's shares, for the reasons described above and in Appendix 2.

Comment 7: Counsel for Sacilor contends that Sollac's and Solmer's benefits should not be aggregated with Sacilor's.

DOC Position: We agree with counsel. Neither Solac nor Solmer produces wire rod and benefits to them are therefore not attributable to Sacilor's wire rod production. However, benefits to Sacilor's total steel production were allocated over total steel sales; benefits to the corporate entity as a whole (e.g., loss coverage) were allocated to Sacilor's total sales. See Appendix 2.

Comment 8: Counsel for Normandie contends that COFACE's commercial risk and political risk insurance programs should be considered separately, as the former operates at a profit and the latter at a loss. Normandie's exports to the United States are insured under the commercial risk program exclusively.

DOC Position: We agree with counsel's argument, and have taken it into account in section II–A of this notice.

Comment 9: Counsel argues that, as Sacilor's obligation to pay severance to laid-off workers is contractual rather than statutory, there can be no subsidy. He also contends that Sacilor's contractual agreement was to serve as a conduit for government largesse.

DOC Position: We determine that the steel companies do have contractual and statutory obligations to pay severance to laid-off workers.

We agree with counsel for Sacilor that the companies have contractual obligations to their workers. We find these contractual obligations to be legally binding.

We agree that the companies serve as conduits for the distribution of certain funds, and we are not countervailing against them in this respect.

Comment 10: Counsel for Sacilor alleges that the interest rates chosen as benchmarks for our preliminary determination often exceeded the official rates. Counsel argues that rates in excess of those published by the OECD are arbitrary.

DOC Position: We are using the rates published by the OECD in this final determination.

Comment 11: Counsel for Sacilor asserts that our preliminary determination treats funds received by Sacilor from FNE and AFOREST as subsidies. Counsel states that the funds received from FNE for relocation and moving expenses and retraining of workers did not benefit in any manner Sacilor. Sacilor was at no time under any legal or contructual obligation to retrain these employees.

DOC Position: We agree that the retraining and relocation of workers did not provide any benefits to Sacilor, for the reasons stated in section II–B and II–J of this notice.

Comment 12: Counsel for respondents assert that the allegedly new methodology used in the preliminary determination should be rejected for failure to follow proper administrative procedures.

DOC Position: See Appendix 4.

Comment 13: Counsel for respondents argue that the methodology used in the preliminary determination to calculate the benefits of loans and equity infusions is incorrect.

DOC Position: Neither counsel for petitioners nor counsel for respondents provided convincing reasons for adopting their suggestions. For further information, see Appendix 2.

Comment 14: Counsel argue that the grants methodology which involves the imputation of a future value designed to reflect the time value of money is a violation of the prohibitions in Article IV, ¶ 3 of the GATT; Article IV, ¶ 2 of the Subsidies Code; and Section 701(a) and Section 703(d)(2) of the Act, against imposing countervailing duties in excess of subsidies.

DOC Position: See Appendix 4.

Comment 15: Counsel argues that no standards have been articulated for determining creditworthiness.

DOC Position: See Appendix 2.

Comment 16: Counsel contends that, because the Rescue Plan is akin to a Chapter XI reorganization proceeding under U.S. bankruptcy law, it is not countervailable.

DOC Position: See Appendix 4.

Comment 17: Counsel for Sacilor argues that the assumption of financing costs is not countervailable. Relying on the illustrative list of domestic subsidies contained in section 771(5)(B) of the Act, he argues that only the assumption of operational costs is countervailable. In addition, he argues that because the accounting definition of "operating costs" does not include interest-related revenues and expenses, we should not countervail the provision by the government of funds which relieve a business of its interest obligations.

DOC Position: We disagree. Any preferential absorption by a government of a cost of doing business—be it wages, materials, taxes on income, or interest expenses—can give rise to a subsidy, as recognized in subsection 771(5)(B)(iv) of the Act. We find that a subsidy to relieve debt expenses is an assumption of a cost of manufacture, production, or distribution within the meaning of subsection 771(5)(B)(iv), and is therefore countervailable. Although subsection 771(5)(B)(iii) of the Act lists as an example of a subsidy "funds * * * to cover operating losses," this illustrative example does not permit us to ignore the language of subsection 771(5)(B)(iv).

Comment 18: Counsel for Sacilor contends that the success of GIS in floating bond issues is proof of the creditworthiness of his client.

DOC Position: In his response to our questionnaire, counsel indicated that GIS has not floated any issues nor made any loans since 1978, in our judgment the year Sacilor became uncreditworthy.

In addition, Sacilor's GIS loans were converted to PACS because Sacilor was unable to repay them under their original terms.

Comment 19: Counsel states that equity subsidies were accepted by Sacilor as a holding company and not tied to any particular division or activity, and therefore should be allocated over total consolidated revenues.

DOC Position: It is the Department's judgment that the 1981 equity subsidies were conversions of loans tied to steel production, and consequently are allocated over total value of steel production. However, 1979 equity subsidies were considered under loss coverage and allocated over total sales.

Comment 20: Counsel maintains that because United States imports from Sacilor have declined, and because no export subsidies were found, critical circumstances should not be found to apply to his client.

DOC Position: For our determination regarding critical circumstances see the section below.

Negative Determination of Critical Circumstances

Petitioners alleged that imports of carbon steel wire rod under investigation present "critical circumstances." Under section 355.29 and 355.33(b) of the Department's regulations, critical circumstances exist when the alleged subsidies include an export subsidy inconsistent with the Agreement, and there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

We have not found any export subsidies in this investigation. Therefore, critical circumstances do not exist in this investigation on carbon steel wire rod from France.

Verification

In accordance with section 776(a) of the Act, we verified the data used in making our final determination. During this verification, we followed normal procedures, including inspection of documents, discussions with government officials and on-site inspection of manufacturers' operations and records.

Administrative Procedures

The Department has afforded interested parties an opprotunity to present oral views in accordance with its regulations (19 CFR 355.35). A public hearing was held on July 12, 1982. In accordance with the Department's regulations (19 CFR 355.34(a)), written views have been received and considered.

Suspension of Liquidation

As explained in this notice, we have determined that no countervailable benefits are being provided to Normandie, because the amount of the estimated net subsidy during the period for which we are measuring subsidization is 0.291 percent *ad valorem*, which is *de minimis*. The suspension of liquidation ordered in our preliminary affirmative countervailing duty determination for Normandie shall be terminated upon publication of this notice. All estimated countervailing duties shall be refunded, and all appropriate bonds shall be released in accordance with § 355.33(g) of the Department of Commerce Regulations (19 CFR 355.33(g)). The suspension of liquidation ordered in our preliminary affirmative countervailing duty

determination for Sacilor shall remain in effect until further notice. The estimated net subsidy is as follows:

Manufacturer/producer/exporter	Ad valorem rate (percent)
Sacilor:	
Carbon Steel Wire Rod	14.223
Normandie:	
Carbon Steel Wire Rod	0.000
All Other Maufacturers/Producers/Exporters:	
Carbon Steel Wire Rod	14.223

We are directing the United States Customs Service to require a cash deposit or bond in the amount indicated above for each entry of the subject merchandise entered on or after the date of publication of this notice in the **Federal Register**. Where the manufacturer is not the exporter, and the manufacturer is known, the rate for that manufacturer shall be used in determining the amount of cash deposit or bond. If the manufacturer is unknown, the rate for all other manufacturers/producers/exporters shall be used.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine within 45 days of the publication of this notice whether these imports are materially injuring, or threatening to materially injure, a U.S. industry. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all securities posted or cash deposited as a result of the suspension of liquidation will be refunded or cancelled. If, however, the ITC determines that such injury does exist, within 7 days of notification by the ITC of that determination, we will issue a countervailing duty order, directing Customs officers to assess countervailing duty on carbon steel wire rod from France entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the net subsidy determined or estimated to exist as a result of the annual review process prescribed by section 751 of the Act. The provision of section 707(a) of the Act will apply to the first directive for assessment.

Dated: September 21, 1982.

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

BILLING CODE 3510-25-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting the Import Charges for Certain Cotton Apparel Products From the Philippines

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Deleting charges for infant's cotton playsuits in T.S.U.S.A. Number 383.5047 from the level of restraint established for Category 337 pt. (adult-sized cotton playsuits), produced or manufactured in the Philippines and exported during the agreement year which began on January 1, 1982. This will result in a reduction of 1,958 dozen in imports currently charged to that level. In addition, T.S.U.S.A. Number 383.5047 is being deleted from the coverage of the level for Category 337 pt. (adult-sized cotton playsuits).

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963), October 27, 1981 (46 FR 52409), February 9, 1982 (47 FR 5926), and May 13, 1982 (47 FR 20654)).

SUMMARY: Effective on April 1, 1982, T.S.U.S.A. Numbers 383.5047 (infants' cotton playsuits) and 383.5049 (cotton playsuits other than infants' playsuits) were established within Category 337, replacing T.S.U.S.A. Number 383.5050. Infants' cotton playsuits, i.e., T.S.U.S.A. Number 383.5047, are intended to be excluded from the level of restraint established for adult-sized cotton playsuits in Category 337 pt.

EFFECTIVE DATE: September 28, 1982.

FOR FURTHER INFORMATION CONTACT: Carl Ruths, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-4212).

SUPPLEMENTARY INFORMATION: On December 18, 1981, there was published in the **Federal Register** (46 FR 61699) a letter dated December 14, 1981 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established levels of restraint for certain specified categories of cotton, wool, and man-made fiber textile products, including Category 337 pt. (adult-sized cotton playsuits), produced or manufactured in the Philippines, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1982 and extends through December 31, 1982. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to delete T.S.U.S.A. 383.5047 (infants' cotton playsuits) from the coverage of the level of restraint previously established for Category 337 pt. (adult-sized cotton playsuits). The Commissioner is further directed to deduct 1,958 dozen from charges to the level which have been exported during 1982 and imported during the April–August 30, 1982 period. This amount represents imports charged in T.S.U.S.A. 383.5047.

Walter C. Lenahan,

Acting Chairman, Committee for the Implementation of Textile Agreements.

September 24, 1982.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of December 14, 1982 from the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool, and man-made fiber textile products, produced or manufactured in the Philippines.

Effective on September 28, 1982, you are directed to exclude TSUSA Number 383.5047 from the coverage of the level of restraint established for Category 337 pt., produced or manufactured in the Philippines and exported during the twelve-month period which began on January 1, 1982. This exclusion is in addition to the current exclusion of TSUSA Numbers 383.0335, 383.0830, and 383.5036.

Also effective on September 28, 1982, the amount of 1,958 dozen should be deducted from charges made to the level of restraint established for Category 337 pt. in the directive of December 14, 1981. This reduction accounts for merchandise in T.S.U.S.A. Number 383.5047, exported during the agreement year which began on January 1, 1982 and imported during the period which began on April 1 and extended through August 30, 1982.

The actions taken with respect to the Government of the Republic of the

Philippines and with respect to imports of cotton textile products from the Philippines have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Walter C. Lenahan,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

CONSUMER PRODUCT SAFETY COMMISSION

Hearing on Smoke Detectors

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of hearing.

SUMMARY: The Commission has scheduled a hearing to explore efforts necessary to promote the increased use and proper maintenance of smoke detectors.

DATE: The hearing will be held at 9:00 a.m. on October 4, 1982.

ADDRESS: The hearing will be held in the third floor conference room at 1111 18th Street, N.W., Washington, D.C.

FOR ADDITIONAL INFORMATION CONTACT: Dr. Elizabeth F. Johnson, Office of Outreach Coordination, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 492–6580.

SUPPLEMENTARY INFORMATION: Fire is a very serious cause of death and injury to consumers in this country. A number of state and local governments, associations, insurance companies, federal agencies, consumer organizations, industry and businesses are working to reduce fires by encouraging the installation of smoke detectors. While a recent survey of the U.S. Fire Administration has found that approximately 60 percent of the homes in the U.S. have smoke detectors, a significant number of homes do not. In addition, proper maintenance of smoke detectors must be assured in homes where they are present.

In order to explore the further efforts that are necessary to promote the increased use and proper maintenance of smoke detectors, the Commission has scheduled a public hearing. It will focus on the following subjects:

1. Current smoke detector technology;
2. Effectiveness of those currently in use;
3. Voluntary standards;
4. State and local codes;
5. Information and education activities.

The Commission staff has already been in contact with some members of the public who plan to participate in the hearing. The morning session will be a "legislative-type" hearing, with presentations by members of the public and questions by the Commissioners and staff. Presentations will be generally limited to five minutes. Any member of the public interested in making a presentation should telephone Dr. Elizabeth Johnson at (301) 492–6580, no later than September 30, 1982. Please be prepared to give her the subject(s) of your presentation, one or more of those listed above.

The afternoon session of the hearing will have a different format, designed to encourage discussion among all Commission and non-Commission participants. This general discussion will be open to all members of the public, whether or not they made a presentation in the morning. While not required, it would be helpful for members of the public who want to participate only in the afternoon session to contact Dr. Johnson.

The hearing will be held in the third floor conference room at 1111 18th Street N.W., Washington, D.C. and will begin at 9:00 a.m.

(Sec. 27(a) of the Consumer Product Safety Act; 15 U.S.C. 2076(a))

Dated: September 23, 1982.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

A. Johnson & Co.; Proposed Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed consent order and opportunity for comment.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order with A. Johnson & Company and provides an opportunity for public comment on the proposed Consent Order.

DATE: Comments by: October 27, 1982.

ADDRESS: Send comments to: Robert J. McKee, Jr., Director, Philadelphia Field Office, ERA, 1421 Cherry Street, Philadelphia, Pennsylvania

FOR FURTHER INFORMATION CONTACT: Robert J. McKee, Jr., Director, Philadelphia Field Office, ERA, 1421 Cherry Street, Philadelphia, Pennsylvania 19102; (215) 597–2862.

Copies of the Consent Order may be obtained free of charge by writing or calling this office.

SUPPLEMENTARY INFORMATION: On September 7, 1982, the ERA executed a proposed Consent Order with A. Johnson & Company ("Johnson") of New York, New York. Under 10 CFR 205.199J(b), a proposed Consent Order which involves the sum of $500,000 or more excluding interest and penalties, becomes effective no sooner than thirty days after publication of a notice in the **Federal Register** requesting comments concerning the proposed Consent Order. Although the ERA has signed and tentatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate a modification of the Consent Order or issue the Consent Order as signed.

Johnson, with its home office located in New York, New York, is a firm engaged in the production, refining and sale of crude oil and covered petroleum products, and was subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR Parts 210, 211, and 212 during the period January 1, 1973 through January 28, 1981 ("the period covered by this Consent Order"). An audit conducted by the ERA included a review of Johnson's records relating to compliance with the Federal petroleum price and allocation regulations during the period January 1, 1973 through January 28, 1981 (the audit period). In its audit the ERA reviewed Johnson's pricing and allocation policies and procedures and the manner in which Johnson applied the Federal petroleum price and allocation regulations. Johnson has cooperated with this audit. Johnson has made its books and records available to the auditors of the DOE and the auditors have examined and reviewed a substantial volume of such materials. DOE believes that Johnson has maintained procedures reasonably adapted to achieve compliance with the federal petroleum price and allocation regulations. DOE has found no evidence that Johnson has committed any willful or intentional violations of the federal petroleum price and allocation regulations for the period covered by this Consent Order.

The ERA and Johnson disagree in several respects concerning Johnson's compliance with the Federal petroleum price and allocation regulations during the audit period. Notwithstanding the ERA's view as to the proper application of the regulations to Johnson's activities, Johnson maintains that it has correctly construed and applied the regulations. The ERA and Johnson each believes that its respective positions on the legal issues underlying their disagreements are meritorious. However, both parties desire to resolve the issues raised by the audit without resort to complex, lengthy and expensive compliance actions and therefore have entered into this Consent Order. The ERA believes that the Consent Order is in public interest because it provides a satisfactory resolution of disputed issues and an appropriate conclusion of the Johnson audit.

The Consent Order addresses all aspects of Johnson's compliance with the Federal petroleum price and allocation regulations during the audit period and, subject to its terms, resolves all issues concerning Johnson's compliance with the Federal petroleum price and allocation regulations during the audit period. In settlement of all disputes with the ERA concerning sales of covered petroleum products during the audit period, Johnson has agreed to issue credit memoranda in the amount of $2,050,000 to stated residual fuel end-users who purchased from Johnson's subsidiary C. H. Sprague & Son Co. during the period of October 1, 1973 through December 31, 1974. The Consent Order contains details on the computation of the amount, duration and terms and conditions of the credit memoranda. The Consent Order also provides details concerning records retention and procedures concerning enforcement of the provisions of the Consent Order.

The Consent Order does not constitute an admission by Johnson nor a finding by the ERA of any violation of the Federal petroleum price and allocation regulations. This notice merely summarizes the Consent Order, and neither limits nor modifies it in any way whatsoever. The provisions of 10 CFR 205.199J, including those regarding the publication of this Notice, are applicable to the Consent Order.

Upon full satisfaction of the terms and conditions of this Consent Order by Johnson, the DOE releases Johnson from any civil claims that the DOE may have arising out of the federal petroleum price and allocation regulations.

Submission of Written Comments

Interested persons are invited to submit written comments concerning the terms and conditions of this Consent Order to the address given above. Comments should be identified on the outside of the envelope and on the documents submitted with the designation "Comments on A. Johnson Consent Order." The ERA will consider all comments it receives by 4:30 p.m., local time, on October 27, 1982. Any information or data considered confidential by the person submitting it must be identified as such in accordance with the procedures at 10 CFR 205.9(f).

Issued in Philadelphia on the 15th day of September, 1982.

Robert J. McKee, Jr.,
Director, Philadelphia Field Office, ERA.

[FR Doc. 82-26472 Filed 9-24-82; 8:45 a.m.]
BILLING CODE 6450-01-M

Santa Fe Energy Co.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken on consent order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces that it has adopted a Consent Order with Santa Fe Energy Company as a final order of the Department.

EFFECTIVE DATE: September 14, 1982.

FOR FURTHER INFORMATION CONTACT: David H. Jackson, Director, Kansas City Office, Economic Regulatory Administration, 324 East 11th Street, Kansas City, MO 64106, (Telephone) 816/374-2092.

SUPPLEMENTARY INFORMATION: On July 21, 1982, 47 FR 31600, the ERA published a notice in the **Federal Register** that it had executed a proposed Consent Order with Santa Fe Energy Company on July 2, 1982 which would not become effective sooner than 30 days after publication of that notice. Pursuant to 10 CFR 205.199J(c), interested persons were invited to submit comments concerning the terms and conditions of the proposed Consent Order.

The proposed Consent Order involves the resolution of certain potential civil liability arising out of the Mandatory Petroleum Allocation and Price Regulations and related regulations 10 CFR Parts 205, 210, 211, 212 in connection with Santa Fe's transactions involving crude oil sales during the period September 1, 1973 through January 28, 1981.

Pursuant to the proposed Consent Order, Santa Fe Energy Company will pay the sum of $800,000 which includes interest, within thirty (30) days of the effective date of the Consent Order for deposit in the U.S. Treasury as miscellaneous receipts. In addition, Santa Fe agrees to pay the sum of $8,000 in compromise of civil penalties.

Six comments were received. Each objected to the method of distributing the refund contemplated by the proposed Consent Order. Each suggested that the refunds be distributed to the various states.

Because the sales of crude oil were to refiners that were able to pass on the alleged overcharges to subsequent purchasers, ERA was unable to identify specific parties, if any, ultimately injured.

In this case ERA has determined that deposit in the U.S. Treasury is an appropriate remedy under these circumstances. Therefore, the porposed Consent Order was made final and effective without modification on September 14, 1982.

Issued in Kansas City, Missouri on the 14th day of September 1982.

David H. Jackson,

Director, Kansas City Office, Economic Regulatory Administration.

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MHCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register.**

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New wall (2.5 mile rule)
102–3: New wall (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–CB: Geopressured brine
107–CB: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper wall
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MHCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register.**

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New wall (2.5 mile rule)
102–3: New wall (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–CB: Geopressured brine
107–CB: Coal seams
107–DV: Dovonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper wall
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

Office of Fossil Energy

National Petroleum Council, Subcommittee on Enhanced Oil Recovery; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Subcommittee on Enhanced Oil Recovery, National Petroleum Council.

Date and Time: Tuesday, October 19, 1982,—10:00 a.m.

Place: The Madison Hotel, Mount Vernon Room, Fifteenth and M Streets, NW., Washington, D.C.

Contact: Gloria Decker, Information Management Systems Branch, U.S. Department of Energy, 1000 Independence Ave., SW., Forrestal Building, Room 4D–024, Washington, D.C. 20585; telephone: 202–252–8890.

Purpose of Committee: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to the development of alternative fuels.

Tentative Agenda:

- Discuss study scope and plan in response to the Secretary of Energy's request to update the National Petroleum Council's 1976 Enhanced Oil Recovery report.
- Discuss and approve organizational structure and function of a coordinating subcommittee and task groups.
- Discuss study schedule and final report format.
- Discuss any other matters pertinent to the overall assignment from the Secretary.
- Public comments.

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Gloria Decker at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC, between 8:00 a.m. and 4 p.m., Monday through Friday, except federal holidays.

Issued at Washington, DC, on September 22, 1982.

Howard H. Raiken,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450–01–M

Office of Hearings and Appeals

Issuance of Proposed Decisions and Orders; Period of August 9 Through August 20, 1982

During the period of August 9 through August 20, 1982, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for refund in a Subpart V proceeding.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

With respect to the Proposed Refund Decision any person who wished to file comments should submit comments to the Office of Hearings and Appeals within 30 days of receipt of the proposed decision or the date of publication of this list, whichever is earlier.

Copies of the full text of these proposed decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, New Post Office Building, 12th and Pennsylvania Ave., N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

George B. Breznay,

Director, Office of Hearings and Appeals.

September 20, 1982.

National Helium Corp./Farmland Industries, Inc., Kansas City, Kans., RF3–1; National Helium Corp./Atlantic Richfield Co., Los Angeles, Calif., RF3–3; National Helium Corp./Controller, State of California, Washington, D.C., RF3–2.

Pursuant to 10 CFR Part 205, Subpart V, and in connection with a consent order between the DOE and the National Helium Corporation (NHC), Atlantic Richfield Company (ARCO) filed an Application for Refund. In its Application ARCO requested the entire $10 million paid to an escrow account by NHC, on the ground that ARCO was the only first purchaser of natural gas liquids from NHC during the period covered by the consent order. Farmland Industries, Inc. filed an Application for Refund, requesting a refund in proportion to its NGL purchases from ARCO. The controller of the State of California filed a refund request on behalf of end-users and consumers of NGLs both in California and other states.

In the Proposed Decision, the OHA upheld the principle that refunds made

to direct purchasers or downstream purchasers of petroleum products involved in a consent order must be measured by the extent of the injury which the claimants prove to have experienced as a result of the alleged overcharges. The OHA also stated that such a proof of injury is not necessary for consumers and farmers' cooperatives which will redistribute the refund received to end-users. The OHA compared the prices which NHC charged ARCO for NGL purchases during the consent order period, with national average prices of that period. The OHA found that, except during four quarters of the years 1978 and 1979, the NHC prices were lower than national average prices during the entire consent order period. This comparison indicates the ARCO was probabably injured by NHC's alleged price violations only during the four quarters in which NHC's prices exceeded the national average. On this basis, OHA concluded that ARCO should receive a refund of $387,989, an amount calculated to alleviate any injury which ARCO incurred as a result of the NHC's alleged price violations during the four quarter period.

The OHA found that Farmland, a farmers' cooperative association, is an appropriate conduit for redistributing the NHC Consent Order funds to end-users within that association who purchased NHC products. The OHA granted Farmland 13%, or $1,300,000, of the NHC Consent Order funds, an amount equal in proportion to the percentage of NHC products sold to Farmland through ARCO. The OHA directed Farmland to redistribute the refund monies to its member cooperatives according to their actual purchases. The remaining $8,312,011 of the NHC Consent Order fund will be distributed to the benefit of end-users and consumers. In this regard, the OHA required that the State of California develop procedures for the redistribution of the remaining monies to California and other states affected by NHC's sales during the consent order period.

BILLING CODE 6450-01-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Central of Illinois, Inc.*, Sterling, Illinois; to acquire 100 percent of the voting shares or assets of Mount Morris Bancshares, Inc., Mount Morris, Illinois and thereby indirectly acquire Citizens State Bank of Mount Morris, Mount Morris, Illinois. Comments on this application must be received not later than October 21, 1982.

B. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Citizens Ban-Corporation*, Rock Port, Missouri; to acquire 80 percent of the voting shares or assets of the Kingston Bank, Kingston, Missouri and the Farmers Bank of Sheridan, Sheridan, Missouri. Comments on this application must be received not later than October 21, 1982.

C. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Westex Bancorp, Inc.*, Del Rio, Texas; to acquire 100 percent of the voting shares or assets of Sutton County National Bank, Sonora, Texas. Comments on this application must be received not later than October 21, 1982.

Board of Governors of the Federal Reserve System, September 21, 1982.

Dolores S. Smith,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Banco do Brasil S. A.; Application To Establish Corporation To Do Business and To Establish Branches

An application has been submitted for the Board's approval of the organization of a corporation to do business under section 25(a) of the Federal Reserve Act ("Edge Corporation"), to be known as Banco Do Brasil Overseas Corporation, Washington, D.C. Banco Do Brasil Overseas Corporation would operate as a subsidiary of Banco Do Brasil, S.A., Brasilia, Brazil. Banco Do Brasil Overseas Corporation, Washington, D.C., has also applied for the Board's approval under § 211.4(c)(1) of the Board's Regulation K (12 CFR 211.4(c)(1)), to establish branches in Chicago, Illinois; Atlanta, Georgia; Houston and Dallas, Texas. The factors that are considered in acting on the application are set forth in § 211.4(a) of the Board's Regulation K (12 CFR 211.4(a)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than October 21, 1982. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identify specifically any questions of fact that are in dispute and summarize the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, September 21, 1982.

Dolores S. Smith,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or

unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated for each application.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

Correction

1. *Barclays Bank PLC* and *Barclays Bank International, Limited,* both of London, England, (consumer finance; Idaho, Kansas, Michigan, New Mexico, New York, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota, Texas, and Washington). This notice corrects a previous **Federal Register** document (FR Doc. 82-24699) that was published on page 39721 of the issue for September 9, 1982. The proposed activities would also be conducted from offices located in Corning, New York and Albany, Oregon. The city of Loring should be removed from the New York listing.

b. **Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *York Bancorp,* York, Pennsylvania (reinsurance activities; Pennsylvania): To engage through its subsidiary, Dickinson Life Insurance Company, in the underwriting, by reinsuring, credit life and credit health and accident insurance related to extensions of credit made by Applicant's subsidiary bank. These activities will be conducted from offices in Phoenix, Arizona serving southeastern Pennsylvania. Comments on this application must be received not later than October 21, 1982.

C. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. **Dominion Bankshares Corporation,** Roanoke, Virginia (trust functions or activities; Virginia): To engage, through a subsidiary known as Dominion Trust Company in the following *de novo* activities: performing or carrying on any one or more of the functions or activities that may be performed or carried on by a trust company. The aforementioned activities will be conducted from the following four locations: Roanoke, Winchester, Richmond, and Harrisonburg, Virginia. The proposed service area of the four offices will be the following areas of the State of Virginia: Roanoke SMSA, Richmond SMSA; the cities of Covington, Lexington, Buena Vista, Galax, Bedford, Harrisonburg, and Winchester; the counties of Allegheny, Rockbridge, Bedford, Giles, Wythe, Carroll, Grayson, Tazewell, Smyth, Russell, Wise, Rockingham, Augusta, and Frederick. Comments on this application must be received not later than October 20, 1982.

Board of Governors of the Federal Reserve System, September 21, 1982.

Dolores S. Smith,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the

Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General Antitrust advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Divisions of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction	Waiting period terminated effective
Exxon Corporation's proposed acquisition of certain assets of Tosco Corp.	June 11, 1982.
Baker International Corporation's proposed acquisition of all voting securities of Envirotech Corp.	Feb. 19, 1982.
L'Air Liquide, S.A.'s proposed acquisition of all voting securities of Cardox Corp.	Mar. 30, 1982.
The proposed acquisition of all voting securities of USA Petroleum Corp. and Oasis Petroleum Corp. by a corporation to be formed for purpose of the acquisition.	Mar. 3, 1982.
General Dynamics Corporation's proposed acquisition of all voting Securities of Chrysler Defense, Inc.	Mar. 5, 1982.
Wallace G. Wilkinson's proposed acquisition of certain assets of Occidental Petroleum Corp.	Mar. 24, 1982.
Baker International Corporation's acquisition of certain assets of Arjay Inc.	Mar. 29, 1982.
Rollins Leasing Corporation's proposed acquisition of all voting securities of ABC Truck Rental and Leasing Co.	Mar. 24, 1982.
Consolidated Foods Corporation's proposed acquisition of certain assets of International Telephone and Telegraph Corp.	Mar. 23, 1982.
Carl C. Icahn's proposed acquisition of certain voting securities of Marshall Field & Co.	Mar. 29, 1982.
Barlow Rand Limited's proposed acquisition of all voting securities of Monitor Sugar Co.	Apr. 9, 1982.
Oglethorpe Power Company's proposed acquisition of certain assets of Georgia Power Co.	June 10, 1982.

FOR FURTHER INFORMATION CONTACT: Patricia A. Foster, Compliance Specialist, Premerger Notification Office, Bureau of Competition, Room 301, Federal Trade Commission, Washington, D.C. 20580; (202) 523–3894.

By direction of the Commission.

Early Termination of the Waiting Period of the Premerger Notification Rules; The Hanna Mining Company

AGENCY: Federal Trade Commission.

ACTION: Granting of request for early termination of the waiting period of the premerger notification rules.

SUMMARY: The Hanna Mining Company is granted early termination of the waiting period provided by law and the premerger notification rules with respect to the proposed acquisition of all the voting securities of Midland Southwest Corporation. The grant was made by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice in response to a request for early termination submitted by The Hanna Mining Company. Neither agency intends to take any action with respect to this acquisition during the waiting period.

EFFECTIVE DATE: September 10, 1982.

FOR FURTHER INFORMATION CONTACT: Patricia A. Foster, Compliance Specialist, Premerger Notification Office, Bureau of Competition, Room 311, Federal Trade Commission, Washington, D.C. 20580; (202) 523–3894.

SUPPLEMENTARY INFORMATION: Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Commission and Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Human Development Services

Social Services Block Grant Program, Federal Allotments to States for Expenditures for Fiscal Year 1982

AGENCY: Office of Program Coordination and Review, Office of Human Development Services, Department of Health and Human Services.

ACTION: Revised notification of allocation of Title XX—Social Service Block Grant Allotments for Fiscal Year 1982.

SUMMARY: Pub. L. 97–248, Enacted September 3, 1982, among other things, amended Section 1101(a) of the Social Security Act, as amended, (Act) to define the term State when used in Title XX to no longer include American Samoa and the Trust Territory of the Pacific Islands.

The Federal Allotments to States for Social Services under Section 2003 of the Act which were promulgated in Vol. 46, No. 216 of the **Federal Register**, page 55420 on November 9, 1981, included American Samoa and the Trust Territory of the Pacific Islands.

Accordingly, the promulgation contained in such document is rescinded, and the promulgation in Vol. 46, No. 172 of the **Federal Register**, page 44508 on September 4, 1981, is in effect.

EFFECTIVE DATE: October 1, 1981.

Dated: September 16, 1982.

Teresa Hawkes,

Director, Office of Program Coordination and Review.

Approved: September 22, 1982.

Dorcas R. Hardy,

Assistant Secretary for Human Development Services.

Allergy, Immunology, and Transplantation Research Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Allergy, Immunology, and Transplantation Research Committee, National Institute of Allergy and Infectious Diseases, on October 28–29, 1982, at the Holiday Inn, Chevy Chase, Maryland. The meeting will be open to the public from 8:30 a.m. to 9:30 a.m. for review of policies and procedures and routine business of the committee. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code, and Section 10(d) of Pub. L. 92–463, the meeting of the Allergy, Immunology, and Transplantation Research Committee will be closed to the public for review, evaluation, and discussion of individual grant applications from 9:30 a.m. until 6:00 p.m. on October 28 and from 8:30 a.m. until adjournment on October 29.

These applications and discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A–32, National Institutes of Health, Bethesda, Maryland 20205, telephone (301) 496–5717, will provide summaries of the meetings and rosters of the Committee members as requested.

Dr. Nirmal K. Das, Executive Secretary, Allergy, Immunology and Transplantation Research Committee, NIAID, NIH, Westwood Building, Room 706, Bethesda, Maryland 20205, telephone (301) 496–7966, will provide substantive program information.

BILLING CODE 4140–01–M

Biotechnology Resources Review Committee; Conference Call Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the conference call meeting of the Biotechnology Resources Review Committee, Division of Research Resources, on October 5, 1982, in Building 31, Room 5B39, National Institutes of Health, Bethesda, Maryland 20205 from approximately 1:00 p.m. until adjournment.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public for the review, discussion, and evaluation of a PROPHET prospectus. The prospectus and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the prospectus, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Chief, Office of Science and Health Reports, Division of Research Resources, Bldg. 31, Rm. 5B–13, National Institutes of Health, Bethesda, Maryland 20205, telephone area code 301 496–5545, will provide summaries of

meetings and rosters of committee members.

Dr. Charles L. Coulter, Executive Secretary, Biotechnology Resources Review Committee, Division of Research Resources, Bldg. 31, Rm. 5B–41, National Institutes of Health, Bethesda, Maryland 20205, telephone area code 301 496–541, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.371, Biotechnology Research, National Institutes of Health)

(NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in section 8(b) (4) and (5) of that circular)

Dated: September 15, 1982.

Betty J. Beveridge,

NIH Committee Management Officer.

BILLING CODE 4140-01-M

Board of Scientific Counselors, NIA; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute on Aging, November 8–10, 1982, to be held at the Gerontology Research Center, Baltimore, Maryland. The meeting will be open to the public from 9:00 a.m. to adjournment on Monday and Tuesday, November 8 and 9, and, from 9:00 a.m. until 1:30 p.m. on Wednesday, Novermber 10. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), Title 5, United States Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on November 10, from 1:30 p.m. until adjournment for the review, discussion and evaluation of individual programs and projects conducted by the National Institutes of Health, NIA, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. June C. McCann, Committee Management Officer, NIA Building 31, Room 2C–05, National Institutes of Health, Bethesda, Maryland 20205, (telephone: 301/496–5898) will provide a summary of the meeting and a roster of committee members. Dr. Richard C. Greulich, Scientific Director, NIA, Gerontology Research Center, Baltimore City Hospitals, Baltimore, Maryland 21224, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.866, Aging Research, National Institutes of Health)

(NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in section 8(b)(4) and (5) of that Circular)

Dated: September 20, 1982.

BILLING CODE 4140-01-M

Clinical Trials Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the Clinical Trials Review Committee, National Heart, Lung, and Blood Institute, October 31, 1982, at the Linden Hill Hotel, 5400 Pooks Hill Road, Bethesda, Maryland 20814. On November 1–3, 1982, the meeting will be held at Wilson Hall, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205.

This meeting will be open to the public on October 31, 1982, from 8:00 p.m. to approximately 9:00 p.m. to discuss administrative details and to hear a report concerning the current status of the National Heart, Lung, and Blood Institute. Attendence by the public will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), Title 5, United States Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on October 31 from approximately 9:00 p.m. to recess and will convene again on November 1 beginning at 8:30 a.m. to adjournment on November 3, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Therefore, this meeting is concerned with matters exempt from mandatory disclosure under Section 552b(c)(6) of Title 5, United States Code.

Ms. Terry Bellicha, Chief, Public Inquiries and Reports Branch, NHLBI, National Institutes of Health, Bethesda, Maryland, 20205, Building 31, Room 4A–21, phone (301) 496–4236, will provide summaries of the meeting and rosters of the committee members. Dr. Fred P. Heydrick, Chief, Contracts, Clinial Trials and Training Review Section, Division of Extramural Affairs, NHLBI, Westwood Building, Bethesda, Maryland 20205, Room 548B, phone (301) 496–7363, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.837, Heart and Vascular Diseases Research; 13.838, Lung Diseases Research, National Institutes of Health)

(NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in Section 8(b)(4) and (5) of that Circular)

Dated: September 15, 1982.

BILLING CODE 4140-01-M

General Research Support Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the General Research Support Review Committee, Division of Research

Resources, November 18–19, 1982 at the National Institutes of Health. The meeting will be held in Conference Room 9, Building 31, 9000 Rockville Pike, Bethesda, Maryland 20205.

This meeting will be open to the public from 9:00 a.m. to approximately 1:30 p.m. on November 18, 1982, to discuss policy matters relating to the Minority Biomedical Research Support Program. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on November 18, 1982, from approximately 1:30 p.m. to 5:00 p.m. and on November 19, from 8:30 a.m. to adjournment for the review, discussion and evaluation of individual grant applications submitted to the Minority Biomedical Research Support Program. These applications and discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Building 31, Room 5B10, Bethesda, Maryland 20205, telephone (301) 496–5545, will provide summaries of meeting and rosters of committee members. Dr. Sidney A. McNairy, Executive Secretary of the General Research Support Review Committee, Building 31, Room 5B29, Bethesda, Maryland 20205, telephone (301) 496–6743 will furnish substantive program information.

(Catalog of Federal Domestic Assistance Programs No. 13.375, Minority Biomedical Research Support Program, National Institutes of Health)

(NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in section 8(b) (4) and (5) of that Circular)

Dated: September 15, 1982.

BILLING CODE 4140-01-M

Microbiology and Infectious Diseases Advisory Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Microbiology and Infectious Diseases Advisory Committee, National Institute of Allergy and Infectious Diseases, October 14, 1982, at the National Institutes of Health, Building 31C, Conference Room 9, Bethesda, Maryland 20205.

The meeting will be open to the public from 8:30 a.m. to approximately 9:30 a.m. for discussion of site visit policy; review of policies and procedures; and routine business of the Committee and again from 2:00 p.m. to 4:00 p.m. for discussion of the International Collaboration in Infectious Diseases Research (ICIDR) Program. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code, and Section 10(d) of Pub. L. 92–463, the meeting of the Committee will be closed to the public for the review, evaluation, and discussion of individual grant applications and contract proposals. It is anticipated that this will occur from 9:30 a.m.until 2:00 p.m.

These applications, proposals, and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with applications and proposals, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A–32, National Institutes of Health, Bethesda, Marlyand 20205, telephone (301) 496–5717, will provide summaries of the meetings and rosters of the Committee members as required.

Dr. Susan B. Spring, Executive Secretary, Microbiology and Infectious Diseases Advisory Committee, NIAID, NIH, Westwood Building, Room 706, telephone (301) 496–7465, will provide substantive program information.

BILLING CODE 4140-01-M

NIDR Special Grants Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Institute of Dental Research Special Grants Review Committee, November 17–18, 1982, in Conference Room 9, Building 31–C, National Institutes of Health, Bethesda, Maryland. The meeting will be open to the public from 9:00 a.m. to 9:30 a.m. November 17, 1982, for general discussions. Attendance by the public is limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 9:30 a.m. November 17 to adjournment November 18 for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. H. George Hausch, Executive Secretary, NIDR Special Grants Review Committee, National Institute of Dental Research, National Institutes of Health, Westwood Building, Room 504, Bethesda, MD 20205, (telephone 301 496–7658) will provide summaries of meeting, rosters of committee members, and substantive program information.

BILLING CODE 4140-01-M

National Advisory Neurological and Communicative Disorders and Stroke Council and the Planning Subcommittee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Advisory Neurological and Communicative Disorders and Stroke Council, October 22 and 23, 1982, at 9:00 a.m. in Building 31–C, Conference Room 6, National Institutes of Health, Bethesda, Maryland 20205. In addition, a meeting of the Planning Subcommittee

of the above Council will be held on October 20, 1982, at 1:00 p.m. to approximately 5:30 p.m. and on October 21 from 9:00 a.m. to approximately 5:00 p.m. in Building 31, Room 8A28, National Institutes of Health, Bethesda, Maryland 20205.

The meeting of the full Council will be open to the public from 9:00 a.m. until approximately 11:30 a.m. on October 22, 1982, and from 8:30 a.m. to approximately 9:30 a.m. on October 23, 1982, to discuss administration, management and special reports. The meeting of the Planning Subcommittee will be open from 1:00 p.m. to approximately 5:30 on October 20 and from 9:00 a.m. to approximately 3:00 p.m. on October 21, 1982 to discuss program planning and program accomplishments. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4), and 552b(c)(6) of Title 5, United States Code and Section 10(d) of Pub. L. 92–463, the Advisory Council meeting will be closed to the public from approximately 11:30 a.m. on October 22, 1982, until the conclusion of the meeting that day, and from 9:30 a.m. until adjournment on October 23, 1982, for review, discussion and evaluation of Research Grant applications and applications for Teacher Investigator Awards, Research Career Development Awards, and Institutional National Research Service Awards. The meeting of the Planning Subcommittee will be closed from approximately 3:00 p.m. to adjournment on October 21, 1982; also for the review, discussion and evaluation of individual grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Chief, Office of Scientific and Health Reports, Miss Sylvia Shaffer, Building 31, Room 8A06, NIH, NINCDS, Bethesda, Maryland 20205, telephone (301) 496–5751, will furnish summaries of the meeting and rosters of committee members.

Dr. John C. Dalton, Executive Secretary, Federal Building, Room 1016, Bethesda, Maryland 20205, telephone (301) 496–9248, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.851, Communicative Disorders Program; No. 13.852, Neurological Disorders Program; No. 13.853, Stroke and Nervous System Trauma; No. 13.854, Fundamental Neurosciences Program, National Institutes of Health.)

(NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in section 8(b) (4) and (5) of that Circular)

Dated: September 15, 1982.

BILLING CODE 4140–01–M

National Advisory Research Resources Council; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Nation Advisory Research Resources Council, Division of Research Resources (DRR), October 12–13, 1982, Conference Room 6, Bldg. 31, National Institutes of Health, 9000 Rockville Pike, Bethesda, MD 20205.

The meeting will convene in open session on October 12, at 8:45 a.m., for opening remarks by the Director, DRR, greetings from the Director, NIH, a talk on Animal Welfare Issues by Dr. Andrew N. Rowan, Associate Director, Institute for the Study of Animal Problems, Humane Society of the United States, reports by the DRR Program Directors, a budget presentation by the Action Executive Officer, DRR, a report by the Director, DRR, and an update of the DRR Five-Year Plan. The meeting will continue as follows, in open session, from approximately 1:00 p.m. to 3:30 p.m.: Animal Resources Program Work Group, Rm. 9A51; Biomedical Research Support Program Work Group, Rm. 5B03; Biotechnology Resources Program Work Group, Rm. 8A28; General Clinical Research Centers Program Work Group, Rm 2A52; and Minority Biomedical Research Support Program Work Group, Conference Room 6. The meeting will reconvene, in open session, in Conference Room 6, on October 13, from 8:30 a.m. to approximately 10:30 a.m., for a Report on the Legislative Assignment by the Executive Officer, DRR, and Program Work Group reports and recommendations to the full Council for discussion and action. Attendance will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4) and 552b(c)(6) Title 5, United States Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on October 12, from approximately 3:30 p.m. to recess, and on October 13, from approximately 10:30 a.m. to adjournment, for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, Rm. 5B10, Bldg. 31, National Institutes of Health, Bethesda, MD 20205, (301) 496–5545, will provide summaries of the meeting and rosters of the Council members. Dr. James F. O'Donnell, Acting Director, Division of Reserach Resources, Rm. 5B03, Bldg. 31, National Institutes of Health, Bethesda, MD 20205, (301) 496–6023, will furnish substantive program information and will receive any comments pertaining to this announcement.

BILLING CODE 4140-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N–82–1166]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Robert Neal, OBM Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410; telephone (202) 755–5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirement is described as follows:

Notice of Submission of Proposed Information Collection to OBM

Proposal: Annual Housing Survey—SMSA Sample Group BB–2.

Office: Policy Development and Research.

Form No.: AHS–51, AHS–52, AHS–54–L1, AHS–54–L2, AHS–54(Sp), AHS–58(L).

Frequency of Submission: Every 3 or 4 Years.

Affected Public: Households in 13 SMSA's.

Estimated Burden Hours: 32, 980.

Status: Revision.

Contact: Duane T. McGough, HUD, (202) 755–5060 or Robert Neal, OBM, (202) 395–6880.

(Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d))

Dated: September 20, 1982.

Judith L. Tardy,

Assistant Secretary for Administration.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Pyramid Lake Paiute Tribe; Plan for the Use and Distribution of Pyramid Lake Paiute Tribe Judgment Funds in Dockets 343–70 and 87–C Before the United States Court of Claims

September 14, 1982.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary for Indian Affairs by 209 DM 8.

The Act of October 19, 1973 (Pub. L. 93–134, 87 Stat. 466), requires that a plan be prepared and submitted to Congress for the use of distribution of funds appropriated to pay a judgment of the Indian Claims Commission or Court of Claims to any Indian tribe. Funds were appropriated on August 27, 1981, and on December 4, 1981, in satisfaction of the awards granted to the Pyramid Lake Paiute Tribe in United States Court of Claims Dockets 343–70 and 87–C, respectively. The plan for the use and distribution of the funds was submitted to the Congress with a letter dated May 24, 1982, and was received (as recorded in the Congressional Record) by the House of Representatives on May 25, 1982, and by the Senate on June 14, 1982. The plan became effective on August 19, 1982, as provided by section 5 of the 1973 Act.

The plan reads as follows:

"The funds appropriated on August 27, 1981, and on December 4, 1981, in satisfaction of the respective awards in Docket 343–70 and Docket 87–C granted to the Pyramid Lake Paiute Tribe before the United States Court of Claims, less attorney fees and litigation expenses, and including all interest and investment income accrued, shall be utilized as herein provided.

Per Capita Payment Aspect

"The Pyramid Lake Paiute Tribe's latest approved membership roll shall be brought current to include all eligible members born on or prior to and living on the effective date of this plan. Subsequent to the preparation and approval of the membership roll, the Secretary of the Interior (hereinafter 'Secretary') shall make a per capita distribution of eighty (80) percent of the funds, in sums as equal as possible, to each tribal enrollee.

"The per capita shares of living competent adults shall be paid directly to them. Shares of deceased individual beneficiaries shall be determined and distributed in accordance with 43 CFR Part 4, Subpart D. Shares of legal incompetents shall be handled in accordance with 25 CFR 115.5. Shares of minors shall be handled in accordance with 25 CFR 87.10 (a) and (b)(1) and 115.4.

Programing Aspect

"Twenty (20) percent of the funds, and any amounts remaining after the per capita payment provided above, shall be invested by the Secretary, and the principal and interest and investment income accrued shall be utilized by the tribal governing body, on an annual budgetary basis subject to the approval of the Secretary, for tribal administration and social and economic programs. None of the funds distributed per capita or made available under this plan for programing shall be subject to Federal, State or local income taxes or be considered income or resources under the Social Security Act."

Kenneth Smith,

Assistant Secretary, Indian Affairs.

BILLING CODE 4310-02-M

Bureau of Land Management

Minnesota; Availability of Management Framework Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Availability of the Bureau of Land Management's management framework plan for public lands in Minnesota.

Notice is hereby given that a summary of the Bureau of Land Management's (BLM) Management Framework Plan for BLM-administered lands in Minnesota is now available.

The Management Framework Plan (MFP) for Minnesota considers the management of 1,193 islands, along with upland tracts totaling 45,344 acres.

The MFP includes the decision to transfer 81 islands and one upland tract to the National Park Service. These lands are in Voyageur's National Park and the Lower St. Croix National Scenic Riverway. The plan also includes decisions to consider applications from State and local government agencies for the remaining islands, as well as a small number of the upland tracts presently under BLM jurisdiction. Ten other upland tracts will be offered for public sale, and 129 upland tracts (totaling 33,425 acres) will be retained for use by other Federal agencies as an exchange base. Those lands not identified for exchange will be made available for public sale. Attempts will be made to exchange these lands for local government lands or privately-owned lands lying within the National Forests and Parks in Minnesota.

The State of Minnesota may receive the majority (1,055) of the islands, as well as some upland tracts. The State will include the islands and upland tracts in Wildlife Management Areas, parks, Scientific and Natural Areas, Wild and Scenic Rivers, Boating and Canoeing Rivers, and Public Access Sites. Local governments and agencies that may receive BLM-administered lands are: The Hennepin County Park Reserve District; the City of Shakopee; and Waseca, Aitkin, Blue Earth, and Itasca Counties.

The MFP also calls for the retention of 1,732,665 acres of Federal mineral ownership (FMO) in cases of potentially

valuable minerals, and recommends that BLM continue efforts to gain authority to lease hardrock minerals on the Public Domain. FMO without development potential could be transferred to the surface owner or administrator after a geologic investigation.

Copies of the summary of the MFP are available from the Bureau of Land Management, Duluth Field Office, 125 Federal Building, Duluth, Minnesota 55802. Telephone number: (218) 727–6692, ext. 378.

G. Curtis Jones, Jr.,

Eastern States Director.

[Serial No. I-08927]

Idaho; Partial Termination of Proposed Withdrawal and Reservation of Lands

Correction

In FR Doc. 82–24710 appearing on page 39722 in the issue for Thursday, September 9, 1982, third column, the legal description for Meadow Creek Streamside Zone and Recreation Area (unsurveyed) should read as follows:

T. 31 N., R. 9 E.
Sec. 11, NW¼, SW¼, SE¼;
Sec. 14, E½.

BILLING CODE 1505-01-M

Utah; Grazing Management Program for Ashley Creek Planning Area

AGENCY: Bureau of Land Management, Interior

ACTION: Notice of availability of final environmental impact statement.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969 and a 1975 Federal Court ruling, the Bureau of Land Management (BLM) has prepared a Final Environmental Impact Statement (EIS) for the Ashley Creek rangeland management program in Duchesne, Uintah, and a small portion of Carbon County.

The Final EIS is an abbreviated edition to be used with the Draft EIS; the EIS examines five alternative management programs: (1) Proposed Action—Multiple Use Recommendation, (2) Livestock Forage Recommendation, (3) No Action—Active Preference, (4) No Change—Average Use, and (5) Wildlife Habitat Recommendation. The objective of the alternatives is to provide land use management on the basis of multiple use long-term sustained yield of the natural resources on 527,974 acres of public land.

The alternatives examine proposed levels of grazing use ranging from 20,684 to 39,306 animal unit (AUMs) for livestock and from 10,454 AUMs short-term use to 20,767 AUMs long-term use for big game. Varying levels of vegetation manipulation and management would accompany the proposed levels of forage use.

Copies of the Final EIS are available from the Vernal District BLM Office at 170 South 500 East, Vernal, Utah 84078, or the Richfield District BLM Office at 150 East 900 North, Richfield, Utah 84701. Public reading copies of the Final EIS will be available for review at the following locations:

Office of Public Affairs, Bureau of Land Management, Interior Building, 18th and C Street NW., Washington, D.C.
Utah State Office, Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah

Decisions on the grazing management program will not be made until at least 30 days after the Final EIS is published. Written comments on the Final EIS may be submitted to be considered in the decision-making process during that 30-day period to the Vernal District Manager at the above-mentioned address by November 1, 1982.

Dated: September 1, 1982.

Roland G. Robison,

State Director.

BILLING CODE 4310-84-M

Bureau of Reclamation

Colorado River Basin Salinity Control Advisory Council; Public Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463)), announcement is made of a meeting of the Colorado River Basin Salinity Control Advisory Council at 1 p.m. on October 19, 1982, at the Hotel Bahia, 998 West Mission Bay Drive, San Diego, California 92109.

Purpose of Meeting

Council members will be briefed on the status of salinity control activities and receive input for drafting the Council's annual report.

Proposed Agenda

The Bureau of Reclamation, Soil Conservation Service, Bureau of Land Managment, and Environmental Protection Agency will each present a progress report and schedule of activities on salinity control in the Colorado River Basin. The Council will discuss Colorado River Basin Salinity Control activities and the content of its annual report.

Public Participation

The meeting of the Advisory Council is open to the public.

Any member of the public may file a written statement with the Council before, during, or after the meeting in person or by mail. To the extent that time permits, the Council chairman may allow public presentation of oral statements at the meeting.

All communications regarding this meeting, including requests for time to make statements, should be addressed to Mr. Fred T. Krauss, Acting Chief, Colorado River Water Quality Office, Bureau of Reclamation, Engineering and Research Center, P.O. Box 25007, Denver, Colorado 80225.

Dated: September 20, 1982.

Jed D. Christensen,

Acting Commissioner of Reclamation.

BILLING CODE 4310-09-M

Fish and Wildlife Service

Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora; Fourth Regular Meeting; Correction

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; correction.

SUMMARY: This document corrects a notice publishing the time, place, and provisional agenda for the fourth regular meeting of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora that appeared at pages 34043 through 34048 in the **Federal Register** of Thursday, August 5, 1982, (47 FR 34043). The action is necessary to correct errors made in the original document which omitted certain material.

DATES: The Service will consider information and comments concerning the provisional agenda received by October 31, 1982.

ADDRESSES: Information and Comments should be sent to the Director, U.S. Fish and Wildlife Service, Federal Wildlife Permit Office, Washington, D.C. 20240. Information and comments are open to public inspection from 8:00 a.m. to 4:15 p.m. weekdays, except holidays, at the Federal Wildlife Permit Office, located at 1000 North Glebe Road, Room 620, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Richard M. Parsons, Chief, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone 703/235–2418.

The following corrections are made in FR Doc. 82–21047 which appears at pages 34043 through 34048 in the issue of August 5, 1982.

1. On page 34045 at the bottom of the second column, renumber paragraph 6 as paragraph 7, and insert immediately before paragraph 7 the following paragraph:

6. Trade in African elephant ivory—A draft TEC resolution proposes that all raw and worked ivory weighing 2.2 pounds or less, with the exception of whole tusks, be considered not readily recognizable (hence not controlled by CITES).

2. On page 34045 in the third column, at the end of item 8, add the following paragraph to item 8:

A draft TEC resolution proposes that confiscated Appendix II specimens be disposed of in a manner benefitting enforcement and that steps be taken to avoid the "person responsible" receiving financial or other gain from the disposal; that in the case of live specimens, the "guilty importer and/or airline" meet the costs of confiscation, custody, and return (if appropriate); and that if return costs are not so met, financial assistance from nongovernmental organizations be sought.

Dated: September 17, 1982.

F. Eugene Hester,

Acting Director, Fish and Wildlife Service.

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: Notice is hereby give that Texoma Production Company has submitted a Development and Production Plan describing the activities it proposes to conduct on Leases OCS–G 2950 and 2951, Blocks 148 and 151, Main Pass Area, offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Minerals Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m. 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in a revised Section 250.34 of Title 30 of the Code of Federal Regulations.

Dated: September 10, 1982.

John L. Rankin,

Acting Minerals Manager Gulf of Mexico OCS Region.

Office of Surface Mining Reclamation and Enforcement

Abandoned Mine Lands Reclamation Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Notice of availability of findings of no significant impact (FONSI) addressing environmental assessments (EAs) for development of three abandoned mine land projects under the State of Pennsylvania Reclamation Plan.

SUMMARY: OSM has prepard EAs on projects submitted in the Federal Grant Application from the State of Pennsylvania to the Office of Surface Mining.

A FONSI has been made on the three reclamation projects indicated below and included in the grant application developed under Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), 30 U.S.C. 1231–1234.

ADDRESS: Copies of the EAs and FONSI are available for inspection or may be obtained at the following location between the hours of 8:00 a.m. and 4:00 p.m.: Office of Surface Mining Reclamation and Enforcement, Pennsylvania State Office, 100 Chestnut Street, Suite 300, Harrisburg, Pennsylvania 17101.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Biggi, State Director, Office of Surface Mining, Telephone: (717) 782–4036.

Reclamation projects included in FONSI, location and description:

1. Plymouth Borough—West,
   Plymouth Borough, Luzerne County,
   Backfill an abandoned underground coal mine.
2. Baldwin Borough,
   Baldwin Borough, Allegheny County,
   Perform a number of core drillings to examine the subsurface strata of an abandoned coal mine to determine the extent of the underground workings.
3. Carbondale—Phase I,
   City of Carbondale, Lackawanna County,
   Backfill an abandoned underground coal mine.

Dated: September 21, 1982.

William B. Schmidt,

Director, Office of Surface Mining.

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 387 (Sub-273)]

Atchison, Topeka and Santa Fe Railway Co.; Exemption for Contract Tariff ICC–ATSF–C–0122 (Grain)

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: A provisional exempton is granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the above-noted contract tariff may become effective on one day's notice. This exemption may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278).

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in this instance to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption request meets the requirements of 49 U.S.C. 10505(a) and is granted subject to the following conditions:

This grant neither shall be construed to mean that the Commission has approved the contract for purposes of 49 U.S.C. 10713(e) nor that the Commission is deprived of jurisdiction to institute a proceeding on its

own initiative or on complaint, to review this contract and to determine its lawfulness.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

ACTION: Notice of provisional exemption.

SUMMARY: A provisional exemption is granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the above-noted contract tariffs may become effective on one day's notice. This exemption may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway (202) 275-7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in this instance to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption request meets the requirements of 49 U.S.C. 10505(a) and is granted subject to the following conditions:

This grant neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) nor that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine its lawfulness.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10505)

Decided: September 20, 1982.

By the Commission, Review Board No. 1, Members Parker, Chandler and Fortier (Board Member Parker not participating).

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

INTERSTATE COMMERCE COMMISSION

Motor Carrier; Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register.** One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–203

The following applications were filed in region I: Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

Correction

In FR Doc. 82–26988, appearing at page 33803 in the issue of Wednesday, August 4, 1982, the words "points in Dallas and Tarrant Counties, TX, and extending to" should be inserted between the fifth and sixth lines of the second column on page 33804. (MC 15681, Sub-1)

BILLING CODE 1505-01-M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY, AGENCY FOR INTERNATIONAL DEVELOPMENT

[Amdt. No. 1]

Bureau for Private Enterprise Function and Authorities; Delegation of Authority

Delegation of Authority 142 is hereby amended as follows:

A new Section is inserted as follows:

Section 6. There is hereby delegated to the Assistant Administrator for Private Enterprise the following additional authorities for projects within the Private Enterprise Bureau's area of exclusive program responsibility:

Such authority as has been heretofore or will hereafter be delegated to any Assistant Administrator to execute and implement loan agreements and amendments thereto and otherwise to implement loan projects.

The authority delegated in this Section shall be exercised in consultation with the Office of the General Counsel and with such other Offices and Bureaus as the Assistant Administrator for Private Enterprise may deem appropriate. Such authority shall be exercised in accordance with applicable regulations, policies and procedures now or hereafter established or modified and promulgated within AID.

The authority delegated in this Section is in addition to any other authorities heretofore delegated to the Assistant Administrator for Private Enterprise. The authority herein delegated includes, but is not limited to, authorities delegated to Assistant Administrators in Delegations of Authority 5, 40, and 133.

Sections 6, 7 and 8 of Delegation of Authority 142 are renumbered accordingly.

This amendment to Delegation of Authority 142 shall be effective immediately.

Except as expressly modified hereby, Delegation of Authority No. 142 remains in full force and effect.

Dated: September 13, 1982.

M. Peter McPherson,

Administrator.

Agency Forms Under Review

September 22, 1982.

OMB has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. The list has all the entries grouped into new forms, extensions, or revisions. Each entry contains the following information:

(1) The name and telephone number of the Agency Clearance Officer (from whom a copy of the form and supporting documents is available); (2) The office of the agency issuing this form; (3) The title of the form; (4) The agency form number, if applicable; (5) How often the form must be filled out; (6) Who will be required or asked to report; (7) An estimate of the number of responses; (8) An estimate of the total number of hours needed to fill out the form; (9) An indication of whether Section 3504(H) of Pub. L. 96-511 applies; (10) The name and telephone number of the person or office responsible for OMB review.

Copies of the proposed forms and supporting documents may be obtained from the Agency Clearance Officer whose name and telephone number appear under the agency name. Comments and questions about the items on this list should be directed to the reviewer listed at the end of each entry and to the Agency Clearance Officer. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer and the Agency Clearance Officer of your intent as early as possible.

BILLING CODE 4410-10-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[82-55]

Agency Report Forms Under OMB Review

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of agency report forms under OMB review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed information collection requests to OMB for review and notifying the public that the agency has made the submission. The proposed forms under review are listed below.

Copies of the proposed forms, the request for clearance (S.F. 83), supporting statement, instructions, transmittal letters, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Comments on the items listed should be submitted to the Agency Clearance Officer and the OMB Reviewer.

DATE: Comments must be received in writing by (insert 10 days from the date of publication in the **Federal Register**). If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB reviewer and the Agency Clearance Officer of your intent as early as possible.

ADDRESS: Christine Cabell, NASA Agency Clearance Officer, Code NSM-23, NASA Headquarters, Washington, D.C. 20546. Edward Clarke, Office of Information and Regulatory Affairs, OMB, Room 3208, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Christine Cabell, NASA Agency Clearance Officer, (202) 755-3219.

Reports

Title: Subcontracting Report for Individual Contracts
Type of Request: New
Frequency of Report: Semiannually
Type of Respondent: NASA Contractors
Annual Responses: 180
Annual Reporting Hours: 90
Federal Cost: $500.00
Number of Forms: One

Abstract: This report is used to collect information on subcontract commitments by NASA prime contractors and subcontractors which are required to subcontract with small and disadvantaged business concerns in accordance with the subcontract plans required by the Small Business Act of 1958 as amended by Pub. L. 95–507.

Title: Summary Subcontract Report
Type of Request: New
Frequency of Report: Quarterly
Type of Respondent: NASA Contractors
Annual Responses: 360
Annual Reporting Hours: 180
Federal Cost: $400.00
Number of Forms: one

Abstract: This report is used to collect information on subcontract commitments by NASA prime contractors and subcontractors which are required to subcontract with small and disadvantaged business concerns in accordance with the subcontract plans required by the Small Business Act of 1958 as amended by Pub. L. 95–507.

Title: Application for Patent License
Type of Request: New
Frequency of Report: On occasion
Type of Respondent: Companies in the Business of Manufacturing Products
Annual Responses: 184
Federal Cost: $170,000.00
Number of Forms: None, respondent answers questions in section 1245.207 of 14 CFR Part 1245

Abstract: Pursuant to the NASA Patent License Regulations, applicants for patent licenses must submit specific information in support of the application for license. This regulation specifies the information required to be submitted.

Title: Space Transportation System Request for Flight Assignment
Type of Request: New
Frequency of Report: Applicants complete the form once unless requirements change. Any change in requirements would result in an updated form
Type of Respondent: Satellite Telecommunication and Scientific Firms
Annual Report Hours: 10
Federal Cost: $1,000
Number of Forms: One

Abstract-Needs/Uses: The STS form 100 details the user's Shuttle launch request. This information includes: Payload title, principal contact, requested launch date, payload weight and length, and orbital requirement.

Dated: September 20, 1982.

Walter B. Olstad,

Associate Administrator for Management.

BILLING CODE 750-01-M

NUCLEAR REGULATORY COMMISSION

[Dockets Nos. 50-289 and 50-320]

GPU Nuclear Corp., et al.; Three Mile Island Nuclear Station, Units Nos. 1 and 2; Exemption

I

GPU Nuclear Corporation (the licensee) and three co-owners are the holders of Facility Operating Licenses Nos. DPR–50 and DPR–73 which authorize the operation of the Three Mile Island Nuclear Station, Units Nos. 1 and 2 (TMI–1 and 2). These licenses provide, among other things, that they are subject to all rules, regulations and Orders of the Nuclear Regulatory Commission (the Commission). The facility comprises two pressurized water reactors at the licensee's site in Dauphin County, Pennsylvania.

II

10 CFR 50.54(q) of the Commission's regulations requires a licensee authorized to operate a nuclear power plant to follow and maintain in effect emergency plans which meet the standards of 10 CFR 50.47(b) and the requirements of Appendix E to 10 CFR Part 50. Section IV.F.1 of Appendix E requires each licensee annually to conduct an emergency preparedness exercise with full participation by the State and local county governments unless the State and all local county governments in the plume exposure pathway Emergency Planning Zone (EPZ) for the licensee's facility have otherwise participated in a full-scale exercise during the annual period (with such participation occurring in conjunction with a full-scale exercise at another nuclear power plant). In this latter case, the licensee is required to conduct an annual exercise with the participation of State and local governments consistent with the provisions of Section IV.F.3 of Appendix E for small scale exercises.

By letter dated July 27, 1982, GPU Nuclear requested an exemption from certain annual exercise requirements of Section IV.F.1.a of Appendix E. Specifically, GPU Nuclear's annual exercise conducted on August 11, 1982 did not include a level of participation of local governments within the plume exposure pathway EPZ for TMI entirely consistent with the requirements of Section IV.F.1.a for full-scale exercises. Rather, the level of participation by the five counties within the plume exposure pathway EPZ for TMI along with the Commonwealth of Pennsylvania was consistent with the provisions of Section IV.F.3 of Appendix E for small-scale exercises. Two of the five counties for TMI, York and Lancaster, and the Commonwealth of Pennsylvania had previously participated on a full-scale basis in the recent annual exercise for the Peach Bottom facility in June 1982. However, the other three counties for TMI, Dauphin, Lebanon and Cumberland, have not participated in a full-scale exercise in 1982 and will not have the opportunity to do so during the balance of the year.

We have reviewed the participation of the Commonwealth of Pennsylvania and the TMI counties in previous exercises within the last 15 months. These exercises were the full-scale exercises conducted at TMI in June 1981, involving the full participation of the Commonwealth and Dauphin, Cumberland, Lancaster and Lebanon Counties, the TMI emergency exercise conducted in September 1981 involving the Commonwealth and York County, the TMI emergency communications exercise in October 1981, involving the Commonwealth and Dauphin, Cumberland, Lancaster, Lebanon and York Counties, and the recent full-scale exercise for the Peach Bottom facility in June 1982 involving the full participation of the Commonwealth and York and Lancaster Counties. This review has shown that these several exercises conducted within the last 15 months have provided suitable tests for the adequacy of offsite emergency preparedness for TMI, and have provided ample opportunity for training and familiarizing emergency response personnel, including those in Dauphin, Lebanon and Cumberland Counties, in their emergency response duties. In addition, the emergency preparedness exercise, conducted on August 11, 1982, involving the Commonwealth and the five counties for TMI served to further test the adequacy of communication links and the understanding of the participating agencies of their emergency response rules. From the scale and frequency of exercises conducted within the last 15 months involving the counties within the plume

exposure pathway EPZ for TMI, we find that the less than full-scale participation of Dauphin, Cumberland and Lebanon Counties in the current annual exercise for TMI will not adversely affect the overall state of emergency preparedness at TMI. For the above reasons, we conclude that the licensee's request for exemption should be granted.

III

Accordingly, the Commission has determined that an exemption in accordance with 10 CFR 50.12 is authorized by law, will not endanger life or property or the common defense and security and is otherwise in the public interest.

The requested exemption from the exercise requirements of 10 CFR Part 50, Appendix E, Section IV.F.1.a involving Dauphin, Lebanon, and Cumberland counties' full-scale participation in the licensee's current annual exercise is hereby granted.

The Commission has determined that this exemption does not authorize a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. Having made this determination, we have further concluded that the exemption involves an action which is insignificant from the standpoint of environmental impact and, pursuant to 10 CFR 51.5(d)(4), that an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 14th day of September 1982.

For the Nuclear Regulatory Commission.

Darrell G. Eisenbut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 82-26508 Filed 9-24-82; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-416]

Mississippi Power and Light Co. Middle South Energy, Inc. and South Mississippi Electric Power Association; Issuance of Amendment of Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 3 to Facility Operating License No. NPF-13, issued to Mississippi Power and Light Company, Middle South Energy, Inc., and South Mississippi Electric Power Association (the licensees), for Grand Gulf Nuclear Station, Unit No. 1 (the facility) located in Claiborne County, Mississippi. This amendment grants additional one time Technical Specification exceptions for Phase I operation, and changes to the Technical Specifications. The changes to the Technical Specifications relate to Specifications Table 3.6.4-1, Valve E12-F021B Stroke Time; 4.5.1.C.2.a, "Keep Filled" Pressure Alarm Surveillance; Table 3.3.8-2, Containment Spray Initiation Time; and Table 3.8.4.1-1, Molded Case Circuit Breaker Response Time. The amendment is effective as of the date of issuance.

The applications for the amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendement will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the two applications for the amendments dated September 13, 1982; (2) Amendment No. 3 to License NPF-13 dated September 20, 1982; and (3) the Commission's evaluation dated September 16, 1982. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Hinds Jr. College, George M. McLendon Library, Raymond, Mississippi 39154. A copy of items (1), (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 20th day of September, 1982.

For the Nuclear Regulatory Commission.

A. Schwencer,

Chief, Licensing Branch No. 2, Division of Licensing.

26509

[FR Doc. 82-26509 Filed 9-24-82; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-298]

Nebraska Public Power District (Cooper Nuclear Station); Modification of Order

January 13, 1981.

I

The Nebraska Public Power District (the licensee) is the holder of Facility Operating License No. DPR-46 which authorizes the licensee to operate the Cooper Nuclear Station at power levels not in excess of 2381 megawatts thermal (rated power). The facility is a boiling water reactor located at the licensee's site in Nemaha County, Nebraska.

II

On January 13, 1981 the Commission issued an Order modifying the license requiring: (1) The licensee to promptly assess the suppression pool hydrodynamic loads in accordance with NEDO-24583-1 and the Acceptance Criteria contained in Appendix A to NUREG-0661; and (2) design and install any plant modifications needed to assure that the facility conforms to the Acceptance Criteria contained in Appendix A to NUREG-0661. The Order, published in the Federal Register on January 28, 1981 (46 FR 9260) required installation of any plant modifications needed to provide compliance with the Acceptance Criteria in Appendix A to NUREG-0661 be completed not later than September 30, 1982, or, if the plant is shutdown on the date, before the resumption of power thereafter.

III

On October 31, 1979, the staff issued an initial version of its acceptance criteria to the affected licensees. These criteria were subsequently revised in February 1980 to reflect acceptable alternative assessment techniques which would enhance the implementation of this proram. Throughout the development of these acceptance criteria, the staff has worked closely with the Mark I Owners Group in order to encourage plant-unique assessments and modifications to be undertaken.

Since the development of these acceptance criteria significant progress has been made and it was the intent of the licensee to meet the date specified in the January 13, 1981 Order. However, as identified in an August 23, 1982 letter, unforeseen difficulties and delays have been encountered related to the following: (1) Installation of piping hangers for the torus attached piping; (2) delivery of specialized cabling for the torus temperature monitoring system;

and (3) installation of relief valve logic system changes (Low-Low Setpoint Logic) that have necessitated revision of the Order date.

All of the major modifications, which are those associated with the torus, vent system, internal structures and safety relief valve piping have been completed except for the installation of the relief valve logic system changes. All of the torus attached piping modifications have also been completed, except for completion of the installation of the remaining 40% of the external pipe hangers. It is estimated that over 95% of the total program effort has already been completed.

The Commission believes that with the modifications already completed most of the intended margins of safety of the containment systems have been achieved. In consideration of the range of modification completion dates presented in SECY–81–678 that was approved by the Commission, the Commission has concluded that the licensee's proposed completion schedule is both responsive and practicable.

The Commission has therefore determined to extend the previously imposed completion dates for needed plant modifications. This extension continues in effect the exemption to General Design Criteria 50 of Appendix A to 10 CFR Part 50 granted on January 13, 1981.

The Commission has determined that good cause exists for the extension of that exemption, that such extension is authorized by law, will not endanger life or property or the common defense and security, and is in the public interest. The Commission has determined that the granting of this extension will not result in any significant environmental impact and that, pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environment impact appraisal need not be prepared in connection with this action.

IV

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, including Sections 103 and 161i, and the Commission's rules and regulations in 10 CFR Parts 2 and 50, it is ordered that the completion date specified in Section V of the January 13, 1981, "Order for Modification of License and Grant of Extension of Exemption," is hereby changed to read as follows: "Prior to the start of Cycle 9 at the completion of your 1983 refueling outage." The Order of January 13, 1982, except as modified herein, remains in effect in accordance with its terms.

V

The licensee may request a hearing on this Order within 30 days of the date of publication of this Order in the **Federal Register**. A request for hearing shall be submitted to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the request shall also be sent to the Secretary of the Commission and the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an order designating the time and place of any such hearing. If a hearing is held, the issue to be considered at such a hearing shall be whether the completion date specified in Section V of the January 13, 1981, "Order for Modification of License and Grant Extension of exemption," should be changed to "Prior to the Start of Cycle 9 at the completion of your 1983 refueling outage."

This order shall become effective upon expiration of the period within which a hearing may be requested or, if a hearing is requested, on the date specified in an order issued following further proceedings on this Order.

Dated at Bethesda, Maryland this 15th day of September 1982.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 82–26510 Filed 9–24–82; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–272 and 50–311]

Public Service Electric and Gas Co. (Salem Nuclear Generating Station, Units Nos. 1 and 2); Exemption

I

Public Service Electric and Gas Company (the licensee) and three other co-owners are the holders of Facility Operating Licenses Nos. DPR–70 and DPR–75 which authorize operation of the Salem Nuclear Generating Station Units 1 and 2 (Salem or the facilities). These licenses provide, among other things, that they are subject to all rules, regulations and Orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facilities are pressurized water reactors located at the licensee's site in Salem County, New Jersey.

II

Section III.G.2a of Appendix R to 10 CFR 50 requires that structural steel forming a part of or supporting a fire barrier with a 3-hour rating shall be protected to provide fire resistance equivalent to that requried of the barrier.

The licensee indicated in its March 19, 1981 letter that the walls forming barriers between redundant equipment and/or cables incorporating fire dampers are fire rated for three hours. The fire doors and/or fire dampers that are used for protection of these openings are fire rated for 1½ hours. The licensee has stated that an exemption for the doors and/or dampers is justified since the fire hazard analysis performed for Salem calculated a potential fire duration of less than one hour in all such areas.

Based on our evaluation, we conclude that the fire loading in the vicinity of openings in the affected area is sufficiently low so that protection by the 1½ hour fire door/dampers in the walls is acceptable. Therefore, the licensee's request to be exempted from the requirements to provide a three hour barrier should be granted.

III

Section III.G.3 of Appendix R to 10 CFR Part 50 requires that a fixed fire suppression system be installed in an area, room or zone under consideration for alternative safe shutdown modifications. In the case of Salem, under this provision a fixed fire suppression system would be required in the control room.

The licensee indicated in its March 19, 1981 letter, that the fire protection features currently installed in the control room provide adequate fire fighting capability in the control room and constitute an adequate fixed fire suppression system for the area. However, inasmuch as the term "fixed suppression" has been used to connote sprinklers or gas suppression systems, the licensee has requested an exemption from the requirements of III.G.3 to provide a fixed suppression system.

The licensee's exemption request is based on the following:

—An alternate shutdown system has been provided for the control room. This alternate shutdown system provides remote control capabilities for those systems needed to carry out a reactor shutdown function, maintain hot shutdown, proceed to and maintain cold shutdown, from outside the main control room.

—A fire detection system has been installed in the control room.

—Portable fire extinguishers have been installed inside the control room.

The modifications which the licensee's exemption request is based on are required by Appendix R to 10 CFR Part 50. Therefore, the above modifications alone do not justify an exemption from the requirement to install a fixed fire suppression system in areas where redundant divisions are located. However, the control room is an unique area of the plant that is requried to be continually occupied by the operators. In the event of a fire, manual fire suppression would be effective and prompt. Because the operators provide a continuous fire watch in the control room, a fixed suppression system is not necessary to achieve adequate fire protection in the control room. This is similar to the concept reflected in the staff's acceptance, on a short-term basis, of a continuous fire watch as an alternative to fixed suppression systems when such systems become unavailable per 3.7.10.2 of the Standard Technical Specifications.

Based on our evaluation, we conclude that the licensee's fire protection features for the control room meet the objectives of Section III.G, "Fire Protection of Safe Shutdown Capability," of Appendix R to 10 CFR Part 50, and, therefore, the licensee's request to be exempted from the requirement to provide a fixed fire suppression system in the control room should be granted.

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, these exemptions are authorized by law and will not endanger life or property or the common defense and security, are otherwise in the public interest, and are hereby granted.

The Commission has determined that the granting of this Exemption will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

This Exemption is effective upon issuance.

Dated at Bethesda, Maryland this 16th day of September, 1982.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing.

[FR Doc. 82-26511 Filed 9-24-82; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-312]

Sacramento Municipal Utility District; Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 39 to Facility Operating License No. DPR-54, issued to Sacramento Municipal Utility District, which revised Technical Specifications (TSs) for operation of the Rancho Seco Nuclear Generating Station (the facility) located in Sacramento County, California. This amendment is effective as of the date of issuance.

The amendment modifies surveillance requirements and limiting conditions for operation for the engineered safety feature air filter systems.

The application for the amendment complies with the standrds and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commision's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the licensee's application dated May 21, 1975, as revised November 28, 1975, February 9, 1977 and June 21, 1979, (2) Amendment No. 39 to License No. DPR-54, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Business and Municipal department, Sacramento City-County Library, 828 I Street, Sacramento, California. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, , Washington D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 13th day of September 1982.

For The Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch No. 4, Division of Licensing.

[FR Doc. 82-26512 Filed 9-24-82; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-361]

Southern California Edison Co., et al.; Issuance of Amendment; Facility Operating License No. NPF-10

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 8 to Facility Operating License No. NPF-10, issued to Southern California Edison Company, San Diego Gas and Electric Company, The City of Riverside, California and The City of Anaheim, California (licensees) for the San Onofre Nuclear Generating Station, Unit 2 (the facility) located in San Diego County, California. This amendment is effective as of the date of issuance.

Amendment No. 8 changes the date for operability of the post-accident sampling system from "prior to exceeding five (5) percent power" to "January 1, 1983." Amendment 8 also changes the associated Technical Specifications.

Issuance of this amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) Southern California Edison Company's letters dated September 11, 14, and 15, 1982, (2) Amendment No. 8 to Facility Operating License No. NPF-10, and (3) the Commission's related Safety Evaluation.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and the San Clemente Library, 242 Avenida Del Mar, San

Clemente, California 02672. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 17th day of September, 1982.

For the Nuclear Regulatory Commission.

Janis Kerrigan,

Acting Chief, Licensing Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 30-19101 (50-327 and 328)]

Tennessee Valley Authority; Issuance of Materials License, Safety Evaluation Report, Environmental Impact Appraisal, and Negative Declaration for the Onsite Storage of Low-Level Radioactive Waste at the Sequoyah Nuclear Plant

The U.S. Nuclear Regulatory Commission (the Commission) has issued Materials License No. 41-08165-14 to the Tennessee Valley Authority (TVA or licensee) authorizing the receipt, possession, storage and transfer of low-level radioactive waste (LLRW) at its onsite LLRW Storage Facility at the Sequoyah Nuclear Plant (SNP) located in Hamilton County, near Chattanooga, Tennessee. The license authorizes the storage of up to five years of LLRW generated from the operation of the SNP. The license is effective as of the date of issuance and the term of the license is five years.

Application for storage of LLRW at the SNP was made by TVA as an amendment to the facility operating license No. DPR-77. Notice of receipt of the application and offering an opportunity for public participation in connection with the action was published in the **Federal Register** on March 5, 1981 (46 FR 15390). For administrative purposes the application has been reviewed and the license issued pursuant to 10 CFR Part 30 of the Commission's regulations.

The application for amendment to the facility operating license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's Regulations in 10 CFR Chapter 1, which are set forth in the license.

The Commission's Office of Nuclear Materials Safety and Safeguards, Division of Fuel Cycle and Material Safety, has completed its safety and environmental reviews in support of the issuance of Materials License No. 41-08165-14. Two staff documents, the Safety Evaluation Report and the Environmental Impact Appraisal of Low-Level Radioactive Waste Storage at Tennessee Valley Authority Sequoyah Nuclear Plant, have been issued.

The environmental appraisal, "Environmental Impact Appraisal of Low-Level Radioactive Waste Storage at Tennessee Valley Authority Sequoyah Nuclear Plant," was issued in accordance with 10 CFR Part 51. The Environmental Impact Appraisal concluded that the issuance of the proposed license will not significantly affect the quality of the human environment and that there will be no significant environmental impact from the issuance of the proposed license. Based on this appraisal, the Commission therefore concludes that this Negative Declaration is appropriate and an environmental impact statement for this particular license is not warranted.

The Commission's Safety Evaluation Report, dated September 1982, and Environmental Impact Appraisal, dated September 1982, are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the local Public Document Room for TVA's Sequoyah Nuclear Plant at the Chattanooga-Hamilton County Public Bicentennial Library, 1001 Broad Street, Chattanooga, Tennessee. A copy of these reports may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Fuel Cycle and Material Safety.

Dated at Silver Spring, Maryland this 17th day of September 1982.

For the Nuclear Regulatory Commission.

Leland C. Rouse,

Chief, Advanced Fuel and Spent Fuel Licensing Branch, Division of Fuel Cycle and Material Safety, NMSS.

BILLING CODE 7590-01-M

[Docket No. 50-271]

Vermont Yankee Nuclear Power Corp.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 72 to Facility Operating License No. DPR-28, issued to Vermont Yankee Nuclear Power Corporation which revised Technical Specifications for operation of the Vermont Yankee Nuclear Power Station (the facility) located near Vernon, Vermont. The amendment is effective as of its date of issuance.

The amendment changes the Technical Specifications to incorporate revised core thermal-hydraulic Limiting Conditions of Operation during the present fuel cycle (Cycle 9).

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.d(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated August 19, 1982 as supplemented September 10, 1982; (2) Amendment No. 72 to License No. DPR-28, and; (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Brooks Memorial Library, 224 Main Street, Brattleboro, Vermont 05301. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 16th day of September 1982.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

Chief, Operating Reactors Branch No. 2, Division of Licensing.

BILLING CODE 7590-01-M

OFFICE OF THE FEDERAL INSPECTOR FOR THE ALASKA NATURAL GAS TRANSPORTATION SYSTEM

Certificate of Completion

AGENCY: Office of the Federal Inspector for the Alaska Natural Gas Transportation System.

ACTION: Notice of the Federal Inspector's Certification of Completion

for Phase I of the Eastern Leg of the Alaska Natural Gas Transportation System.

Take notice that on September 20, 1982, The Federal Inspector certified that Phase I of the Eastern Leg of the Alaska Natural Gas Transportation System is completed so as to be capable of performing at the certificated throughput of 800 million cubic feet of natural gas per day. This Federal Inspector action was taken pursuant to Order Nos. 31 and 31–B of the Federal Energy Regulatory Commission, which provide that Northern Border Pipeline Company, the owner of the Phase I segment in the U.S., may commence billing under its transportation tariff upon this certification of completion.

This certification of completion is a final agency action under Section 202(a) of Reorganization Plan No. 1 of 1979, 44 FR 33663, and Section 10 of the Alaska Natural Gas Transportation Act, 15 U.S.C. 719h. Copies of the letter containing the certification are available by writing or telephoning: Mr. Richard Berman, Director, Audit and Cost Analysis, Office of the Federal Inspector, ANGTS, Room 2317, Post Office Building, 1200 Pennsylvania Avenue, N.W., Washington, D.C. 20044; (202) 275–1153.

Dated: September 23, 1982.

John T. Rhett,

Federal Inspector.

BILLING CODE 6119–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 19059, File No. SR–OCC–82–12]

Amendment To Proposed Rule Change by the Options Clearing Corporation

September 17, 1982.

The Options Clearing Corporation ("OCC") submitted Amendment No. One to a proposed rule change (SR–OCC–82–12) on September 13, 1982, pursuant to Rule 19b–4 under the Securities Exchange Act of 1934. The Amendment makes several changes to OCC's proposed foreign currency options rules published in Securities Exchange Act Release No. 18886 (July 14, 1982) and the **Federal Register** (47 FR 33349, August 2, 1982).

The Amendment to the proposed rule change would: (i) Permit OCC to release on the date settlement is deemed to have been made margin deposited in respect of foreign currency options; (ii) require receiving clearing member to buy-in foreign currency within two foreign business days after receiving notice from OCC of a failure to deliver, (iii) assess any party failing to deliver interest penalties based upon interest rates in the country of origin of the foreign currency; (iv) reduce the minimum margin amount required to be deposited in respect of foreign currency options to reflect more accurately the volatility of foreign currency options, and (v) alter the exercise settlement procedures to provide for delivery of foreign currency through the facilities of OCC rather than the member-to-member settlement procedure originally proposed.

Specifically, with respect to settlement of exercised options contracts under the Amendment, OCC will establish and maintain a correspondent bank in the country of origin of each foreign currency that is the subject of OCC options. After the receiving clearing member pays the aggregate exercise price to OCC, the delivering clearing member will be required to direct its correspondent bank to deliver foreign currency to OCC's correspondent bank. OCC will then direct its correspondent bank to redeliver the foreign currency to the account of receiving clearing member at the receiving member's correspondent bank.

In order to assist the Commission in determining whether to approve the proposed rule change or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within twenty-one days from the date of publication in the **Federal Register**. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549. Reference should be made to File No. SR–OCC–82–12.

Copies of the submission, with accompanying exhibits, and of all written comments will be available for public inspection at the Securities and Exchange Commission's Public Reference Room, 450 5th Street, N.W., Washington, D.C. Copies of the filing will also be available at the principal office of the above-mentioned self/regulatory organization.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.
